Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

A: AUSTRIA

Siglum	Library
A	Admont, Benediktinerstift, Archiv und Bibliothek
DO	Dorfbeuren, Pfarramt
Ed	Eisenstadt, Domarchiv, Musikarchiv

A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

Abbreviations in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

Alphabetization of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

Bibliographies are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

Cross-references are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

Signatures where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

Work-lists are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

Contents

F

[continued]

Florence (It. Firenze). City in Italy. It stands at the natural boundary between the north and the south of the country and owes its special cultural prestige to the fact that its dialect was raised to the dignity of national language by Dante, Petrarch and Boccaccio; in different ways, these authors established unsurpassed models of artistic expression in which the essential characteristics of Italian life and temperament were perfectly mirrored. The city has traditionally been regarded as a national cultural centre, a place where artists and intellectuals from all over the world found their natural home. Economic prosperity, realized mainly through craftsmanship and international commerce, helped give support to an exalted level of achievement in every aspect of culture, from philosophy to architecture, from science to poetry, from visual arts to humanistic scholarship; and music is second to none of them.

1. To 1600: (i) Sacred music (ii) Secular music. 2. 1600–1815. 3. After 1815.

1. To 1600.

(i) Sacred music. Documentary evidence of Florentine musical history is slender before 1200, though recent research on the cathedral's surviving chant manuscripts points to a rich repertory reflecting both local and Roman traditions. Developments after 1310 saw the inclusion in its liturgy of apparently unique chants dedicated to city-patron saints Reparata and Zanobi as well as to Mary Magdalen and Nicholas of Bari whose relics were kept there. Ecclesiastical singers are mentioned in Florence from 941; Rozo, *cantorum praepositus*, was active at the cathedral from 1026 to 1057 and was succeeded by his son Theodaldus, called *cantor dulcissimus* in a document of 1094. In the 12th century chant was performed throughout the Florentine diocese, and according to the Vallombrosan chronicles each convent had its own singing school. The quality of musical instruction was emphasized: in the 13th century novices at the Dominican church of S Maria Novella were taught from Guido's *Micrologus*, and certain of its friars became famous in the city for their beautiful voices. The performance of chant flourished in the city's major churches throughout the period.

Vocal polyphony was introduced in a few churches in the mid-13th century, but at the cathedral its performance was prohibited by Bishop Ardingo (1231–49) on the grounds that only chant was appropriate for services. His views apparently prevailed for many years, because vocal polyphony at the cathedral is not mentioned again until the mid-14th century; before then the choir generally chanted the Creed in alternation with the organ. But a vocal performance of Bartolo's two-voice Credo was so well received that polyphony gradually became accepted in services, first at the cathedral, then at other major convent churches such as Santa Trìnita, S Lorenzo, Santo Spirito and SS Annunziata, and generally during the 15th century. Very few Florentine sacred works survive from this period but the repertory presumably included other works by native composers and music from northern Italy and France.

The practice at the cathedral of employing two singers of polyphony, established by 1407, continued with few interruptions for almost 40 years. The singers included composers of polyphony such as Conradus of Pistoia, Nicola Zacharie, Ugolino of Orvieto and groups of foreign musicians including the itinerant *cantori tedeschi* (i.e. northerners) at SS Annunziata in 1410 and the singers of Pope Martin V's chapel at S Maria Novella in 1419–20. The recent discovery of the palimpsest (*I-Fsa* 2211) shows that music from the international repertory also found a receptive audience in Florence at this time. At the consecration of the cathedral dome in 1436, the singers of Pope Eugene IV (in Florence from 1434) sang two works especially commissioned from Du Fay, a monophonic sequence and a polyphonic motet, both beginning with the words *Nuper rosarum flores*. Eugene IV established a cathedral school which initially taught only chant, but included polyphony in the regular curriculum in the later 15th century.

In 1438 a chapel of four singers, including the composer Benotto di Giovanni, known as Benoit, was established at the cathedral and baptistery to sing Vespers at one church and masses at the other on Sundays and major feast days. Subsequently six singers were employed and also sang at SS Annunziata. The presence of these singers, hired from Ferrara and later employed in Rome and Ferrara, hints at the important role Florence played in the broad cultural exchange of musicians and repertories during the following decades. Many singers of this period were northerners, some of them recruited by Du Fay. In the early 1480s Lorenzo de' Medici instigated a major reorganization of the chapel and it became one of the best in Italy with 18 singers including Isaac, Agricola and Ghiselin. Florentine sacred music does not survive from this period either, but these men, particularly Isaac who lived in Florence for several years, probably composed many works for the local singers. Some of the same singers also served other

Florentine churches (e.g. S Lorenzo and Santo Spirito), which began to develop chapels; but this unprecedented musical activity was arrested by the rise of Savonarola and the expulsion of the Medici in 1494.

In the early 1500s independent chapels were re-established at the three principal churches; the Medici returned in 1511, and under Pisano, Verdelot and Rampollini the chapels slowly revived. In 1540, after another period of decline, Duke Cosimo de' Medici had the cathedral and baptistery chapels reorganized as a single group. For the next century, the singers (24, later 32) had a master nominated by the Medici, and sang masses and Vespers at the cathedral and baptistery on Sundays and feast days, as well as services at other churches. Francesco Corteccia, the first ducal *maestro di cappella*, composed extensively for the chapel, as did his successors, notably Luca Bati and Marco da Gagliano.

Public musical performances increased with the formation of *laudesi* in the late 13th century. These groups of laymen and women of all social classes met daily or weekly to venerate the Virgin Mary or another saint in processions, prayers, chants, hymns and *laude*. The earliest group was the Compagnia delle Laudi founded at S Maria Novella in 1244 by St Peter Martyr; at least a dozen such groups were active during the 15th century.

From their inception the principal companies offered instruction in singing to their members, all of whom participated at services. Later, paid singers and instrumentalists were also engaged (by 1312 at S Maria Novella). During the late 15th century and the 16th, some companies employed semi-professional groups of between five and 11 singers. It was also during this time that the practice of having boy singers of *laudi* accompanied by the organ became prevalent; the composers Bartolomeo degli Organi, Francesco de Layolle and Jacopo Peri began their careers in this way.

Manuscript collections in Florence and Cortona of monophonic *laude* dating from the late 13th century suggest the kind of music performed by the early companies. In the late 15th century and the 16th *laude* texts were either adapted to popular secular works or given new music. The principal Florentine sources for the texts and music of the later polyphonic *laudi* are the printed and manuscript collections of the 16th-century monk Serafino Razzi, which contain texts by such 15th-century poets as F. Belcari, L. Tornabuoni de' Medici and Lorenzo de' Medici, and in some cases their original melodies. Giovanni Animuccia, a Florentine who lived in Rome as a friend of Filippo Neri, published two *laudi* collections (1563 and 1570).

The *sacra rappresentazione* was also much cultivated between 1450 and 1525; several leading literary figures, including Belcari and Lorenzo de' Medici, contributed to the genre. The plays were performed by companies and confraternities in churches, private halls and palaces and sometimes outdoors. No music for them survives, but according to their rubrics chant, *laudi*, polyphonic secular songs, contrafacta and instrumental music (in one instance specifically a *moresca*) were incorporated.

(ii) Secular music. Secular vocal music flourished during the late Middle Ages: monophonic troubadour song, introduced to Florence during the 13th century, was subsequently much admired and emulated. Native composer-performers known from this period include Pietro Casella, who set one of Dante's canzoni, and Garzo dell'Ancisa (possibly a direct ancestor of Petrarch). Although none of these composers' works is known, some extant ballate by Gherardello, Donato da Cascia and Lorenzo testify to the continuing monophonic tradition (see Pirrotta, 1973).

The Florentine polyphonic secular works of the second half of the 14th century, by Giovanni da Cascia, Gherardello, Donato, Lorenzo, Landini, Paolo da Firenze and Andreas de Florentia, constitute one of the supreme achievements of Italian musical history. The chief forms cultivated were the madrigal, the caccia and particularly the ballata, of which some 140 by Landini alone survive. This repertory exists principally in four large early 15th-century manuscript collections and a number of fragments, whose contents were often arranged in a chronological order that suggests Florentine awareness of the historic importance of the repertory. The most famous of the collections, of Florentine provenance like many of the others, is named after the organist Antonio Squarcialupi, its earliest known owner.

In the history of Florentine polyphony Squarcialupi linked the achievements of the Trecento school (ended *c*1425) with the emergence of the new Florentine school at the close of the 15th century; he was one of the few native composers to gain renown during the unexplained decline of Italian written polyphony in the mid- and late 15th century (his works are not known to have survived). As far as 1460, perhaps following northern European models, he was also responsible for having the cathedral organ's range expanded with the addition of a few large pipes perhaps meant to be played from a pedal board. During this period Franco-Flemish musicians began their domination of Italian musical life which lasted well into the 16th century. Notwithstanding the vogue for northern polyphony, traditional modes of vocal improvisation retained great popularity in Florence throughout the 15th century. Singing to the *lira* or other instrument was practised by popular musicians such as Antonio di Guido in the city piazzas, by scholars such as the philosopher Marsilio Ficino in more private surroundings, and at the court of Lorenzo de' Medici, himself a considerable singer.

Chansons and instrumental pieces by the Franco-Flemish living in Florence, many extant only in Florentine manuscripts, were written expressly for patrons there. Some of these chansons make use of typically Italian stylistic elements and seem to have furnished models for the later development of the narrative type of Parisian chanson. Some of the northerners even composed to Italian texts, and two, Isaac and Agricola, contributed greatly to the polyphonic revival of the traditional Florentine Carnival songs. The presence of these musicians also encouraged the formation, in the late 15th century, of a new native school that cultivated such traditional Florentine forms as the ballata and Carnival songs, as well as the newer styles of northern motet and mass. Alessandro Coppini and Bartolomeo degli Organi and their successors Pisano, Francesco de Layolle, Corteccia, Rampollini and Verdelot (who was in Florence as early as 1521) all contributed to the early development of the 16th-century madrigal. Pietro Aaron, another Florentine of this generation, gained widespread fame with his lucid and informative theoretical writings; the most famous, *Toscanello in musica*, had at least six editions in the 16th century. His work indicates the traditional Florentine interest in musical theory, as does the presence in the city

during the 15th century of distinguished theorists (Ugolino of Orvieto, Hothby and Ramis de Pareia); it is significant that the city's libraries have a large collection of medieval and Renaissance treatises.

Arcadelt, the greatest master of the early madrigal, reputedly lived in Florence during the early 1530s; other composers such as Costanzo Festa, Cipriano de Rore and Francesco de Layolle, though not resident in the city, were patronized by prominent Florentine families. Later madrigal composers associated with the city include Cristofano Malvezzi, Alessandro Striggio (i) and Marenzio, who also wrote for the celebrated *intermedi* that characterized the Medici festivities: lavish entertainments including spectacle, dance, poetry and song, presented by leading Florentine artists, usually in celebration of Medici weddings (*see* INTERMEDIO). In the late 16th century such well-known Florentines as de' Bardi, Peri and Marco da Gagliano, together with their non-Florentine associates at the Medici court, Giulio Caccini and Emilio de' Cavalieri, participated in formulating the new monodic style and the first operas, to which the Florentine theorist Girolamo Mei and the theorist-composer Vincenzo Galilei also contributed. Important works by Galilei, Caccini, Peri and others, as well as those by Florentine gentlemen composers, were issued by the firm of Marescotti (later Pignoni), which began a modest publishing programme in 1581.

Little Florentine instrumental music survives but its use was evidently widespread in both public and private life during the Middle Ages and Renaissance. A municipal band (brass and percussion) existed by the early 13th century; a reorganization of forces in 1384 created two groups of trumpeters (six *trombetti* and eight *trombadori* assisted by one or two percussionists) and a wind band of three shawm players (*pifferi*). With some variation in the number of personnel, the three groups were maintained throughout the period of the republic. In 1443, with the addition of a trombonist, the wind band numbered four musicians; five were employed in 1510, six in 1520, five in 1532, by which time cornetts and other wind instruments were coming into use. Trumpeters were generally of Florentine or Italian origin, but throughout the 15th century German musicians dominated the wind band's ranks; the most prominent of them was the trombonist Augustine Schubinger of Augsburg, appointed in 1489. The brass groups generally played at military functions and state processions, while the wind band performed at public and religious ceremonies and within the Palazzo Vecchio at mealtimes and at official receptions. 19 musicians, including an organist, a harpist, lutenists, trumpeters, trombonists and singers, were associated with the court of Duke Cosimo I. Their number was considerably enlarged by Cosimo's successors, most notably Ferdinando I, who employed string, woodwind, brass, keyboard and lute players.

1. Florentine Carnival serenade sung by masquers: woodcut from 'Canzone per andare in maschera', Florence, 1485 (I-Fn Palatino E.6.5.47)

As in other Italian cities, there was considerable amateur music-making in Florence during this period. Public musical instruction was available at least by 1432, when three musicians banded together for two years 'to teach the playing of harp, lute and all other instruments to all people who came to their studio to learn'. Many public figures, including the rulers from the early Medici, were keenly interested in instrumental music, gave their children musical instruction and collected instruments. None set a better example than Lorenzo de' Medici, who at the time of his death in 1492 owned four organs and an organetto as well as several other keyboard instruments, strings, lutes and a harp.

The earliest organ was at SS Annunziata (1299); from the 14th century organs were built with increasing frequency. After 1400 a native Tuscan organ builder, Matteo da Prato, repaired existing organs or built new ones in many of the principal churches, and during the 16th century such builders as Fra Bernardo d'Argentina and Onofrio Zefferini constructed new instruments. Almost all the leading Florentine composers of the late Middle Ages and Renaissance were organists at the major churches, including Landini, Andreas de Florentia, Squarcialupi, Coppini, Bartolomeo degli Organi, Corteccia, Francesco de Layolle, Cristofano Malvezzi, Alamanne de Layolle and Peri. A set of ricercares by Malvezzi, the incomplete *Intavolatura* of Layolle and some Florentine manuscripts containing keyboard music from the later 16th century are extant. The lute was also popular in Florence during the 16th century and at least two native composers for it acquired international fame: Perino Fiorentino had several works published with those of his teacher Francesco Canova da Milano; Galilei included many intabulations and original compositions in his *Intavolatura* (1563), *Fronimo* (1568, 1584) and in a large manuscript volume (*I-Fn*).

2. 1600–1815. Florence is generally regarded as the birthplace of opera. The earliest composers of musical drama, Jacopo Peri, Giulio Caccini and Emilio de' Cavalieri, all employed at the grand-ducal court, built their pioneering works on the foundation provided by the

tradition of the 16th-century Florentine court theatre festivals, usually celebrating Medici weddings, and by the discussions of Greek antiquity carried on by generations of Florentine humanists. These discussions resulted in Vincenzo Galilei's *Dialogo della musica antica et della moderna* (1581) as well as other theories and compositions in *recitar cantando* by other members of Giovanni de' Bardi's *Camerata*, by another group centring on Jacopo Corsi, by the Accademici degli Alterati, the members of the Accademia Fiorentina and by professional musicians at the court and chapels of Florence. There are two reasons why the new styles of accompanied solo singing (monody) that underlay the foundation of opera would have been promoted by courtiers such as Bardi and Corsi, who wished to curry favour with Grand Duke Ferdinando de' Medici. Firstly, these styles were based upon a (partly unwritten) tradition which was considered quintessentially Italian and which had strong associations with aristocratic behaviour and accomplishments – all of this was in line with Ferdinando's political policy to refeudalize Tuscany and promote Italian independence under his leadership, and with the underlying cultural conservatism of the Florentine nobility. Secondly, the pretence that recitative style and entirely sung drama represented a revival of ancient Greek arts was in keeping with the work of several of the academies founded by Cosimo I, which helped to promote the myth that Florence was the new Athens and that the Medici was a long-established ruling family destined to create a new golden age.

The first, brief, pastorales entirely sung were Cavalieri's *Satiro* (1590), *La disperazione di Fileno* (1590) and *Il giuoco della cieca* (1595), all on texts by Laura Guidiccioni. No music for these works survives and Giulio Caccini claimed (1614) that they did not contain actual recitative. *Dafne* (1594–8) by Jacopo Peri, on a text by Ottavio Rinuccini, is thought to have been the first full-length opera, and several pieces from it are known. The first opera to be preserved completely, Peri's *Euridice* (text by Rinuccini), was performed with some music by Caccini in celebration of the politically crucial wedding of Maria de' Medici and King Henri IV of France in October 1600 (fig.2). In honour of the same occasion, Caccini's opera *Il rapimento di Cefalo* (text by Gabriele Chiabrera with music also by Stefano Venturi del Nibbio, Piero Strozzi and Luca Bati) was performed in the theatre in the Palazzo degli Ufizzi. Later (5 December 1602) Caccini's own setting of *Euridice* was produced and published. Although operas continued to be staged from time to time in early 17th-century Florence, the new styles of solo singing were more frequently heard in *intermedi, veglie, mascherate, cocchiate* and *balletti a cavallo*.

Following the early death of Ferdinando's successor, Cosimo II, in 1621, Florence was ruled by a regency of Cosimo's mother, Christine of Lorraine, and his widow, Maria Maddalena of Austria, until Cosimo's son Ferdinando II attained the age of 17 in 1627. These two women used musical spectacle for political ends no less than their male predecessors, but, facing a challenge to the legitimacy of female rule rather than one directed at their lack of pedigree, they employed a different allegorical programme. Since Greek mythology provided few useful models of female rule, the regents turned to the lives of saints, particularly virgin-martyrs, and Old Testament heroines as the subjects for many of the musical stage works produced during their reign. Notable among these works that projected the image of strong, decisive female rulers were *Il martirio di Sant'Agata* (1622, text by Jacopo Cicognini, music by Giovanni Battista da Gagliano and Francesca Caccini), *La regina Sant'Orsola* (1624, text by Andrea Salvadori, music by Marco da Gagliano; fig.3), *Trionfo del disprezzo del mondo* (1625, text by Cicognini, music by Filippo Vitali) and *La Giuditta* (1626, text by Salvadori, music by Marco da Gagliano). The most important work in this series was Francesca Caccini's opera (*La liberazione di Ruggiero dall'isola d'Alcina* (1625, text by Ferdinando Saracinelli), a complex political allegory referring to pending marriages and alliances. The end of the regency is signalled by Marco da Gagliano's opera *La Flora* (1628, text by Salvadori), in which Venus gives Cupid back his arrows. Ferdinando II's wedding was celebrated by the last opera held in the Medici court theatres, *Le nozze degli dei* (1637, text by G.C. Coppola), composed by Marco da Gagliano, Peri and Francesca Caccini.

The composers of early opera also provided the churches of Florence with music, much of it for multiple choirs. Luca Bati's successors as *maestro di cappella* of the cathedral were Marco da Gagliano from 1608,

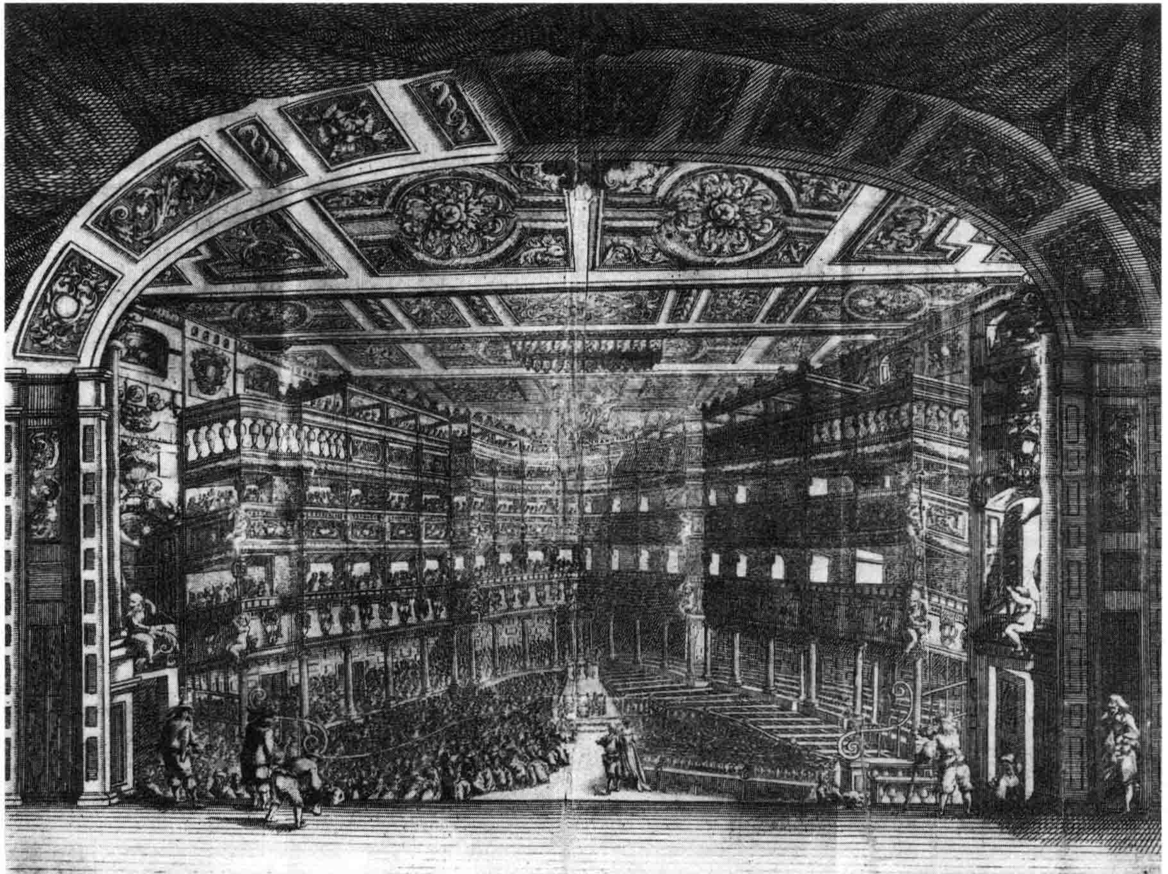
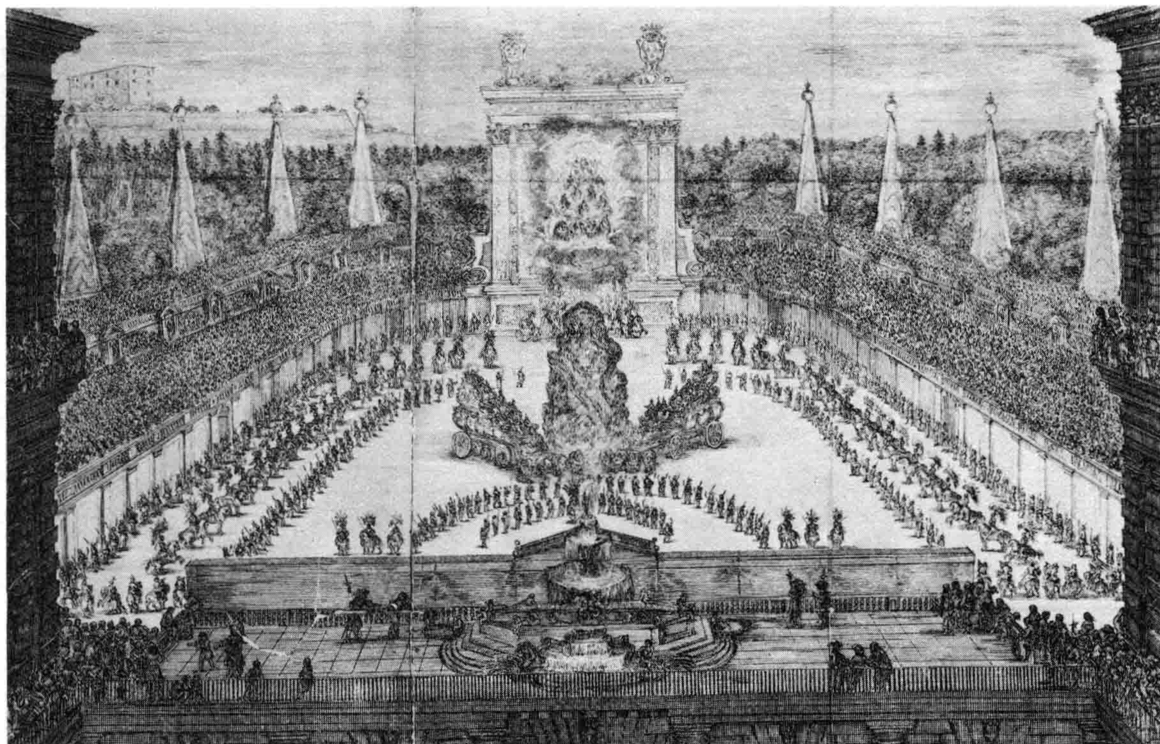
Giovanni Battista da Gagliano from 1643, Filippo Vitali from 1651, Giovanni Battista Comparini from 1655, Niccolò Sapiti from 1660, Bonaventura Cerri from 1681, Pietro Sanmartini from 1686, Giovanni Maria Pagliardi *de facto* in 1701, Giovanni Maria Casini *de facto* in 1702, Francesco Maria Mannucci from 1712, Giuseppe Maria Orlandini from 1732, Giovanni Nicola Redi *pro interim* from 1760, Carlo Antonio Campioni from 1763, Salvadore Pazzaglia (*c*1723–92) and Gaspero Sborgi in 1792. These leaders were appointed with confirmation by the grand duke and often at his initiative, and most of them, until Redi, were considered in effect to be *maestro di cappella* of the court musical establishment as well. Antonio Cesti's appointment as *maestro di cappella* in 1669 seems to have been the first time that title was used for a grand-ducal court appointment distinct from the baptistery or cathedral.

Parallel to public, civic and courtly music and spectacle runs a stream of semi-private activity centred in the numerous religious confraternities of Florence. Nearly every male citizen belonged to one, in most of which the traditional *laudi* continued to be sung in the 16th century. But the older *sacra rappresentazione* that the boys of these sodalities performed earlier gave way, especially after 1550, to the newer *commedia sacra*, especially by Giovanni Maria Cecchi, with dialogue in realistic prose and adorned with incidental songs and *intermedi*. One of these confraternities, the Compagnia dell'Arcangelo Raffaello *detta* della Scala, included most of the prominent musicians of Florence by the end of the 16th century, and from about 1585 it produced a series of musical skits and dramatic dialogues that led, in the 17th century, to works that belong to the history of the oratorio; by that time it had been followed by a half dozen or so similar confraternities. Towards the mid-17th century most of these groups, originally founded to educate boys, became dominated by adult members who no longer took an interest in acting; the dialogues and oratorios they sponsored were sung by professional musicians, frequently by opera virtuosos, without costume, action or scenery, but still on a stage erected at the front of the church. In these oratories, sacred musical dramatic dialogues in Italian were performed from at least the second decade of the 17th century; collections of many texts reveal their popularity. Oratorios were performed from the early 1660s, perhaps as early as 1652. The first of these were by the Roman Antonio Melani and by the Florentines Cerri, Benvenuti and Sanmartini. The Oratorian fathers, established in Florence in 1632, built the oratory of S Filippo Neri (1645–88) for public exercises, where until 1808 they produced an annual series of between 16 and 37 different oratorios, to be sung every Sunday evening and on the more important feasts, from All Saints' to Easter. Among the Florentine composers of oratorios (and the number of known titles to their credit performed in Florence) are Lorenzo Conti (20), Orlandi (15), F.M. Veracini (10), A.F. Piombi (8) and Casini (6).



From about 1586 to 1593 the court cornettist Bernardo Pagani *detto* il Franciosino (*d* 1596) built up an instrumental ensemble at first consisting of orphans and abandoned children whom he trained. The ensemble, always called the Franciosini, continued to function as a unit within the court musical establishment until 1656. One of the original members, Antonio Vanetti, was a violinist who trained the German boy Tobbia Grünschneider. The latter, in turn, became the teacher of Francesco Veracini, whose son and grandson, Antonio and Francesco Maria, earned lasting reputations as violin virtuosos and composers in the late 17th century and the 18th. Girolamo Frescobaldi, a guest at the Medici court from 1628 to 1633, initiated a thriving school of organists, which in the 17th and 18th centuries included Negetti, Casini, Feroci, Bartolomeo Felici and Gaspero Sborgi.

During the second half of the 17th century operas in Florence were performed almost exclusively in theatres operated by 12 or more academies, descendants of those that produced the first experiments in *recitar cantando*. The most important were the Accademia degli Immobili (founded 1648) and its offshoot, the Accademia degli Infuocati (founded 1652). The Immobili constructed a



large theatre in the Via della Pergola (fig.4), which they inaugurated in 1656 with Jacopo Melani's *La Tancia ossia Il potestà di Colognole* (text by G.M. Moniglia). Melani composed four of the six operas presented at the Teatro della Pergola, including *Ercole in Tebe* (Moniglia) for the wedding of the future Cosimo III and Marguerite Louise of Orléans (8 July 1661), before it closed in 1663 on the death of its patron, Cardinal Giovanni Carlo de' Medici. From then until 1718 this theatre was used only for special events, such as the performance of *Il Greco in Troia* (M. Noris) by Pagliardi for the wedding of Prince Ferdinando de' Medici and Violante Beatrice of Bavaria (29 January 1689), and *Il vero onore* (F.M. Corisgnani) by F.M. Mannucci for the visit of Prince Friedrich August of Saxony (13 February 1713). Meanwhile the theatre of the Infuocati in Via del Cocomero became the most important opera centre in the city. It specialized in comic operas, many by Florentine poets and composers, which were occasionally written in dialects and often drew on the characters of the *commedia dell'arte*. Other theatres within the city that produced operas during the late 17th century included the Teatro nel Corso de' Tintori, the Teatro in Borgo Ognissanti, and, apparently, the Casino Mediceo, where Ferdinando II's brothers, Giovanni Carlo, Mattias and Leopoldo de' Medici, may have produced the lost operas by Giovanni Cinelli and Buonaventura Cerri.

About 1690 Prince Ferdinando de' Medici (1663–1713), the son of the ruling Grand Duke Cosimo III, opened a particularly brilliant episode in the history of Florentine music. He was learned in art, literature and the sciences as well as music, and is reported to have been able to play a difficult sonata at sight on the harpsichord and to repeat it from memory immediately. His voluminous correspondence with composers, especially with Alessandro Scarlatti, contains specific discussions of musical style. In the prince's laboratory, and possibly according to his own designs, Bartolomeo Cristofori constructed the first pianoforte (1698–1700). Every autumn and Carnival season the prince directed operas in this private theatre in the Villa di Pratolino. During Lent his musicians performed in the church of S Felìcita, and there was a concert in his chamber nearly every evening (according to the diary of one of his lutenists). Among the composers under the prince's protection were the Florentine residents Lorenzo Conti, F.A.M. Pistocchi, Antonio Veracini, Pietro Sanmartini, Casini, Martino Bitti and G.M. Orlandini, and he assisted Handel in 1708–9. His music collection of at least 390 volumes, mostly manuscript, has been lost.

The reopening of the Teatro della Pergola with Vivaldi's *Scanderbeg* (22 June 1718) marked a capitulation of native Florentine opera to international styles. The most important impresario at this theatre during the first half of the 18th century was Luca Casimiro degli Albizzi, who commissioned works by Vivaldi, Giovanni Porta and G.B. Pescetti. The music director of the theatre at this time was normally G.M. Orlandini, who provided substitute arias

5. Performance of 'Il mondo festeggiante' (music by Domenico Anglesi) in the amphitheatre of the Giardino di Boboli, Florence, for the wedding of the future Cosimo III and Marguerite Louise of Orléans, 1661: engraving by Stefano della Bella after the design by Ferdinando Tacca

for operas by other composers when requested and arranged a large number of pasticcios in addition to providing original operas of his own. His speciality was the composition of comic intermezzos, a genre of which he may have been the principal creator. Francesco Pecori, another important impresario, produced six premières of operas by Antonio Predieri, 1718–20. From 1738 to 1752 Florence saw new operas by Orlandini, Giuseppe Scarlatti, Domenico Scarlatti, Domingo Terradellas, G.B. Lampugnani and Michele Fini, five of them commissioned by Ugolino Grifoni.

Following the death of the last Medici grand duke, Gian Gastone, in 1737, Florence was ruled by regents of Emperor Francis I. The first of these, Marc de Craon and Emmanuel de Richecourt, took little interest in serious opera, although Craon gave encouragement to comic opera performed at the Cocomero theatre. They banned opera from theatres other than the Pergola and Cocomero and forbade foreign companies from performing in the city. In 1785 Francis's successor, Leopold (1765–90), suppressed many of the city's churches and religious companies; but he did give vital support to opera, which gave rise to a new generation of local composers, including Michele Neri Bondi, Bernardo Mengozzi, Giovanni Marco Rutini, Alessandro Felici, Giovanni Vincenzo Meucci, Ferdinando Rutini and Giuseppe Moneta. Leopold also gave decisive encouragement towards the establishment of public concerts in Florence. From 1766 to 1799 the Armonici, a group of bourgeoisie and nobility, presented concerts at a series of theatres: the Teatro di Borgo dei Greci, the Teatro di Porta Rossa and the Filomusi theatre. The Faticanti held their academies in the Sala di Giovacchino Ferrini and later at the Borgo dei Greci. The Ingregnosi began their concerts at the Teatro del Corso dei Tintori in 1767, where they continued until 1782. These concerts of vocal and instrumental music stimulated interest in orchestral genres and gave rise to a remarkable absorption of northern Classical style in keyboard concertos by such local composers as Carlo Antonio Campioni, Alessandro Felici, G.M. Rutini, Gaspero Sborgi and Eugenio Sodi. Opera continued in a healthy state during the first reign of Ferdinando III (1791–1800). During the mid-1790s Florence actually saw more opera premières than any other city in Italy. The French occupation of Florence (1800–14) brought severe dislocations in the musical life of the city, including the closure of theatres, prohibitions of public concerts, further suppressions of churches, monasteries and confraternities, and the departure of many of the city's notable composers. Luigi Cherubini, born and initially trained in Florence, pursued his career largely beyond the Alps.

3. After 1815. When the house of Lorraine returned to power under Archduke Ferdinando III (in accordance with the Treaty of Vienna, 1815), closer commercial and cultural relations between the Florentine bourgeoisie and the Viennese way of life were restored, creating the conditions for a musical life increasingly different from that of other Italian cities. Particularly after 1824 (when the Grand Duchy of Tuscany came under the enlightened rule of Leopold II) Florentine élite circles were determined to tackle the problem of fostering a new music based on foreign models, giving precedence to instrumental music over opera, sometimes with a strongly polemic slant. The Teatro della Pergola had in 1810 been declared an imperial theatre for the performers of grand opera, *opera*

6. Scene from Act 3 of Cavalli's 'Hipermestra', Teatro della Pergola, Florence, 1658, designed by Ferdinando Tacca: engraving from the libretto by G.A. Moniglia (Florence, 1658); Hipermestra, throwing herself from the tower, is saved and carried away by Juno's peacock

seria and *opera buffa* and in 1830 Alessandro Lanari, one of the most intelligent and active Italian opera impresarios, became its manager. Premières during the 19th century included Donizetti's *Parisina* (1833) and *Rosmonda d'Inghilterra* (1834), Mascagni's *I Rantzau* (1892) and the first Italian performances of *Der Freischütz* (1843) and Meyerbeer's *Dinorah* (1859). The slant towards instrumental music is reflected in the opening (1828) of a piano factory, which employed Viennese craftsmen, and in the foundation of a Società Filarmonica (the first in Italy) to propagate Classical – and particularly instrumental – music in 1830. In 1834 the pianist Gioacchino Maglioni launched a regular series of chamber music concerts in a hall in the centre of the city; known as the Sala Maglioni, it was for decades, even after the Grand Duchy of Tuscany became part of the Kingdom of Italy, a focus of musical life where the public could become familiar with music by Haydn, Mozart and Beethoven, as well as Meyerbeer. It was to Meyerbeer that Florentine developers of instrumental music looked for guidance on the path abandoned by Rossini (regarded as the last of the Classical composers) and as an example to Italian opera writers of greater scholarship with a modern style devoid of vulgarity.

Hence even Verdi's work was received in Florence with some suspicion although with immediate close critical attention. In 1847 his *Macbeth* had its première at the Teatro della Pergola but did not arouse much enthusiasm among the Florentine élite. In 1849, during the final period of the Grand Duchy, the Istituto Musicale was set up in association with the Accademia di Belle Arti and in 1853 people interested in popularizing instrumental music founded the *Gazzetta musicale di Firenze*, a periodical which greatly influenced the cultural life of the city before the publication of *L'armonia* (1856–9) which defined itself as the 'organ of musical reform in Italy'. The editor Abramo Basevi (1818–85) remained, even after the demise of *L'armonia*, one of the most lively personalities of 19th-century Italian musical culture; his *Studio sulle opere di Giuseppe Verdi* (1859) is basic to Verdi studies, and his many enterprises included 'Mattinate Beethoveniane' (from 1859), morning concerts presenting Beethoven's music. Basevi's collaborator in this pioneer work was the publisher Giovanni Gualberto Guidi (1817–83), a double bass player at the Teatro della Pergola who took up printing in 1844 and who published pocket editions, possibly the first of their kind, of many full scores, including Rossini's *Guillaume Tell*, Meyerbeer's *Robert le diable* and *Les Huguenots*, and Spontini's *La vestale*, and instrumental music, as well as the modern edition of Peri's *Euridice* (1863).

The campaign waged by Basevi and his friends awakened Wagner's interest in the Florentine 'reformers' (see his letter from Zürich, 30 March 1856). But he inspired no more enthusiasm than Verdi in cultured Florentine circles where, under Basevi's guidance, Meyerbeer long

continued to be preferred. However, the unremitting efforts of the Florentine cultural élite resulted in a wider acquaintance with Beethoven's music, often many years before the rest of Italy. By 1841 the Second, Third and Fourth Symphonies and the Egmont and Fidelio Overtures were known; in 1857 the Pastoral Symphony was performed under the direction of Teodulo Mabellini (1817–97) and in 1880 Jefte Sbolci conducted the Ninth Symphony. In addition, the Società del Quartetto was founded in 1861 and in 1863 Concerti Popolari were started, again to popularize instrumental music.

In these attempts to convert and inform the public Basevi was aided by Gerolamo Alessandro Biaggi (1819–97) who, arriving in Florence in 1863, was for almost 30 years music critic of the newspaper *La nazione*, where his 'arts supplement' articles give a detailed picture not only of the musical life of the city but also of the aesthetic and organizational problems that were developing in Italy and Europe. In fact the pattern of Florentine musical life continued unbroken even after the annexation of Tuscany to the Kingdom of Italy with the plebiscites of 1860; when Florence was provisional capital between 1865 and 1870 its new administrative and political prestige added nothing substantial to the achievements of men such as Basevi and Guidi. However, after 1870 a slow decline of the city's musical life began, becoming particularly apparent at the end of the century when once vigorous activities languished and general interest was once again limited to opera at the Pergola and the bigger, modern Teatro Pagliano (now Teatro Verdi). This should be understood in the context of Florence's traditional preference for visual arts rather than abstract music.

The first signs of a revival came just before World War I, when Giannotto Bastianelli and Ildebrando Pizzetti, based in Florence as musicians and critics, came into contact with Florentine literary review circles, breaking down former prejudices. In 1914 Bastianelli and Pizzetti founded the magazine *Dissonanza* devoted to contemporary music; in 1915 Bastianelli was the critic of *La nazione* and for some years a lively voice in the musical life of the city which, through his articles, suddenly made contact with more recent European music, from Debussy to Schoenberg. In 1918 Luigi Parigi (1883–1955) launched the review *La critica musicale* which ran until 1923, having among its contributors Bastianelli, Fausto Torrefranca and Pizzetti, who from 1919 to 1923 was also music critic of *La nazione* and from 1917 to 1923 director of the conservatory. In 1920 a group of citizens founded the society Amici della Musica, which was chiefly interested in chamber music; at one of its concerts (1 April 1923) Schoenberg and Puccini met. The latter had come from Viareggio to Florence expressly to hear *Pierrot lunaire* conducted by Alfredo Casella at the Sala Bianca in Palazzo Pitti.

But it was not until 8 December 1928 that Florence emerged from musical inferiority with the creation of a symphony orchestra, suggested by Vittorio Gui, who also directed it. The Orchestrale Fiorentina became a permanent orchestra (one of the best in Italy), so it was possible to organize concert seasons at the Teatro Comunale (formerly the Politeama Fiorentino Vittorio Emanuele II) and, in 1933, the first Maggio Musicale Fiorentino, conceived and directed by G.M. Gatti until 1937. This festival soon gained international renown for the importance and originality of its opera productions, the prestige of the guest conductors, and for its restorative influence on the whole of Italian musical life. It was particularly successful just before the war under the direction of Mario Labroca (1937–44) and between 1950 and 1956 under Francesco Siciliani; it presented the Italian première of Stravinsky's *Oedipus rex* (1937), the world première of *Volo di notte* (1940) by Dallapiccola (who became Florentine by adoption in 1922), Prokofiev's *War and Peace* (1953) and many new works by Malipiero, Pizzetti and other Italian and foreign composers. Many celebrated conductors have been invited there, and the contributions of Bruno Walter, Furtwängler, Victor de Sabata, Antonio Guarnieri, Mitropoulos and Rodzinski were particularly valuable. The permanent conductors of the Orchestra del Maggio have included Bruno Bartoletti (1957–64), Riccardo Muti (1969–73) and Zubin Mehta (from 1985). Musicians most active as composers and teachers after the war included Dallapiccola, Bruno Bartolozzi, Carlo Prosperi and Sylvano Bussotti. Torrefranca had considerable influence in university studies as professor of music history at the Faculty of Letters and Philosophy (1941–53). He was succeeded as professor and head of department by Remo Giazotto in 1957 and Mario Fabbri in 1969. Musicologists active as critics for the Florentine press have included Pizzetti, Arnaldo Bonaventura, Adelmo Damerini, Federico Ghisi and Leonardo Pinzauti. The Istituto Musicale, founded during the Grand Duchy, became the Regio Conservatorio in 1923 and is named after Luigi Cherubini; its library is largely inherited from the grand-ducal collections in Palazzo Pitti and there is also a museum of instruments including the 'Medicean' viola by Antonio Stradivari.

A more recent institution, unique to Italy, is the Scuola di Musica di Fiesole. Founded by Piero Farulli in 1974, it offers a variety of part-time courses that range from musical appreciation for amateurs to masterclasses conducted by international artists, 'finishing' lessons and orchestral training for professionals. From it has emerged the Orchestra Giovanile Italiana (1984), which performs regularly in Italy and abroad and competes with national youth orchestras throughout Europe. Another product of the school is the Coro di Voci Bianche, which takes part in the operatic seasons and has performed children's operas such as Peter Maxwell Davies's *The Two Pipers* (1981), Britten's *The Little Sweep* (1995) and Hans Krása's *Brundibár* (1996), the last two at the Piccolo Teatro del Comunale. A further department is concerned with research into modern methods of musical education, its findings set forth in the quarterly magazine, *Bequadro*. The city's concert life has been enriched by the foundation in 1980 of the Orchestra Regionale Toscana, a body of 45 players capable of being broken down into chamber ensembles and possessing a repertory that extends from Baroque to contemporary music. In 1983, under the direction of Luciano Berio, it attained government recognition and has since toured widely abroad. Also worthy of mention is the Concentus Musicus, an association founded in 1972, which specializes in the promotion of jazz concerts and music of the avant garde.

Florentia, Franciscus de. *See* LANDINI, FRANCESCO.

Florentine Opera Company. Opera company founded in 1933, based in MILWAUKEE.

Florentius de Faxolis [Fiorenzo de' Fasoli] (*d* 18 March 1496). Italian theorist. He entered the service of Cardinal Ascanio Maria Sforza in about 1480 and was a canon at S Florenzio in Fiorenzuola d'Arda from 1482. Some time between 1484 and 1492 he wrote a theoretical work of 95 folios entitled *Liber musices* (*I-Mt* 2146). This treatise, commissioned by the cardinal for personal use, is notable for its finely executed miniatures by Attavante degli Attavanti or a member of his school. Gilded notes on blue staves are used for the music examples. The work is divided into three books; it begins with an extended treatment of the value, uses and effects of music and continues more summarily with the elements of music, plainsong, counterpoint, composition and rules of mensural notation. As authorities Florentius cited many ancient Greek, Roman and medieval writers, but did not name any contemporary theorists or composers of renown. He described briefly such musical practices of his time as fauxbourdon, imitation and canon. The treatise contains short polyphonic pieces for discant and tenor to illustrate the five genera of proportions. To conclude the work a Latin poem by Francesco Tranchedino praises the treatise as a valuable guide to musical understanding.

CLEMENT A. MILLER/BONNIE J. BLACKBURN

Florentz, Jean-Louis (*b* Asnières, 19 Dec 1947). French composer. Before completing university courses in natural science, literary Arabic and ethnomusicology, he entered the Paris Conservatoire, where he studied with Messiaen and Schaeffer, receiving additional instruction from Duhamel. He won the Lili Boulanger composition prize in 1978, which was followed, from 1980 onwards, by further prizes from the SACEM and the Institut de France. During the 1970s he undertook 14 field trips to Africa, and between residencies at the Villa Medici, Rome (1979–81), and at the Casa Velasquez in Madrid and Palma de Mallorca (1983–5), he was a visiting lecturer at Kenyatta University College, Nairobi (1981–2). Appointed to a professorship in ethnomusicology at the Lyons Conservatoire in 1985, he subsequently extended his studies of oral traditions to the West Indies, Polynesia, Egypt and Israel. He was elected to the Académie des Beaux-Arts in 1995.

Florentz's music shows the influence of a variety of non-Western traditions, both secular and liturgical. His Marian triptych *Le livre du pacte de miséricorde* (which comprises *Magnificat-Antiphone pour la visitation* op.3, *Laudes* op.5 and *Requiem de la vierge* op.7) grafts onto the ancient Greek apocryphal text extracts from the Qur'an and texts from the Ethiopian orthodox liturgy, while the rhythmic and polyphonic character of the instrumental writing at times resembles the ensemble music of Central Africa. His enthusiasm for birdsong, which is often quoted, and his development of a personal modal system suggest parallels with Messiaen. But though comparable in its richness of instrumental colour, Florentz's music differs strikingly from his teacher's in its approach to form and texture, favouring continuous narrative structures whose preoccupation with the superimposition, interpenetration and constant transformation of layers and events the composer has attributed to the influence of African story telling traditions.

WORKS
(*selective list*)

Magnificat-Antiphone pour la visitation, op.3, T, mixed chorus, orch, 1979–80; Laudes, op.5, org, 1983–5; Chant de Nyandarua, op.6, 4 vc, 1985; Requiem de la vierge (Lat., Gk., Arab and Ethiopian texts), op.7, S, T, Bar, mixed chorus, children's chorus, orch, 1986–8; Debout sur le soleil, op.8, org, 1990; Asmarâ (Ps viii, Ethiopian liturgy), op.9, mixed chorus, 1991–2; Le songe de Lluc Alcari, op.10, vc, orch, 1992–4; Second chant de Nyandarua, op.11, 8/12 vc, 1994–5; L'ange du Tamaris, op.12, vc, 1995; Les jardins d'Amènta, conte symphonique, op.13, orch, 1995–7

Principal publishers: Leduc, Ricordi

MYRIAN SOUMAGNAC

Flores. *See* INDONESIA, §VII, 3(i).

Flores [Flores Dalcaraz], **Alfonso** [Alonso] (*b* ?Alcaraz; *fl* Nîmes, late 16th century). ?Spanish composer, active in France. Winterfeld surmised, on the evidence of his name and his psalm settings, that he was a Spanish Calvinist. His extensive five-part settings of Psalms 23, 28 and 97, published in Heidelberg (RISM 1597^6), are cantus firmus settings of the Geneva melodies in the style of Claude Le Jeune, in which the cantus firmus is set afresh in each *pars* and moves from voice to voice. According to the preface of the psalm collection, he intended to set the whole psalter in this style.

Flores also wrote three four-part secular pieces to French texts in a predominantly chordal style; all survive in manuscript parts held in Aberdeen (*GB-A*). *Belle admirablement* is a chanson, the other two, *Rien ne dement jamais* and *Les lieux vont rechangeant*, are sonnets in praise of Nîmes, probably dating (on the evidence of their texts) from after the massacre and expulsions of Catholics in 1569.

GEOFFREY CHEW

Flores, Pedro (*b* Naguabo, 9 March 1894; *d* Puerto Rico, 13 July 1979). Puerto Rican bandleader and composer. He was a schoolteacher in his native Puerto Rico, then moved to New York City in 1926, when small trios and quartets were forming on its Latin music scene to perform romantic boleros and other Cuban genres such as *son* and *guaracha*. In 1928, despite no prior musical training, Flores established his own group, the Cuarteto Flores which, through the 1930s, became internationally famous, with vocalists such as Davilita, Alfredito Valdes, Chenco Moraza and Daniel Santos. Flores was a prolific composer, writing such classics as *Obsesión*, *Amor perdido*, *Perdón*, *Irresistible*, *Despedida*, *Bajo un palmar*, *Toma jabon pa'que laves* and the patriotic *Sin bandera*. His arrangements were strongly influenced by the predominant Cuban style of the day, with heavy percussion and catchy riffs. While Flores lacked the skills and sophisticated compositional style of his contemporary and life-long rival Rafael Hernández, his songs had a broad appeal among working-class Latin Americans for their depictions of everyday life and ordinary people. See also R. Glasser: *My Music is my Flag: Puerto Rican Musicians and their New York Communities, 1917–1940* (Berkeley, 1995).

LISE WAXER

Flores Zeller, Bernal (*b* San José, 28 July 1937). Costa Rican composer, musicologist and teacher. His first music teacher was Carlos Enrique Vargas. He trained at the Eastman School of Music in New York (1951–64; BM, 1961, MM, 1962, PhD in composition, 1964). At the Eastman School he studied the piano with José Echániz and composition with Wayne Barlow, Bernard Rogers and Howard Hanson. After graduating he went on a research tour in Central America, and from 1965 to 1966 he taught at the Castella Conservatory of the University of Costa Rica. He taught theory at the Eastman School of Music (1966–7), then returned to Costa Rica to teach at the Castella Conservatory, the Escuela Superior de Música and the University of Costa Rica. At the university he carried out a large-scale institutional reforms and in 1971 set up degree courses in musical science and composition. He also set up the School of Musical Arts of the Rodrigo Facio University (inaugurated in 1971) and the degree courses in music history and composition at the Autonomous University of Central America. In 1971 he was appointed director of the music department of the Ministry of Culture, Youth and Sports. Together with Benjamín Gutiérrez Sáenz he trained a whole new generation of Costa Rican composers. He was also instrumental in propagating the theories of Hanson, whose *Harmonic Materials of Modern Music* he translated into Spanish.

Flores Zeller has dedicated his life to composition, research, teaching and research into Costa Rican music, and played a leading role in important reforms that have revitalized the musical development of Costa Rica.

JORGE LUIS ACEVEDO VARGAS

Flórez, Francisco (*fl* 1784–1824; *d* Madrid, 1824). Spanish piano and harpsichord maker. He was born in Murcia. By 1784 he had established a workshop in the Calle de San Bernardo, Madrid, where his first advertisements in Madrid newspapers (dating from 1784 to 1787) were for 'Forte Pianos' based on the English model; one of those, advertised in 1786, had seven registers. Between 1789 and 1790 he travelled to London, with financial help from King Carlos IV, in order to perfect his craft. On 20 January 1795 he was named organ builder and harpsichord maker to the Royal Chamber of Carlos IV, although his work consisted of making, repairing and tuning the pianos of the royal palaces. He worked first from a shop in the Calle de San Andrés before moving to the Carrera de San Jerónimo in 1814. He also made harpsichords and pianos for the Duchess of Benavente and for other members of the aristocracy in Madrid.

In 1795, following his trip to London he advertised combined harpsichord-pianos based on the models of J.J. Merlin. In addition, he offered glass harmonicas and barrel organs. In 1797 he made a piano with a compass of six octaves (*C′*–*c″″*), which was, according to him, the first with that compass in Madrid. In the same year he made a harpsichord-piano for the king in the English style, possibly modelled on the 1796 Broadwood piano now preserved in the Museum of Fine Arts, Boston, which had been a present from chief minister Manuel de Godoy to the queen. At his death he left unfinished an upright piano-organ intended for the king, the description of which indicates that it was to have been a luxurious and expensive instrument. His main rival was Francisco Fernández, who was also given a position at the Royal Chamber of Carlos IV.

Few pianos with Flórez's signature survive. Six square pianos are preserved in the Victoria and Albert Museum, London, the Palacio Real, Madrid, the Museo Municipal, Madrid, and various private collections. There is also an upright piano, dated 1807, with six registers and a compass of five and a half octaves (*F′–c″″*), at the Palacio Real, Madrid.

CRISTINA BORDAS

Flori [Florii, Florio, Florius]. Dutch family of musicians, active in Italy and Germany. Apart from the five separately discussed below, a sixth member of the family, Gregorio, is known from a motet for seven voices (in RISM 1609[15]).

(1) **Francesco** [Franz, Franciscus] **Flori (i)** (*b* ?Maastricht; *d* Munich, 1588). Music copyist and composer. He entered the Munich court chapel in 1556 and in April 1557 received a lifelong appointment there as a singer. From about 1565 he worked as a scribe alongside the court copyist Johannes Pollet, and he took over from him in 1570. Flori was the copyist of several choirbooks belonging to the Munich court chapel and to the Jesuit College in Munich. His compositions are indistinguishable from those of (2) Francesco Flori (ii).

BIBLIOGRAPHY

M. van Daalen: 'Der Utrechter Lasso-Codex aus der bayerischen Hofkapelle in München', *TVNM*, xxx (1980), 85–112

(2) **Francesco** [Franz, Franciscus] **Flori (ii)** (*d* Innsbruck, 1583). Singer and composer, ?son of (1) Francesco Flori (i). He was a bass at the Graz court chapel from 1567 to 1572 and at the Innsbruck court chapel from about 1573 to 1578. In 1578 he applied for a post at Stuttgart and in 1581 for one at Munich. He appears to have spent some time in Heidelberg, but by 1581 he had returned to the Innsbruck court, where he remained until his death. One chanson for three voices, *Waer machse sijn die alderliefste* (in RISM 1554[31]), and a four-part mass based on it (in *D-Mbs*) may be by him or by (1) Francesco Flori (i).

(3) **Giovanni** [Johannes, Johann, Iohan] **Flori** (*fl* 1555–98). Composer, son of (1) Francesco Flori (i). In 1555 he served at the Habsburg court. He may be identifiable with Johannes Flory, who left Maastricht in 1559 and entered the Capilla Flamenca in Madrid. In 1562 he returned and may have matriculated at Douai University. He travelled to Munich and Tübingen and may have lived in Venice during the 1560s. In 1572 he served at L'Aquila Cathedral and in 1573 at the Innsbruck court as an alto and as music teacher to the princesses; in 1580 he became *maestro di cappella* at Treviso Cathedral, where he remained for about a year. From 16 August 1586 to the end of 1598 he was *maestro di cappella* at S Maria Maggiore, Bergamo; in 1589 he applied unsuccessfully for the post of *maestro di cappella* of Verona Cathedral. He composed three masses and five *falsobordoni*, as well as a book of madrigals for five voices. He also contributed to many important madrigal anthologies. In his madrigal *Più trasparente velo* (RISM 1592[11]) he used word-painting skilfully, creating varied and interesting textural contrasts and setting the refrain in an extended homophonic style.

(4) **Giorgio** [Georg, Georgi] **Flori** (*b* c1558; *d* after 1594). Composer and singer, son of (1) Francesco Flori (i). In 1564 he entered the Emperor Maximilian II's chapel as a choirboy; he may have been taught there by Monte. He remained there until 1576, acting as music teacher to the emperor's sons Maximilian and Matthias. In 1577 Archduke Ferdinand of the Tyrol summoned him to the Innsbruck court as a bass, and in 1578 he stayed briefly in Venice. He was employed by the Fugger family at Augsburg in 1580 and served as vice-Kapellmeister at Innsbruck from 1584 to 1587. Between 1588 and 1589 he was *maestro di cappella* at Treviso Cathedral and in 1592 returned to his former post at Innsbruck, where he remained until 1594. His music was well known and much admired. He published one book of madrigals for six voices, and several of his masses, motets and madrigals appeared in anthologies of the time. He may have learnt from Monte his talent for madrigal writing in a traditional style with suave melodic lines.

(5) **Jacobus** [Jacob, Jean] **Flori** [Florij, Flory] (*fl* 1571–99). Composer, probably son of (1) Francesco Flori (i). Much of his biography has been confused with that of (3) Giovanni Flori. However, he is known to have applied for a post at Stuttgart in 1571. He visited L'Aquila in 1572 and Venice in 1573, shortly after which he became a member of the court chapel at Innsbruck. He applied unsuccessfully for a post at the Emperor Maximilian's court at Vienna in 1574. With Lassus's help he obtained a grant to travel to the Netherlands in 1575. He returned to Innsbruck in 1581 and then lived at Hechingen from 1581 to 1583. In 1596 he became Kapellmeister at Salzburg but returned to the Netherlands in 1599. A document in the Munich Kreisarchiv records a payment of 12 gulden to 'Jacob Florj' for a mass sent to the Duke

of Bavaria in 1599; this may have been the *Missa 'Deus in nomine tuo'*.

R.B. LENAERTS, E. HARRISON POWLEY/R

Florid. A term used to describe melody that is ornamented, either written out by the composer, or improvised by the performer. It can apply to a single melodic line, or to polyphony. In the florid organum of Aquitaine in the early 12th century the upper part of the note-against-note counterpoint is embellished with melismas. The term is also used to describe the *musica figurata* of early Netherlandish composers such as Ockeghem, in which elaborate polyphony was created by combining a number of equally florid lines. Most often it refers to a profuse style of ornamentation running in rapid figures, passages or divisions, but it can also designate ornamentation in general. For example, P.F. Tosi's treatise on improvised embellishment, *Opinioni de' cantori antichi e moderni, o sieno osservazioni sopra il canto figurato* (1723), translated into English (1742) as *Observations on the Florid Song*, includes specific ornaments, such as trills and appoggiaturas, alongside various types of passage work.
See also FIORITURA.

Florido de Silvestris [Floridus de Sylvestris]. *See* SILVESTRIS, FLORIDO DE.

Florie, Martin. Chaplain at the Ste Chapelle in Paris in 1385, probably identifiable with FLEURIE.

Florificatio vocis (Lat.). A type of trill; *see* ORNAMENTS, §1.

Florilegium. British ensemble. Based in London, it specializes in 17th- and 18th-century chamber music on period instruments. Its core players are Ashley Solomon (flute and recorder), Neal Peres Da Costa (harpsichord), Rachel Podger (violin) and Daniel Yeadon (cello and bass viol). Florilegium made its début at Blackheath Concert Halls in 1991, since when it has performed and broadcast regularly at the Wigmore Hall, throughout Europe, the USA, East Asia and Australia. Its many CDs include recordings of Telemann's chamber music and Vivaldi's cello sonatas (with Pieter Wispelwey as solo cellist), both of which received awards.

LUCY ROBINSON

Florimi, Giovanni Andrea (*b* Siena; *d* Pistoia, Jan 1683). Italian composer and organist. According to Morrocchi he was a pupil of Cristofano Piochi. He was a member of the Servite order. In 1668 he was organist at Budrio, near Bologna, and according to Fétis he was a member of the Accademia Filarmonica at Bologna. Morrocchi referred to him as *maestro di cappella* at the collegiate church in Siena. In 1680 or 1682 he was appointed *vicemaestro* of Siena Cathedral and in 1682 *maestro di cappella* of Pistoia Cathedral. On the title-page of his op.7 he described himself as 'very aged'. He was one of the most skilful Tuscan composers of his time; all his extant music is sacred, some of it scored for double choir. The title-page of the *Compendio* compiled by Girolamo Chiti, which survives only in a manuscript dating from after Florimi's death, mentions Piochi, Florimi and other composers as the source for some of the information contained in it.

WORKS

JUDITH NAGLEY

Florimo, Francesco (*b* San Giorgio Morgeto, Calabria, 12 Oct 1800; *d* Naples, 18 Dec 1888). Italian librarian, musicologist, teacher and composer. The varied activities of his career were dominated by a single theme: the preservation and glorification of the Neapolitan musical tradition. At 12 (or 15) he entered the Naples Conservatory, where he was a fellow student of Bellini, who became his closest friend and the object of his intense devotion. He was made archivist-librarian there in 1826 and (perhaps his most important achievement) acquired a large part of the library's rich holdings. He also served as director of vocal concerts and singing teacher there. His widely praised *Metodo di canto* (Naples, ?1840; Milan, 1841–3, enlarged 3/?1861) was conservative in tendency, claiming to be based on the precepts of the castrato Crescentini, then director of the conservatory's singing school, and intended to restore the 'antico bello' of 'the only true tradition of Italian song', that of Scarlatti, Porpora and Durante, which had been displaced by 'la moda barocca' of the present age. Florimo composed in all genres except the dramatic, but apart from a *Sinfonia funebre per la morte di Bellini* (*I-Nc**; piano four-hand arrangement, Milan, 1836), only his songs are of interest. Many are in a Neapolitan popular style, and from 1844 he published several collections in the Neapolitan publisher Girard's series *Collezione completa delle canzoncine nazionali napoletane*, some of which were reprinted about 1853 by Ricordi in Milan. Even in these, however, it is difficult or impossible to determine to what extent they embody genuinely popular material.

In his old age Florimo turned to historical writing. His *Cenno storico sulla scuola musicale di Napoli* (Naples, 1869–71) and the supplementary *Cenni storici sul Collegio di musica S. Pietro a Majella in Napoli* (Naples, 1873)

were enlarged as *La scuola musicale di Napoli e i suoi conservatorii* (Naples, 1880–82/*R*). In sending the first volume to Verdi in 1869, Florimo wrote: 'Without being either a man of science or a man of letters, I have ventured to write a book. If the world only regards my good intentions, then it will have indulgence for me, otherwise I shall be lost'. Florimo's failings as a historian are great, but his collection of unsorted fact, legend and error remains unreplaced and indispensable.

Most of Florimo's other writings are on Bellini. His *Traslazione delle ceneri di Vincenzo Bellini* (Naples, 1877; Florimo arranged for the body to be moved from Paris to Catania) was reprinted with a biography, anecdotes and letters in *Bellini, memorie e lettere* (Florence, 1882). Besides authentic material he published letters, parts or the whole of which he had invented, and made assertions based on 'remembered conversations' that could not have taken place; these for many years bedevilled studies of Bellini. On the occasion of the first Bayreuth Festival Florimo wrote a short, highly antagonistic pamphlet, *Riccardo Wagner ed i wagneristi* (Naples, 1876). After Wagner's visit to Naples in 1880, when he astutely declared to Florimo his predilection for Bellini, Florimo published a much longer second version (Ancona, 1883) in which he praised Wagner and criticized only his fanatical followers.

Florimo was on friendly terms with many figures of his time, including Rossini, Donizetti and Verdi. His view of Italian musical development was that Rossini had been the great revolutionary who had put an end to the old Neapolitan school, but that his style had been replaced by Bellini's, and the Bellinian reform had been carried on by Donizetti and completed by Verdi in *Don Carlos* and *Aida*. His relations with Mercadante were at times strained during the latter's directorship of the conservatory (1840–70). As Walker pointed out, the praise of Mercadante in the *Cenno storico* was much toned down in the second edition of the work, published after Mercadante's death, and in some cases simply reversed by the addition of 'not'. In 1870–71 Florimo unsuccessfully tried to persuade Verdi to become director. Even in extreme old age he continued to live in his beloved conservatory and bequeathed to it 37 volumes of his correspondence, an important source that has only begun to be drawn on by historians; some of these documents showed up his own published falsifications.

Florinda, La. *See* ANDREINI, VIRGINIA.

Florio. *See* FLORI family.

Florio, Charles H(aiman) (*b* *c*1768; *d* Moscow, 1819). British composer, flautist and singer of Italian descent, son of Pietro Grassi Florio. According to Pohl, Florio made his début in London as a flautist in 1782, and Burney lists him as a tenor singer in the Handel Commemoration concerts in 1784. He was engaged as a flautist for Mme Mara's concerts in 1788. His earliest composition appears to be a duet sung by Mrs Bland and Miss Hayley at the end of Act 2 of *Twelfth Night*, performed at the King's Theatre on 31 May 1792.

In the summer of 1794 Elisabeth Mara caused a scandal by leaving her husband and running off to Bath with young Florio. He accompanied her to Dublin in 1796, but despite Mara's great success, Florio, who unwisely described himself as 'first singer at the Hanover Square Concert', was hissed by the audiences. His first complete score, *The Outlaws*, with a libretto by Andrew Franklin, was performed at Drury Lane on 16 October 1798. His most significant work, *The Egyptian Festival* (London, 11 March 1800), written for Mara's first appearance at Drury Lane, was described in the *Monthly Mirror* as one of the 'most magnificent spectacles the stage has for some time produced'.

In 1802 Florio and Mara left London for an extended tour of the Continent. He provided flute solos at her concerts, and she sang some of his songs in an attempt to win him a continental reputation as a composer, but with little success. They travelled first to Paris, to Berlin in 1803, and to Russia in 1807, where Florio remained, though he made some trips to London to participate in unsuccessful financial ventures. Some of his songs were published in London (*c*1795, 1800), including a duet originally sung by Mara and Incledon in *Love in a Village*. He also published three piano sonatas with obbligato flute accompaniment (London, after 1800).

RICHARD PLATT

Florio, Pietro Grassi (*b* before 1740; *d* London, 20 June 1795). Italian flautist and composer. He was in the Dresden court orchestra in 1756. Leaving there about that time, he went probably to Paris and then to London, where, according to Pohl, he first appeared at a concert in 1760. Over the years he appeared in the Bach-Abel concerts and at several theatres (his flute obbligatos to Mrs Sheridan's performances of Handel's 'Sweet Bird' were long remembered); he was also flautist in the orchestra of the Italian opera at the King's Theatre. His last years were darkened by the scandalous liaison of his son, Charles H. Florio, with the celebrated opera singer Gertrud Elisabeth Mara. He published several sets of chamber music, all with flute.

WORKS

6 Sonatas or Duets, 2 fl/vn, op.1 (London, 1763); 6 Sonatas, 2 fl, op.2 (London, *c*1765); 6 Trios, fl, vn, vc, op.3 (London, 1781); 8 Duos, 2 fl, op.4 (The Hague and Amsterdam, n.d.); 6 quatuors, fl, vn, va, vc, arr. from favourite Fr. airs (London, n.d.)

Florius. *See* FLORI family.

Floros, Constantin (*b* Thessaloniki, 4 Jan 1930). German musicologist of Greek birth. After studying law at the University of Thessaloniki (1947–51), he went to the Vienna Music Academy, where he studied composition with Alfred Uhl and conducting with Hans Swarowsky and Gottfried Kassowitz, graduating in both subjects in 1953. At the same time he studied musicology with Erich Schenk at Vienna University as well as art history (with C. Swoboda), philosophy and psychology. In 1955 he obtained the doctorate in Vienna with a dissertation on Campioni. He continued his musicological studies with Husmann at Hamburg University (1957–60), where in 1961 he completed his *Habilitation* in musicology with a work on the Byzantine kontakion. In 1967 he became supernumerary professor, in 1972 professor of musicology and in 1995 professor emeritus at the University of Hamburg. He received the honorary doctorate from the University of Athens in 1999.

He is the co-editor of the *Hamburger Jahrbuch für Musikwissenschaft* and in 1988 he founded and became president of the Gustav Mahler Vereinigung, Hamburg. In 1992 he was elected a member of the Erfurt Akademie der gemeinnützigen Wissenschaften and in 1999 was made an honorary member of the Richard Wagner-Verband.

Floros is one of the leading German musicologists and his research interests are varied. His three-volume *Universale Neumenkunde* (1970) overturned previous theories concerning the origin of Gregorian neumes. In his treatise *Gustav Mahler* (1977–85), and his writings on other composers of instrumental music in the 18th and 19th centuries, he examined the semantic meaning of the symphony alongside theories of the dominance of absolute music. He also carried out pioneering research on the music of the Second Viennese School, in particular Alban Berg; he discovered the hidden programme for Berg's Lyric Suite before the relevant sources were found. His view of 'Musik als Autobiographie' characterizes his books on Berg (1993) and Ligeti (1996) and connects musical aesthetics with everyday circumstances.

HANS HEINRICH EGGEBRECHT/PETER PETERSEN

Flos (pl. *flores*) (Lat.: 'flower'; Fr. *fleuretis*). A species of vocal embellishment. Hieronymus de Moravia (late 13th century) gave this definition: 'est autem flos armonicus decora vocis sive soni celerrima procellarisque vibratio' – an 'ornamental vibration of the voice, or a very rapid

rippling of the sound' – that is, a shake. He described three types of 'flowers': long, open and sudden. 'Long flowers' resemble a slow vibrato, taking the note a semitone above the note to be graced. 'Open flowers' are slow, taking the tone below. 'Sudden flowers' begin slowly and gradually gather speed, using the interval of a semitone. Describing these ornaments in connection with plainchant, the author warned against applying them indiscriminately. Five notes are singled out for embellishment: the first, last and penultimate notes to be graced with long flowers, the second note of the first syllable with open flowers, and the long plica with sudden flowers. Singers may insert several short notes between this ornamental plica and the next note 'to make the melody more elegant'.

The addition of flowers was reserved for festal performance and was omitted during times of penance or mourning:

> Enffans du cueur, ne faictes plus leçons
> De fleuretiz, mais note contre note
> Sur Requiem, en doulcettes façons.

(Guillaume Crétin: *Déploration sur le trespas de feu Okergan*)

In the 18th century Lebeuf used the term *fleuretis* as synonymous with *chant sur le livre* (p.110).

MARY BERRY

Flosman, Oldřich (*b* Plzeň, 5 April 1925; *d* Prague, 12 Oct 1998). Czech composer. He studied at the Prague Conservatory with Karel Janeček, and at the academy with Bořkovec (1946–50). After a period as secretary of the composition department of the academy, he acted as artistic director of the Army Arts Ensemble from 1951. He left his appointment to devote time to composition, and to work on behalf of the Pragokoncert agency. He became a committe member of the Union of Czech Composers in 1971, and in 1977 was appointed director of the Czechoslovak performing rights society. His early music was much influenced by Czech folksong. He then turned in the direction of Shostakovich and Prokofiev and thereafter succeeded in developing a highly individual style, most noticeably in the Second Violin Concerto, dedicated to Gertler, who gave the première at the 1973 Prague Spring Festival, and in *Michelangalův kámen* ('Visions of Michelangelo'), written for the Czech violist Lubomír Malý. Flosman received many honours during his lifetime, among them the State Prize (1974) and the titles Artist of Merit and National Artist.

Flöte (i) (Ger.). *See* FLUTE.

Flöte (ii) (Ger.). *See under* ORGAN STOP (*Flute*).

Flötenbass (Ger.). *See under* ORGAN STOP (*Bassflute*).

Flötenuhr (Ger.). A flute-playing MUSICAL CLOCK, a MECHANICAL INSTRUMENT producing its sounds from organ pipes activated by pinned cylinders. Mozart, Haydn, Beethoven, C.P.E. Bach and other late 18th- and early 19th-century composers wrote for the instrument.

Flothuis, Marius (Hendrikus) (*b* Amsterdam, 30 Oct 1914). Dutch composer and musicologist. After studying musicology with A. Smijers and K.P. Bernet Kempers at Amsterdam University he was assistant to the artistic director of the Concertgebouw Orchestra (1937–42). During the later years of the war he was interned in concentration camps. After the war he worked as a librarian and music critic before returning to the Concertgebouw in 1953; two years later he was appointed artistic director. In 1974 he left this post to become professor of musicology at Utrecht University until his retirement in 1982. From 1980 to 1994 he was president of the Zentralinstitut für Mozartforschung in Salzburg. Although Flothuis had no instruction in composition, in 1922 he wrote a cadenza for Haydn's keyboard concerto in D, and this was followed by several piano pieces and an incidental score for Sophocles' *Philoktetes*; all the music composed before 1934 has been withdrawn. Important works of the 1940s and 1950s include the Horn Concerto (1945), the charming *Four Trifles* (1948) the *Sonata da Camera* for flute and harp (1951) and the lyrical String Quartet no.1 (1952), winner of the Professor van der Leeuw Prize. *Symfonische muziek* (1957) is a brilliant score somewhat in the vein of César Franck. The first three movements are cyclical, with a single motif linking a vivid scherzo-like Allegro, a funeral march and a tempestuous Allegro agitato, while the finale is a passacaglia built on a related theme. In the symphonic song *Hymnus*, awarded the Johan Wagenaar Prize, Flothuis presents an accurate musical realisation of the hope and despair permeating Ingeborg Bachmann's poem

An die Sonne. Flothuis's music is in general lyrical and intimate, tonal and extensively contrapuntal.

JOS WOUTERS/LEO SAMAMA

Flotow, Friedrich (Adolf Ferdinand) Freiherr **von** (*b* Toitendorf [Teutendorf] estate, nr Neu-Sanitz, Mecklenburg-Schwerin, 27 April 1812; *d* Darmstadt, 24 Jan 1883). German composer. He is best remembered for his romantic comic opera *Martha*, which continues to be staged; the aria 'Ach so fromm' (and in its Italian version as 'M'appari tutt' amor') has become a staple of the tenor aria repertory.

1. LIFE. Flotow was born into one of the oldest aristocratic families of Mecklenburg. Both parents were musical, and he began composing as a child, receiving his first musical instruction from his mother and from Thiem, the local organist. He resisted his parents' wish that he enter the diplomatic service, and in 1828 was taken by his father to Paris, where his musical education was entrusted to Reicha and the Mannheimer Johann Peter Pixis. By the following year he had already been offered the libretto of *Pierre et Cathérine* by Jules-Henri Vernoy De Saint-Georges, who during the ensuing four decades was to provide Flotow with eight further librettos (including that for a ballet, *Lady Harriette, ou La servante de Greenwich*, in 1844, which was to become the basis of *Martha*). The 1830 Revolution caused the composer to return to Mecklenburg, where he completed *Pierre et Cathérine* and had it translated into German by his uncle; as *Peter und Kathinka* it was performed in Ludwigslust, Mecklenburg, in 1835. By 1831 Flotow had already returned to Paris, where he continued composing. During this period he also made the acquaintance of prominent artistic and aristocratic figures there, which helped him

towards having Parisian performances of his works, and it was at the *hôtel* of Count Castellane, where aristocratic families ran their own private amateur theatre, that works such as *Rob-Roy* and *Alice* were performed in 1836–7. His first professional performances were of pastiche works to which he contributed, a situation that arose often owing to the tight schedules of theatres whereby portions of a work were given to various composers to write in time for the opening night. The play *Le comte de Charolais* (1836) was such a work, and Flotow gladly accepted the opportunity to write several numbers for it, including a waltz and a hunting chorus. The work was performed at the Théâtre du Palais Royal and served to draw Flotow's abilities to the attention of a wider public.

The first important theatre to mount his works was the Théâtre de la Renaissance with two pastiches: in 1838 *Lady Melvil* (where Flotow's name was not even mentioned; the other composer, Albert Grisar, took all the credit), and in 1839 *L'eau merveilleuse*, for which Flotow wrote much of the music. His first real box office success, however, was *Le naufrage de la Méduse* (later enlarged as *Die Matrosen*), to which he contributed the last two acts, also performed at the Théâtre de la Renaissance (54 times in 1839 alone). In 1840 *La duchesse de Guise* (originally *Le comte de St-Mégrin*) was given an amateur charity performance as *Le duc de Guise* for Polish refugees at the Salle Ventadour, and it was there that Flotow met Friedrich Wilhelm Riese, a poet and translator for the Thalia-theater in Hamburg, who was in Paris looking for new vaudeville comedies to translate into German for performances at home. It was Riese, under the pseudonym W. Friedrich, who was to create the librettos for the only two operas which were to bring Flotow lasting fame, *Alessandro Stradella* (1844) and, particularly, *Martha, oder Der Markt zu Richmond* (1847). Flotow's greatest ambition, however, was to make his name as an opera composer in Paris, and his first performance at a major opera house there (by the Opéra-Comique at the Salle Favart) was in 1843 with the one-act *L'esclave de Camoëns* (later enlarged as *Indra*). He was finally accepted by the Opéra in 1844 with a contribution to the pastiche ballet *Lady Harriette*, the seed of *Martha*. In the meantime *Alessandro Stradella* had been performed in Hamburg in 1844 and within a year was such a success there, and in Berlin, Vienna, Budapest and Prague, that Flotow received a commission to write a new German opera for the Hoftheater in Vienna. He offered Friedrich the *Lady Harriette* plot, and *Martha* was the result. *Martha* was first performed at the Kärntnertortheater in 1847, with immediate success. By 1858 it had already been played across Europe and as far afield as Algiers, San Francisco and Sydney.

In the mid-1840s, still living in Paris, Flotow continued to write French operas, many of which were translated and performed in Germany. The Revolution in Paris caused him to leave France again in 1848, and he returned to Mecklenburg where he had inherited the family estates from his father, who had died the previous year. There he married and had a son; his wife and child died in 1851. In 1850 *Sophie Katharina, oder Die Grossfürstin* was performed in Berlin and he received the Mecklenburg-Schwerin Goldene Verdienstmedaille für Kunst und Wissenschaft in recognition of his achievements. His next moderate success was his second version of *L'esclave de Camoëns*, *Indra*, which had its première in Vienna (1852). As a result of his growing reputation in Vienna, he now moved there, where in 1853 he married his second wife, who bore him three children, only two of whom were to survive into adulthood. In 1855 Flotow was appointed director of the grand-ducal court at Schwerin in Mecklenburg, where he remained until 1862. There he was in charge of the incidental music for the court celebrations, directed performances of opera and ballet at the Hofoper and continued to compose operas for Vienna and Berlin. He achieved modest successes in 1859 with *La veuve Grapin* and incidental music to Shakespeare's *The Winter's Tale*.

In the 1860s Flotow's opera premières were being staged as a matter of course right across Europe. He married for the third time in 1868, having divorced his second wife, and went to live on his new wife's estate in Reichenau in Austria, where he continued to compose. His last success was *L'ombre*, which was performed in Paris in 1870 by the Opéra-Comique. The Franco-Prussian war of 1870 caused a wave of anti-German sentiment in Paris which had a negative effect on Flotow's fortunes there. His *La fleur de Harlem* (completed in 1874), which he may have begun as early as 1866 and which had been accepted by the Opéra-Comique, could now no longer be performed there and had its première in Turin in 1876 as *Il fiore d'Arlem*. In 1873 Flotow finally left Paris and returned to the family estate in Toitendorf, where he resumed work on his most problematic opera; what had started as a French work, the one-act *L'esclave de Camoëns*, in 1843, and been extended to three acts in 1852 as *Indra* with a German text, he now revised and further enlarged to four acts for an Italian première as *Alma l'incantatrice*. Animosities in France having subsided, however, Flotow was able to obtain a performance of the new work in Paris in a French version, as *L'enchanteresse*. In addition, *Indra* was also known at various times as *Zora*, *Die Hexe* and possibly *Griselda*, making a total of seven different names and three different languages used by the composer for this work alone. In 1880 Flotow moved to Darmstadt, where he spent his last years almost blind. He died, as the result of a stroke, at the age of 70.

2. Works. Between Weber's death (1826) and Wagner's *Rienzi* the history of German opera lay primarily in the hands of Kreutzer, Spohr, Marschner, Lortzing, Nicolai and Flotow. Flotow's musical style is a synthesis of German and French influences. On the German side he may be grouped with Lortzing and Nicolai, with whom he shared a north German musical heritage. These three cheerful, if modest, talents were in turn all influenced by their francophile compatriot Meyerbeer, much of whose cantilena, esprit and orchestration shed its light on their works. But while Meyerbeer is best known for his serious works, these three are remembered today for their comic operas. This Berlin school of composers possessed a profound sense of the stage that German contemporaries such as Schubert, Mendelssohn or Schumann lacked. Flotow's French models can be sought in composers like Boieldieu, Auber and Adam: indeed the comic bandits Malvolino and Barbarino in *Alessandro Stradella* find their musical ancestors in Auber's Giacomo and Beppo (*Fra Diavolo*). Whereas Nicolai combined German Singspiel with *opera buffa*, Flotow was to merge the Singspiel with *opéra comique* to create a kind of French Biedermeier opera, a fusion of styles which had its dramaturgical

justification and precedent. Just as Mozart, in *Don Giovanni*, had fused elements of *opera buffa* and *opera seria*, and Beethoven, in *Fidelio*, had combined the Singspiel with an emerging Romantic music drama, so Flotow, in *Martha*, reserved the Singspiel style for his buffoonish and peasant characters (Nancy, Plumkett and the maids of Richmond) and the sustained, bel canto French Romanticism of *opéra comique* for the lovers Martha and Lyonel (see illustration).

For that reason, Flotow's own description of his works as 'romantic' (*Alessandro Stradella*) or 'romantic comic' (*Martha*) has met with some objection: the former fits rather the description of an *opéra comique*. Meyerbeer referred to *Martha* in his diary as a 'komische Oper (eigentlich semiseria)'. What distinguishes such works as *Alessandro Stradella*, *Martha* or *Indra* (originally *L'esclave de Camoëns*) from *opéras comiques* is that (by contrast, for example, with Lortzing) Flotow omits spoken dialogue and links the numbers with short recitatives, achieving an uninterrupted musical flow. It is perhaps rather the manner of performance of these works that determines which of Singspiel or *opéra comique* is to predominate. In Flotow's two most successful works, *Alessandro Stradella* and *Martha*, a balanced fusion of all stylistic elements is achieved. The former is perhaps the better work, but it was *Martha* that found its way into the hearts of the public. The reason for this lies not only in the quality of the text and the music, but also in the dramatic situations which keep the audience in a state of amused suspense.

Flotow's musical style is characterized by simple harmonies, pithy and gracious rhythms, and short musical forms, among which he often uses dance movements (tarantella, gavotte, mazurka or polka) as the basis for his arias. His melodies are catchy, often italianate, and he is musically most successful when he confines himself to the strophic song with facile melodies. The inclusion of simple folksongs as local colour further adds to the attractiveness of his works, for example the Irish folksong 'The Last Rose of Summer' in *Martha* (which is used to great effect as a leitmotif), or the Hohenfriedberger March and Russian folksong in *Sophie Katharina*. Within the framework of a completely homophonic style, contrapuntal or even motivic writing is only occasionally found and is a little incongruous, such as the moment in the overture to *Martha* where he combines a cheeky motif (symbolizing Martha's flirtations) with Lyonel's heartfelt 'Mag der Himmel Euch vergeben'. In *Die Matrosen* (originally *Le naufrage de la Méduse*) there is a canon to the amusing alliterative text 'O Du, der Du, die, die Dir dienen'. Flotow's instrumentation is well considered and effective, playing host to the melody and thematic material in parlando sections; in the last works an increasing refinement of orchestral technique can be observed. It is perhaps not surprising that his basically lyrical style is least convincing when a plot such as *Indra*'s calls for an exotic Iberian-Indian treatment, a musical exoticism familiar from *L'Africaine*, *Carmen* or *Samson et Dalila*. Here Flotow's French Biedermeier *Spieloper* shows its limitations. At their best, his works are a fascinating Franco-German link in the chain from 18th-century Italian *opera buffa* to Arthur Sullivan in England.

Flotow's librettos are based on works by authors as varied as Kalidasa, Shakespeare, Massinger, Racine,

Spinning scene from Flotow's 'Martha', Act 2, with the principals from the original production, Kärntnertortheater, Vienna, 1847; engraving by Andreas Geiger after ?J. Cajetan, 1848

Goldoni, Scott, Dumas and Soulié. A certain emphasis on historical figures is evident: the statesmen Henri III of France (*Le comte de St-Mégrin*) and Peter the Great (*Pierre et Cathérine*); the religious reformer Johann Albrecht of Mecklenburg, the poet Camões (*L'esclave de Camoëns*), and the composers Stradella and Mozart (*Die Musikanten*). Among the mythical subjects are Thetis, Medusa and Rübezahl. Using the pseudonym Marckwort, Flotow himself made excellent translations of some of his French works into German. His most prominent librettists were Salomon Hermann Mosenthal (who wrote the text for Nicolai's *Die lustigen Weiber von Windsor*), Léon Halévy (brother of the composer) and Charlotte Birch-Pfeiffer (who helped Fétis prepare the final version of Scribe's libretto for *L'Africaine*).

A comprehensive survey of Flotow's works today presents almost insurmountable difficulties. At least 14 of them are lost, parts of which were no doubt re-used later. At least eight works are known to have been rearranged by Flotow. An exact correlation of lost and re-used material is therefore no longer possible. Many of his works also received new titles with each arrangement or even performance, to say nothing of the translations. At least six were written in collaboration with other composers, sometimes, especially the earlier ones, without even mention of Flotow's name. A realistic estimate of the number of Flotow's operas is about 30. Ironically, although he dedicated his life to French opera, and composed mainly French and what might be called Franco-German works, his adopted country never fully returned the compliment. It is perhaps no coincidence that his only lasting successes were two works which, as French as they are in spirit and style (Gustav Kobbé originally classified *Martha* as a French opera), were thoroughly German in their composer, their librettists, their texts and their premières. It may be added that it took *Martha* 11 years to reach Paris and *Alessandro Stradella* 19 years; both were first performed there in Italian. Conversely, the one theatre where almost all his works were performed as a matter of course was the court opera house of Schwerin in Mecklenburg, the land of his birth.

A truer reflection of how widely disseminated Flotow's operas were can be gained if the performances of his works in such a city as Hamburg are considered. There *Martha* alone had enjoyed 440 performances by 1955 and *Alessandro Stradella* 218 by 1932. Nine other works performed at some time or other in Hamburg never exceeded 16 performances (*Die Matrosen*), and these nine played an average of five performances each. Nonetheless, *Martha* and *Alessandro Stradella* have earned Flotow 15th place among Hamburg's most-played opera composers, just after Beethoven and Offenbach. During the 19th century Flotow's fame was such that many parodies and potpourris of his works appeared, for example Nestroy's *Martha, oder Die Mischmonder Markt-Mägde-Mietung* in three acts to music by Michael Hebenstreit (1848), Offenbach's one-act *La romance de la rose* (1869) and Johann Strauss's *Quadrilles*, op.46 on themes from *Martha*, and op.122 on themes from *Indra*. Perhaps of interest is that almost every decade of the 20th century has borne witness to the revival of one or another unknown work by Flotow: *Indra* and *Wintermärchen* were still being played until well into the century; in 1922 and 1943 *La veuve Grapin* was revived; in 1925 and 1933 *Zilda* was played, under the title *Fatme*; and in 1934 *L'ombre* and *Rübezahl* were staged. Blacher's opera *Das Zauberbuch von Erzerun* (1942) is based on music by Flotow.

Although Flotow's creative career was dominated by opera, he also wrote works in other genres throughout his life, most of which are lost. In his early years he seemed to have had ambitions as an orchestral composer, and two piano concertos, a symphony and a concert overture (the latter both lost) all date from this period. In his later years his non-operatic compositions became increasingly modest in scope, consisting mainly of songs, piano works and chamber music for various traditional combinations of instruments, including two piano trios and two string quartets of which the first has recently been rediscovered. Some of Flotow's song texts are in French and Italian, but most are settings of German verses, intended for use in his native Mecklenburg-Schwerin, where he was always held in high esteem. He also composed several melodramas. Flotow's chamber and orchestral works, often akin to Mendelssohn in style, are composed with careful attention to detail and, like his operas, are characterized by deft instrumental writing, graceful melody and clear, light textures.

WORKS

STAGE

Pierre et Cathérine (op, 2, J.H. Vernoy de Saint-Georges); Ger. trans., Ludwigslust and Schwerin, 1835

Die Bergknappen (op, 2, T. Körner)

Alfred der Grosse (op, 2, Körner)

Rob-Roy (Rob le barbe) (oc, 1, P. Duport and P.J. Desforges, after W. Scott), Royaumont Castle, Sept 1936

Sérafine (oc, 2, Desforges, after F. Soulier), Royamount, 30 Oct 1836

Le comte de Charolais (incid music, Duport and Desforges, after P. Massinger and N. Field), Paris, Palais Royal, Nov or Dec 1836

Alice (oc, 2, H. de Sussy and D. de Laperrière), Paris, Hôtel Castellane, 8 April 1837

Stradella (pièce lyrique, 1, Duport and P.A. de Forges), Paris, Palais Royal, 1837

La lettre du préfet (oc, 1, E. Bergounioux), Paris, Salon Gressier, 1837, rev. 1868

Le comte de Saint-Mégrin (La duchesse de Guise) (opéra, 3, F. and C. de la Bouillerie, after A. Dumas *père*: *Henri III et sa cour*), Royaumont, 10 June 1838; rev. as Le duc de Guise, Paris, Ventadour, 3 April 1840; Ger. trans., Schwerin, 24 Feb 1841

Lady Melvil (oc, 3, Saint-Georges and A. de Leuven), Paris, Renaissance, 15 Nov 1838, collab. A. Grisar; rev. Grisar as Le joaillier de Saint-James, 1862

L'eau merveilleuse (opéra bouffe, 2, T.M.F. Sauvage), Paris, Renaissance, 30 Jan 1839, collab. Grisar; Ger. trans. as Das Wunderwasser, vs (Mainz, n.d.)

Le naufrage de la Méduse (opéra, 3, H. and T. Cogniard), Paris, Renaissance, 31 May 1839, Act 1 by A. Pilati; excerpts (Paris, n.d.); rev., expanded as Die Matrosen, Hamburg, 23 Dec 1845, vs (Hamburg, 1845)

Lady Harriette, ou La servante de Greenwich (ballet, 3, Saint-Georges and J. Mazilier), Paris, Opéra, 21 Feb 1844, Act 2 by R. Burgmüller, Act 3 by E. Deldevez

L'esclave de Camoëns (oc, 1, Saint-Georges), Paris, Opéra-Comique, 1 Dec 1843; rev., enlarged as Indra, das Schlangemädchen (3), Vienna, 18 Dec 1852; as Alma l'incantatrice (4), Paris, Italien, 6 April 1878 [also known as L'enchanteresse, Die Hexe, Zora ? and Griselda

Alessandro Stradella (romantische Oper, 3, Friedrich), Hamburg, Stadt, 30 Dec 1844; numerous scores pubd

Lâme en peine (Der Förster; Leoline) (opéra, 2, Saint-Georges), Paris, Opéra, 29 June 1846; (Paris, n.d.), Ger. (Hamburg, ?1847)

Martha, oder Der Markt zu Richmond (romantische-komische Oper, 4, Friedrich), Vienna, Kärntnertor, 25 Nov 1847; vs (Vienna, ?1847), fs (Leipzig, 1940); *US-STu**

Sophie Katharina, oder Die Grossfürstin (romantische-komische Oper, 4, C. Birch-Pfeiffer), Berlin, Hof, 19 Nov 1850; vs (Berlin, 1850)

Rübezahl (romantische Oper, 3, G.H. Gans zu Putlitz), Retzien, 13 Aug 1852 [privately], Frankfurt, 26 Nov 1853 (Berlin, 1853)
Albin, oder Der Pflegesohn (opera, 3, S.H. Mosenthal, after *Les deux savoyards*), Vienna, Kärntnertor, 12 Feb 1856; rev. as Der Müller von Meran, Gotha, 15 Jan 1860
Die Libelle (La demoiselle, ou Le papillon ou Dolores) (ballet, 2, Markwort), Schwerin, 8 Aug 1856
Herzog Johann Albrecht von Mecklenburg, oder Andreas Mylius (opera, 3, E. Hobein), Schwerin, 27 May 1857
Pianella (komische Oper, 1, E. Pohl, after C. Goldoni *La serva padrona*), Schwerin, 27 Dec 1857 (Paris, 1860)
Die Gruppe der Thetis (ballet), Schwerin, 18 Aug 1858
Wintermärchen (incid music, 4, W. Shakespeare, trans. F. von Dingelstedt), Weimar, Hof, 23 Oct 1859
La veuve Grapin (Madame Bonjour) (opéra comique, 1, de Forges), Paris, Bouffes-Parisiens, 21 Sept 1859 (Paris, ?1859); Ger. trans., Vienna, Theater am Franz-Joseph-Kai, 1 June 1861, vs (Berlin, n.d.)
Der Tannkönig (ballet, 2, Hobein and A. Rossi), Schwerin, 22 Dec 1861
Wilhelm von Oranien in Whitehall (incid music, 5, Ganz zu Putlitz), Schwerin, 2 Oct 1861
Der Königsschuss (Divertissement) (ballet, 1), Schwerin, 22 May 1864
La châtelaine (Der Märchensucher) (op, 2, M.A. Grandjean), Vienna, Karl, Sept 1865; rev. K. Treumann as Das Burgfrälein
Naida (Le vannier) (op, 3, Saint-Georges and L. Halévy), St Petersburg, 11 Dec 1865 (Milan, n.d.)
Zilda, ou La nuit des dupes (oc, 2, Saint-Georges, H.C. Chivot and A. Duru), Paris, Opéra-Comique, 28 May 1866; vs (Paris, 1866); Ger. trans. as Fatme, vs (Berlin, *c*1925)
Am Runenstein (op, 2, R. Genée), Prague, 13 April 1868 (Leipzig, 1868)
Die Musikanten (La jeunesse de Mozart) (komische Oper, 3, Genée), composed ?1869–70, Mannheim, 19 June 1887; Ger. vs (Leipzig, 1890)
L'ombre (oc, 3, Saint-Georges and de Leuven), Paris, Opéra-Comique, 7 July 1870; vs (Paris, 1870); Ger. trans. as Sein Schatten, Vienna, Wien, 10 Nov 1871 (Berlin and Posen, ?1871)
Le fleur de Harlem (op, 3, Saint-Georges and de Leuven, afer Dumas *père*: *Le tulipe noir*); It. trans., Turin
Rosellana (op, 3, de Lauzières), Vittorio Emanuele, 18 Nov 1876 (Turin, 1876)
Sakuntala (op, 3, C. d'Ormeville, after Kalidasa), inc.
1 aria in La champmeslé (Duport, ? after Racine), Paris, Nouveautés, 11 Feb 1837

MELODRAMAS

Der Deserteur, acc. hp, hn, str, pf, lost; Der Blumen Rache (F. Freiligrath), acc. str, pf, rev. for pf, op.16 (Berlin and Posen, 1876); Der Schweizer-Soldat in Bologna; Die Heimkehr; Die Harfe, acc. hn, str, pf; 3 Poems (Franz Freiherr von Gaudy), acc. hn, str

VOCAL

Choral: Mass, solo vv, vv, orch, inc.; Dorf-Messe, male vv; Das Waldvögelein (J.N. Vogl), 4 male vv (Leipzig, n.d.); Songs for the Viennese artists' fraternity 'Grüne Insel': Aufnahmslied (I. Castelli), also as Wilkommslied (O. Prechtler), Pilgrimslied (Prechtler), Jubellied (J. von Paümann), all for male vv, pf; Abschiedslied, B, unacc. male vv
Songs with pf: Maria (E. Plouvier) (Paris, ?1840); Rêverie (N. Duff) (Paris, ?1840); 4 Savoyardenlieder (A. Alberti), op.17 (Rostock, 1875): Der Abschied, Die Ankunft, Vor dem Palast, Im Sterben; 3 Lieder und Balladen (Alberti) (Dresden, n.d.): Heimweh, Lied der Amme, Frühlingswunsch; 4 Lieder (Berlin, 1883): Zum Scheiden (C. Stieler), Grüss dich Gott (O. Roquette), Fahr' wohl (E. Geibel), Der Landsknecht (Geibel); 3 Lieder (Berlin, n.d.): Silvia, Serenade, Sehnsucht nach der Nachtigall
Other songs (1v, pf), all lost: 6 Lieder: Wiegenlied, Sehnsucht, Das Gruseln, Müller, hab' acht, Maiennacht, Mädchenlied; Der blinde Musikant (G.L. Mohr), Die Drei (N. Lenau); Für mich alleine (M.G. Saphir); Les hirondelles (Marquis de Foudras); Künstlers Erdenwallen (Markwort); Lied eines Schmiedes (Lenau); Die Madonna (T. Oliphant); Schlummergesang (Markwort) [=Serenade (A. Tastu)]; Ständchen (Saphir), also for S, A, T, B (hp, ob)/(pf, vn/fl); Der Holunderbaum, ballad, Das Kreuz am Weg, Mama die Muhme (K. Schäfer), Star and Spatz

INSTRUMENTAL

Orch: Sym., 1833, lost; 2 pf concs., no.1, a, 1830, no.2, c, 1831; Ov., D, 1830, lost, arr. pf 4 hands, op.4; Jubel-Ouverture, F, 1857 (Leipzig, n.d.; Hamburg, n.d.); Fackeltanz, E♭
Chbr: 2 str qts, no.1, C, no.2, lost; Trio de salon, vn, vc, pf, a, *c*1845 (Leipzig, n.d.); Trio no.2, vn, vc, pf (Leipzig, n.d.); Sonata, A, vn, pf, op.14 (Leipzig, n.d.); 6 études, pf 4 hands, op.15 (Rostock, 1874); 6 rêveries, 6 chants du soir, vc, pf, collab. Offenbach (Leipzig, n.d.); Nocturne concertant, ob, pf, op.47; Nocturne, ob, vn, pf, collab. C. Wacker (Paris, n.d.); Fantasie, fl, pf, collab. L. Coninx; L'écho du bocage, romance, fl, obbl, pf, collab. Coninx (Paris, n.d.)

PETER COHEN

Flotzinger, Rudolf (*b* Vorchdorf, Upper Austria, 22 Sept 1939). Austrian musicologist. While at the Vienna Academy, where he was a composition pupil of Schiske (1958–64), he studied at Vienna University with Erich Schenk and Walter Graf (1959–64); later he studied in Göttingen with Husmann (1966–8). He took the doctorate in 1965 with a dissertation on lute tablatures in Kremsmünster and in 1969 completed the *Habilitation* at Vienna University with a work on music at Notre Dame. In 1971 he succeeded Othmar Wessely as professor at Graz University; in 1999 he resigned. His main areas of research are medieval music (particularly early polyphony) and the music history of Austria. From 1992 until 1999 he was editor of *Acta musicologica*. He is a member of several academies and scientific societies.

RUDOLF KLEIN

Flourish. A term applied to various kinds of short preludial (occasionally postludial) pieces, originally improvised but later often written out.

In stage music the term usually refers to a call of the fanfare type, generally for trumpets with or without drums but sometimes for other instruments. Elizabethan dramatists frequently used the word in stage directions in this sense (e.g. Shakespeare, *Antony and Cleopatra*, Act 2 scene vii, 'Sound a Flourish with drummes'). The flourish and the sennet were not identical, as a direction in Thomas Dekker's *Satiromastix* (1601) shows: 'Trumpets sound a florish and then a Sennate'.

In a more specialized sense the term was used in England from the Restoration period to the 18th century to denote a short improvised prelude consisting largely of scales and arpeggios decorating a common chord. Its function was to acquaint the audience with the key of the following piece and, as in the toccata and other preludial forms, to allow the performer to test the tuning and functioning of his instrument and briefly to exercise his fingers in a passage of increasing brilliance in preparation for the performance. Roger North described a flourish as 'sounding the proper accord-notes of an assumed key successively, and then breaking or mixing those notes as may best be done, *dividendo*, *consonando*, or *arpeggiando*, with what elegance and variation the fancy suggests or capacity admitts'. He went on to say that before a piece of ensemble music 'the like may be performed in severall manners by any number of instruments, with perpetuall variety of fancy in each, and no one much regard what another doth; and in all that disorder upon the key the sound will be rich and amazing'.

Although the best performers improvised flourishes, many were printed for the less adept. *Select Lessons for the Violin* (London, 1702) contains *A Florish or Prelude in Every Key* designed to preface pieces in keys from C to F minor on the flat side and to A on the sharp side. The *Florish in C fa ut Natural* arpeggiates the common chord and then makes division on it in precisely the manner described by North (ex.1). That flourishes for several

instruments were used for dramatic effect is apparent from Act 2 of Purcell's *Dioclesian* (1690), where the unaccompanied chorus 'Sound all your instruments' is followed by the direction 'Flourish with all the instruments in C fa ut-Key'. Whether this practice was generally much employed in ensemble music outside the theatre is very doubtful.

With only a little elaboration the flourish becomes a prelude with formed thematic elements developed in rudimentary fashion. Some of the pieces in *Select Preludes or Volentarys for the Violin* (London, 1704), described on the title-page as 'Florishes', fall into this category. That by Purcell (Purcell Society Edition, xxxi, 93) is highly chromatic at the outset, so its main function as a true flourish, to impress the tonic chord on the listener, is no longer so evident.

Military flourishes were decorative trumpet calls or fanfares, more elaborate than the 'duty' and 'routine calls' and unlike them in not necessarily having any stereotyped features or promptly recognizable melodic outlines. Until the 18th century, British Army flourishes were 'without any set rule'; later a fixed notation developed for those intended as salutes for royalty and general officers (*see* SIGNAL).

In the prefatory note to the 'Table of Graces proper to the Viol or Violin' in his *Introduction to the Skill of Musick* (1660), John Playford used the word as synonymous with 'graces' or ornaments, at any rate with the more elaborate shaken graces. Eventually it came to be applied to almost any florid instrumental passage.

MICHAEL TILMOUTH

Flower, Sir **(Walter) Newman** (*b* Fontmell Magna, Dorset, 8 July 1879; *d* Blandford, 12 March 1964). English author, collector and publisher. After training as a writer on various popular journals, Flower joined the publishers Cassell & Co. in 1906 and took over as proprietor in

1927. He was knighted in 1938. His purely literary work includes an edition of the journals of Arnold Bennett.

Flower's musical interests were amateur. His books are marred by a poor literary style and the absence of scholarly discipline, though the use of previously unknown documentary material gives them some value. His important collection of manuscripts and early printed editions of Handel's music (including the bulk of the Aylesford Manuscripts, copied for Handel's friend Charles Jennens) was acquired by the Henry Watson Library, Manchester, in 1965.

ANTHONY HICKS

Floyd, Carlisle (Sessions) (*b* Latta, SC, 11 June 1926). American composer. His ancestors on both sides were among the earliest European immigrants to the Carolinas. During his childhood his father, a Methodist minister, was posted to a variety of small South Carolina towns, and the composer has derived much inspiration from this background. Almost all his operas have southern, rural or colonial settings.

In 1943 Floyd entered Converse College (Spartanburg, SC), where he studied the piano with Ernst Bacon. When Bacon took a position at Syracuse University, New York, in 1945, Floyd followed him there as his pupil (BM 1946); in 1947 Floyd was appointed to the piano faculty of Florida State University in Talahassee; he remained there for nearly 30 years, eventually becoming professor of composition. Until 1955, however, he was primarily a pianist, returning to Syracuse for a master's degree (1949), then taking private piano lessons with Sidney Foster and Firkušný.

While at Syracuse he began to take an interest in composition. Drawing on existing skills as a playwright (as an undergraduate he had won a competition for one-act plays), he wrote his first operas. His third attempt, *Susannah* (an updating of the biblical tale of Susannah and the Elders), proved a tremendous success. Initially mounted in Talahassee in 1955, it was taken up by the New York City Opera and performed in New York in September 1956 to great acclaim, garnering for its composer a New York Music Critics' Circle Award, a Guggenheim Fellowship and several other awards. The work was chosen to represent American opera at the Brussels World Fair (1958), and has since become a repertory item. It remains the linchpin of Floyd's reputation. Of the subsequent operas, *Of Mice and Men* (1969) has achieved the greatest success. In 1976 Floyd left his Talahassee post for an equivalent position at the University of Houston in Texas, becoming also co-director of the Houston Opera Studio. He retired from teaching in 1996.

The guiding spirit of Floyd's operas is a studied, almost draconian pragmatism that makes them attractively easy to stage while limiting the heights to which they can aspire. Casts and orchestras are small; plots, action and scenery uncomplicated. No unusual instruments, voices or theatre technologies are required, nor any great virtuosity in the performers. There is little counterpoint, or any other musical feature that would demand more than minimal rehearsal time.

Musically, Floyd owes a great deal to Ernst Bacon. His work is most readily understood as a nostalgic continuation of the populist 'social realism' of the 1930s and 40s, a style of which Bacon was a characteristic exponent. In Floyd's case, this takes the form of an all-purpose substrate of quartal harmonies with numerous parallel 5ths, supporting melodies imitative of various American folk genres. The later operas, starting with *Of Mice and Men*, display greater chromaticism and metric flexibility.

Dramatically, the operas continue the *verismo* tradition. Floyd, who wrote his own librettos, relied heavily on the dramaturgy for emotional effect: directions for facial expression and the like are unusually detailed, and emotional climaxes are often expressed by moments of silence or in spoken dialogue.

WORKS

STAGE

all to librettos by Floyd

Slow Dusk (musical play, 1), Syracuse, U. of Syracuse, 2 May 1949, vs (New York, 1957)

The Fugitives (op), Talahassee, Florida State U., 1951, withdrawn

Susannah (musical drama, 2), Talahassee, Florida State U., 24 Feb 1955, vs (New York, 1957, 2/1967)

Wuthering Heights (musical drama, prol., 3, after E. Brontë), Santa Fe, 16 July 1958; rev.1959, vs (New York, 1961)

The Passion of Jonathan Wade (op, 3), New York, City Opera, 11 Oct 1962; rev. version, Houston, Wortham, 18 Jan 1991

The Sojourner and Mollie Sinclair (comic op, 1), Raleigh, NC, East Carolina College, 2 Dec 1963, vs (New York, 1968)

Markheim (op, 1, after R.L. Stevenson), New Orleans, Municipal Auditorium, 31 March 1966, vs (New York, 1968)

Of Mice and Men (musical drama, 3, after J. Steinbeck), Seattle, 22 Jan 1970, vs (New York, 1971)

Flower and Hawk (monodrama, 1), Jacksonville, Civic Auditorium, 16 May 1972, vs (New York, 1977)

Bilby's Doll (op, 3, after E. Forbes: *A Mirror for Witches*), Houston, 29 Feb 1976

Willie Stark (op, 3, after R.P. Warren: *All the King's Men*), Houston, 24 April 1981

Cold Sassy Tree (comic op, 3, after O.A. Burns), Houston, Wortham Center, 14 April 2000

OTHER WORKS

Pilgrimage (song cycle, Bible), Bar, orch, 1956; Piano Sonata, 1957; The Mystery (song cycle, G. Mistral), S, orch, 1960; Introduction, Aria, and Dance, orch, 1967; In Celebration, ov., orch, 1971; Citizen of Paradise (song cycle, E. Dickinson), Mez, pf, 1983; A Time to Dance, Bar, chorus, orch, 1994

ANDREW STILLER

Floyd, John. *See* LLOYD, JOHN.

Floyd, Samuel A(lexander), Jr (*b* Tallahassee, FL, 1 Feb 1937). American musicologist and music administrator. His early training was in music education: he graduated from Florida Agricultural and Mechanical University in 1957 (BME) and Southern Illinois University in 1965 (MME). He received the PhD from Southern Illinois in 1969. Floyd taught at Florida Agricultural and Mechanical University (1962–4) and Southern Illinois University (1966–78). He was then appointed director of the Institute for Research in Black Music, Fisk University (1978–83). From 1983 to 1990 he was director of the Center for Black Music Research at Columbia College, Chicago and he was reappointed to this position in 1993.

Floyd's research has centred on the music of Black Americans. He has worked on the bibliography of the field, and his interests include interdisciplinary studies and music in Harlem. He is editor of *Black Music Research Journal* and *Lenox Avenue: a Journal of Interartistic Inquiry*, and artistic director of the Black Music Repertory Ensemble. As a musician, Floyd has been active as a percussionist; he taught percussion instruments and studies at both Florida Agricultural and Mechanical University and at Southern Illinois University. His honours include the Irving Lowens Award from the Sonneck Society for American Music.

PAULA MORGAN

Fludd, Robert (bap. Bearsted, Kent, 17 Jan 1574; *d* London, 8 Sept 1637). English writer and composer. Robert was the seventh child of Sir Thomas Fludd, knight, who lived at Milgate House, Bearsted. He was admitted a commoner at St John's College, Oxford, in 1591, obtained the BA on 3 February 1596 and the MA on 8 July 1598. After six years travelling through Europe teaching, he returned to England and achieved the degrees of MB and MD at Christ Church, Oxford, on 16 May 1605. His unorthodox views, associated with Rosicrucianism, hindered his admission to the College of Physicians, but he was eventually elected a Fellow on 20 September 1609. He practised in London, lived for a time in Fenchurch Street and died unmarried on 8 September 1637 at his home in the parish of St Catherine's, Coleman Street. He was buried in the chancel of Bearsted church on 21 September 1637, where there is an elaborate memorial he designed himself.

Of Fludd's many Latin treatises only a few touch on music. *Utriusque cosmi ... metaphysica, physica atque technica histories* (Oppenheim, 1617–24; see illustration) treats of musical phenomena in tract I, book 3; tract II, part i, book 6, and part ii, book 4. In obscure language and with fantastic diagrams Fludd postulated that the universe was a musical instrument set playing by the soul or spirit of the world. He criticized his contemporary theoreticians Kepler and Mersenne. Kepler's *Harmonices mundi* (1619) attacked Fludd's theories, to which the latter replied in his *Monochordum mundi symphoniacum* (Frankfurt, 1622, 2/1625). Mersenne's *Quaestiones celeberimae in Genesim* (Paris, 1623) also censured Fludd, provoking *Sophiae cum moria certamen* (Frankfurt, 1629) and *Summum bonorum quod est verum* (Frankfurt, 1629) in reply. Fludd's abstruse fantasies leave most agreeing with Hawkins that he was 'a man of a disordered imagination'.

13 trite dances for two trebles and a bass by 'Dr Fludd' (*US-NH* Filmer 3) come from the Filmer home at East Sutton, a few miles from Bearsted. The manuscript dates from the later years of Fludd's life and the pieces may reasonably be assumed to be by him.

The Temple of Speculative Music: engraving from Fludd's 'Utriusque cosmi ... metaphysica, physica atque technica histories' (Oppenheim, 1617–24); the structure embodies various aspects of the theory of music

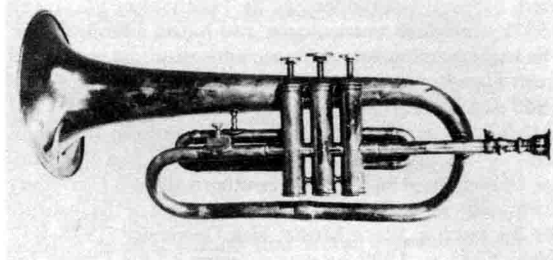
Flude, John. *See* LLOYD, JOHN.

Flue-work. The flue-stops of an organ collectively (as distinct from REED-WORK), i.e. those in which sound is produced on the fipple or flue principle whereby wind is directed through a narrow windway to strike against a lip or edge above. The term refers to the open or stopped Diapasons or Principals, the Flutes, the narrow-scaled, conical, compound and all varieties of metal or wooden stops other than those of the reed-work. The term appears only late in English writings, being absent from such authors as Talbot, Hawkins, Burney, Blewitt etc., who used only the phrase 'reed stops' to distinguish the non-flues. Hopkins and Rimbault (*The Organ*, 1855) gave alternatives: 'lip, mouth or flue pipes – for they are called by all these names', although he himself preferred 'flue'. Some American authors prefer the terms 'labial' (flue) and 'lingual' (reed).



PETER WILLIAMS

Flügel (Ger.: 'wing'). A term used for wing-shaped stringed keyboard instruments. During the 18th and early 19th centuries it was applied to the HARPSICHORD. Later in the 19th century the term came to denote the GRAND PIANOFORTE. The word is also applied to the 'wing' (tenor) joint of the bassoon.

JOHN KOSTER

Flugelhorn (from Ger. *Flügelhorn*; Fr. *bugle, grand bugle*; It. *flicorno soprano*; Sp. *fiscorno*). A valved brass instrument pitched in B♭ with the same compass as the cornet. It has the conical bore, wide bell and large format of its parent the keyed bugle. The mouthpiece cup is deep, almost funnel-shaped, and a sliding mouthpipe serves as the tuning-slide. The tone is round and suave though rougher and bugle-like in loud playing. The flugelhorn plays a leading role in most continental bands as it has done for over a century. Military bands in Britain and America do not use it; however one flugelhorn is an obligatory constituent of the British brass band, in which it is played from the same part as the repiano cornet following the instructions 'unis.' and 'solo' (with the instrument specified).

At the beginningof the 18th century in Germany, the *Flügelhorn* was a large semicircular hunting horn of brass or silver carried by the *Flügelmeister* who directed the wings of a ducal hunt. It became a military instrument during the Seven Years War and from it was developed the BUGLE (i) as known since, at first in a single-wound model, to which Halliday added keys in his keyed bugle of 1810. This was adopted by German bands from 1816, first described as 'Klappenflügelhorn'. Substitution of valves for keys took place in Germany where the Munich manufacturer Michael Saurle registered the privilege for the valved flugelhorn (*Ventilflügelhorn*) in 1832. The

Soprano flugelhorn in E♭ by Gautrot l'aîné, Paris, 1860 (Horniman Museum, London)

resulting instrument made a great impression in France, where Kastner described it in *Cours d'instrumentation: supplément*(Paris, 1844) as 'bugle à pistons (Flügelhorn)' and a 'miraculous transformation of the [keyed] bugle'. It helped suggest to Sax the proportions of his saxhorns, his own valved 'bugle' being practically a bell-to-front model of the B♭ contralto saxhorn and a little smaller in bore than some of the German and Austrian instruments. This was sold in England from about 1846, first as 'soprano saxhorn or bugle'. The name 'flugelhorn' had entered by 1857 probably under the influence of German bandmasters, and brass band journals by then included a part for it exactly as today.

An equally important instrument in the larger continental bands is the small flugelhorn in E♭ (sometimes F) known best in Germany simply as 'Pikkolo' and in France as 'petit bugle' (see illustration). Expressions like 'Altflügelhorn' and 'bugle tenor' denote bell-to-front (trumpet-form) models of 'Althorn' etc., but in Italy 'flicorni alto' to 'contrabasso' are the ordinary deep brass instruments, normally in upright form.

Orchestral uses of the flugelhorn include Respighi's *Pini di Roma*(representing the 'buccine' of a consular army), Stravinsky's *Threni*, Vaughan Williams's Ninth Symphony and works by Tippett. Tim Souster's *The Transistor Radio of St Narcissus* (1982–3) is a substantial work for flugelhorn and live electronics which uses the instrument over a range of three and a half octaves, and the same composer's *Concerto for Trumpet, Live Electronics and Full Orchestra* (1988) employs the instrument for the solo part in two of the movements, 'Beach' and 'Dawn'.

The flugelhorn has been used extensively in jazz in the 20th century. Several players, particularly Miles Davis, have used it in addition to the trumpet, but others have developed the idiom of the instrument in its own right. Chet Baker, Thad Jones and Clark Terry are notable American players, while London-based players such as Harry Beckett, Kenny Wheeler and the lesser-known but highly respected Henry Lowther have established distinguished reputations for their flugelhorn playing.

Flute [concert flute, cross flute, German flute, transverse flute]. (Fr. *flûte, flûte traversière, flûte allemande, flûte d'Allemagne, traversière*; Ger. *Flöte, Querflöte*; It. *flauto*,

flauto traverso, traversa). Term used to refer to a vast number of wind instruments, from the modern orchestral woodwind to folk and art instruments of many different cultures.

See also ORGAN STOP.

I. General. II. The Western transverse flute.

I. General

1. Acoustics. 2. Classification and distribution.

1. ACOUSTICS. Generically, a flute is any instrument having an air column confined in a hollow body – whether tubular or vessel – and activated by a stream of air striking against the edge of an opening, producing what acousticians call an 'edge tone' (*see* ACOUSTICS, §IV, 7); flutes are therefore often called edge-tone instruments. The edge is generally referred to as 'sharp', although sharpness is by no means necessary and may even be a disadvantage, as for example, on the modern orchestral flute – most makers prefer a slightly rounded edge.

The opening is either at one end of a tube, or in the side of a tube or vessel. The air stream may be shaped and directed by the player's lips as on the modern orchestral flute; confined in a channel, or duct, which leads the air across the hole, as on the RECORDER or WHISTLE; or produced by the wind, as in the *bulu pārinda*, a large (up to 10 metres in length) aeolian pipe hung in treetops in Southeast Asia.

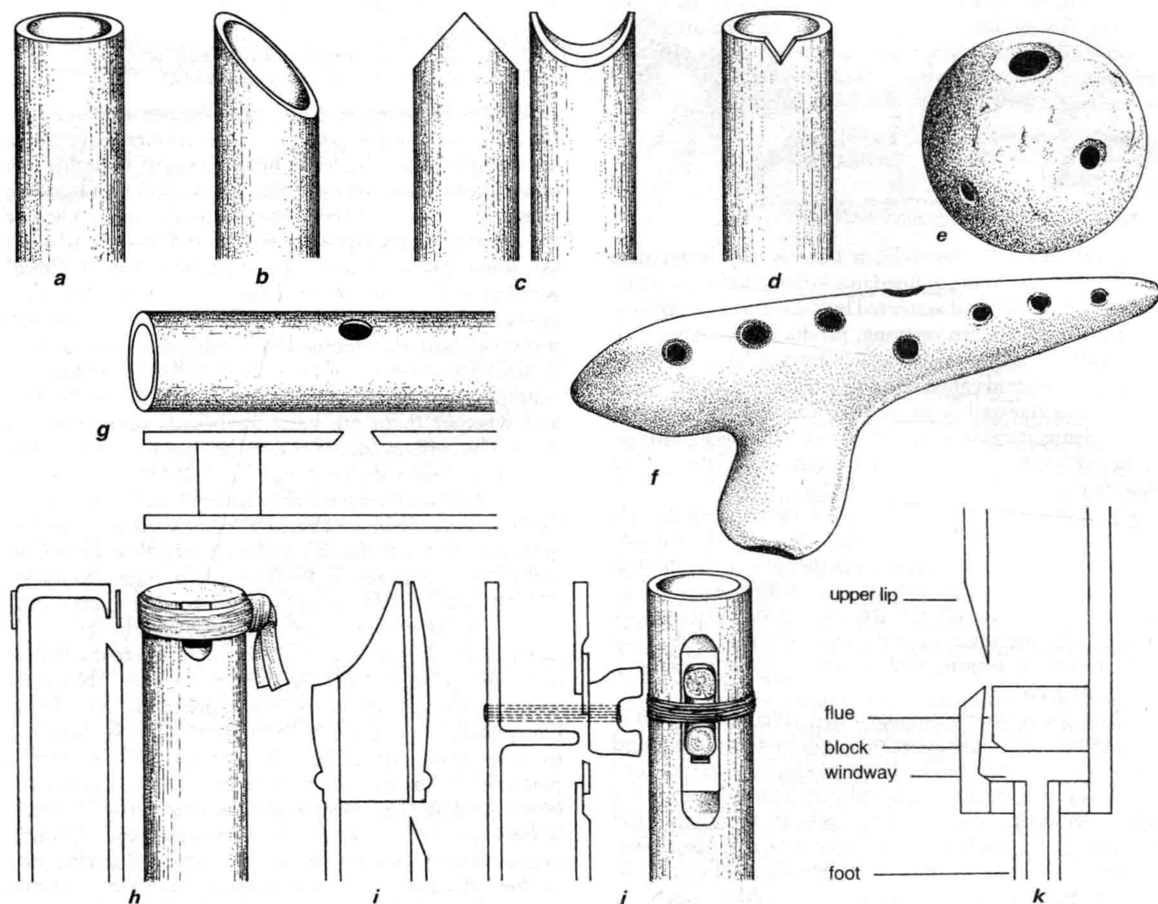
Where the air meets the edge it is divided, peeling off in vortices like miniature swiss rolls, alternately outside and inside the instrument. The pitch produced is determined mainly by the length of the tube or the volume of the vessel, although other factors such as the shape and diameter of the air body and the area of any open holes (including the embouchure hole) are also influential. If, with a tube, the distal end is closed, the length is effectively almost doubled, and the pitch produced is almost an octave lower; 'almost' because the true acoustic length of the open tube is slightly longer than the tube itself, a factor called end-correction. When the end is closed, the length of the tube is doubled but not this slight elongation of the air column, and thus the lower pitch is very slightly sharper than a true octave. If the uppermost range of an open tubular flute is to be playable and the octaves in tune, some conicity in the bore is necessary. This is one reason why the cylindrical Renaissance transverse flute and recorder had a more limited range than the Baroque forms, which had a conical body. When Theobald Boehm reinstated the cylindrical body on the transverse flute (see §4(iii) below), he introduced some conicity into the head joint ('Boehm's parabola'). A similar effect is produced on many other flutes by constricting the diameter of the distal end, often by boring a hole smaller than the diameter of the tube in the natural septum which closes the end of a tube of reed or cane.

2. CLASSIFICATION AND DISTRIBUTION. Flutes are classified in the Hornbostel and Sachs system by the way in which the sound is generated and then by a variety of other criteria. Flutes are:

4 *Aerophones*
42 *Wind instruments proper*
421 *Edge instruments or flutes*, and thereafter
421.1 *Flutes without duct*, either
421.11 *End-blown flutes* (fig.1*a–d*), or
421.12 *Side-blown (transverse) flutes* (fig.1g, or
421.13 *Vessel flutes* (only those without a duct) (fig.1*e*).

These are followed by:

421.2 *Duct flutes*, either
421.21 *Flutes with external duct* (fig.1*h* and *j*), or
421.22 *Flutes with internal duct* (fig.1*f*, *i* and *k*)



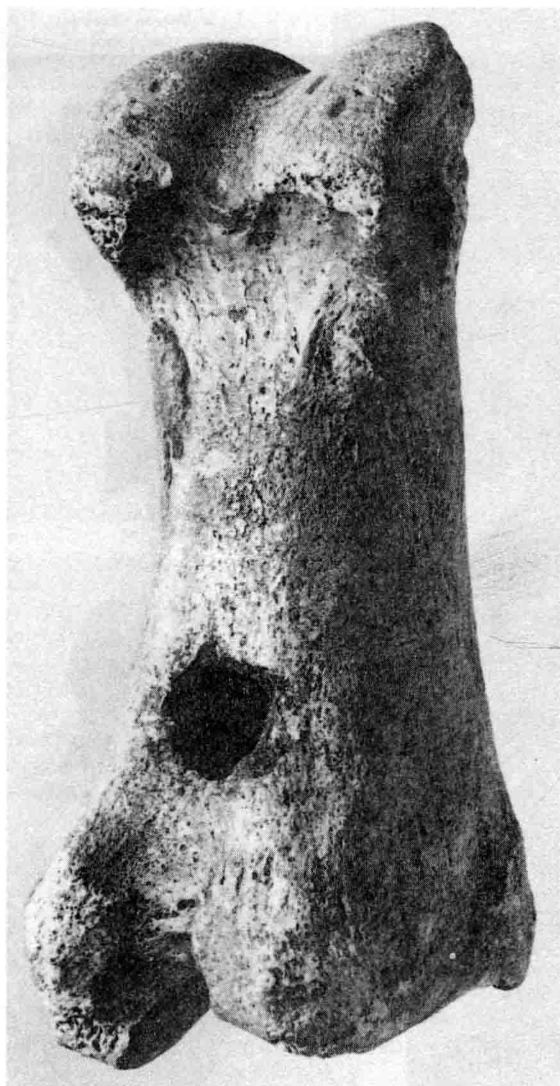
Within these main categories, further numbers are provided to indicate: whether the instruments are single or multiple and if multiple how arranged (whether the tubes of PANPIPES, for example, are in a raft or a bundle); whether they are with or without fingerholes; or whether the distal ends are open, closed, a combination of both (as some panpipes are) or constricted, and if closed whether with a fixed stopper (as some organ pipes) or a movable stopper (such as a PITCHPIPE or a SWANEE WHISTLE). Suffixes preceded by a hyphen are available to indicate the presence of air reservoirs (on the organ, for example) and whether the reservoir is rigid or flexible; and whether there are keys, keyboards or mechanical drive. The suffixes can, of course, be used in combination, so that a barrel organ could be 421.222.11/.31–62–9 (*flutes* (421) *with internal duct* in sets (.222) *open ended without fingerholes* (.11)/also *closed ended without fingerholes* (.31) *with flexible bellows* (–62) *played mechanically* (–9)) whereas a Boehm-system flute would be 421.121.12–71 (*flutes* (421) *side-blown* and single (.121) *open-ended with fingerholes* (.12) *with keys* (–71)).

There are very few parts of the world where the flute is unknown. One is Australia, where the only Aboriginal wind instrument seems to be the didjeridu. Another is Greenland, where the only instrument of the Inuit is said to be the frame drum. Whistles were certainly known in palaeolithic Europe, for pierced animal phalanges have been found at Magdalenian sites in France (fig.2), and it is improbable that bone antedated cane and reed, although of course bone survives far longer as a buried artefact (for further discussion, *see* EUROPE, PRE- AND PROTO-HISTORIC). Equally, it is hard to credit the assertion that no such use existed among the Inuit or the Australian Aborigines.

The most basic form of flute is a tube of reed or cane, stopped at one end and blown across the other. Such instruments, played in sets by a group of people (*see* STOPPED FLUTE ENSEMBLE), each playing a single note in turn in hocket style, are used in a number of areas, for example the *skudučiai* in Lithuania (*see* LITHUANIA, §II, fig.1) and the *nanga* of the Venda of South Africa.

More complex forms, with the tubes combined into a single instrument, are known as PANPIPES and are found almost worldwide. The pipes may be arranged in a raft (fig.3*b*) or a bundle, although the bundle, found mainly in Oceania, is much less common. The pipes are usually arranged in scalar order, although zigzag patterns that suit the musical needs of a particular culture are also used: the best known example is the *rondador* of Ecuador. Also common is an interlocking arrangement, either with half the scale in each of the left and right ends of one raft, as in China or Japan, or divided between two instruments, as is frequent in South America. Rafts are frequently doubled: the *sikus* of Bolivia and neighbouring areas have one rank half the length of the other or one rank closed at the distal end and the other the same length but open. Both produce pitches in approximate octaves.

End-blown open-ended tubes with fingerholes are also widespread, especially throughout North Africa and the Middle East, most commonly under the name of NEY (fig.3*a*). The somewhat more elaborate KAVAL is found in



1. Examples of the variety of apertures and edges found in the flute family: (a)–(d) end-blown flutes: (a) plain rim-blown (e.g. ney, Middle East), (b) obliquely cut rim-blown (e.g. umtshingo, Swazi people, South Africa), (c) cupped rim-blown (e.g. skudučiai, Lithuania), (d) notched (e.g. mlele, Kenya); (e) vessel flute (e.g. shiwaya, South Africa); (f) vessel flute with duct (e.g. ocarina); (g) transverse (side-blown) (e.g. Western orchestral flute); (h)–(j) end-blown duct, or fipple flutes: (h) duct formed by ring of tied rattan (e.g. suling, Indonesia), (i) duct formed by internal plug (e.g. recorder), (j) duct formed by tied-on block of wood (e.g. Apache flute, North America); (k) flue pipe of an organ

Turkey and the Balkans. A characteristic of all flutes is that when blown harder the pitch becomes sharper, and when blown more gently, flatter. With an end-blown flute, the player can compensate for this by altering the angle of blowing and thus covering the open end more or less with the lip – the more covered, the flatter the pitch. Thus the *kaval* and the *ney* are capable of great subtlety in performance, with infinite gradation of tuning and pitch.

The end-blown flute (sometimes called a rim-flute) normally has the rim chamfered externally to produce a better edge and thus aid production of the sound. A variant form has the chamfer at one point only, at the base of a U-shaped or V-shaped notch (fig.3*c*); the sides of the notch help to focus the airstream (*see* NOTCHED FLUTE). Notched flutes are found in Africa, the Pacific Islands, Central and South America, and East Asia. Among them are the Andean KENA, the XIAO of China and the SHAKUHACHI of Japan. A lacuna in the Hornbostel and Sachs system is the lack of any separate provision for the notched flute.

The end- and notch-blown flutes require considerable skill to produce a sound, for it is essential to maintain the correct angle of blowing and speed of airstream. An instrument on which the sound is easier to produce has the notch further down the tube, usually in the form of a rectangular mouth, and a plug almost closing the blowing end (for example, the RECORDER). A narrow passage is left as a duct or windway to lead the air at the correct angle to the sharp edge at the base of the mouth (fig.1*i*). The player has only to blow, and a sound will always result. Thus the DUCT FLUTE is known almost everywhere; such instruments, however, lack the subtlety of tone control available on the end-blown flute.

Three variant forms of duct flute are more limited in distribution. The Indonesian SULING has an external duct, between a strip of leaf or bamboo and the head of the instrument (fig.1*h*), which is thinned in one section of its circumference to form the duct. In North and Central America, and in parts of East Asia, an internal plus external duct is found. The player blows into the end; a plug or a natural septum then forces the air out through a hole; and an external block, tied over the tube above the hole, channels the air along and then down into a mouth (fig.1*j*). Extremely elaborate blocks can be seen on flutes in pre-Columbian Mexican codices, and such flutes

2. *Single-note whistle made out of a reindeer phalange (c10,000 BCE) from La Madeleine, France (Pitt Rivers Museum, Oxford)*

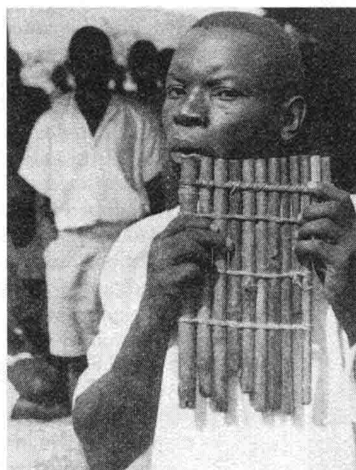
are still used in that area and in the southern USA. In another less common type, which appears in a number of areas, the player's tongue forms the duct.

The number of finger-holes on flutes varies according to the needs of the music and the preferences of the culture. The most common number is six, to which is added, where necessary, a thumb-hole to aid overblowing to an upper register: heptatonic scales of various forms are the most frequent throughout the world. Chinese and some Southeast Asian flutes have an extra hole between the mouth-hole and the uppermost finger-hole which is covered by a thin membrane (a MIRLITON) made from the inner lining of a piece of bamboo; this adds an enlivening buzz to the sound (*see* for example the DI of China). Chinese transverse flutes commonly have more holes than any others: a mouth-hole, a membrane hole, six finger-holes, two tuning vents and two holes for a decorative tassel which also functions as a suspension loop.

Some open-ended flutes have no holes at all. By opening or closing the far end with a finger, the player can produce the harmonics of either an open or a closed tube and, by interlocking these harmonics, can play melodically. An open tube would need to be a metre or more in length for this to be practicable, but a stopped tube which can also use some notes of the harmonic series of the open tube can be half that length or less. In the Highlands of Papua New Guinea one finds flutes 2 or 3 metres long but sounding only the overtones of the open flute (fig.3*d*); these are played in pairs, using hocketing techniques. In the Eastern Highlands, young men play shorter, very wide-bore flutes (often 10 cm or more in diameter) without finger-holes; pitch is varied by closing the open end more or less with the hand. Rather narrower flutes in Suriname and Guyana have a large hole in the side which is similarly used.

Otherwise flutes without finger-holes are usually regarded as whistles (*see* WHISTLE). But some whistles can produce more than one note, for example the boatswain's pipe, on which the signals are varied by moving a hand over the airstream after it leaves the instrument (in Britain, in the Royal Navy, the instrument is the 'call' and the signals are the 'pipes'). Whistles sometimes have one or two finger-holes. The one-hole whistle is a very common children's toy, signal instrument, and bird-call imitator; the two-hole whistle is common in West and Central Africa, often with the holes in projections, one on each side near the top of the end- or notch-blown tube.

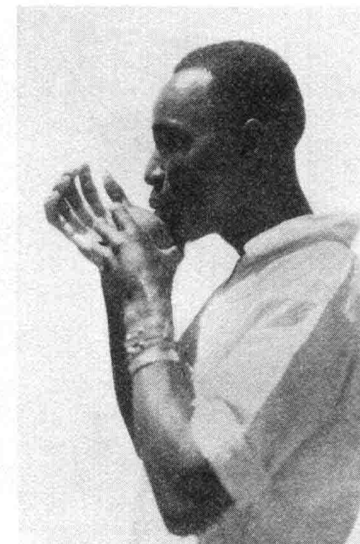
Whistles are blown in almost all the ways mentioned here, the most common being the end-blown and the duct. Many are more or less globular in shape, and vessel whistles and vessel flutes, sometimes called ocarinas (*see* OCARINA), are found in most parts of the world, made from natural seeds and gourds, or of pottery.



While most flutes are blown by mouth, a few, especially in Oceania and Southeast Asia, are blown by the nose (fig.3*h*). This is most commonly for cultic reasons, the breath of the mouth, which is used for eating and talking, being considered profane and the breath of the nose nearer to the soul (*see* NOSE FLUTE).

The least common flute worldwide is that best known in Western art music. The transverse flute is found in other cultures mainly in India, China, Korea, Japan and Papua New Guinea. Some other cultures in which it is well known today, for example that of the Indonesian island of Sulawesi, are known to have acquired it from European contact. In India it has been associated with Krishna, and, as the *vaṃśa*, is a favourite instrument for classical music. In the south it is quite a short instrument, around 30 cm in length, but in the north it may be twice that length or more. It is usually assumed that it was from India that the transverse flute migrated into Byzantium in the 10th century, at which period it began to appear in manuscript illuminations, and thus came into Europe.

In China the *di*, and before that the *chi*, were used. The latter was mainly a ritual instrument and the former was initially, as in Europe, a military flute eventually becoming an instrument for opera and later for all sorts of music. It is probable that the Korean transverse flutes derived from the Chinese, and it is certain that the Japanese instruments did, for Tang dynasty prototypes are preserved in the Shōsōin (the imperial treasury of Emperor Shōmu, *d* 756) in Nara.



In Japan the *ryūteki* and other transverse flutes are, with the cylindrical oboe *hichiriki*, the main melody instruments of the ritual court music, *gagaku*. The

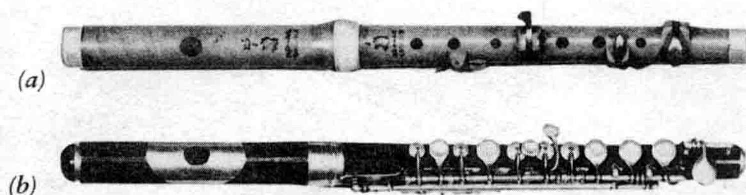
Examples of non-Western flutes: (a) rim-blown, with built-up rim (ney, Iraq); (b) plain rim-blown (panpipes, Soga people, Uganda); (c) notched flute (mlele, Kenya); (d) transverse flute (Iatmul people, Papua New Guinea); (e) vessel flute (shiwaya, South Africa); (f) double fipple flute (dvojnice, Yugoslavia); (g) external duct flute (suling, Indonesia); (h) nose flute (fangufangu, Tonga Island, Polynesia)

4. Plagiaulos or possibly a transverse flute player: relief on an urn, late 2nd or early 1st century BCE *(Tomb of the Volumnii, near Perugia)*

NŌKAN, which is thought to have derived from the *ryūteki*, is the most important melody instrument of the *nō* theatre and is also widely used in other genres.

It is clear that all the East Asian transverse flutes derived from the Chinese; whether there is any connection between the Chinese and the Indian is not known, although as with many other instruments, the *di* is thought to have come into China from western areas. Certainly, however, the 'sacred flutes' of Papua New Guinea are of independent origin. Some are short, 30–50 cm in length, and often played in groups; the most impressive are up to 3 metres long and are used in pairs, one a note higher than the other. They sound only natural harmonics, hocketing an interlocking series a tone apart.

There is no evidence of the transverse flute in ancient Egypt. The end-blown flute was common there, as in Mesopotamia, from the earliest times; because such instruments were held obliquely, as they almost invariably still are, they have often been misinterpreted as transverse instruments, for example the one on a slate palette in the Ashmolean Museum illustrated by Hickmann (1961). The transverse flute was unknown also in ancient Greece (a statue illustrated by Wegner (1963) is a fragmentary late Roman copy with a very small piece of something next to the figure's mouth; there is no evidence that this is the remains of a flute). One well-known late Etruscan relief of the late 2nd or early 1st century BCE, carved on an urn or sarcophagus in the tomb of the Volumnii family near Perugia, has been identified as the first European illustration of a transverse flute (fig.4). There is no other evidence for the transverse flute in Etruria or Rome, whereas there is frequent evidence for the *plagiaulos*, a reed instrument played transversely; thus, while the Volumni relief does look much like a transverse flute, it should be regarded with some suspicion. The Roman bone tubes made in short sections, each with one or two holes in the side, which have often been described as flutes – ignoring the difficulty of assembling such fragments into a single tube – have more recently been recognized as hinges.



II. The Western transverse flute

1. Terminology. 2. The modern flute. 3. Other members of the family: (i) Piccolo (ii) Third flute (iii) Flûte d'amour (iv) Alto flute (v) Bass and sub-bass flutes. 4. History: (i) To 1500 (ii) 1500–1800 (iii) 1800 to the present.

1. TERMINOLOGY. Before the late 18th century, the term 'flauto' or its equivalent, without a modifier, almost always referred to the RECORDER, evidently the dominant instrument of the two during much of their history, and sometimes specifically to the treble (alto) recorder, the most characteristic member of the family. Similarly 'flautino' or 'flauto piccolo' referred to a small recorder, a descant or even a sopranino. If, in earlier times, a transverse flute was intended, a modifier had to be added to the noun (e.g. cross, German, transverse, *traversière*, *traverso*).

2. THE MODERN FLUTE. The modern flute is a tube of metal, more rarely of wood, about 67 cm in length and 1·9 cm in bore diameter (see fig.6*c* below). It is built in three sections fitted together with tenon-and-socket joints: a head joint with the mouth-hole or embouchure (raised in metal flutes to give the hole its proper depth); the middle joint with the principal keywork; and the foot joint with the keys for the right little finger. In the head joint the bore is terminated by a plug or stopper, usually threaded, which can be shifted to adjust intonation. The junction of the head joint with the body is also used as a tuning-slide, which can be pulled out to lower the instrument's pitch.

The sound is produced by blowing across the mouth-hole, activating the air in the tube. The basic scale of the flute begins on *d′*, but keys on the foot joint extend the compass down to *c′* and on some flutes to *b*. The instrument is functionally in C and thus non-transposing.

5. *Piccolos: (a) with 4 keys, by John Köhler, London, 1800–10; (b) Boehm 1847 system, by Jérome Thibouville, Paris, late 19th century (Horniman Museum, London)*

It has an effective compass of just over three octaves, overblowing at the octave, so that the fingering of the first octave is duplicated in the second; the fingering of the third octave differs from the other two. Control of the sound is achieved principally by the player's lips, and thus the embouchure is an important part of the flautist's training.

The mechanism of the modern flute is based on Theobald Boehm's design of 1847, as modified by 19th-century French makers (see §4(iii)); there are a number of small variations between types. Practically all have a closed G♯ key, and they may be fitted with various trill keys, rollers and special mechanisms to enhance the instrument's playability. Flutes with keys having solid, airtight surfaces (as Boehm originally designed them) are called closed-hole flutes; on open-hole or 'French-model' flutes, five of the keys are perforated so that the finger forms part of the seal. Pitch levels of the later 20th century, higher than Boehm's, have compelled makers to devise adjustments to his specifications for internal tuning: several slightly different scales have been used, the best known of which is that devised by Albert Cooper (*b* 1924). Materials used for the tube and mechanism include nickel-silver, sterling silver, gold and platinum, while the springs are usually of tempered steel or phosphor bronze, occasionally of gold or another metal. The choice of material, especially for the head joint, influences the flute's tone: wooden flutes produce a rich tone with a very full *fortissimo* in the lower register; metal flutes produce a limpid, flexible tone with great carrying power and also allow the player very sensitive control over the tone-colour; gold produces a mellow sound while silver is more brilliant. To achieve a combination of these qualities a head joint of wood or gold is sometimes fitted to a tube of silver.

The modern flautist is expected to be able to play a broad repertory. Distinct styles and techniques for playing Baroque, Classical, 19th-century, avant-garde music and jazz have all become part of the flautist's training, and the well-rounded orchestral flautist must also be an accomplished piccolo player. The flute is highly popular among young people, especially girls, although there is still a high proportion of male players in some countries such as Ireland and Italy.

3. Other members of the family. The flute with *c′* or *b* as its lowest note (sometimes called the concert flute) is the most common representative of a family of instruments of different sizes and pitches. Other sizes were developed to play various parts in consort or band music or for other special uses, some of which no longer exist. Mechanically and acoustically these variants share the history and development of the concert flute. Only the principal members of the flute family that are employed in art music are discussed here, although other types, such as the G treble of the Irish flute bands, are well-known in particular places. Military band flutes are sometimes pitched in D♭ rather than C to match the B♭ and E♭ standards of brass instruments and clarinets, but these are not, strictly speaking, separate sizes.

(i) Piccolo (Fr. *petite flûte*; Ger. *kleine Flöte, Pickelflöte, Pikkoloflöte, Oktavflöte*; It. *ottavino* or, more rarely, *flauto piccolo*). A small flute pitched an octave higher than the concert flute. It is a transposing instrument, its music written an octave lower than sounding pitch. The piccolo is fingered like its larger relative but, as it has no separate foot joint, its range usually extends down only to *d″*, although Verdi in his Requiem and Mahler in his First Symphony wrote for it down to *c″*. 'Old-system' piccolos were used well into the 20th century even after the Boehm-system flute had displaced other types (fig.5). The most common model at the end of the century was a wooden, two-piece instrument with Boehm-system key-work, having a conical bore and either a wooden or a metal head and a range of *d″*–*c″‴*.

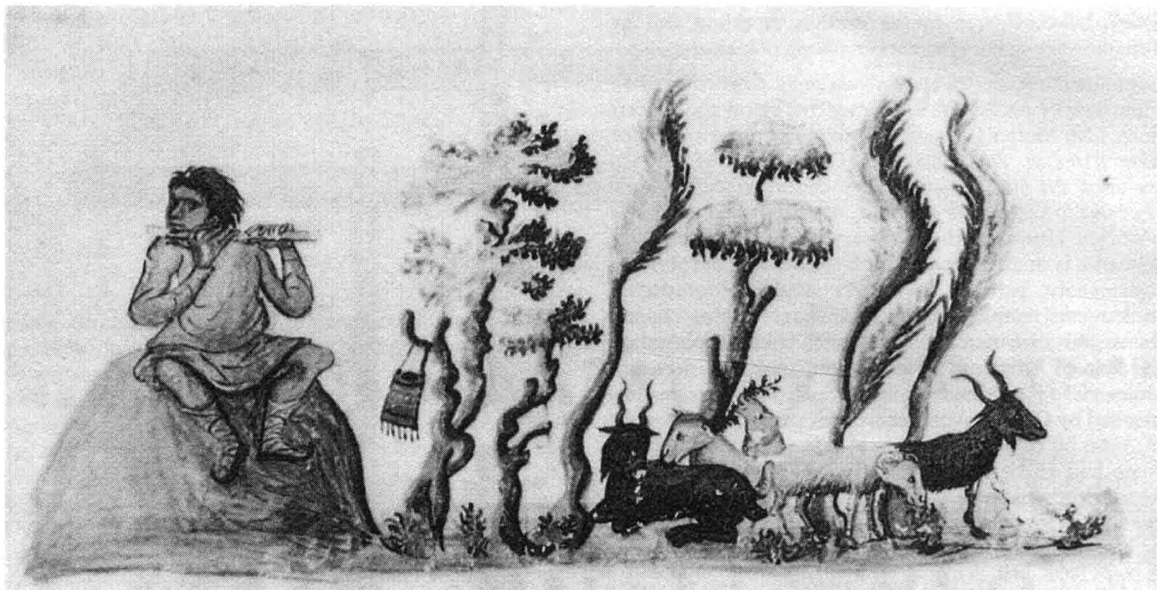
In the 18th-century 'petite flûte' or 'flautino' could indicate a flageolet or small recorder as well as the piccolo, and it is thus not always clear which instrument a composer had in mind. However, the transverse piccolo was used in 18th-century France: Michel Corrette mentioned it in his *Méthode* (1740), and Rameau (*Dardanus*, 1739) and Gluck (*Iphigénie en Tauride*, 1779) scored for it. Since Beethoven (*Egmont* Overture, Symphonies 5, 6 and 9) it has been an integral part of the symphony and opera orchestra, often used for special effects. Late 19th-century composers such as Richard Strauss and Mahler made the piccolo a full member of the orchestra, integrating its sound into the orchestral colour. As parts became increasingly difficult, piccolo playing became a speciality, and by the end of the 20th century most large orchestras had a principal piccolo player ranking with the other principals. The piccolo's brilliance is a feature of the military band repertory, and the military piccolo appears occasionally in the orchestra (as for example, in Berlioz's *Grand Symphonie funèbre et triomphale*, 1840, originally for military band, which also includes third flutes in F).

(ii) Third flute [soprano flute, tierce flute] (Fr. *flûte à tierce*; Ger. *Terzflöte*). A soprano flute pitched a minor 3rd above the concert flute – hence its name. Its development followed that of the concert flute through the 18th, 19th and 20th centuries. 18th-century examples are usually in F (the lowest note of the contemporary flute was D), while later ones in E♭ also served in military bands to replace or double other instruments such as the E♭ clarinet. It has been used in the USA and Ireland in flute bands and choirs, together with flutes of all other sizes. It was used by Mozart in *Entführung aus dem*

Serail, by Beethoven in the ninth sympthony and by Tchaikowsky in the *Nutcracker* among others.

(iii) Flûte d'amour (Ger. *Liebesflöte*; It. *flauto d'amore*). Flute usually pitched in A, a minor 3rd below the concert flute. J.M. Molter (1696–1765) wrote a concerto in B for *flûte d'amour* and Christoph Graupner (1683–1760) included the instrument in five cantatas and a triple concerto in G for *flûte d'amour*, *oboe d'amour* and *viola d'amour*. However, the repertory of the 18th and 19th centuries is small compared with the number of surviving instruments; perhaps they were used as transposing instruments, employing the same fingerings as concert flutes. Music written at concert pitch could be played on the flute in A by reading it as though written in French violin clef (*g′* on the bottom line), a procedure recommended by Quantz. Verdi scored for three *flûtes d'amour* in *Aida*; by then the instrument was so uncommon that some had to be specially made. The derivation of the instrument's name is not clear; it may have come from the soulful tone quality of the deeper pitched instrument, or it may merely be by analogy with the oboe d'amore in A (*see* OBOE, §III, 3(ii)).

(iv) Alto flute (Fr. *flûte alto*, *flûte contralto en sol*; Ger. *Altflöte*; It. *flautone*). Flute pitched in G, a 4th below the concert flute (fig.6*b*). It was constructed by Theobald Boehm in about 1854 as a completely new instrument. Its mechanism differs slightly from that of the concert flute to allow the fingers to reach the keys and it has a powerful sonorous tone, which Boehm compared to that of a french horn. It is a transposing instrument, its music written a 4th higher than it actually sounds. Boehm promoted the instrument by performing on it a repertory of specially composed and arranged music. Its slightly melancholy, haunting tone attracted 20th-century composers such as Stravinsky (*Rite of Spring*), Ravel (*Daphnis et Chloé*) and Holst (*The Planets*), and it has been much used in avant-garde music. The *tiefe Quartflöte* mentioned by Quantz (1752) may have been an earlier instrument at this pitch. The alto flute has sometimes been called the bass flute, especially in Britain.

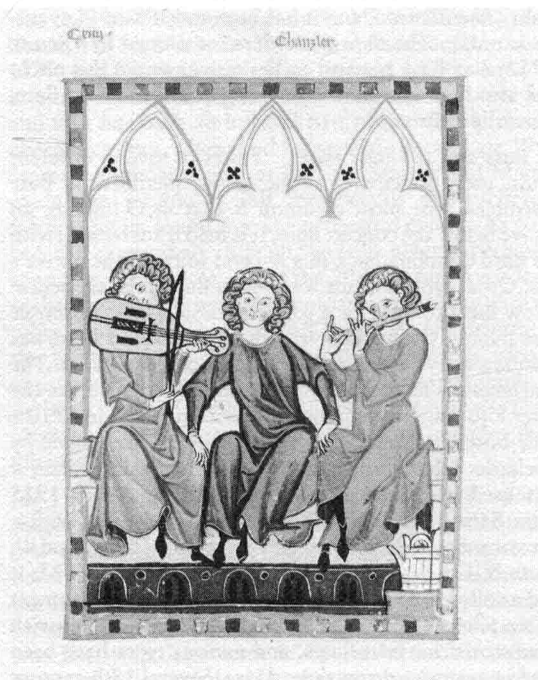


(v) Bass and sub-bass flutes. Flutes of several different kinds, used principally as the lowest members of flute ensembles. The most common is that in C (fig.6*a*), an octave below the concert flute. It is held transversely, with the head doubling back in a U-bend to reach the player's lips. Other types include a sub-bass flute in G, an octave below the alto flute, or a tone lower still, in F. A double bass flute in C, two octaves below the concert flute, has been made by Jaeger and by Kotato & Fukushima. The instrument is held vertically, the head bent twice like the letter P to bring the embouchure within reach. In 1910 a wide-bore bass flute in C, the *Albisiphon*, was made by Abelardo Albisi, principal flautist at La Scala, Milan; it was used in Mascagni's *Parisina* (1913). About 1925 Gino Bartoli introduced a U-shaped instrument with a narrower bore which he called a 'contrabass flute'. Rudall, Carte & Co. devised another transverse type in 1932; it had a coiled head joint and a crutch to rest the instrument on the player's thigh. Ravel, Stravinsky and Shostakovich have scored for bass flutes, and various types have been used in avant-garde music and jazz. Several 18th-century bass flutes survive, including instruments by Beuker, Naust, Thomas Lot and Delusse; the latter has a U-shaped head joint.

6. Modern orchestral flutes by Rudall, Carte & Co.: (a) bass in C; (b) alto in G; (c) concert in C; (d) treble in G; (e) piccolo in C

4. HISTORY.

(i) To 1500. The earliest undoubted representations of transverse flutes on the fringes of Europe come from Byzantium. Such instruments appear on 10th-century ivory caskets (Museo Nazionale, Florence, and Victoria and Albert Museum, London) and in a number of 11th-century manuscripts (listed in Braun; fig.7). Thereafter, the transverse flute makes very occasional appearances, the earliest being on a Hungarian bronze water vessel of *c*1100, found in eastern Slovakia. The figure probably represents the centaur Chiron, here playing a drum, teaching the art of music to Achilles, who stands on the centaur's back playing the flute left-handed – the normal posture in the Middle Ages. Two 12th-century Benedictine



7. Shepherd with a transverse flute: miniature from a copy of the Homilies of St Gregory of Mazianzus, Byzantine, 11th century (F-Pn fonds grec 533, f.34v)

manuscripts (an encyclopedia and a psalter) show figures playing transverse flutes, as does an illustration in the 13th-century Munich psalter (*D-Mu* 24).

Music was not conceived for specific instruments in this period, and most references to flutes in written sources are ambiguous, possibly referring to duct flutes such as recorders or tabor pipes. Flutes of all kinds were often identified with mythical or spiritual figures, with pastoral life, and with death. Although depictions and descriptions of transverse flutes were rare compared with references to other instruments until the mid-16th century, in the most realistic of them certain customary uses can be identified. Adenés Le Roi's romance *Cléomadès* (*c*1285) mentions 'Flahutes d'argent traversaines' as part of the instrumentarium of a well-known minstrel: the word 'silver' [argent] may refer to their material or perhaps their tone. The *Niebelungenlied* of *c*1300 refers to the loud sound of the flute, comparing it to that of the trombone and trumpet, and in the *Roman d'Alexandre* (*GB-Ob*) illustrated by Jehan de Grise in 1344, transverse flutes are shown being played with large bells, drums, bagpipes and trumpets. A number of references to flutes in the hands of sentries and soldiers point to its use in outdoor military music as well as indoor courtly songs.

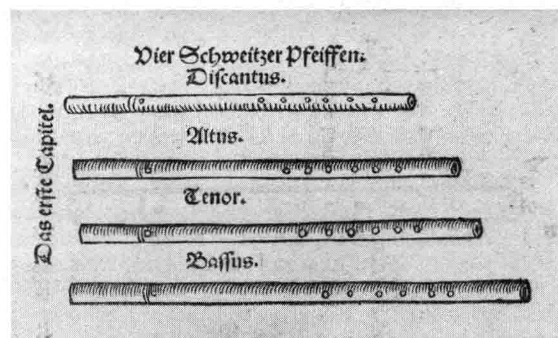
The first evidence to link the flute with a particular musical repertory is provided by two medieval illustrations. A manuscript of the *Cantigas de Santa María* (*E-E*; *c*1270–90) associated with the court of Alfonso, King of Castile and León, contains a depiction of two seated flautists playing left-handed on slightly different instruments, one with ornamental turning or binding. At this date flutes, like the other instruments, were probably made by the musicians themselves rather than by specialized instrument makers. The early 14th-century Manessische Liederhandschrift (*D-HEu*), one of the most important sources of Minnesang, includes a miniature, 'Der Kanzler', which presents a clear and elegant portrayal of three musicians: a fiddler playing a four-string instrument, a transverse flute player holding the instrument to his right, and a singer (fig.8). As the music in these manuscripts is monophonic, it is not clear how the flute was used: perhaps it doubled the vocal line or played a drone, perhaps it provided improvised heterophony. Guillaume de Machaut gave instructions in *Le Livre dou Voir dit* (1363–5) that when instruments were used, his (polyphonic) ballades should be played without ornamentation or cuts, therefore this was probably not the normal

8. Singer, with transverse flute and fiddle players: 'Der Kanzler', miniature from the Manessische Liederhandschrift, German, c1320 (D-HEu pal.germ.848, f.423v)

practice. In *La Prise d'Alexandrie* (*c*1369), he distinguished between transverse flutes – 'flaüstes traverseinnes' – and duct flutes – 'flaüstes, dont droit joues quant tu flaüstes', that is, 'flutes you blow straight when you play them'. Other literary references, notably in the works of Eustache Deschamps (*c*1346–*c*1406), suggest that the flute still led a double life as both a soft, indoor instrument and a loud one with military connotations. No medieval flutes survive, but they were probably built in broadly the same way as surviving 16th-century examples: a basically cylindrical tube with six or more finger-holes and an embouchure hole, but perhaps with different ratios of bore and outer diameter to sounding length, which affected range, tone and carrying power.

Pictures and literary references involving flutes become rare for about 70 years after the second decade of the 15th century; Franco-Flemish, English and Italian polyphonic music of this period may have provided few opportunities for the instrument. At the end of the 15th century the military flute became common again, particularly in the hands of Swiss mercenary troops and in combination with large side drums. The first use of the term FIFE occurs in a description of an occasion in 1489 in which drums, fifes and trumpets played together at a French feast. By 1494 the *grande écurie* of the French court was making payments to 'tambourins suisses', probably a corps of transverse flutes and side drums associated with Swiss mercenary troops who accompanied Charles VIII to Italy. In this period, as before, any technical distinction between the 'fife' and the 'flute' remained unstated. In fact, early 16th-century illustrations, such as the group of four Basle soldiers by Urs Graf, himself a mercenary, seem to indicate that, even if the instruments differed, the soldiers played both, perhaps performing four-part consort music on ordinary flutes and functional field calls and improvised marching music on military flutes.

(ii) 1500–1800. Court inventories of the 16th century suggest that the flute was in high favour for playing the four-part consort repertory of that period. Henry VIII of England possessed 74 flutes, including examples in lacquered ivory and in glass (1547), Maria of Hungary had more than 50 (1555), Felipe II of Spain had 54 (1598) and the Stuttgart court (1589) no fewer than 220 transverse flutes, as opposed to 48 recorders, 113 cornetts and 39 viols. Multiple sets of a wide range of tuned instruments must have been necessary to play music in a wide range of modes. From the 1530s the flute emerged as a chamber instrument frequently played by amateur musicians of the aristocracy and the merchant class, a group that clearly included women (fig.9).



The earliest printed instructions for flute playing confirm that the flute was made in several sizes in the 16th century (see, for example, fig.10). Like all Renaissance woodwind instruments it was fingered according to Guidonian theory (*see* HEXACHORD), which resulted in three sizes of instrument pitched a 5th apart. The recorder consort consisted of a bass which followed the flat hexachord (beginning on F *fa ut*), two tenors in the natural hexachord (C *fa ut*), and a descant in the hard hexachord (G *ut*). But on the transverse flute the scale began one note higher, so that the bass had G (*gamma ut*) as its lowest written note, the tenor and contratenor D *sol re*, and the descant A *la mi re*. Meylan (1974) has suggested that these flutes played an octave higher than

9. Trio of voice, lute and flute: 'The Concert' by the Master of the Female Half-lengths, c1530 (Harrach family collection, Schloss Rohrau); the music is Claudin de Sermisy's chanson 'Jouyssance vous donneray'

written, so that in a mixed consort a D tenor flute could have played a descant or contratenor part. While most Renaissance wind instruments – cornetts, crumhorns, recorders, pommers, bagpipes and shawms – had almost identical fingering, that of the flute was unique, differing considerably in its upper register.

Information on the flute and on playing technique appears in 16th-century treatises by Virdung (1511), Agricola (1529 and 1545) and Jambe de Fer (1556) (essays by Gorlier, 1558, and Lengenbrunner, 1559, are lost). Virdung illustrated only one size of flute, which he called 'Zwerchpfeiff'. The first edition of Agricola's treatise, which was written for children, gives a rather unlikely range of three octaves, and mentions that the flute should be played 'with trembling breath'; other 16th-century sources reveal that vibrato was considered a characteristic feature of flute sound at this time (Hadden, forthcoming). Agricola's revised edition of 1545 contains

10. Four sizes of flute (discantus, altus, tenor, bassus): woodcut from Martin Agricola's 'Musica instrumentalis deudsch' (5/1545)

'transposed' scales for sets of instruments in D, A and E and in C, G and D as well as 'regular' scales for instruments in G, D and A, all with a more realistic range of two octaves and a 2nd or two octaves and a 6th. Three sizes of flute played four parts, the range of the instrument in D being wide enough to cover both inner parts, tenor and contratenor. Jambe de Fer, whose instructions were directed at amateurs, described only two instruments, a G bass with a range of 15 notes, and a D tenor with a range of 15 or 16 good notes, or up to 19 including some forced ones at the top. He directed that the highest part be taken by an instrument of the same size as those playing the tenor and contratenor, so that his consort would have consisted of a G bass and three D flutes, using principally the higher part of their range.

Collections of printed music for instruments gave occasional precise indications as to the use of flutes. In Paris, Attaingnant (1533) published arrangements of chansons by Claudin de Sermisy, Janequin, Josquin Des Prez, Gombert, Heurteur, Passereau and others, and, in Nuremberg, Forster (1539) printed music by himself, Senfl, Wolff and others. Attaingnant's *Chansons musicales* distinguished between pieces suitable for recorder consort and those for flute consort: they confirm the view expressed by Jambe de Fer, and later by Praetorius, that the flute of those times is best suited to playing in the flat modes, that is, scales with the natural notes of the gamut as well as B♭, not in the scale of D major as is often assumed today.

Surviving instruments from the 16th century are predominantly D flutes, a high proportion of these and of the basses, according to Puglisi (1988), pitched at *a*′ = 410, with a smaller group at *a*′ = 435. Among surviving instruments the best represented makers are probably members of the families of Bassano (Venice and London) and Rafi (Lyons; see fig.14*a* below); they were performers and composers as well as makers of wind instruments. To ensure correct ensemble tuning, flutes were made in sets, as is made clear in a contract of 1542 between the maker Mathurin de La Noue and a French merchant, for 'ung jeu de flustes unyes, façon d'allement'. The term *flûte d'Allemagne* or 'German flute' remained common for the transverse flute until the late 18th century.

By the late 16th century military instruments were sometimes differentiated from indoor flutes. Arbeau's *Orchésographie* (Langres, 1588) noted that the military flute then used by the Germans and the Swiss had a narrow bore and a piercing sound, was played with a special hard articulation, and was used to improvise freely over a steady drum beat in marching. The distinction between flute and fife was mentioned again by Praetorius (2/1619) and Mersenne (1636–7), who gave different fingerings and a range of only a 12th for the fife. However, Puglisi (1988) points out that two surviving military flutes (from before 1674), contrary to Arbeau's description, have a larger bore than usual for their length, producing a more powerful first octave and less facility in the third.

The first surviving solo pieces for transverse flute date from the end of the 16th century and the beginning of the 17th. Giovanni Bassano's *Ricercate, passaggi et cadentie* (1585) is a collection of pieces exemplifying the Italian division style. Aurelio Virgiliano's *Il dolcimelo*, ii (*c*1600) contains *ricercate* in a similar style for cornetto, violin, transverse flute [*traversa*] or other instruments. Book iii contains a fingering chart for a D flute with a range of two and a half octaves. However, Lodovico Zacconi's *Prattica di musica* (1592) gives a range of only two octaves. The flute was a part of the peculiarly English mixed consort of treble viol, lute, flute, cittern, bandora and bass viol. Music for this combination by Thomas Morley (1599 and 1611), Philip Rosseter (1609) and others used a D flute on the tenor part, playing an octave higher than written.

The principal German source of the 17th century is Praetorius's *Syntagma musicum* (2/1619). His D flute had a range of 19 notes (*d*′–*a*‴), including four overblown ones, while his A flute could play only two octaves, its highest note being the same as that of the D flute. Praetorius noted that flat modes were the best for the flute, and specified the pitches in use in different situations and locations: in some places there was a choir pitch (*Chor Thon*) a whole tone lower than chamber pitch (*Cammer Thon*); and in England and the Netherlands there was another pitch a minor 3rd lower than chamber pitch, at which harpsichords and flutes sounded better – but this pitch was not used for large ensembles. From the Stuttgart court inventory of 1589, it appears that curved cornetts there were at chamber pitch (about *a*′ = 450), while mute cornetts and flutes were at choir pitch (*a*′ = 410). Thus chamber-pitch flutes were probably exceptional, a conclusion borne out by the pitches of surviving 17th-century flutes. Praetorius also mentioned two sizes of military *Schweizerpfeiff* or *Feldtpfeiff*, in D and high G, each with a range of an octave and a half.

Mersenne's *Harmonie Universelle* (1636–7) signalled a change in the design of the D flute, a prelude to the alterations that were to mark the emergence of the 'Baroque' flute. His two fingering charts, for G and D instruments, differed significantly from one another. Meylan has pointed out the similarities between Mersenne's chart for the D flute and that of Hotteterre (1707), and argued that Mersenne's flute must have had a conical bore if it functioned with the fingerings given, although unlike the true Baroque flute it was constructed in only one or perhaps two pieces and had no key. Mersenne mentioned that fifes were not used in consort, but that flutes, playing at choir pitch, were so employed, with the bass part taken by a sackbut, serpent or other bass instrument. As an example, he gave a 4-part *air de cour* for flute consort.

Although conical-bore instruments may have been made before the mid-17th century, cylindrical-bore transverse flutes continued in use. A two-piece flute by Lissieu with a cylindrical bore but proto-Baroque styling (Kunsthistorisches Museum, Vienna) was probably made in Lyons in the third quarter of the 17th century, and an instrument with similar characteristics (Germanisches Nationalmuseum, Nuremberg) may be from Augsburg or northern Italy. Jacob van Eyck's *Der Fluyten Lust-hof* (1646–9) is a Dutch collection of pieces and divisions for C recorder or flute in high G, the latter with a range of *g*′–*d*‴′.

The flute, like all the woodwind instruments, was transformed during the 17th century. The one-piece, keyless, cylindrical flute of the 16th century became a conical-bore instrument, divided into three sections, with a key for D♯/E♭. The new flute could produce hitherto difficult semitones more clearly, could play in more tonalities and in music which modulated, and had a more tractable and flexible tone, particularly useful for performing vocal music.

When and where these changes were first united in one instrument is uncertain. Most modern writers have assumed that the woodwinds were transformed at the French court, but the musical life of this period in the Netherlands, north Germany, southern France, Italy and England remains little studied by comparison. Probably the earliest surviving instruments with the new features are an anonymous D flute at *a′* = 395 (Biblioteca Comunale, Assisi) and a C flute at *a′* = 410 by Richard Haka (*fl* 1645/6–1705) (Ehrenfeld Collection, Utrecht). The musical connections between Italy and the Netherlands were strong in this period, and the city of Amsterdam, where Haka worked, reached its apex as a cultural centre at this time. The woodwind instrument makers of Amsterdam, themselves high in social status, supplied an extensive market of prosperous merchant amateurs. The flute held a favoured position in the domestic music-making that marked the life style of the rising middle class, while the most favoured music and musical styles came from Italy.

Nevertheless the first famous performers on the new transverse flute were those who emerged at the French court in the late 17th century. In France as elsewhere transverse flutes had been considered warlike instruments, but they were also thought suitable for soft and charming music of a more touching nature, especially that in which love was a theme. It was in the latter character that the flute playing of Philbert Rebillé (1639–1717) came to notice, not only in court music but in private concerts held in the apartments of the king and his principal courtiers. On such occasions the repertory probably consisted of simple brunettes, noëls and *airs*, in which flute and voice were accompanied by the lute and sometimes other instruments. R.P. Descoteaux (*c*1645–1728) was another famous player; he was known as a fine singer, and had an excellent tone on the flute, on which he was reported to have played 'scarcely anything but delicate airs'. Jacques Hotteterre's *Airs et Brunettes* (1721) is a rare printed collection of such music. A ritornello in G minor for two flutes and continuo appeared in Lully's *Le triomphe de l'amour* (1681), and the flute was used in Charpentier's *Médée* (1693) and Destouches' *Isée* (1697). The first French instrumental work to call specifically for the new flute may have been the *Sonate* of about 1686 attributed to Charpentier, while the title-page of Marin Marais' *Pièces en trio* (1692; fig.11) depicts flutes of the new style.

According to Michel de La Barre (*c*1730), the transformation of the flute in France took place some time after that of the other woodwinds; it is not known whether the earliest surviving French new flutes were made earlier or later than the Dutch/Italian models. In Paris the woodwind instrument making workshops of Pierre Naust (*c*1660–1709) and J.-J. Rippert (*c*1668–1724) were active towards the end of the century, while at court members of the Hotteterre and Philidor families made flutes as well as playing them. Two original Hotteterre flutes survive (Landesmuseum Joanneum, Graz, and Musée de la Musique, Paris); they are probably the work of Martin Hotteterre (*c*1665–1712) or his son Jacques (ii) (1673–1763). Other examples in Berlin and St Petersburg previously thought to have been by Hotteterre are 19th-century copies of a lost original (Powell, 1996). Of the surviving flutes with Naust's stamp, one is at the same unusual pitch as the Haka instrument while three others are D flutes pitched at around *a′* = 395. P(eter) Bressan (1663–1731), active in London, was noted in the 1690s as a flute maker, but only one three-joint flute by him survives, at the higher London pitch of *a′* = 408.

During the first half of the 18th century in northern Europe male amateurs from merchants to princes adopted the flute as their favourite instrument. Professional players of the Baroque flute were principally oboists. In London they included foreigners such as Peter La Tour (*c*1705), and later Jean Baptiste Loeillet (1680–1730) and C.F. Weideman. London had excellent flute makers in Bressan, Thomas Stanesby (ii) (1692–1754) and, after his arrival from Germany about 1726, J.J. Schuchart (*c*1695–1758). Music for flute began to be published there at the beginning of the century; the first to appear was an aria for 'Flute D. Almagne' (1701) from John Eccles's *The Judgment of Paris*. Englishmen such as Thomas Roseingrave and M.C. Festing (whose father Michael and brother John were flautists) also published music in London, and Handel's sonatas op.1 were printed there about 1730. The first solo music for the new flute was published in Paris; Michel de La Barre's *Pièces pour la flûte traversière avec la basse-continue* appeared there in 1702. In his preface the composer, one of the most eminent French flautists of the period, observed that the music was of a quite different character from the sighing tender airs of Philbert and Descoteaux hitherto considered suitable for the flute. Instead he modelled its dance-like movements on the viol pieces of Marais. Jacques Hotteterre (ii) published the first tutor for the Baroque flute, *Principes de la flûte traversière*, in 1707 (fig.13); he also published Italian-influenced solos and trios for flute and continuo.

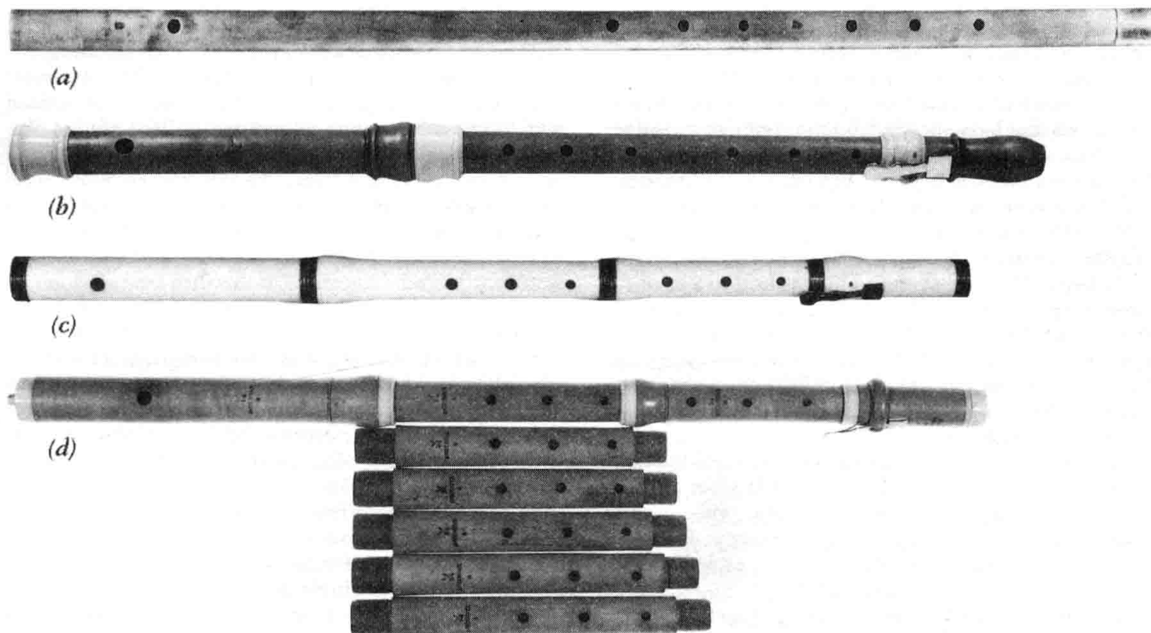
12. Ferdinand Joseph Lemberg as flautist: portrait by Jan Kupecký, c1710 (Musikinstrumenten Museum, Berlin)

Hotteterre's tutor described the flute as 'one of the most pleasant and one of the most fashionable' of instruments. The fingering chart gave different fingerings for flat and sharp versions of the same enharmonic note, although as Hotteterre observed, 'a number of people do not make this distinction at all'. His brief discussion of tonguing was limited to the two syllables 'tu' and 'ru', but he gave extensive instructions for playing the graces – trills, *ports-de-voix*, *accents*, *flattements* and *battements* – so integral to the successful performance of French music of this period. The first Dutch version of Hotteterre's flute tutor was published in 1729, and an English translation the following year – Hotteterre's prototype was also closely imitated by the only known Spanish Baroque flute tutor, Pablo Minguet y Yrol's *Reglas y avertencias generales* (Madrid, 1754).



The new flute became known in Germany around the second decade of the 18th century. In Hamburg, Reinhard Keiser scored for the flute in his opera *Heraclius* (1712), while the orchestra in Dresden employed the virtuosos P.-G. Buffardin (*c*1690–1768), his pupil J.J. Quantz (1697–1773), and J.M. Blockwitz (*fl* 1720–30). But according to Quantz, solo music for flute was rare at this time and flautists had to adapt pieces for violin or oboe. Three works by Keiser survive (1720) and a manuscript collection of 54 pieces (Brussels Conservatory) contains early solos by Blockwitz, Christoph Förster, J.H. Freytag, Handel, J.S. Weiss and Quantz. Pieces by Telemann and J.S. Bach are among the earliest German flute music to survive. Telemann's *Six Trio* (1718) includes a piece for violin, 'Flûte traverse' and basso continuo, and several manuscript trios, some from Dresden, dating from 1720 or before, contain parts for one or two flutes. Mattheson's *Der brauchbare Virtuoso* (1720) contained the first flute solos printed in Germany. Much of this music was in a 'violinistic' style characterized by constant semiquaver or quaver motion and arpeggiated passage-work, evidently influenced by the Italian style. The influence of Italian violin music and the Vivaldian concerto style is also apparent in Bach's solo sonata (Partita) in A minor, BWV1013, which is reminiscent of unaccompanied flute pieces originating in Dresden around 1720, and in his Sonata in E minor BWV1034, a 'sonata in the style of a concerto' written, according to Marshall (1989), about 1724.

Flutes of the first two decades of the 18th century were usually made of boxwood, ebony or ivory; they were constructed in three sections, with an essentially conical bore and a single key for D♯/E♭. However the instrument was by no means standardized: each maker developed an individual concept of tone and intonation, and devised original technical means to achieve it. Among the few surviving examples from this period, by Bressan, Chevalier, Jacob Denner, Hotteterre, J.N. Leclerc, Naust, Panon and Rippert (fig.14*b*), pitches range from *a'* = 395 to *a'* = 408, the bore taper (the difference between the largest and smallest points in the bore) can be as much as 6·5 mm or as little as 4 mm, and maximum bore diameters differ by up to 1·5 mm. Hence there are great differences in timbre, intonation, range and flexibility of tone. Around 1720 there was a brief vogue for flutes with an extension to low C, but although these were made by Bressan, Denner, Schuchart and Stanesby (ii), the idea did not become widespread.

About 1720 flutes began to be made in four sections instead of three, dividing the body between the two hands (fig.15). Experimentation with the bore may have made the division expedient, but Quantz (1752) gave two further reasons: portability, and the prospect of supplying

14. *Flutes from the 16th century to the 18th: (a) keyless cylindrical flute by Claude Rafi, Lyons, 1515–53 (Musée des Instruments de Musique, Brussels); (b) one-keyed flute by Jean-Jacques Rippert, Paris, c1700 (Glen Collection, Glasgow Art Gallery and Museum); (c) one-keyed ivory flute by Thomas Stanesby (ii), London, 1734–54 (Horniman Museum, London); (d) one-keyed flute with five corps de rechange by Grenser, Dresden, late 18th century (private collection)*

upper body sections of different lengths to adjust the pitch of the flute. Of the earliest four-joint flutes, by J.H. Eichentopf (1678–1769) (Musikinstrumenten-Museum, University of Leipzig), Scherer (Museum Vleechuis, Antwerp) and J.H. Rottenburgh (1672–1756) (Brussels Conservatory and Museo Clemente Rospigliosi, Pistoia), the flute in Pistoia has *corps de rechange* for *a*′ = 392 and *a*′ = 415. The first written mention of *corps de rechange* appears in a document of 30 December 1721 from the Naust workshop in Paris (Giannini). Flutes of different sizes, such as the *flûte d'amour* in B♭ or A, the piccolo and the tierce flute in F (the same pitch as the treble recorder), were also made, but their repertory, possibly including flute band and military music, remains largely unexplored. In 1726 Quantz added a separate key for D♯ to his flute to supplement the one for E♭; although this made the precise tuning of intervals easier and was retained by some later flautists, the innovation never gained general acceptance.

In the second quarter of the 18th century, French composers for the flute turned from the French suite to the Italianate sonata, and the number of publications increased. Works by J.-C. Naudot, Michel Blavet and J.-M. Leclair may have been played by their composers in public concerts (the last as a violinist), in spaces much larger than those for the soft music of private performances at court. Such performers no longer relied on court appointments for their living, but were employed in the musical establishments of aristocrats and the bourgeoisie and gave lessons to wealthy amateurs. Buffardin returned to Paris occasionally to perform at the Concert Spirituel; Quantz visited Paris in 1726 (and became friends with Blavet). Composers such as J.B. de Boismortier and Michel Corrette supplied the growing demand for flute music and tutors, while the workshops of Charles Bizey, Louis Cornet (*c*1678–1745), Leclerc, Naust and Rippert made flutes available to anyone who could afford them.

In the Netherlands the flute was evidently already flourishing before 1730. Abraham van Aardenberg (1672–1717), J.B. Beuker (*b* 1691), Willem Beukers

15. *One-keyed flute in four sections: William Wollaston, portrait by Thomas Gainsborough, c1759 (Christchurch Mansion, Ipswich)*

(1666–1750), Thomas Boekhout (1666–1715), Philip Borkens (1693–*c*1765), Frank Eerens (1694–1750), J.J. van Heerde (1638–91) and Engelbert Terton (1676–1752) were all established early as flute makers and made instruments that have survived. Italian composers such as Lotti, T.G. Albinoni, Vivaldi, Geminiani, Porpora, Tessarini, Leonardo Vinci, P.A. Locatelli and Sammartini published flute solos in Amsterdam and London beginning in the 1720s.

Flutes of the 1730s and 40s were just as diverse as earlier types. The workshop of Thomas Lot, successor to Naust, supplied large numbers of flutes to a widespread market and in 1744 August Grenser established a woodwind workshop in Dresden which went on to become one of the most famous in Europe. Ivory flutes from the Scherer workshop in Butzbach became popular with wealthy amateurs.

Telemann's *Sonate metodiche* (1728), *Continuation des sonates méthodiques* (1732) and *XII solos* (1734) added 36 superb solos to the repertory, while pieces composed by J.S. Bach include the sonatas in B minor BWV1030 and A major BWV1032 (*c*1736), as well as the Trio Sonata in G major BWV1039 (*c*1736–41) and probably the sonatas in C major BWV1033 and E♭ major BWV1031 (which Swack (1995) suggests was modelled on a piece by Quantz). In 1733 W.F. Bach, then organist in Dresden, became friends with Buffardin; between 1733 and 1746 W.F. Bach composed six challenging flute duets.

Frederick the Great became King of Prussia in 1740, appointing C.P.E. Bach as his keyboard player and his flute teacher Quantz as Music Director; C.P.E. Bach composed six flute sonatas, H552–6 and H548, in 1738–40, and three more, H560–62, in 1746–7. J.S. Bach's Sonata in E major BWV1035 may have been composed for Frederick's flute-playing valet, M.G. Fredersdorf, in 1741 or 1747, and the difficult trio sonata in the *Musical Offering* BWV1079 is a flattering comment on the king's own abilities as a flautist. Quantz supplied the king with flutes and with 300 concertos to play on them; his *Versuch einer Anweisung die Flöte traversiere zu spielen* (1752) codified the musical practices of the Prussian court and remained influential for at least 40 years. Quantz's flutes had keys for both D♯ and E♭, a head-joint tuning-slide, and a set of *corps de rechange*, of which only the lowest, pitched at about *a′* = 392, received much use.

Quantz's *Versuch* is less a tutor for the flute than a compendium covering musical taste and execution on all sorts of instruments. Because of its broad scope it became and has remained one of the most widely known instrumental method books of the 18th century. Its instructions on how to play the flute itself are tantalisingly brief. Although the tutor was written for the two-key flute that Quantz favoured, using separate fingerings for sharps and flats, he gave only brief hints on how to use these keys. His instructions on tonguing were by far the most sophisticated to date, using 'ti', 'di' and 'ri' for single tonguing, and 'did'll' for double tonguing, a technique which he was the first to mention (*see* TONGUING).

In London by the mid-18th century music shops supplied a growing middle class with flutes, tutors and music. Economic and artistic opportunities there attracted good players, such as P.G. Florio (before 1740–95) and Joseph Tacet, while makers included Thomas Cahusac (i) (1714–98), Benjamin Hallet the elder (*b* 1713), Charles Schuchart (1719/20–65), Caleb Gedney (successor to Stanesby (ii)) (1729–69), and Richard Potter (1726–1806). Most of the music was by foreign composers, but Englishmen such as John Stanley (1712–86) were also represented. Sophisticated tutors like Granom's *Plain and Easy Instructions* (London, 4/1766) and Luke Heron's *A Treatise on the German Flute* (1771), and, later, Gunn's *Art of Playing the German-Flute* (*c*1793), were for sale alongside cheap anonymous method books.

Flutes with between three and seven *corps de rechange* were common by this period (fig.14*d*), and two devices were introduced to regularize the instrument's tuning, which varied with the length of the joint. These were the screw-cork, to make fine adjustments to the cork stopper in the head joint, and the index or 'register' foot joint, which had a telescoping tube to make it longer or shorter. Not many makers supplied these gadgets: flutes from the Grenser workshop are among the few from this period with registers, while in England Potter first used the device during experiments with a graduated head-joint tuning-slide in the 1780s. The most important mid-century development in England was the addition of keys for B♭, G♯ and F, with an extension of the range down to *c′*. The earliest surviving example of such a six-key flute was made about 1755 by J.J. Schuchart (Powell, 1996). The new keys facilitated the penetrating and even tone that was becoming fashionable, particularly in the lowest octave, among players developing a new bravura style. The Seven Years War in Europe made life more difficult than in England, thus the transmission of keyed flutes to the Continent occurred slowly.

In France, the flute was in decline in the mid-18th century while musical life focussed on opera. However a tutor by Charles de Lusse (Delusse) (*c*1761) showed the increasing virtuosity of flute playing by including brilliant studies and a piece using quarter-tones. In 1764 Buffardin wrote to the *Mercure de France* to say that Lusse's prescriptions for quarter tones were less advanced than his own. Later the Count of Guines commissioned Mozart, while in Paris, to write the Concerto for flute and harp (K299/297*c*); that the flute part includes a low C probably indicates that the count had acquired an English flute during his earlier sojourn in London.

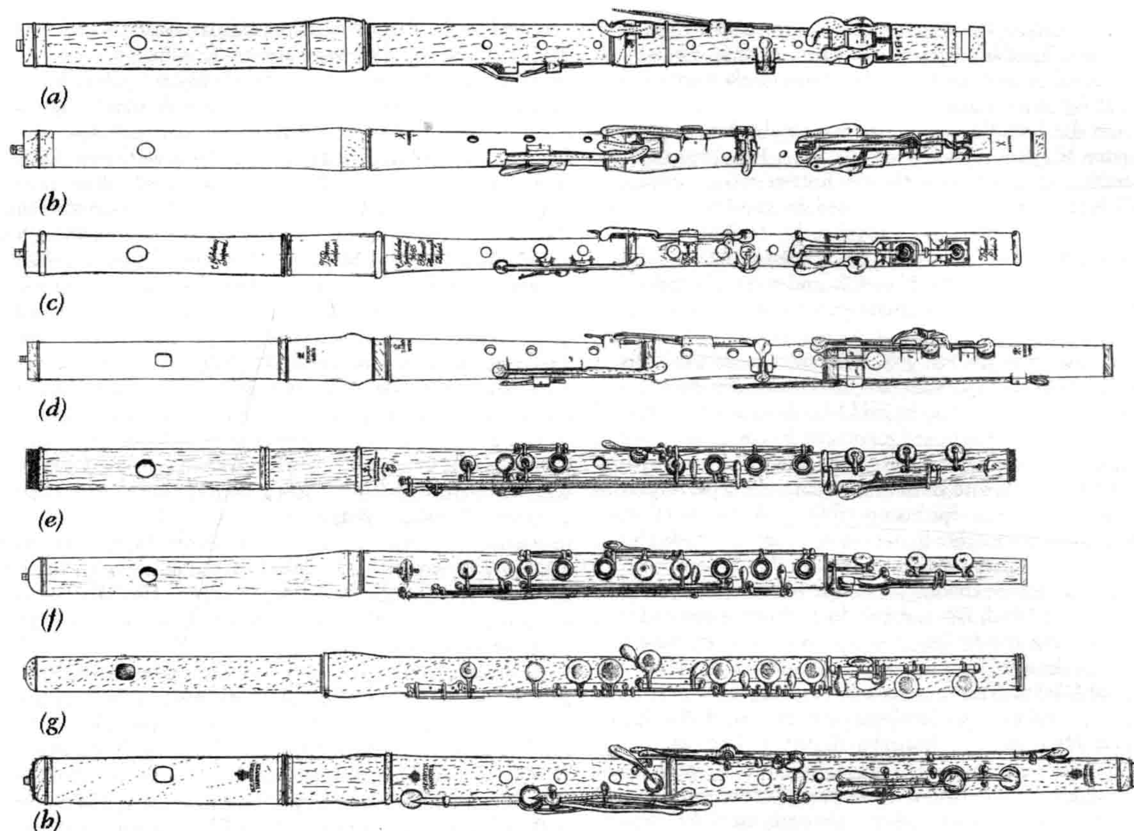
In Mannheim and Vienna Mozart wrote concertos in G major (K313/285*c*) and D major (K314/285*d*; an adaptation of an oboe concerto in C), and three quartets for flute and strings. Mozart's friend J.B. Wendling (1723–97), principal flute in Mannheim, may have played in Mozart's symphonies, perhaps on a flute by Parisian maker Thomas Lot. Other concertos and chamber works for flute include those by J.C. Bach, François Devienne (1759–1803), Carl Ditters von Dittersdorf, Michael Haydn and the Mannheim composers. The largest output, consisting mostly of printed solos, duets, quartets and concertos, was that of the Viennese composer and publisher F.A. Hoffmeister (1754–1812).

The most famous players of the late 18th century were travelling virtuosos. Those who performed in England, still a richly attractive destination for musical travel, included F.L. Dülon, Andrew Ashe and Tebaldo Monzani. Concepts of tone and performance style varied greatly between one virtuoso and another, and the varied acoustics, materials and key configurations of contemporary flutes tended to promote this diversity. In 1785 Richard Potter added to the numerous types of flute on the market a 'new-invented Patent German Flute', the first to be manufactured under patent protection; it had

pewter instead of leather seals for the keys, a foot-register and a metal-lined head-joint with a tuning slide. The new flute was mass-produced and the pewter seals were soon imitated by other makers.

When the Paris Conservatoire was established in 1795 Devienne became professor of the flute. He encouraged his students to use flutes with only four keys (i.e. without the C-foot), a type institutionalized by the first official tutor written for the Conservatoire, by Antoine Hugot and J.-G. Wunderlich (1804). The Conservatoire's military-style regime introduced a new and more disciplined method of teaching, in which students were drilled in technical exercises.

The Leipzig virtuoso J.G. Tromlitz published his *Ausführlicher und gründlicher Unterricht die Flöte zu spielen* in 1791. Although he said less about musical style and ensemble playing than Quantz, he provided far more detailed instructions for playing the flute, including two chapters on single and double tonguing. As a performer Tromlitz was famous for his powerful tone and excellent intonation, qualities due in part to the flutes he made and played on. In 1785 he announced the invention of an instrument with seven keys (C for the left thumb, B♭, G♯, an F for each hand, D♯ and E♭). In 1796 he improved it by duplicating the B♭ key, and in 1800 he published a tutor with detailed instructions for playing it. Tromlitz's design of 1785 was the first important synthesis of existing elements, prefiguring developments of the following century. He combined his own thumb C key and the second F key invented by Dülon's father in 1783 with the basic English configuration of 30 years before, retaining on the foot joint Quantz's D♯/E♭ combination rather than extending the range down to C. His flute was the first on which every semitone was supplied with its own tone hole.

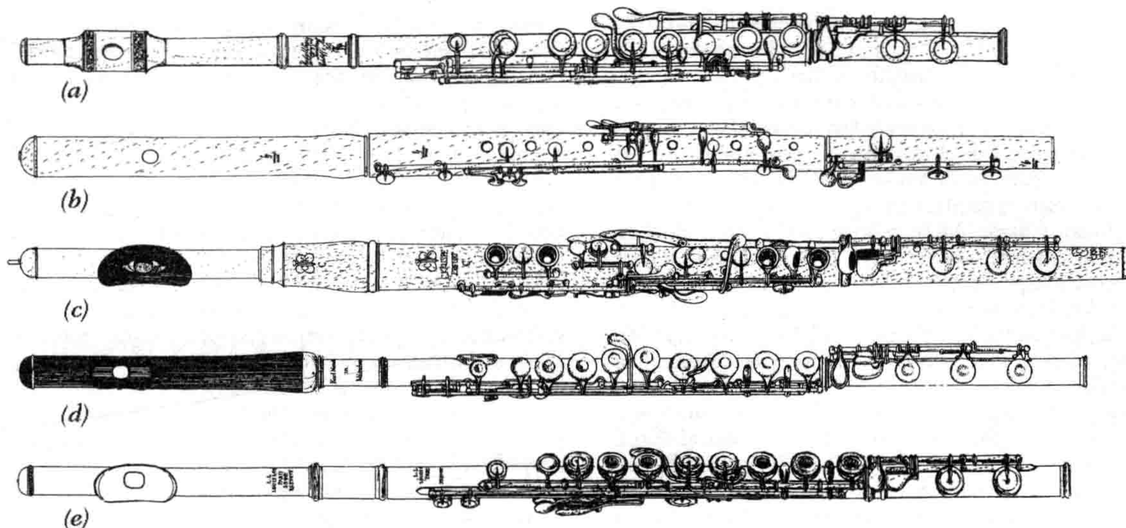


(iii) 1800 to the present. While one-key instruments remained in use by beginners and amateurs, flutes with more keys were devised, modified and used in almost chaotic profusion according to the preference of individual players and makers. The most influential maker was Theobald Boehm (1794–1881), whose revolutionary design concepts provided the basis for the modern flute.

(a) Early 19th-century flutes. Flute makers of the early 19th century modelled their instruments on those of the previous generation. Their flutes had a conical bore, a small embouchure-hole and six irregularly sized small tone holes, a key for D♯ and, usually, keys for F, G♯ and B♭, with eventually up to 12 further keys to supplant the fingerings inherited from the one-key flute; many have ivory ferrules or graduated tuning devices such as screw stoppers, registers or *corps de rechange*. Around 1820 a long *c″* lever for the right forefinger appeared; its invention has been attributed to both Claude Laurent (*fl* 1805–48) and J.N. Capeller (1776–1843). Capeller also devised a one-piece body joint to replace the separate joints for each hand. Instruments were made of boxwood, ebony or other woods, ivory or crystal, and keys of brass, silver or pewter.

Key systems developed along national lines. In France, Devienne and, for many years, the influential maker and player J.-L. Tulou persistently rejected the addition of a second F key and keys for *c′* and *c♯′*: most early 19th-century French flutes had four or five keys, with a separate joint for each hand. From 1805 French flutes had their keys suspended on rods and pillars attached to a plate screwed to the body of the instrument. Makers included Tulou, Laurent, who was especially noted among the post-Revolution upper classes for his crystal (glass) flutes, and Clair Godfroy *aîné*. German, Austrian and English makers continued to mount the keys on wooden protrusions called 'blocks', but their head-joints were now, after innovations by Richard Potter (1726–1806), often lined with metal. Keys for F and B♭ were sometimes supplied in dual form – either by fitting a second key or by adding a second touchpiece – to give the option of two different fingerings. A key for *d″* operated by the first finger of the right hand was added by Capeller about 1811; it served also to improve trills involving D, B♭ and B. Although variations persisted, by about 1820 the flute with eight or nine keys and *c′* or *b* as its lowest note was standard everywhere except France. Prominent English makers included James Wood (*fl* 1799–1832), Tebaldo Monzani, J.M. Rose (1794–1866) and Thomas Prowse (*fl* 1816–68), who made the large-hole flutes associated with the English virtuoso Charles Nicholson (1795–1837). The most important German maker was Wilhelm Liebel (1793–1871) of Dresden, whose instruments, along with those of Koch and Ziegler, were recommended by A.B. Fürstenau, the most influential German player, teacher and flute composer of the period.

Fürstenau toured as a virtuoso and served from 1820 as first flautist at the Hoftheater in Dresden, then under the direction of Weber. He wrote two methods for the flute: *Flöten-Schule* (1826) and *Die Kunst des Flötenspiels* (1844). He performed (on a flute by Koch) the Adagio (1819) from Weber's Trio op.63 for flute, cello and piano with the composer and the cellist J.J.F. Potzauer, and was the dedicatee of Friedrich Kuhlau's Three Grand Duos op.39 (1821). After 1825 Fürstenau played a flute by Liebel. Kuhlau, who did not play the flute himself, but had an affinity for it, wrote a number of other chamber works for the instrument: his Grand Trio op.90 for three flutes (1826) was dedicated to the French flautist A.-T. Berbiguier and his Six Divertimentos op.68 (1825) to P.N. Petersen (1761–1830). Schubert's *Introduction and Variations on Trockne Blumen* (1824) was composed for Ferdinand Bogner, professor of the flute at the Vienna Conservatory. The most prominent French players were Tulou and his rival Louis Drouet, who played Mendelssohn's Scherzo from *A Midsummer Night's Dream* in its first London performance (24 Jun 1829); both were prolific composers for the instrument. The most important English player was Nicholson, whose powerful tone, the result in part of his use of a flute with unusually large finger-holes and embouchure-hole, had both admirers and detractors. Drouet, in vain, tried to establish himself in London, but neither he nor his French flutes were accepted by the English public. Another important player was the Spaniard J.M. del Carmen Ribas (1796–1861), who served as first flute in the Gewandhaus Orchestra in Leipzig from 1838 to 1843 and played on an eight-key Nicholson flute.



(b) The Boehm flute. Flutes featuring the concept, technology and acoustic principles devised by Theobald Boehm are called Boehm flutes. Boehm was trained in his father's trade as a goldsmith, but even as a child displayed an aptitude for music. As a young man he combined the careers of goldsmith, flute maker and professional flautist. In 1828 Boehm, then flautist in the Bavarian Hofkapelle, opened a flute factory in Munich. In 1829 he made an

16. Western flutes: (a) J.G. Tromlitz, Leipzig (fl 1753–1805); (b) Heinrich Grenser, Dresden (fl 1796–1817); (c) Nicholson large-hole model, by Thomas Prowse, London (fl 1816–68); (d) Stephen Koch, Vienna, c1820; (e) Boehm 1832 conical ring-key model, by Rudall & Rose, London, c1843; (f) 1832 ring-key model, by Clair Godfroy aîné, Paris, c1840; (g) Boehm system cylindrical, by Theobald Boehm, Munich, c1856; (h) 'Meyer Flute', by Heinrich Meyer, Hanover (fl 1848–1920)

'old-style' conical-bore flute with the keys suspended on pillars and axles, and right-hand levers on rods for *b♭′* and *c″*. On hearing Nicholson in London, Boehm was struck with the tone he produced on his large-hole flute and set out to design an instrument on which larger holes were spaced for good intonation and evenness of tone rather than according to the reach of the player's fingers. A prototype was made for him by Gerock & Wolf of London in 1831. Boehm's instrument broke new ground by employing ring keys, an idea patented in 1808 by the English inventor Frederick Nolan and also employed by J.C.G. Gordon. This device transferred the movement of a finger to keys outside its reach, allowing a single finger to stop two or more holes at the same time. On Boehm's new flute, a ring key allowed the right first finger to stop two holes, producing F♮ rather than the usual F♯ – an idea suggested by H.W.T. Pottgiesser in 1803, and F♯ was now produced with a second ring-key mechanism, for the right third finger: the basic scale of the instrument was now C rather than D.

Boehm's second model, which featured a combination of ring keys and rod axles (the 'ring key' flute), was made in his Munich shop in 1832. The hole for G was closed indirectly by the second or third finger of the right hand, the key for G♯ was open-standing and Tromlitz's open-standing C key for the left thumb was revived. As early as 1833 Boehm's pupil Eduard Heindl (1837–96) performed a *Fantasie* by Kuhlau on the new flute. Within a few years conical ring-key Boehm flutes were being made in Paris by the firm of Godfroy and by 1843 the instrument had become successful enough for Boehm to license its manufacture by Rudall & Rose in London (under the direction of Boehm's foreman, Rudolph Greve). In 1846–7 Boehm studied acoustics with his friend Carl von Schafhäutl with a view to improving his flute and developed his *Schema* (Munich, 1862, a plan for the relationship between the tube diameter and the placement and size of the tone holes, also published in his pamphlet *Die Flöte und das Flötenspiel in akustischer, technischer und artistischer Beziehung* of 1871). His next design, the 'Boehm-system' flute (1847), was a cylindrical-bore instrument of silver with a parabolic head, a rectangular embouchure-hole with rounded corners, and tone holes of the largest possible size, closed by padded keys interlinked with rod-axles and clutches; this instrument was the basis of the modern flute (*see* KEYWORK). After several experiments with a thumb key for B/B♭, in 1849 Boehm devised the version that has since been universally adopted. The invention of this key was incorrectly ascribed by R.S. Rockstro (1890) to Giulio Briccialdi and the key has since been known by his name. Boehm at first manufactured his flutes himself, later in partnership with his foreman Carl Mendler (1833–1914) under the name Boehm & Mendler. His pupils Emil Rittershausen (1852–1927) and Thomas Mollenhauer (1840–1914) also made flutes to his design, the latter making a piccolo to Boehm's specifications in 1862. Under Liszt's direction, between 1842 and 1862 Theodor Winkler (1834–1905),

17. *Western flutes: (a) Radcliff model, by Rudall & Carte, London, c1860; (b) 'Flûte perfectionée' by Jacques Nonon, Paris, c1860; (c) 'Reform' model, by Maximilian Schwendler, Leipzig, c1912; (d) Boehm system cylindrical, by Carl Mendler, Munich, c1860; (e) Boehm system cylindrical, by Louis Lot, Paris, c1900*

principal flute in the Weimar Hoforchester, was the first orchestral player in Germany to use the Boehm cylinder.

The practicality of the 1832 'ring key' flute was recognized early in France, and instruments were made and promoted by Godfroy, his son V.H. Godfroy and his son-in-law Louis Lot. Victor Coche (1806–81) and Auguste Buffet *jeune* (1830–85) modified the instrument, moving the rod-axles to the player's side of the tube and adopting needle springs instead of the flat ones used by Boehm. In 1837–8 Vincent Dorus (1812–96) devised a G♯ key that remained open except when the ring key for the adjacent hole for A was pressed – a compromise between Boehm's closed G♯ key and the open G♯ of earlier flutes; this open key, although opposed by Boehm, has been generally adopted. Dorus adopted Godfroy's improved conical ring-key Boehm flute because 'it was, in essence, the keyed Godfroy flute he had used until 1838 except for its more functional mechanism'. In 1839 he played Berlioz's *Roméo et Juliette* on a conical ring-key Boehm flute by that maker. Dorus and P.H. Camus (*b* 1796) championed Boehm's flute and wrote the first tutors for it (1839); they introduced his cylinder flute at the Paris Conservatoire when Dorus succeeded Tulou as professor of the flute in 1860. But the conical ring-key Boehm flute remained in use: Saint-Saëns's *Romance* op.37 (1871) and Carl Reinecke's *Undine* (1882) were dedicated to A. de Vroye (1835–90), a student of Coche, who was then still playing one.

Boehm sold the rights to make his 1847 cylinder flute to Godfroy and Lot in France and Rudall & Rose in London. The French manufacturers replaced Boehm's G♯ key with Dorus's open one, arranged the keys in a straight line and perforated some of them as a compromise between the rings of the 1832 model and the closed keys of some non-French instruments. Buffet replaced the vaulted clutches used by Boehm and Godfroy with flat ones. After about 1850 the French Boehm cylindrical flutes were usually made of silver or nickel-silver, less often cocus or rosewood. The earliest methods for this, Boehm's second and final concept, were written by E. Krakamp, W. Popp, W. Barge and by Boehm himself.

(c) The flute after Boehm. Fürstenau and most other German flautists rejected Boehm's designs; his new flutes, they felt, made superfluous the alternative fingerings that enhanced the tonal character and intonation of the instrument. Partisans of the old conical keyed flute – Wagner prominent among them – were not willing to relinquish the old instrument's wider variety of tone to gain the smoother technique, greater dynamic range and better intonation offered by Boehm's instruments. Wagner referred to the new instruments as 'Blunderbusses' (*Gewaltröhre*) and forced Moritz Fürstenau, one of the first to play the Boehm flute in Germany, to return to his old instrument. Boehm's pupil Rudolph Tillmetz (1847–1915), who was Wagner's principal flautist at Bayreuth, ordered an adapted ring-key flute from J.M. Bürger (*fl* 1881–1904) for the première of *Parsifal* in 1888. As late as 1898 Tillmetz claimed that 'the tone of the cylindrical flute was too assertive and lacking in flexibility', and the firms of Rittershausen (*fl* 1876–1927), Joseph Pöschl (1866–1947) and J.H. Zimmermann (1851–1922) offered hybrid conical ring-key flutes until 1920.

Beginning in 1853 H.F. Meyer of Hanover (1814–97) made flutes that reflected the requirements of German and Austrian symphony orchestras: they played easily in the high and low registers, produced greater volume and had better intonation than earlier 'old-system' flutes. Although his flutes were superficially similar to the nine-key instruments of the period, they differed in bore dimensions, placement and size of the tone holes and the size and form of the embouchure-hole; the keys and ferrules were generally made of nickel-silver or other metals. Flutes following his concept were known as 'Meyer' flutes or 'old-system flutes' to distinguish them from Boehm system flutes; they were immensely popular in the second half of the 19th century and played the flute parts in orchestral works by Schumann, Tchaikovsky, Brahms, Mahler and Richard Strauss. They remained standard in the symphony orchestra until about 1930 and in military bands even later. Important players of the Meyer flute included Franz and Karl Doppler and Jules

Demerssmann (1833–66); Ernesto Koehler (1849–1907), Wilhelm Popp (1828–1903) and Adolf Terschak (1832–1901) wrote methods or studies for it.

By the late 19th century national preferences had given way to personal ones. Some players remained true to their first flutes while others switched to new models: in the Bilsesche Kapelle in Berlin in 1881 the Danish flautist Karl Andersen, who played a Meyer flute, sat next to the Frenchman Charles Molé, who played a silver Boehm-system instrument; later in New York Andersen sat next to Boehm's pupil Carl Wehner (1838–1912), who played a wooden Boehm flute with an open G♯ key. In the Leipzig Gewandhaus Orchestra, William Barge (1836–1925), playing a Meyer flute, sat next to Maximilian Schwedler, who played on a 'reform' flute of his own design (see below). Many hybrid instruments, combining features of both the Boehm flute and old conical flutes, appeared in the second half of the 19th century; such instruments may have been developed as a result of reluctance among professional players to adopt an unfamiliar instrument, or sometimes in the belief that a new design represented a perfect compromise between the old system and the Boehm flute. Among the hybrids were Rudall, Rose and Carte's 'Council & Prize Medal' flute of 1851, Richard Carte's model of 1867, models designed by R.S. Rockstro and John Radcliff (1842–1917), Briccialdi's flute of 1870/71, 'Pratten's Perfected', made by R.S. Pratten (1814–62) and instruments by Thibouville, Abel Siccama (1810–65), John Clinton (1810–64), Tulou/Nonon and Giorgi. Of these, only the Carte model of 1867 and a version of it with a closed G♯ key known as the 'Guards' model' achieved popularity; in Great Britain and its colonies the Carte model of 1867 was the most widely used after Boehm's cylindrical flute until well into the 20th century. As well, makers including Clinton ('Equisonant' flute), Cornelius Ward and Siccama ('Diatonic flute') subjected Boehm's designs to various, sometimes eccentric, alterations and additions.

In 1885 Maximilian Schwedler (1853–1949) of Leipzig, an opponent of the Boehm flute, created the 'reform' flute – a conical-bore instrument based on Meyer's design. Like Meyer, he considered the conical bore and the combination of open and veiled notes as essential to the character of the flute. However, his instruments, mostly made for him by Carl Kruspe (1865–1929), took into account the demands of contemporary scores. The innovations he introduced from 1885 until his last reform of about 1916 were: the raised-side (*Seitenerhöhte*) embouchure-hole, a touchpiece for F, a Tulou-like cross F♯ mechanism, and, about 1900, a metal headjoint with ebonite embouchure plate to replace the metal-lined wooden one. Schwedler's best known models were those of 1889 and 1911. His last model, made in 1923 by M.M. Mönnig (1875–1949), was dubbed by Hindemith the 'six-cylinder flute' on account of its ample volume and advanced technology. His instruments never achieved the popularity of the Meyer flute and were played almost exclusively in Germany and the Balkans. In 1886 Brahms praised Schwedler's playing of the solo in the fourth movement of his Symphony no.4; other compositions written for the reform flute include Carl Reinecke's Concerto op.283 (*c*1908), dedicated to Schwedler, and probably the compositions of Sigfried Karg-Elert, dedicated to Tillmetz's pupil Carl Bartuzat (1882–1959). Schwedler took part in the first performance of Saint-Saëns's *Tarantelle* for flute, clarinet and orchestra (1893). He was one of the first to rediscover the forgotten repertory of the 18th century and the 19th: in 1901 he and Barge's pupil Oskar Fischer performed Bach's Brandenburg Concerto no.4 on reform flutes; for Peters of Leipzig he edited Bach's solo Partita (to which the organist Gustav Schreck (1849–1918) added a piano part in 1918) and six Sonatas (1910–24), and Mozart's Flute Quartets (1924).

By the end of World War I most Germans had overcome their reservations and were playing wooden Boehm-system flutes; English flautists played the Carte model of 1867, an instrument by Radcliff or a Boehm flute of silver, wood or ebonite. Most French players after 1860 used metal instruments of the modified Boehm system. Of these three 'national schools', the German and English players concentrated on tonal power while the French cultivated finesse in tone production and colour. Paul Taffanel and his student Louis Fleury gave new impetus to flute playing in France at the turn of the century by creating a new culture of pedagogy, playing style and repertory, which included the hitherto mostly unexplored flute music of the past 200 years. The flute methods written by Henri Altès (1906) and by Taffanel and his student Philippe Gaubert (1923) were still widely used at the end of the 20th century. Players of the French school favoured instruments by the firms of Lot, Claude Rive (*fl* 1877–95) and Auguste Bonneville (*fl* 1858–67). Outstanding solos from this period were Debussy's *Prélude à l'après midi d'un faune* (1892–4) and *Syrinx* (1913) for solo flute, the latter written for Fleury.

Around the turn of the century, German- and French-style flutes and flute playing were transmitted to North America. The French style became dominant, and the recordings, teaching and concert tours of French performers hastened the change from wooden Boehm-system flutes to silver flutes such as those made by Louis Lot. American firms founded by W.S. Haynes and V.Q. Powell began to make French-style flutes in the USA in the first decade of the century. These have set the standard both in the USA and, from the 1930s, in Japan, where Koichi Muramatsu began to make flutes inspired by Haynes and Powell. After World War II these and other American and Japanese makers added low-priced models to their lines while the few remaining French makers primarily made instruments for professional use.

(d) The modern Boehm flute. After World War II players of the French-style flute cultivated a smooth, rich, penetrating and brilliant sound, to which vibrato was commonly added. This replaced the dark, dense, compact sound, without vibrato, that had been cultivated by English and German players for the past 150 years. Brahms and Mahler had desired a flute tone that merged with the other instruments, but this ideal became subordinate to an emphasis on the characteristic sound of each instrument; conductors such as Herbert von Karajan required a penetrating sound and a wide range in dynamics. Taffanel's axiom 'le volume est peu de chose et le timbre est tout' had been reversed.

The French Boehm-system flute best fulfilled all these requirements. The instrument is modelled after Lot's, with closed keys, five of them perforated; it is made of silver, silver alloy or gold, occasionally ebonite (predominantly in Great Britain), German silver or platinum. The

3. The 3rd finger is applied to the small key between the F and F# keys.

bore is slightly wider than earlier models (19 mm) and a key for *b* is standard, as is a closed key for G♯. Since the late 1980s, occasionally the head joint is made of wood. Changing pitch levels and tone ideals led to larger embouchure- holes and a revision of Boehm's *Schema* by Albert Cooper (*b* 1924) and others. The resulting redefinition of the flute's sound through an increase in overtones differentiated it from earlier models. Such revisions led to the modern multi-purpose flute and a related playing style.

Following World War II, broadcasts and recordings made the polished and evocative playing of René le Roy (1898–1985) and J.-P. Rampal (1922–2000) available to a large international public. These players were exponents of the Taffanel school, passed down by his students Adolphe Hennebains (1862–1914), Gaubert and Marcel Moyse (1889–1984). Moyse's innovatory approach provided the foundation for a new French school: French flute playing and teaching were responsible for the almost complete disappearance of the German and English wooden flutes and related styles of playing.

Many outstanding works for the flute were composed for players of the French school. Ibert's Concerto (1932–3) was written for Marcel Moyse and Hindemith's Sonata (1936) for Gustav Scheck. Varèse's *Density 21·5*(1936) was written for a platinum flute (21·5 is the density of that metal) made by Powell for Georges Barrère, who had earlier played the first performance of the *Prélude à l'après-midi d'un faune*. Honegger's *Danse de la chèvre* (1926), Jean Rivier's *Oiseaux tendres* (1935) and Martinů's Trio for flute, cello and piano (1944) were composed for Le Roy and Poulenc's Sonata (1956) for Rampal. Prokofiev's Sonata (1943), however, was first performed by the Russian flautist N. Kharkovsky, who probably

played a silver, closed-hole Boehm flute with an open G♯ key, the usual instrument in that region until late in the 20th century.

Especially since World War II players and composers have increasingly explored new techniques and expressive possibilities. Avant-garde techniques include multiphonics, whistle tones and whisper tones, humming and slap tones (created by slapping the keys without blowing through the instrument), and the electronic manipulation of sound. Pioneering works include Varèse's *Density 21·5*, Boulez's *Sonatine* (1946), written for Rampal, Messiaen's *Le merle noir* (1951) for flute and piano, Jolivet's *Cinq incantations* (1936) for solo flute and *Suite en concert* (1965), Maderna's *Musica su due dimensioni* (1952, rev. 1963) for flute and tape and Berio's *Sequenza I* (1958) for solo flute. Notable works of the late 20th century include Ferneyhough's *Unity Capsule* (1975–6) for solo flute, Cage's *Ryoanji* (1983–5) for small ensemble, written for Robert Aitken, and Boulez's *...explosante-fixe...* (1991–4). Flautists such as Severino Gazzeloni (*b* 1915), Aurèle Nicolet (*b* 1926), Istvan Matúz (*b* 1947), P.Y. Artaud (*b* 1946) and Robert Dick (*b* 1950) have played a major role in bringing the repertory up to date. Since the late 1930s the flute has been used as a jazz instrument by players such as Frank Wess, James Moody, Bobby Jaspar and Clement Barone. Bud Shank and others such as the more experimental Eric Dolphy, Roland Kirk and Mike Mower, have translated the advanced techniques of the avant garde to jazz.

Although a few women such as Cora Cardigan, Edith Penville and Winfred Gaskell (Liverpool PO) had played professionally in the early decades of the 20th century, the flute remained essentially a masculine instrument until the 1950s, when women began to occupy principal positions in orchestras and to make their mark as soloists. Among the first to achieve prominence were Doriot Anthony Dwyer (Boston SO) and Elaine Schaffer (Dallas SO); they were followed by many others. Prominent women soloists have included Susan Milan, Irena Grafenauer, Kirsten Spratt, Andrea Lieblenecht, Paula Robison and Carol Wincenc on the modern flute and Lisa Beznosiuk on historical flutes.

Makers have also been inspired to experiment with the instrument. As early as 1948 the British-born flautist Alexander Murray began a series of experiments in collaboration with the makers Elmer Cole and Albert Cooper, and, in 1967, with Jack Moore. In 1972 Greta Vermeulen invented a *Flûte à coulisse*, which has a trombone-like slide instead of tone holes. Developments of the late 20th century include the Matúz-Nagy 'Multiflute' developed by Matúz, and the Oston-Brannen Kingma system 'Quarter-tone C flute' developed by Eva Kingma and Bickford Brannen, both for extended techniques such as multiphonics. A carbon-fibre flute with magnets instead of needle springs was developed in Finland by Matti Haekoenen and Matti Hellin and new alto, bass and lower flutes, such as the 'Grossbass' made in 1981 by Christian Jaeger for Max Hieber, have been introduced. The open-hole (perforated key) alto flute was the result of a collaboration between the Dutch player Jos Zwaanenburg and the makers Dick Kuiper and Eva Kingma; the latter also applied this idea to her bass flutes. At the end of the 20th century Kotato & Fukushima of Japan was making a range of flutes from the piccolo down to a sub-contra bass with a range to C.

(e) The historical revival. In the late 1960s there was a revival of interest in early music and instruments. German teachers such as Scheck and H.-P. Schmitz reintroduced historical techniques while recordings by H.-M. Linde, Leopold Stasny, Frans Vester, Stephen Preston and Barthold Kuijken demonstrated that such effects were at their most convincing on period instruments. Around 1970 a modern school of 'Baroque flute' or 'Traverso' playing emerged, based on a selection from the mass of specific historical information. The all-purpose traverso, usually adapted from mid-18th-century models and pitched at the neo-Baroque standard of *a'* = 415, was used to play the music of Bach and Handel in a modern style loosely based on the instructions of Quantz; 'Hotteterre' flutes at *a'* = 392 were sometimes used for French repertory, and for music by Mozart, Haydn and Beethoven an early 19th-century keyed flute at *a'* = 430 became standard. The neo-Baroque style revived interest in 18th-century repertory among players of both the traverso and modern instruments; at the end of the 20th century the work of scholars, teachers and makers, and the development of an audience for early music, had provided a few young performers with the means to develop a personal yet 'historically informed' style, to investigate neglected music and to perform on instruments associated with specific repertories. At the same time, the revival influenced modern styles of flute playing. The flute repertory of the 16th, 17th and 19th centuries, however, was still viewed as more remote, and its techniques and instruments had been explored by only a few specialists.

JEREMY MONTAGU (I, II), HOWARD MAYER BROWN, JAAP FRANK, ARDAL POWELL (II)

Flûte (i) (Fr.). *See* FLUTE. The term is normally applied to the transverse flute (*flûte traversière*, *flûte allemande*, *flûte d'Allemange*; the form *flûte d'amour* refers to the instrument in A, a minor 3rd below the concert flute, or occasionally to the alto flute in G, a 4th below (usually *flûte alto* or *flûte contralto en sol*); *flûte à tierce* or third flute is pitched a minor 3rd above the concert flute, and *petite flûte* signifies the piccolo (for further discussion of the various members of the flute family *see* FLUTE, §II, 1–3). This group is distinct from duct flutes, where French compounds often signify RECORDER (*flûte à bec*, *flûte à neuf trous*, *flûte d'Angleterre*, *flûte douce*); a *flûte du quatre* is the recorder B♭, a 4th above the treble instrument. Other composite terms include *flûte brehaigne*, *flûte d'oignon* and *flûte eunuque* (*see under* EUNUCH-FLUTE), *flûteau d'un sou* and *flûte en fers blanc* (*see* PENNYWHISTLE), *flûte d'accord* (*see* PITCHPIPE) and *flûte à coulisse* (*see* SWANEE WHISTLE).

Flûte (ii) (Fr.). *See under* ORGAN STOP. (*Flute*; see also *flûte à pavillon*, *flûte d'amour*, *flûte harmonique* and *flûte triangulaire*; for *flûte à cheminée* see under *Chimney Flute*).

Flute clock (Ger. *Flötenuhr*). *See under* MUSICAL CLOCK.

Flutter-tonguing (Fr. *trémolo avec la langue*; Ger. *Flatterzunge*; It. *vibrato linguale*). A type of TONGUING demanded by some 20th-century composers in which the instrumentalist rolls the letter 'r' on the tip of his tongue while playing. The technique is particularly effective on the flute, but it is also applied to various other wind instruments.

Fluxus. An international avant-garde art movement that emerged during the 1960s. Founded by George Maciunas, a Lithuanian artist and architect who organized and promoted its activities in Europe and the USA, Fluxus consisted of a loose affiliation of artists, writers and musicians. In medical terminology, 'fluxus' denotes a flowing or fluid discharge and Maciunas hoped that Fluxus would likewise purge the world of bourgeois intellectuals, commercialized culture and institutionalized art. The movement officially began on 9 June 1962 at the Galerie Parnass in Wuppertal, West Germany. The first official Fluxus concert was held in Wiesbaden during the same year. It was followed by several other concerts throughout Europe featuring works by Nam June Paik, James Tenney, La Monte Young, Allison Knowles, Yoko Ono and many others.

Fluxus composers rejoiced in the musical potential of unconventional sounds, such as the smashing of a violin in Nam June Paik's *One for Violin Solo*. They pioneered a new genre of performance art called 'short forms' or 'events'. Events consist of brief instructions, usually no more than a sentence or two, defining a limited activity of some sort to be carried out by a performer. La Monte Young's *Composition 1960 no.10*, for example, instructs a performer to draw a straight line and follow it. Several other members of the Fluxus group, including Takehisa Kosugi, George Brecht, Dick Higgins and Yoko Ono, experimented with works in the same genre.

Members of the Fluxus movement believed that artists should not have a professional status in society and that their work should be accessible to everyone. A newspaper called *Fluxus V Tre* appeared sporadically from 1964 to 1979. It included announcements for Fluxus events and advertisements for its publications, as well as works by Fluxus artists, writers and musicians. In addition, a series of anthologies of Fluxus materials called 'Fluxus Yearboxes' were published. These contained scores for musical compositions and events, poetry, articles, records, photographs and 'found objects'.

When Maciunas's leadership faltered, Fluxus began to fall apart. A devastating blow came in 1965 during a demonstration at a performance of Stockhausen's *Originale*. Organized by Maciunas in response to the composer's alleged racist remarks about jazz, the demonstration failed miserably, probably because many of the performers in the concert were also members of Fluxus. Fluxus continued until the late 1970s; many agree it finally perished with Maciunas's death in 1978. Despite its critique of institutionalized art, Fluxus works now appear in museum exhibitions around the world.

DAVID W. BERNSTEIN

Flyarkovsky, Aleksandr Georgiyevich (*b* Leningrad, 6 July 1931). Russian composer. He studied at the Moscow Conservatory under Shebalin and has occupied various managerial posts in the USSR and the RSFSR Union of Composers. He is a professor at the M.M. Ippolitov-Ivanov Pedagogical Institute of Music. His compositions range in scope from symphonic works to popular songs: choral music, operettas and musical comedies also occupy an important place in his output. As a composer who has arranged more than 100 Russian folksongs, there is a particularly Russian orientation to his style. The general style of his music and the variety of musical images he employs are striking and specific; he often uses musical programmes which are primarily of a heroic and patriotic content. He has been a frequent prizewinner at Soviet and Russian competitions and also at international composing competitions. He is a laureate of the A.V. Aleksandrov State Prize.

WORKS

Stage: Dorogi dal'nïye [Distant Roads] (op, L. Derbenyov, Yu. Gulukin, I. Sharoyev), 1944; Otvazhnïy trubach [The Gallant Trumpeter] (op, V. Viktorov, after O. Gottsshe), 1963; Budet zavtra [There will be a Tomorrow] (operetta, N. Olev, A. Shaykevich), 1970; Yablochnaya lëdi [The Apple Lady] (operetta, A. Borisov, Ya. Khaletsky), 1979

Choral: Ave Maria (poem-cant., M. Tank), 1962; Pesni vïrvavshiyesya iz ada [Songs Broken Free from Hell] (poem-cant., African poets), 1965; Na grazhdanskoy na voyne [In the Civil War] (orat, A. Prokof'yev), 1972; Pesni Kulikova polya [Songs of Kulikovo Field] (orat, old texts), 1980; Aleksandr Matrosov (orat), 1983; I mir glyadel na nas [And the World Looked down on us] (orat, from military folklore)

3 Syms.: 'Rosveniku' [To my Contemporary], 1966; Sym. no.2; Sym. no.3, str (1992)

Other orch: Vn Conc., 1955; Sax Conc., 1958 (1996); Pyatnadtsat' minut do starta [15 Minutes to Take-Off], sym. poem, 1960; Urildaan [Competition], sym. poem (1979); 4 other sym. poems

Chbr and solo inst: 24 Preludes and Fugues, pf (1992); pf sonatas; Sonata, vc, pf; sonatas, vn, pf

Vocal: 12 song cycles incl. Khudozhnik [The Artist] (V. Sokolov); Madrigalï (P. Rozhar); Razmïshleniya [Meditations] (P. Eluard); Tebe, o rodina [To Thee, o Homeland] (S. Yesenin)

Folksong arrs. incl. 100 russkikh narodnïkh pesen [100 Russ. Folksongs] (1975)

Incid music incl. more than 60 film scores

GALINA GRIGOR'YEVA

Flynn, George (William) (*b* Miles City, MT, 21 Jan 1937). American composer and pianist. He studied at Columbia University (DMA 1972), where his teachers included Ussachevsky, Luening and Beeson. In 1977 he was appointed chair of the department of musicianship studies and composition at DePaul University's School of Music, Chicago. During the 1960s he collaborated with John Cage and Dick Higgins in New York, helping to define what the Fluxus movement called 'danger music'.

Flynn's music is propelled by the repetition in many time scales of similar gestures, loosely anchored around specific pitches and pitch-class aggregates. These gestures are related to kinaesthetic motions and postures, rather than to visual images. His piano music is intensely active and poses unprecedented kinematic challenges, such as the body trills in the second of the Preludes (1965, rev. 1994). Few can equal his keyboard virtuosity, especially in performances of his own works. A preoccupation with large forms and an aversion to notational complexity link Flynn to Kaikhosru Shapurji Sorabji and Cecil Taylor, rather than to Xenakis and Ferneyhough. Much of his work reacts against political and historical events.

KENNETH DERUS

Foard, Thomas. *See* FORD, THOMAS.

Focile, Nuccia (*b* Militello, Sicily, 25 Nov 1961). Italian soprano. She studied with Elio Battaglia in Turin, where she made her début in 1986 as Oscar in *Un ballo in maschera*. In that year she also won the Pavarotti Competition in Philadelphia. The clarity of her voice and the charm of her youthful appearance helped to fit her ideally for the lighter Mozart roles and others such as Norina in *Don Pasquale* and Nannetta in *Falstaff*, which she sang at Covent Garden in 1988. In the first five years of her career Focile sang in many of the major Italian houses, including La Scala, and was a frequent visitor to the USA and Britain, where she was particularly popular with the WNO. In Paris her roles have included Tatyana in *Yevgeny Onegin* (1992) and Gounod's Juliet (1994). The voice gaining weight, she has added roles such as Amelia Boccanegra and Butterfly, and also developed her concert repertory. She has made some solo recordings but is probably heard best as Susanna in *Le nozze di Figaro* with Mackerras and as a delightful Eleonora in Donizetti's *L'assedio di Calais*.

J.B. STEANE

Fock, Gerard(us Hubertus Galenus) von Brucken. *See* BRUCKEN FOCK, GERARD VON.

Focking, Hendrik (*b* Danzig, 17 Aug 1747; *d* Amsterdam, 7 April 1796). Dutch composer, organist and carillonneur. His parents were Mennonites from Haarlem who lived in Danzig from 1739 to 1752, when they moved to Amsterdam. Focking was blind, and it may be assumed that he received his musical instruction from the blind organist Jacob Potholt. From 1769 until his death he was carillonneur at the Oude Kerk and the Regulierstoren (now Munttoren), Amsterdam. In 1780 he became organist of one of the Mennonite communities in Amsterdam, the one usually called 'bij het Lam en bij de Toren', after the locations of its churches. In 1780 only the church 'bij het Lam' ('near the Dram', a brewery on the Singel) had an organ, an instrument by J.S. Strumphler (inaugurated in 1777). In 1786 another organ by Strumphler was installed in the church 'bij de Toren' ('near the Tower', the Jan Rodenpoort Tower), and Focking probably also played on that instrument. Focking taught the well-known blind Amsterdam organist and carillonneur Daniël Brachthuyzer (1779–1832). His son Cornelis Focking (1770) was also an organist.

Focking's only known compositions are the *VI sonates pour le flute traverse solo, avec une basse continuo, oeuvre première* (Amsterdam, *c*1765–9/*R*; 1 ed. H. Schouwman, Amsterdam, 1956). They follow the pattern of the mid-18th-century three-movement solo sonata, beginning with a binary movement in a moderate tempo, followed by a fast binary movement and concluding with an air or minuet, often with variations. Their style resembles that of North German composers such as C.P.E. Bach, Kirnberger and Müthel, and sometimes echoes from his teacher's teacher, Locatelli, can be heard. Though attractive and well-composed, Focking's sonatas are, on the whole, quite simple and not very imaginative. They were published privately by the composer, lack a dedication and are undated.

RUDOLF A. RASCH

Födermayr, Franz (*b* Grieskirchen, 13 Sept 1933). Austrian musicologist. He studied musicology (with Erich Schenk and Walter Graf) and anthropology at the University of Vienna from 1953, and took the doctorate with Graf in 1964. After completing the *Habilitation* in 1972 at Vienna he succeeded Graf in 1973 as professor of comparative musicology, a post he held until his retirement in 1999. From 1983 he was a corresponding member of the Österreichische Akademie der Wissenschaften and he was president of the Österreichische Gesellschaft für Musikwissenschaft, 1986–90. His scholarship is based on the traditions of the Viennese school of comparative musicology, including its celebrated techniques for sound analyses of vocal styles, and the fundamental questions concerning the relationship between psychology, acoustics and music. He has also examined Country and Western music. The Festschrift *Vergleichend-systematische Musikwissenschaft: Beiträge zu Methode und Problematik der systematischen, ethnologischen und historischen Musikwissenschaft* (ed. E.T. Hilscher and T. Antonicek, Tutzing, 1994) was published to mark his 60th birthday.

RÜDIGER SCHUMACHER

Fodor. Family of Dutch and French musicians.

(1) Josephus Andreas Fodor (*b* Venlo, 21 Jan 1751; *d* St Petersburg, 3 Oct 1828). Dutch violinist and composer. He studied with Franz Benda in Berlin and became a famous virtuoso, touring extensively in Europe. He played at the Concert Spirituel in Paris in 1780, and published some of his violin concertos around that time. In 1792 he moved to St Petersburg. His compositions also include sonatas, duets and other occasional pieces.

(2) Carolus Emanuel Fodor (*b* Venlo, 31 Oct 1759; *d* Paris). French harpsichordist of Dutch birth, brother of (1) Josephus Andreas Fodor. One of the foremost harpsichordists of his time, in about 1780 he settled in Paris, where he gave concerts, and taught and composed harpsichord concertos and sonatas, as well as a symphony and music for piano and strings.

(3) Carolus Antonius Fodor (*b* Venlo, 12 April 1768; *d* Amsterdam, 22 Feb 1846). Dutch pianist, conductor and composer, youngest brother of (1) Josephus Andreas Fodor. He studied in Mannheim, Paris and probably Russia, and in 1795 returned to Holland and became a leading figure in the musical life of Amsterdam. He promoted and conducted many concerts and composed symphonies, piano concertos, sonatas, quartets, other chamber music and several cantatas.

(4) Joséphine Fodor-Mainvielle [Mainvielle-Fodor] (*b* Paris, 13 Oct 1789; *d* Saint Genis-Laval, 14 Aug 1870). French soprano, daughter of (1) Josephus Andreas Fodor. She studied in St Petersburg with Eliodoro Bianchi. After some public appearances as a pianist and harpist, she made her stage début about 1810 in Fioravanti's *Le cantatrici villane*. In 1812 she married the French actor Mainvielle, and after singing in Stockholm and Copenhagen, returned to Paris, where she made her début at the Opéra-Comique on 9 August 1814 in Grétry's *La fausse magie* and Berton's *Le concert interrompu*; she also sang in numerous roles at the Théâtre Italien. Her London début was in 1816 as Paer's Griselda at the King's Theatre, where her many other roles included Mozart's Vitellia, Fiordiligi, Countess Almaviva, Zerlina and Susanna. The *Morning Post* described her voice as 'rich, harmonious, and, without possessing extraordinary power, of a considerable compass. Her taste is chaste, her execution correct, easy and elegant, and her science evidently profound. To the brilliance of ornamental flights, she joins the still greater charm of feeling'.

In 1818 Fodor-Mainvielle took part in the first London performances of Rossini's *Il barbiere di Siviglia* and *Elisabetta, regina d'Inghilterra*. That year she also appeared at La Fenice. She later took part in the first Paris performances of Rossini's *La gazza ladra* and *Elisabetta, regina d'Inghilterra* (1822) and also in 1822 was engaged at the S Carlo, Naples. She appeared at the Kärntnertortheater, Vienna, scoring an immense success as Semiramide, a role she also sang at the first Paris performance of Rossini's opera at the Théâtre Italien in 1825; but not completely recovered from an illness, she lost her voice during the performance, and was later replaced by Pasta. She retired from the stage in 1833. Her book *Réflexions et conseils sur l'art du chant* was published in 1857.

ELIZABETH FORBES

Foerster, Anton (*b* Osenice, nr Jičín, 20 Dec 1837; *d* Novo Mesto, Slovenia, 17 June 1926). Slovenian composer of Czech birth, uncle of JOSEF BOHUSLAV FOERSTER. He studied law and music in Prague (including work with Smetana) and was *regens chori* at Senj Cathedral, 1865–7. From 1867 he worked in Ljubljana, holding the post of conductor of the dramatic society (1868–1909) among others. One of the most important Romantic composers in Slovenia during the second half of the 19th century, he strove in his secular compositions to found a national style of Slovenian music. The Slovenian spirit is particularly evident in his lyrical comic opera *Gorenjski slavček* ('The Nightingale of Upper Carniola'). In three acts, to a libretto by E.F. Züngl after L. Pesjak and given in Ljubljana on 13 December 1896, it was originally composed as an operetta (Ljubljana, 17 April 1872). In this work Foerster tried to compose a national opera with an authentic Slovenian melodic idiom, taking as his model Smetana's *Bartered Bride*; *The Nightingale* has become a standard work of the Slovenian repertory. He also wrote a five-act opera, *Dom in rod* ('Home and Family', 1920–23), to a libretto by F. Göstl and F. Mohorič; it has not been performed. Among his other compositions are sacred works (mass settings in Latin, two in Slovene and a Glagolitic Mass), secular choral works and pieces for piano and for orchestra.

MANICA ŠPENDAL

Foerster, Christoph. *See* FÖRSTER, CHRISTOPH.

Foerster [Förster], **Josef** (*b* Osenice, nr Jičín, Bohemia, 22 Feb 1833; *d* Prague, 3 Jan 1907). Czech teacher, organist and composer, father of JOSEF BOHUSLAV FOERSTER. He was born into an old Bohemian cantor family and continued the tradition by studying in Prague as a teacher (1849–51) and at the organ school. After being employed as an organist in Vyšší Brod, he returned to Prague and held appointments as organist and choirmaster, notably at St Mikuláš (1858–61), St Vojtěch (1863–88) and at Prague Cathedral (1887–1907). At the same time he was an active and influential teacher at the organ school (from 1857), the Teachers' Institute (from 1863) and at the Prague Conservatory (1866–1904). His harmony manual, *Nauka o harmonii*, retained its usefulness for several decades. At St Vojtěch (where the organist at that time was Dvořák) he trained the choir to its leading position in Prague and performed large-scale masses with soloists from the Provisional Theatre. In 1873, however, he began performing *a cappella* Renaissance works. This change is reflected in his own compositions. With Lehner, Skuherský and Křížkovský he belongs among the leading figures

of the church music reform movement in Bohemia and Moravia.

WORKS

all printed works published in Prague

3 Requiem, chorus, orch: op.33 (*c*1880); op.34 (*c*1880); op.37 (*c*1890)

7 masses (chorus, orch, unless otherwise stated): male vv, op.20 (*c*1865); Sv. Vojtěch, op.31, in *Cyril*, i (1874), suppl. and ii (1875), suppl.; De beata, SA (optional TB), org, op.32 (1877); Sv. Metoděj, op.35, in *Cyril*, xi (1884), suppl.; Jubilaei solemnis Francisci Josephi I, SATB, org, op.36 (1898); Bohemica, op.38a (*c*1900); op.38b (*c*1900)

Other sacred vocal: Responsoria gregoriánská (n.d.); Sbory k sňatku [Choruses for a Wedding] (n.d.); Otec vlasti [Father of the Fatherland] (cant.); 2 TeD; 15 motets; other works

Org: Katolický varhaník [The Catholic Organist: Collection of Hymn Harmonizations, Preludes etc.], op.13 (1858); Dvě slavnostní předehry [2 Ceremonial Preludes], op.16 (n.d.); other works, MS

JOHN TYRRELL

Foerster [Förster], **Josef Bohuslav** (*b* Prague, 30 Dec 1859; *d* Vestec, nr Stará Boleslav, Bohemia, 29 May 1951). Czech composer, writer and teacher. Together with his contemporaries Janáček, Novák, Suk and Ostrčil, he led the development of Czech music from the nationalist trinity of Smetana, Dvořák and Fibich to the interwar avant garde.

1. LIFE. Foerster came from an established musical family. His father, JOSEF FOERSTER (1833–1907), served as organist and choirmaster in the foremost Prague churches, as organist at St Vitus's Cathedral, as a teacher at the Prague Organ School and, from the 1860s, as professor of theory at the Prague Conservatory. His uncle Antonín Foerster (1837–1926), a pupil of Smetana, was an organist, choirmaster and conductor who contributed much to the musical life of Ljubljana.

Foerster himself studied at the Prague Organ School (1879–82). He succeeded Dvořák as organist of St Vojtěch (1882–8) and was then choirmaster of Panna Marie Sněžná (1889–94). At the same time he taught singing in Prague secondary schools and, from 1884, wrote reviews for *Národní listy*. He was personally acquainted with Smetana and Dvořák, and was also on friendly terms with the poet Jan Neruda, Tchaikovsky and many other artistic figures. In 1888 he married the National Theatre soprano Berta Lautererová (1869–1936), and in 1893 moved with her to Hamburg when she was engaged by the Stadttheater. He worked there as a critic for the *Neue Hamburger Zeitung*, the *Hamburger freie Presse* and the *Hamburger Nachrichten*, and in 1901 was appointed piano teacher at the Hamburg Conservatory. He became a friend of Mahler, who, on his move from Hamburg to Vienna, engaged Lautererová for the Hofoper. Husband and wife moved in 1903 to Vienna, where Foerster became professor of composition at the New Conservatory and, from 1910, music critic for the influential daily *Die Zeit*.

On the formation of the Czech Republic in 1918 the couple returned to Prague and Foerster took appointments as professor of composition at the conservatory (1919–22). He then transferred to the master school (1922–31), also teaching music at the university (1920–36). His pupils included Jirák (in Vienna), Bořkovec and Karel Hába (at the Prague Conservatory), Řídký and Burian (at the conservatory master school), and Plavec (at Prague University), among a host of others. Many of these played leading parts in the interwar Czech avant garde, though Foerster's teaching was never partisan. He received an honorary doctorate from Prague University in 1919, when the Foerstrova Společnost ('Foerster Society') was founded to promote his works. In addition, he was president of the Czech Academy of Sciences and Art (1931–9), and in 1945 he received the title National Artist. After Lautererová's death in 1936 he married Olga Dostálová-Hilkenová and moved to Staré Strašnice, dividing his time between his home there and his summer residence in Vestec. He was granted a state funeral, starting from the National Theatre in Prague (5 June 1951).

2. WORKS. Foerster's artistic production was enormous. His extensive literary work includes essays and memoirs (which, like those of Janáček, are of high quality and value), verse (including his own texts for songs, choruses and operas) and criticism. He contributed to specialist journals – *Dalibor*, *Hudební revue*, *Smetana*, *Hudba*, *Národní divadlo* and Janáček's *Hudební listy* – and to reviews of the arts, including *Lumír*, *Lipa* and *Světozor*. In some cases he used pseudonyms: '-ter' for *Národní listy*, 'Griffith' for *Den*, and 'Essex' and 'Felix Triste' for *Politik*. While in Vienna, too, he made his mark in the Czech newspapers *Vídeňský deník*, *Svědomí* and *Vídeňský národní kalendář*. His criticism shows a sympathy with the late Romantics: Grieg, Tchaikovsky, Wagner, Bruckner, Mahler and the Czechs Smetana, Dvořák, Fibich and Ostrčil. His essays reveal a reflective intelligence and a wide knowledge of world literature. He was also a gifted graphic artist; his paintings and drawings, to which he devoted great attention throughout his life, show him as more than a passionate amateur.

Foerster wrote more than 190 works with opus numbers, and many of these consist of sets or cycles. The bulk is made up of vocal music, including 6 operas, over 350 songs, over 300 choral works and 26 melodramas. The inclination towards music for voices was the result of his constant and fundamental emphasis on the linking of word and sound, in which he saw an ideal medium for the fusion of thought and emotion.

The maturing of Foerster's style may be dated to the period 1890–1910, most of which he spent in Hamburg and Vienna. In these two decades he produced nearly all his key works, these falling into six basic genres: choral music (the *Devět sborů* op.37 for male voices), operas (*Eva*), symphonic works (the Fourth Symphony), orchestral suites (*Cyrano de Bergerac*, *Ze Shakespeara*), songs, and pieces having a stylistic link with Czech pre-Classical music (the Wind Quintet in F major). The feature which unifies all of these is Foerster's lyricism, which had been at first influenced by the Romanticism of Grieg and Fibich. Around 1890 his style became expressively subjective, and before World War I he moved slowly on to a meditative plane, projecting his philosophy of Christian humanism and love as a world principle.

Josef Bohuslav Foerster: portrait by 'Dr Desiderius', charcoal and watercolour, 1925

Foerster's musical language is restrained, conventional in harmony and structure. The central feature of his formal conception is a free polyphony in which the influence of organ playing is evident in his attempts to build a structure from complementary melodic voices. Melodic writing was for him a major preoccupation; his aim was a perfect melodic shape, and he achieved his best in his vocal music.

Forester's first opera, *Debora* (1890–91), is a remarkable work, the earliest serious village drama in Czech opera (as opposed to the many village comedies beginning with Smetana's *Bartered Bride*) and one that provides striking evidence of his abiding sympathy for minority groups such as Jews. His next opera, *Eva* (1895–7), continued the village-opera trend in an adaptation of Gabriela Preissová's drama *Gazdina roba* ('The Farm Mistress'), thus anticipating Janáček's *Jenůfa* (based on Preissová's next play) by several years. But whereas Janáček emphasized the folkloristic aspects, these are muted and regionally unspecific in Foerster. Above all, Foerster (unlike Janáček) turned Preissová's prose into verse, with the result that *Eva*, in comparison to *Jenůfa*, has a much more conventional cut and structure. With its strong line in melancholy lyricism and well-drawn principal character, *Eva* scored a popular and critical success at its première and remained for nearly a century as a repertory opera in Bohemia. After *Jessika* (1905), a light-hearted adaptation of *The Merchant of Venice*, Foerster wrote three later operas, all of which explore an increasingly personal vein in which the psychological depiction of the main characters and their spiritual development are paramount.

WORKS

(selective list)

OPERAS

all first performed at Prague, National Theatre

op.	
41	Debora (3, Mosenthal, J. Kvapil (i), after S.H. Mosenthal), 1890–91, 27 Jan 1893
50	Eva (3, Foerster, after G. Pressová: *Gadzina roba* [The Farm Mistress]), 1895–7, 1 Jan 1899
60	Jessika (3, J. Vrchlický, after W. Shakespeare: *The Merchant of Venice*), 1902–4, 16 April 1905, with addl court scene, 1906
100	Nepřemožení [The Invincible Ones] (4, Foerster), 1906–17, 19 Dec 1918
102	Srdce [The Heart] (prol., 2, epilogue, 2, Foerster), 1921–2, 15 Nov 1923
158	Bloud [The Simpleton] (7 scenes, Foerster, after L.N. Tolstoy), 1935–6, 28 Feb 1936

VOCAL

Sacred: Stabat mater, op.56, chorus, orch, org, 1891–2; Glagolská mše [Glagolitic Mass], op.123, chorus, org, 1923; Missa in honorem S. Francisci Assisiensis, op.131, chorus, org, 1925–6; Missa in honorem Santissimae Trinitatis, op.170, chorus, org, 1940; Missa in honorem S. Adalberti, op.188, chorus, org, 1947

Cantatas: Hymnus andělů [Hymn of the Angels] (S. Čech), op.13, chorus, orch, 1889; Mrtvým bratřím [To the Dead Brothers] (Bible, Gehrok, J. Vrchlický, R. Tagore), op.108, solo vv, chorus, orch, 1918; 4 bohatýři [4 Heroes] (J.V. Sládek), op.117, 1913, orchd 1921; Svatý Václav [St Václav] (cant., A. Klášterský), op.140, solo vv, chorus, orch, org, 1928; Máj [May] (K.H. Mácha), op.159, Bar, spkr, male chorus, orch, 1936; Píseň bratra slunce [Song of Brother Sun] (St Francis, A. Vyskočil), op.173, Bar, male chorus, orch, 1944; Kantáta 1945 (M. Rafojová, B. Mathesius), S, Bar, male chorus, orch, 1943–5

Mixed choruses: Česká píseň [Czech Song] (J. Kvapil), op.30, 1890; Modlitba na moři [Prayer to the Sea] (M. von Strachwitz, V. Hornof), op.71, 1901; Skon [Passing] (H. Heine, trans. V.J. Novotný), op.77/1, chorus, pf, 1898; Gethsemane (16th century), op.121/4, 1900; Oblačný pták [Cloud Bird] (R. Krupička), op.134, 1927–8; Srdci mému [To my Heart] (K.H. Mácha), op.151b, chorus, pf/orch, 1936; 6 sborů [6 Choruses] (T. Shevchenko, J. Hora, R. Krupička, E. Stoklas), op.175, 1933–40

Female choruses: 2 ženské čtverozpěvy [2 Female Quartets] (J.V. Sládek), op.74, 1913; Posvěcení noci [Blessing of the Night] (F. Hebbel), op.87/1, chorus, pf/orch, 1910; Most vzdechů [Bridge of Sighs] (T. Hood, trans. Sládek), op.87/2, chorus, orch, 1911

Male choruses: 3 selské písně [3 Village Songs] (Sládek), op.19, 1889; 9 sborů [9 Choruses] (Sládek), op.37, 1894–7; Hymnus (Sládek), op.63/3, double chorus, 1907; Svatý Václave! [O St Václav!] (Sládek), op.86, 1910; [7] Mužské sbory [Male-Voice Choruses] (Sládek, Vrchlický), op.102, 1920–21; 12 sborů (Sládek), op.171, 1925–44

Melodramas: 3 jezdci [3 riders] (Vrchlický), op.21, 1889; Amarus (Vrchlický), op.30a, 1897; Carçamon (H.A. Beers, trans. Sládek), op.149a, 1942–3; Romance štědrovečerní [A Christmas Eve Romance] (J. Neruda), 1934; Kejklíř [The Juggler] (O. Fischer), op.176a, 1934, orchd 1949

Songs: Frühlings- und Herbstlieder (F. Gilm and others), op.11, 1896–8; 3 Lieder (folk text, K. Stieler, Vrchlický), op.24, 1890–95; Láska [Love] (G. Falke, trans. J. Theurer, K. Burian), op.46, 1899–1900; Démon láska [The Devil Love] (Vrchlický), op.81, 1909; Písně na slova Karla Hynka Máchy [Songs to the Words of Mácha], op.85, 1910; Milostné písně [Love-Songs] (Tagore), op.96, 1v, pf/orch, 1914; Čisté jitro [Pure Morning] (O. Březina, A. Sova, F.X. Šalda), op.107, 1v, orch, 1914–18; 2 motivy z Jana Nerudy, op.109a, 1911; 3 modlitby [3 Prayers] (M. Maeterlinck, P. Flemming, M. Lermontov), op.109b, 1897–1912; Kvetoucí magnolie [Flowering Magnolia] (V. Hálek), op.132, 1924; 6 písní [6 Songs] (A.S. Pushkin, trans. P. Křička), op.161, 1937; 6 písní (Sládek, J. Kvapil, Vrchlický), op.165a, 1941–2; U bran štěstí [At the Gates of Happiness] (Sládek), op.186, 1945; Písně červnových dnů [Songs of June Days] (Foerster, Shakespeare, Sládek), op.189, 1948

OLDŘICH PUKL (with JOHN TYRRELL)

Foetisch, Charles (*b* Ballenstedt, 24 Nov 1838; *d* Pully, nr Lausanne, 13 Oct 1918). Swiss music publisher of German birth. As a resident of St Gallen he formed a quintet under the name of La Chapelle de Saint-Gall, in which he played the double bass. With this group he moved to Lausanne, where he helped to found the Orchestre de la Ville et de Beau-Rivage. In 1865 he started a small music business. He bought the firm of Delavaux in 1877, and later the music firm of Hoffmann. He subsequently sold his business and his house to the four sons of his first marriage, who then founded the firm of Foetisch Frères and in 1905 made it into a joint-stock company. Two grandsons left the company in 1947 to start the business which in 1949 became the publishing house of M.P. Foetisch (to be distinguished from Foetisch Frères S.A., which no longer contains any representative of the Foetisch family).

Foetisch Frères S.A. has published numerous Swiss choral works, a small amount of instrumental music, and works by Honegger (*Le roi David*, *Nicolas de Flue*). The firm was bought by Hug & Co. on 7 January 1978. The house of M.P. Foetisch publishes Swiss choral works and Swiss contemporary music; its catalogue also includes works on musicological subjects and music appreciation. It is now owned by Jean-Claude Foetisch who runs the business with his two sons, Jérôme and Grégoire.

ETIENNE DARBELLAY

Fog, Dan (*b* Hellerup, Copenhagen, 11 Aug 1919). Danish music antiquarian, writer on music and publisher. He founded the publishing firm known by his name in 1953 when he purchased the Knud Larsen Musikforlag (founded 1906), and added to this an antiquarian business. He studied at the University of Copenhagen (1944–6) and the Royal Danish Conservatory (1948). From 1957 to 1977 he was in charge of the distribution of the publications of the Samfund til Udgivelse af Dansk Musik, active since 1871.

Dan Fog is regarded as the most important Scandinavian music antiquarian. Through the distribution of the Samfund editions the firm represents much 19th- and 20th-century Danish music, including works by J.A.P. Schulz, Niels Gade, Carl Nielsen, Knudåge Riisager and Ib Nørholm. As a writer and musicologist he has presented valuable contributions in the field of Danish music history. Fog is co-editor of the *Edvard Grieg-Gesamtausgabe* and was also involved in the planning of the complete edition of works by Gade (1986–94). He has also edited catalogues on Edvard Grieg, Niels Gade, Carl Nielsen and other Danish composers. In 1994 his archive was taken over by the Kongelige Bibliotek.

LENNART REIMERS

Fogel, Johann Christoph. *See* VOGEL, JOHANN CHRISTOPH.

Fogg, (Charles William) Eric (*b* Manchester, 21 Feb 1903; *d* London, 19 Dec 1939). English composer and conductor. He was the son of Charles H. Fogg, organist to the Hallé Orchestra and himself a minor composer. Much of Fogg's life was centred on Manchester. He was a chorister at Manchester Cathedral from the age of 10 until his voice broke and, from the age of 15, organist at St John's, Deansgate. Encouraged by his parents, he composed from childhood, winning the Cobbett Prize (1919) with his *Dance Fantasy* for piano and strings. In 1920 he went to Birmingham to study with Bantock. His first published music, a song, appeared in 1919, and before he was 20 he had a substantial published catalogue including the song *Peace* (with words by Tagore), which became popular. In 1920 he conducted his music at the Queen's Hall.

He joined the BBC in Manchester as a pianist (1924), also appearing on Children's Hour (from 1929). In 1935 he moved to London to direct the newly formed BBC Empire Orchestra, giving concerts during the night for live transmission to distant time zones. He died after falling under a London tube train.

Early in his career Fogg was influenced by Stravinsky's early works and criticized for his modernism; however, his later music owes more to Bantock and Strauss. His success in the 1920s centred on his chamber music and songs, including works written for his wife, the cellist Kathleen Moorhouse. His orchestral works, short and usually lightweight, include the overtures *Comedy of Errors* (1922), *Song of Myself* (1929) and *September Night* (first performed at the Proms in 1935). His delightful Bassoon Concerto (Proms, 1931) was championed by Archie Camden and has been revived by Rachel Gough.

His two choral works, the ballade *The Hillside* (first performed in 1927) and the Blake setting *The Seasons* (1931), though both published in vocal score, had been thought unperformable owing to the loss of the manuscript full scores and orchestral parts. However, *The Hillside* was revived in 1989 in an orchestration by Rodney Newton.

WORKS
(*selective list*)

Stage: Hänsel and Gretel, *c*1928

Vocal: 3 Chinese Songs (L. Henry), op.59 (1921); Songs of Love and Life (R. Tagore), 5 songs (1921) [incl. 'Peace']; The Hillside (ballade, Tagore), S, Bar, chorus, orch, perf. 1927, reorchd R. Newton, 1989; The Grizzle Grumble (M. Levy) (1930); The Seasons (W. Blake), chorus, orch, 1931; other songs, solo vocal pieces, choral works

Orch: Dance Fantasy, pf, str, 1919; Comedy of Errors, ov. after W. Shakespeare, 1922; Scenes from Grimm, *c*1928; Song of Myself, ov., 1929; Bn Conc., D, perf. 1931; September Night, ov., perf. 1935

Chbr and solo inst: Suite, vn, vc, hp, 1920; Poem, pf trio, 1922; Str Qt, A♭, 1922–3; solo pf pieces

LEWIS FOREMAN

Foggia, Antonio (*b* Rome, *c*1650; *d* Rome, May 1707). Italian composer, son of FRANCESCO FOGGIA. He was a pupil of his father. In 1675 he became *maestro di cappella* of S Girolamo della Carità, Rome. While his father was *maestro di cappella* of S Maria Maggiore, Rome, he served as *vicemaestro*, and on his father's death he succeeded him as *maestro*. Like his father he directed Lenten music at the Oratorio del Crocifisso: he is known to have done so on at least three occasions – 1686 (first Friday in Lent), 1687 (one of the Fridays) and 1688 (fifth Friday). His works comprise a few liturgical compositions and at least six oratorios, known only from their librettos. His solo motet *O quam fulgido splendore*, like those of his father, is similar in style and structure to a secular cantata.

WORKS

ORATORIOS

all first performances in Rome, music lost

Bethsabeae, 1679; Archangeli de Antichristo triumphus, 1679, revived 1681; Innocentium clades (A. Politauro), 1686, revived 1687; Superbia depressa in fornace Babilonica, 1687; Saul in Davidem, 1688; Per la notte del Ss Natale (P. Giudici), 1694

OTHER WORKS

Mass, 3vv, in F. Foggia: Messe e offertorii (Rome, 1673), lost, cited in Baini; Mass, 3vv, bc (org), in F. Foggia: Messe (Rome, 1675); Motet, 1668[1]; Sicut lilium, 2vv, 2 vn, bc, *I-MOe*; O quam fulgido splendore, S, bc, *B-Bc*, ed. in Cantio sacra, x (Cologne, 1958); Bacio (Capriccioso desio Lilla), S, bc, *I-Rc*

For bibliography *see* FOGGIA, FRANCESCO.

HOWARD E. SMITHER/R

Foggia, Enrico Antonio Radesca di. *See* RADESCA, ENRICO ANTONIO.

Foggia, Francesco (*b* Rome, 1604; *d* Rome, 8 Jan 1688). Italian composer. He was one of the most important *maestri di cappella* in 17th-century Rome, serving many of the city's most prestigious choirs and publishing church music extensively. He trained as a choirboy at the Jesuit church of S Apollinare under the direction of Ottavio Catalano and perhaps Antonio Cifra. He also received instruction from other important Roman *maestri*, including the Nanino brothers and Paolo Agostini (whose daughter he married in 1631). Early in his career he worked outside Rome (a typical pattern for rising Roman musicians who were expected to prove their merit outside the city), serving, during the 1620s, at the courts of the Elector Ferdinand Maximilian at Cologne, Duke Maximilian I of Bavaria at Munich, and Archduke Leopold of Austria at Brussels. After his return to Italy he became *maestro di cappella* of the cathedrals at Narni and Montefiascone. Payments from 1628 show that he was working at S Maria in Aquiro, Rome, and between 1634 and 1636 he served the important choir of S Maria in Trastevere there. In 1637 he was appointed to the prestigious position of *maestro di cappella* of S Giovanni

in Laterano, his contract stating that he could retain the post for life. Although he left in 1661 for a similar position at S Lorenzo in Damaso, it was during his lengthy tenure at S Giovanni that Foggia established his credentials as a composer and *maestro*. Between 1645 and 1681 he published numerous volumes of motets, masses and other liturgical works at a time when music publishing in Italy had generally fallen on hard times. Some of his volumes were reprinted, many individual compositions were solicited for anthologies, and inventories reveal that many *cappelle* in the Papal States, Tuscany and Germany performed his works from manuscripts. He was repeatedly elected as chief officer of the Congregazione dei Musici and was highly sought after to direct smaller churches' feast-day celebrations, often involving elaborate musical productions. He also served a number of times as *maestro* for the Lenten observances of the Oratorio del Ss Crocifisso at the request of Duke Altemps. His students were important in the next generation of Roman musicians and included G.B. Bianchini, G.O. Pitoni and his own son Antonio Foggia. It may have been primarily for Antonio's benefit that the elder Foggia made his last career move in 1677 to S Maria Maggiore: his contract stated that Antonio would serve as his assistant and then succeed him as *maestro* upon his death.

Foggia's accomplishments as a church-music composer were recognized by his contemporaries, among them Antimo Liberati, who pointed in general to his facility with a variety of styles and in particular to his ability to please the ears of both the learned and ignorant. Foggia's involvement with the Oratorio del Ss Crocifisso resulted in two works which can be reliably attributed to him (*David fugiens a facie Saul* and *Tobiae*) and several others which have at some time been attributed to him. Like other mid-century Roman oratorios, these works comprise an easy mixture of recitative, arioso and occasional aria writing, but – capitalizing on his polyphonic skills – the chorus and ensemble contributions are somewhat more prominent in his works than in those of his contemporaries. Foggia's small-scale motets for two or three voices and continuo reveal a keen sense for the concerted style: *In tribulationibus* (op.3, 1650) for two sopranos, for example, has a typically judicious combination of sequential motion between the two voices, passages of parallel thirds, and suggestions of imitative development. However, it is the full-choir compositions, which are the real tours de force of his output, the Vesper psalms, Marian antiphons, litanies, masses and offertories highlighting Foggia's primary activity as a church musician. In these works he invariably combines contrapuntal skill with a compelling rhythmic and harmonic flair. Imitative openings to mass movements are common, but the motives are sharply chiselled in terms of their rhythm and tonal focus, and robust triple-meter passages provide frequent metrical contrast. Foggia also made occasional use of recent formal developments; for example his Mass *Exultate Deo* (op.15, 1672) uses an ostinato bass. Foggia's compositional orientation seems predominantly polyphonic and probably justifies Martini's assertion that he was the last composer of the 'Roman school' founded on Palestrina.

STEPHEN MILLER

Fogliano [da Modena], **Giacomo** [Fogliani, Jacopo] (*b* Modena, 1468; *d* Modena, 10 April 1548). Italian composer, brother of LODOVICO FOGLIANO (according to Giacomo's letter to Pietro Aretino dated 7 May 1542). In his *Dialogo* (Modena, 1483), Parente (*Dialogo*, Modena, 1483) described the young Giacomo as 'very accomplished on both the keyboard [organ] and the pedal, a master of harpsichord playing, and more than accomplished on other instruments'. From 1479 to 1497 he was the organist at Modena Cathedral. His whereabouts from 1497 to 1504 are not known; Fusi cites a reference to 'Giacomo di Salvatore, Piffaro dei Magnifici Signori' in the city archives of Siena in 1498 and suggests that this is Fogliano. Petrucci published many of his vocal works, the earliest datable being a frottola of 1502. From 1504 until his death he was again the organist at Modena Cathedral, making a short trip to Parma in 1543 to test a new organ. His duties at Modena also included singing, teaching the choirboys, composing and teaching the organ. His most famous keyboard student was Jiulio Segni, whom he taught from 1512 to 1514 at the request of Cardinal

Ippolito I d'Este. A memorial tablet to Fogliano laid by his daughter is in the cathedral.

Fogliano's few sacred compositions reveal much use of imitative duets and frequent homophonic episodes; the text setting is workman-like and not particularly expressive. Their style and the date of 1518 for one source (*I-Bc* Q19) suggest that he wrote them in the early years of the 16th century. His *laude* are in an even more homophonic style and have a simpler texture, suitable for performance by non-virtuoso singers.

His frottolas, most of which date from about 1500, are chordal and rigidly periodic such as *La non vol più esser mai*, dance-like such as *L'amor, donna, ch'io te porto* (in which the hemiola pattern in the superius contrasts with the regular rhythm of the lower voices) or, as in *Quanto più quopro*, have the superius and bass proceeding in parallel 10ths while the meandering inner voices function as fillers. *Occhi suavi et chiari*, however, has an equal-voiced texture which Rubsamen has seen as a link to the madrigal (despite its strophic text). Although published in 1547, his five-voice madrigals are not much more advanced in style than those by the madrigalists of the early 1530s, nor do they have the same skill in text expression. Frottola-like texts are sometimes set in motet style whereas other settings are similar to the frottola itself.

His four keyboard ricercares, probably composed in the late 1520s or 30s, are of moderate length and divided into sections by the use of imitation, instrumental figuration and some homophonic interludes. They reveal an advance over those by Marco Antonio Cavazzoni in planning, in concision and in disciplining instrumental features to more unified ends. While Fogliano's ricercares are not unidiomatic, they betray a certain restrictive influence of vocal polyphony. He achieved coherence by well-defined and carefully placed phrases, employing chords for sheer sonority much less often. Compared to Cavazzoni's treatment, the ambitus of Fogliano's scale work is a full octave less, and his preparation and resolution of dissonances are rarely bold, more usually conforming to contemporary vocal music. Fogliano's major innovation was to introduce short points of imitation in a great number of entries, but he avoided any feeling of pervading imitation by loosening the fabric with brief scalar, ostinato and chordal passages.

WORKS

SACRED

Motets: Adoramus te, 4vv; Beati omnes, 4vv; De profundis, 4vv: ed. K. Jeppesen, *Italia sacra musica*, i (Copenhagen, 1962), 64, 70, 77

H. COLIN SLIM

Fogliano [Fogliani], **Lodovico** [Folianus, Ludovicus] (*b* Modena, *c*1475; *d* Venice, shortly before 7 May 1542). Italian theorist and composer. His name appears in the records of Modena Cathedral in 1494 as 'Don Lodovico de Alexandro da Fojano'; his brother Giacomo had been organist there since 1489. Despite the note that Orazio Vecchi wrote on the cover of a Modenese manuscript which includes a mass by Lodovico (*I-MOd* IV), 'Jacobi et Ludovici Foliani olim cathedralis Mutinae magistri opera', Lodovico was never choirmaster. He may be the 'Ludovico da Modena' who was a singer in the chapel of Ercole I d'Este in 1493 and again in 1503–4, especially if this person was the 'Ludovigo da Fulgano' listed in 1499–1501 (lists in *LockwoodMRF*). In 1513–14 he was a singer in the Cappella Giulia. Some time after this he moved to Venice, and seems to have devoted the rest of his career to music theory and philosophy.

In 1580 Zarlino is quoted as saying that Fogliano 'was neither priest, friar, nor monk, and he never practised music in public, but ... lived in Venice for a very long time'. It is there that he probably learnt Greek; Pietro Aretino, in a letter to him of 30 November 1537, encouraged him in his wish to translate Aristotle (Tiraboschi). A manuscript containing his excerpts from Aristotle and Averroes's commentaries survives (*Flosculi*

ex philosophia Aristotelis et Averroijs, *F-Pn* lat.6757). By 1538 he had completed his philosophical study *Refugio de' dubitanti*; the publisher Caterino Ferri sought a privilege for it, but the book seems not to have been printed. This was probably the work that Lodovico left behind at his death and that his brother Giacomo requested from Aretino on 7 May 1542.

Fogliani's treatise, *Musica theorica* (Venice, 1529/*R*), is the first to bear this title after Gaffurius's *Theoricum opus musice* of 1480 and the second edition of 1492, *Theorica musice*. After a discussion of the nature of sound Fogliano restricts his enquiry to the proportions, discussed in the first part from a purely mathematical point of view, and in the second as applied to musical intervals, especially the parts of the tone. Both sections are presented in a lucid manner, helped by graphic illustrations, including a man showing how to produce various proportions on the monochord, using two movable bridges (allowing two tones to be heard simultaneously). The third section is concerned with Fogliano's new division of the monochord. Unlike the Pythagorean proportions, most of the ratios for the smaller intervals are superparticular: 9:8 for the major tone, 10:9 for the minor tone, 27:25 for the major semitone, 16:15 for the minor semitone, 25:24 for the minimal semitone, and 81:80 for the comma. This division ('according to nature') was expressly intended to correspond to harmonic intervals in contemporary practice. Although he does not say so, the division is based on the 10:9, 9:8, and 16:15 ratios of Ptolemy's syntonic diatonic, the just intonation that would later be championed by Zarlino. It had been adumbrated by Ramis de Pareia in his monochord division, though not explained in theoretical terms.

Only two compositions by Fogliano survive, *Fortuna d'un gran tempo*, a quodlibet based on popular tunes published in Petrucci's *Frottole libro nono* (1509[2]; ed. in Torrefranca), and a concise mass for four voices which makes sporadic use of an unidentified cantus firmus but is otherwise in frottola style (*I-MOd* IV; ed. K. Jeppesen, *Italia sacra musica*, Copenhagen, 1962, vol. ii).

BONNIE J. BLACKBURN

Foignet. French family of composers and performers.

(1) Charles Gabriel [Jacques] Foignet (*b* Lyons, 1750; *d* Paris, 1823). Singer and composer. Loewenberg stated that he was baptized Jacques. He went to Paris, according to Fétis, in 1779 and taught the harpsichord, the harp and singing ('goût de chant'). From about 1781 to 1785 he published six collections entitled *Les plaisirs de la société*, which consisted of easy arrangements of popular melodies for keyboard and violin ad lib. At the same time he wrote and published numerous songs, some of which appeared in periodicals. On 1 November 1788 a *scène* by Foignet was given at the Concert Spirituel. In 1791, when it became a common right in France to open a theatre, he began to compose stage works, initially in collaboration with Louis Victor Simon. These were performed at theatres such as the Théâtre des Beaujolais, the Théâtre de la Cité and the Théâtre Montansier. They were primarily *opéras comiques* or vaudevilles, and enjoyed much success; most are lost.

Foignet later became (with Simon) one of five joint administrators of the Théâtre Montansier, and in 1798 founded the Théâtre des Jeunes-Artistes, rue de Bondy, where he created with his son (2) François Foignet a highly-regarded troupe. Almost nothing is known of Foignet after 1807, when most small theatres were closed by Napoleon at only a fortnight's notice. The manuscript of a mass signed 'Foignet, organiste à Evreux' may be attributed to either Charles Gabriel or François as it dates from the Empire period.

Foignet wrote more than 25 operas and melodramas. His most successful early stage works were *Le mont Alphéa* (1792), *Michel Cervantes* (1793), *L'apothicaire* (1793), *Les petits montagnards* (1794) and *L'orage* (1798). Later works include *Raymond de Toulouse*, with François Foignet (1802), *Walther le cruel*, with Lanusse (1809), *La fille mendiante* (1809) and *Stanislas Leczinsky* (1811).

(2) François Foignet (*b* Paris, 17 Feb 1782; *d* Strasbourg, 22 July 1845). Singer and composer, son of (1) Charles Gabriel Foignet. His talents were nurtured in youthful appearances at the Théâtre des Jeunes-Elèves, and his first stage composition was given shortly before his 17th birthday. Between 1801 and 1807, when he and his father ran the Théâtre des Jeunes-Artistes, François made a considerable reputation as a singer and composer. His greatest success was earned while playing in his own *opéra comique*, *La naissance d'Arlequin* (1803), in which he made nine changes of character and costume. This ran for over 100 performances; August von Kotzebue's remarks on seeing it are quoted by Clément and Larousse. At the time the Foignets' theatre was nicknamed 'Le théâtre lyrique du boulevard'.

After Napoleon closed most of the smaller Parisian theatres in 1807 Foignet sought his livelihood as a singer outside Paris, first as a tenor and later as a baritone. Either he or his father may have acted as organist of Evreux and left a mass in manuscript. In 1818 he was in a troupe in Liège, and the next year he wrote an opera for the theatre at Bruges. In 1822 he sang in the Grand Théâtre, Marseilles. He is afterwards noted as being in Nantes (1824), Lille (1826, 1828), Ghent (1827, 1830) and Rouen (1840). For a time he was *régisseur* of the theatre at Angoulême.

WORKS

first performed in Paris unless otherwise stated; music lost

La noce de Lucette (opéra, 1, J. Monnet), Variétés-Montansier, 4 Jan 1799, lib. *F-Pn*
Les gondoliers, ou La soirée vénitienne (1), Montansier, 6 May 1800
Le chat botté, ou Les vingt-quatre heures d'Arlequin (4, opéra-féerie, J.-G.-A. Cuvelier de Trie), Jeunes-Artistes, 19 March 1802, collab. J.-B.-A. Hapdé
Le retour inattendu, ou Le mari revenant (1, Monnet), Jeunes-Artistes, 9 May 1802
Raymond de Toulouse, ou Le retour de la Terre-Sainte (3, R.C.G. de Pixérécourt), Jeunes-Artistes, 15 Sept 1802, collab. C.G. Foignet
Riquet à la houppe (3, pantomime/opéra-féerie), Jeunes-Artistes, 12 Dec 1802
L'oiseau bleu (4, C. de Rougemont), Jeunes-Artistes, 25 March 1803
La naissance d'Arlequin, ou Arlequin dans un oeuf (opéra-féerie, 3, Hapdé), Jeunes-Artistes, 15 July 1803

Arlequin au Maroc, ou La pyramide enchantée (folie-féerie, 3, Hapdé), Jeunes-Artistes, 29 July 1804, lib. *Pn*
Achille plongé dans le Styx, ou L'oracle de Calchas (scènes allégoriques, Hapdé), Cirque Olympique, 8 June 1811
Barbe-bleue, ou Les enchantements d'Alcine (tableaux, 3, A. Friedelle and Hapdé), Jeux-Gymniques, 16 Dec 1811, lib. *Pn*, collab. Alexandre
Floreska, ou Les déserts de la Sibérie (tableaux, 3, Hapdé), Jeux-Gymniques, 16 March 1812
La houillère de Beaujonc, ou Les mineurs ensevelis (grand tableau historique, Hapdé and E.T.M. Ourry), Jeux-Gymniques, 24 March 1812
L'heure de supplice, ou Les remords du crime (scène tragi-lyrique), Bruges, 5 Feb 1819

Romances
Messe en symphonie, choir, insts, doubtful

(3) **Gabriel Foignet** (*b* Paris, 1790). Harpist and composer, son of (1) Charles Gabriel Foignet. He was a pupil of J.-G. Cousineau and F.-J. Naderman and played in the orchestra of the Paris Opéra-Comique until 1821. His works, principally for harp, include three sonatas op.3, Nocturnes for harp with horn or violin opp.4 and 5, genre pieces, fantasies and variations.

DAVID CHARLTON

Fokine [Fokin], **Mikhail Mikhailovich** (*b* St Petersburg, 13/25 April 1880; *d* New York, 22 Aug 1942). Russian dancer and choreographer; *see* BALLET, §3(i).

Fokker, Adriaan Daniel (*b* Buitenzorg [now Bogor], Java, 17 Aug 1887; *d* Beekbergen, 24 Sept 1972). Dutch physicist and acoustician. He took the doctorate in physics in 1913 at the University of Leiden, and studied with Einstein in Zürich, Rutherford in Manchester and Bragg in Leeds. He taught physics at Delft Gymnasium (1921–3) and Technical College (1923–7), and was Lorentz's assistant (1927) and director of the physics section (1928–55) at Teyler's Stichting, Haarlem, concurrently occupying the chair founded by this institute at Leiden (1928–55). During these years Fokker became one of the foremost physicists in the Netherlands, and with the suspension of academic activity under the German occupation he turned to problems of musical aesthetics, his chief interests being the theories of Euler and Christiaan Huygens. He constructed two pipe organs, one (1943) with just intonation scales according to the principles of Euler's *genera musica*, and another (1950) that realized Huygens's theories of the pure 3rd, secured by a scale of 31 5th-tones. He described this scale in his several books and articles on harmony and temperament.

Fokker became an ardent promoter of the use of the 31-tone system in musical performance (especially on the 31-tone organ at Haarlem) and in composition. He composed a number of musical works, including *Preludium chromaticum* (1948), Nine Bagatellen (1950–52) and *In generibus Leonhardi Euler* (1956–7), for the tuning systems and instruments he devised. Other composers who adopted the 31-tone system under his influence include Henk Badings, Jan van Dijk, Anton de Beer, Hans Kox, Alan Ridout and Joel Mandelbaum. In 1970 Fokker founded the Stichting Nauwluisterendheid (Foundation for Listening Accuracy), later Stichting Huygens-Fokker, to take charge of the application and dissemination of his ideas on music.

Foldes [Főldes], **Andor** (*b* Budapest, 21 Dec 1913; *d* Herrliberg, nr Zürich, 9 Feb 1992). American pianist and conductor of Hungarian birth. He inherited musicianship through his mother (née Ipoly), and was educated at home, studying the piano with Tibor Szatmari. In May 1922, aged eight, Foldes made his début playing Mozart's K450 Concerto with the Budapest PO. A year later he entered the Liszt Academy of Music, studying composition with Leo Weiner and conducting with Ernst Unger; he graduated from Dohnányi's masterclass in 1932. He had made his début in Vienna in 1929, and that year he met Bartók and at once began to study his piano music under his supervision, continuing until Bartók's death. Dohnányi's conducting of concertos from the keyboard fired Foldes with the ambition to do the same, though he did not do so until 1960, after when he also pursued a side-career as a symphonic conductor.

Foldes first toured Europe in 1933, but retired for a while to replace childish intuition with adult reasoning in musical interpretation through study of other arts, language and philosophy. He soon resumed his career though he did not consider himself an adult pianist until 1939 when he played Beethoven's Second Concerto under Erich Kleiber. After his New York début in 1940 he remained in the USA, taking American nationality and marrying the Hungarian journalist Lily Rendy. In 1948 the Foldes returned to Europe; from 1958 to 1965 he took masterclasses in Saarbrücken. At that time he concentrated on the Viennese Classics from Haydn to Schubert, adding Bartók when he recognized that his earlier, pugnacious interpretations were no longer apt to a modern Classical master. He never lost his early virtuoso technique. In the early 1960s his playing was exuberant, outward-going and bright-toned, always attentive to articulation and rhythm. After then he became more concerned with softer shades, and subtle phrasing, perhaps through his study of the late works of Mozart, Beethoven and Schubert, as well as Schumann and Debussy. He composed a number of works and made keyboard transcriptions of three numbers from Kodály's *Háry János*.

WILLIAM S. MANN/R

Foli [Foley], **A(llan) J(ames)** (*b* Cahir, Tipperary, 7 Aug 1835; *d* Southport, 20 Oct 1899). Irish bass. Originally a carpenter, he went to Naples to study with Bisaccia when he discovered that he had a good singing voice. He made his début as Elmiro in Rossini's *Otello* in Catania in December 1862. After appearances in Milan, Modena, Turin and at the Théâtre Italien, Paris, he was engaged by Mapleson for the 1865 season at Her Majesty's Theatre, where he sang Saint-Bris in *Les Huguenots* and the Second Priest in *Die Zauberflöte*. He continued to appear in London at Her Majesty's, Drury Lane and Covent Garden until 1887. He sang Daland in the first performance in England of *Der fliegende Holländer* at Drury Lane in 1870, and had a repertory of more than 60 roles, including Bertram in *Robert le diable*, Assur and Oroe in *Semiramide*, and the title role in Rossini's *Mosè*, which he sang with great success in Russia.

He took part in many of the English choral festivals, and sang in the first performances in England of Berlioz's *L'enfance du Christ* (1880) and Gounod's *Redemption* (1882). At ballad concerts he was invariably billed as 'Signor Foli'. He possessed a powerful voice of more than two octaves, from *E* to *f'*.

HAROLD ROSENTHAL

Folia (Port., It. [It. occasionally *follia*]; Sp. *folía*; Fr. *folie*). A term for a musical framework used during the Baroque period for songs, dances and sets of variations. In the late 17th century a related, alternative form gained popularity and for some time co-existed with the original model.

1. Origins. 2. The early folia. 3. The late folia.

1. ORIGINS. The history of the folia predates the earliest surviving musical sources. A dance called 'folia' was popular in late 15th-century Portugal; it probably originated as a folk dance, but Portuguese sources of the period mention folias sung and danced during both popular festivals and courtly spectacles (Vasconcelos, 1904). Folia texts appear in Portuguese in theatrical works by Gil Vicente (*c*1465–*c*1536) and in Spanish by Diego Sánchez de Badajoz (*c*1460–*c*1536). Sung on stage by an ensemble 'properly dressed for the folia' (Vicente, *Triunfo do Inverno*), they retain a popular tone and a metrical form characterized by a refrain of two, three or four lines (Rey, 1978). The few descriptions of the folia dance containing specific references to its performance manner date from the beginning of the 17th century. In 1611 Sebastián de Covarrubias (*Tesoro de la lengua castellana*) described the folia as a Portuguese dance, very noisy, performed with tambourines and other instruments by disguised street-porters carrying young men in women's clothing on their shoulder. He also explained that the name, which means 'mad' or 'empty-headed', was appropriate because the dance was so fast and noisy that the dancers seemed out of their minds. Gonzalo Correa (*Arte de la lengua castellana*, 1626) related the poetic form of the folia to that of the *seguidilla* and added that the performance was accompanied by guitar and *sonajas* and *pandero* (types of tambourine).

Since no music for Vicente's and Badajoz's plays survives, the relationship between such traditions and the harmonic-melodic formula known later as the folia remains somewhat obscure. Some earlier scholars (Gombosi, Ward) located the origins of folia music in the Spanish and Italian vocal repertory of the late 15th and early 16th centuries. Similarities between the harmonic structure of the 17th-century folia and the chord progressions found in some villancicos in the Cancionero de Palacio (*E-Mp* 1335; an anthology compiled in Spain for the 'Reyes Católicos' Ferdinand and Isabella in about 1500) as well as in some frottolas printed by Petrucci and Antico have led to the suggestion that the folia model was already at work in these compositions. However, like other dance forms and ostinato types, the folia did not consist merely of a chord progression, but included a complex of other distinctive musical elements such as metric patterns, rhythmic and melodic figures, cadential formulae and so forth. The isolated appearance of the chord progression, often fragmented, in compositions whose structure and character are altogether different may not have been associated with the folia music. On the contrary, the use in early 16th-century compositions of chord sequences similar to those of the folia would simply seem to suggest a common musical idiom gravitating toward certain standard progressions.

2. THE EARLY FOLIA. The earliest extant composition to use the folia progression in an ostinato fashion is the *Fantasia que contrahaze la harpa* in Alonso Mudarra's *Tres libros de música en cifras para vihuela* of 1546 (Griffiths, 1986). The title 'folia' first appeared in 1577, however, in Francisco de Salinas's *De musica libri septem*. The melody given by Salinas (on p.309), and associated with the text 'No me digays madre mal de padre fray Anton' does not fit the folia scheme; indeed, it is the tune of 'Veritate facta' on the previous page that appears in the next century as the folia melody (ex.1). Some *differencias de folías* may be found in an anonymous manuscript collection of music for vihuela dated 1593 (*Ramillete de flores nuevas*, *E-Mn* 6001). In Italian

Ex.1 Hypothetical harmonization of the folia melody given in Salinas: *De musica libri septem* (1577) (melody in tenor)

sources the term makes its first appearance in 1604, in a set of variations by G.G. Kapsberger (*Libro primo di intavolatura di chitarrone*). There is no doubt that the folia was enjoying great popularity in Italy by the early 17th century. The chords to be strummed as the accompaniment to the folia were included in more than 50 tablatures for the five-course guitar, beginning with Girolamo Montesardo's *Nuova inventione d'intavolatura* (1606).

Ex.2 shows the musical design of the early 17th-century folia. The upper staff provides the melodic framework, although the precise melody varies. The lower staff gives the simplest type of guitar accompaniment, with the notes representing chords and the stems showing the strumming direction. Two four-bar ritornellos may occur between renditions of the 16-bar structure; occasionally the latter half is repeated. The opening two beats of anacrusis are sometimes omitted, but in any case the first accent always falls on the V chord. The stroke pattern continually emphasizes 3/4 metre, whereas both the melody and the harmonic changes often oscillate between 3/2 and 6/4. Though most often in G minor, the folia may be cast in other keys or, rarely, in the major mode; sometimes both major and minor modes alternate within a single statement of the scheme. The structural chords of the folia formula may be reached by way of intermediary chords. Examples of this practice abound in guitar books of the first half of the 17th century. These usually present a series of folias, each consisting of a single statement of the scheme, and each adding different chords to the framework of ex.2; these pieces were probably intended as pedagogical examples. Some sources suggest that the folia was still sung in early 17th-century Spain; Luis de Briçeño, in his *Método mui facilissimo* (Paris, 1626), provided texts as well as guitar music. In Italy texts were not usually given with guitar folias, but the musical framework is indicated for use in singing poetry in *I-Fr* 2793, 2951, 2973 (III) and *Fn* XIX 143 and, in keyboard notation, in *I-Fn* XIX 115. A monody based on the *aria della folia* appears in Giovanni Stefani's *Scherzi amorosi* of 1622.

Sets of instrumental variations on the folia were written for guitar by A.M. Bartolotti (1640), Foscarini (*c*1640) and Corbetta (1643, 1648, 1671 and 1674), for chitarrone by Alessandro Piccinini (1623), for two violins and continuo by Falconieri (1650) and for keyboard by Frescobaldi (1615), Bernardo Storace (1664), Ximénez (*d* 1672) and Cabanilles (1694). Early 18th-century examples also appear in Portuguese and Spanish manuscripts (*P-Pm* 1577, Loc.B, 5 and *E-Mn* 1538–60).

In his *Nova inventione d'intavolatura* Montesardo claimed that the music that the Spanish called 'folia' was known among Italians as 'fedele' (Folia chiamata così dagli Spagnuoli, che da Italiani si chiama Fedele'). In reality, 'folia' was the term commonly adopted in Italian prints, but some composers did prefer the name 'fedele', including Trabaci (1603), Mayone (1603), Francesco Lambardi (*GB-Lbl* Add.30491, *c*1617), P.A. Giramo (a set of three-voice *partite* on the text 'Filli mia, Filli cara' in *Arie a più voci*, *c*1650) and Cristoforo Caresana (1693). Two variations on *fedele* for guitar with bass courses also survive in *I-Nc* 1321. As Montesardo suggests, no significant differences seem to distinguish the examples of *fedele* from those of folia. *Fedele* settings tend to use the first inversion of IV in the third and 11th bars of ex.2. But the same variant, which can be easily explained as a mere variation in the part-writing, occasionally appears also in pieces labelled 'folia'. The reason why Italian composers adopted such terminological distinction thus remains ambiguous.

The name *La gamba*, transmitted exclusively in 16th-century sources, seems to have designated a rather different dance type. Although *La gamba* settings share the same chord progression as the folia, they differ from the folia music in other respects, specifically in their rhythmic shape. Moreover, they usually terminate each statement of the formula with a reiteration of the same chord sequence in shorter note-values. Although not identified as such, Diego Ortiz's *recercada quarta* and *recercada ottava* (*Trattado de glosas*, 1553) correspond

Ex.2 The early folia

to the *La gamba* model. In the 16th century a musical framework very close to *La gamba* circulated under the name *Caracossa* (or *Cara cos(s)a*), especially in north European prints and manuscripts. Numerous examples appear in Phalèse's collections, often in the guise of a *gaillarde* (see Apfel 1976–7).

3. THE LATE FOLIA. In the course of the 1670s the folia scheme underwent some decisive transformations. Lully, who composed the earliest known example of the new folia model (an *Air des hautbois* dated 1672 in *F-V* 168), no doubt played a vital role in the late history of the genre. His folia settings seem to have exerted a strong influence on French musicians, contributing to the definition of a distinctive local idiom. Francesco Corbetta, one of the most celebrated guitar virtuosos of his time, who emigrated to France in about 1648, might have been in part responsible for this transformation, as some of the characteristic traits of the late folia are already discernible in his works. The new structure developed by Lully and his French colleagues remained popular in France and England until the end of the Baroque period. In France it was often called 'folie(s) d'Espagne', in England 'Farinell(i)'s Ground'. Corbetta's two sets of variations (*La guitarre royalle*, Paris, 1671) began with a statement of the scheme in ex.2 in which all second beats were dotted. This threw a powerful secondary accent on the opening chord, a significant detail that may have acted as a transition to the new rhythmic structure employed by the later folia (ex.3). A comparison of like-numbered bars reveals that the chord progression of ex.3 is similar to that of ex.2, especially when III is inserted in the fifth bar. But in the later folia the first accent falls on I, with a resulting shift in the rhythmic structure. The almost fixed melody shown in ex.3 moves a 3rd lower than the melody in ex.2, with second beats dotted, particularly in the odd-numbered bars. The second-beat accentuation may be the reason why Taubert (*Rechtschaffener Tanzmeister*, 1717); and Mattheson (*Der vollkommene Capellmeister*, 1739, p.230) related the folia to the saraband. The later folia has no ritornellos, is almost always in D minor (transposed in ex.3 to facilitate comparison), and is generally slow and dignified. Some Spanish sources contain examples of both types of folia (*E-Mn* 811 and 1360, dated 1705 and 1709; *E-Bc* 1453). In the *Reglas y advertencias generales* of Pablo Minguet y Yrol (1754), the earlier type is called 'folías espagñolas' and the later type 'folías italianas'.

Among the earliest examples of the later folia type are some lute variations in the *Pièces de luth composées sur*

Ex.3 The later folia

Folie d'Espagne: engraving from Lambranzi's 'Neue und curieuse theatrialische Tantz-Schul' (Nuremberg, 1716)

différens modes of Jacques Gallot, which date from around the same times as Lully's *Air des hautbois* (1672). The new folia first appeared in Spain in Gaspar Sanz's *Instrucción de música sobre la guitarra española* (1674) and in England in 1682 as the music for *The King's Health*, a political text by Thomas D'Urfey, followed by variations for recorder in 1683 (in Humphrey Salter's *The Genteel Companion*) and violin in 1685 (John Playford's *The Division-Violin*). Like the earlier folia, this type was used as a scheme for songs and dances, as well as the subject of variation sets. It appeared as a song in *Die grossmächtige Thalestris* of J.P. Förtsch (1690), as *A Royall Ode* for the coronation of Queen Anne in 1702 (contained in *A Collection of the Choicest Songs*, *GB-Lbl* G.304), in *The Beggar's Opera* (1728) and in *Le théâtre de la foire* of Le Sage and D'Orneval (1724–37); and it is presented as a dance in the books of Feuillet (1700), Gregorio Lambranzi (1716; see illustration) and Taubert (1717). The numerous sets of variations include those by Corelli (1700) and Albicastro (*c*1700) for violin, Marais (1701) for viol, D'Anglebert (1689), Alessandro Scarlatti and C.P.E. Bach (1778) for keyboard, and Vivaldi (1705) for chamber ensemble. The scheme is quoted in Keiser's *Der lächerliche Printz Jodelet* (1726), Bach's 'Peasant Cantata', Grétry's *Les fausses apparences, ou L'amant jaloux* (1778) and the overture to *Hôtellerie portugaise* (1798) by Cherubini. Later works using the folia are Liszt's *Rhapsodie espagnole* (1863), Carl Nielsen's *Maskarade* (1906) and Rachmaninoff's Variations on a Theme by Corelli op.42 (1932).

GIUSEPPE GERBINO, ALEXANDER SILBIGER

Folianus, Ludovicus. *See* FOGLIANO, LODOVICO.

Foliot, Edme (*b* Château-Thierry, last third of 17th century; *d* Paris, before 1752). French composer. He was a choirboy at the church of St Paul in Paris under the direction of Lemercier. He took minor clerical orders and, before 1694, was director of the choir school at Dreux. He was appointed *maître de chapelle* at Troyes Cathedral (27 August 1694), but the unexpected return of his predecessor, Bouteiller, disrupted his employment. When the position became available again, he returned until the discovery of his marriage, contracted in Paris in 1698, forced him to go elsewhere.

In 1701 he was in Paris living on Rue St Martin in the parish of St Jacques-de-la-Boucherie. At the time of publication of his *Motets à I. II et III voix avec symphonie et sans symphonie* (privilege date, 1711), which Foliot acknowledged as the 'first of my works', his title was *Maître de musique de la maison professe des Jésuites*, a post he may have held until 1725.

On 19 September 1726 Foliot succeeded Lacroix as director of the choir school of St Paul. He retired on 10 January 1735 because of the infirmities of age, with a yearly pension of 500 livres. Fétis's assertion that Foliot died in 1777 is in error; he must have died between 1735 and 1752 when P.-L. D'Aquin de Château-Lyon included him among the deceased in his *Lettres sur les hommes célèbres*.

The 12 motets of the 1711 collection and one *air* (*Je dormais auprès de ma pinte*), found in Ballard's *Recueil d'airs sérieux et à boire* of 1708, are all that remain of Foliot's music. The motets are dedicated to Lalande. Perhaps to dispel fears that his motets were too difficult for the performers he had in mind, Foliot reassured them in his *Avertissement*: 'In composing these works, I have no other purpose than to render them useful to the nuns and for concerts of private individuals. I have restricted myself to flowing, natural melody, so sought after by all people of good taste'. He added that the psalms in particular could be abridged 'in order not to prolong the divine office'. The collection is divided into three sections: five motets for solo voice, five for two voices and two for three voices. The psalm *Venite exultemus Domino* (no.12) includes extensive *symphonies* for two violins and two flutes and may be performed 'en Choeur'. Harmonically, Foliot's motets are less static than the motets of Brossard or Nivers, which they resemble superficially. Chords of the 7th and 9th abound, and, as in the motets of Charpentier, Lalande and Couperin, there is use of the strikingly dissonant mediant 9-7-♯5 chord (see *Ave verum corpus*, no.7). Even though they are more French than Italian, the motets include some sentimental duos with paired voices creating chains of suspensions (see *Regina coeli*, no.10) and some brilliant alleluia and amen finales resembling vocal 'gigues'.

JAMES R. ANTHONY

Folk hymn. A type of American spiritual which became popular after the Great Awakening of the early 18th century. Most folk hymns are religious texts sung to secular folktunes. *See* SHAPE-NOTE HYMNODY, and SPIRITUAL, §I, 1.

Folk music. This concept has been defined and developed in multiple ways by collectors, scholars and practitioners, within different geographical locations and in different historical periods. Widely used in Europe and the Americas, it has been used both covertly and overtly in the construction and negation of identities in relation to class, nation or ethnicity and continues to be the source of controversy and heated debate. At its root lie questions about the identity and identification of the 'folk', the delimitation of musical repertories, how these repertories are transmitted and the assessment of sounds.

1. DEFINITIONS AND SCOPE. *Volkslied* ('folksong') as a term was coined by the German cultural philospher, theologian and writer JOHANN GOTTFRIED HERDER (1744–1803) and established by his publication 'Stimmen der Völker in Liedern', *Volkslieder* (1778–9). Among its characteristics, he posited the necessity of its production by 'communal composition' and an aesthetic of 'dignity'. German scholars have extensively debated the ontological status of the concept, its characteristics and delimitations, and the effectiveness of its replacement by the term 'traditional' (*see* GERMANY, §II).

From the late 19th century onwards, the concept became increasingly crucial to the debates on nationalism. Those seeking to identify or create their own national musics, ranging from individual composers and collectors to totalitarian régimes, used 'folk' as a synonym for 'nation', interpreting the concept to fit their needs (see below, §5). Across Europe, the 'folk' were intially identified as peasants and rural artisans. The Merrie

England movement and the Irish and Scottish Gaelic Revivals of the 1880s were fuelled by notions of a lost 'golden age' of innocence symbolized by the music of the 'peasantry' and song airs, song texts and dance tunes of rural working people were idealised in contrast to the artiness of élite society or vulgar products of the industrial poor. Although preoccupied with the collection and classification of rural music, the Hungarian composer, pianist and collector Béla Bartók included urban popular forms within the rubric of 'folk music'. For the English folksong collector CECIL SHARP and for others in the first British Folk Music Revival, folk music was perceived as only produced by artisan and labouring rural people. Sharp argued that continuity, variation and selection were the three vital components of folksongs and that anonymous composition and oral transmission were defining elements (1907) (*see* ETHNOMUSICOLOGY §II, 2(iv) and ENGLAND, §II). Broadside ballads did not fit happily into this definition since they were published and sold in urban contexts for popular consumption. They were, however, embraced as 'folk music' by the folk music revivals of both North America and Britain.

The ENGLISH FOLK DANCE AND SONG SOCIETY was formed in 1932 by the amalgamation of the Folk-Song Society and the English Folk Dance Society (the latter founded by Sharp in 1911). The International Folk Music Council (IFMC), founded in 1947, attempted a definition of 'folk music' at its conference in São Paolo (1955) that incorporated Sharp's three criteria and the notions of 'tradition' and 'oral transmission'. Folk music was 'the product of a musical tradition that has been evolved through the process of oral transmission'. The concept embraced only music that had evolved within a community uninfluenced by 'popular' and 'art' music. The IFMC dispensed with Sharp's ideas about anonymous composition, rather folk music might originate with an individual composer but must have been absorbed subsequently into the unwritten living tradition of a community. The definition did not cover composed popular music that had 'been taken over ready-made by a community' and remained unchanged as it was the re-fashioning and re-creation of the music by the community that gave it its 'folk' character.

Although at the time Sharp had defined 'folk music', he used it as coterminous with 'traditional music', the IFMC changed its name in 1981 to the International Council for Traditional Music (ICTM) in response to concerns about the concept 'folk'. The identification of 'folksong' and 'folkdance' (in Ireland 'Irish song' or 'Irish dance') by collectors of the early years of the century was reassessed in the later years of the 20th century, noting that the terms promoted often heavily edited and reconstructed items, through music publishers, live concert performance and state education systems (e.g. Harker, 1985). From the 1960s onwards, North American increasingly extended the meaning of 'folk music' to include the musics of ethnic and racial communities.

2. STUDIES. The study of folk music, developed differently in different countries, has been influenced by historical contexts and intellectual perspectives. During the 18th and 19th centuries the emphasis across Europe and in America was on folksong texts, which were analysed as literature and therefore the province of literary studies; in some areas, such as Germany, this perspective remains strong. During the 20th century, folksong and folk music became a subject within ETHNOMUSICOLOGY, folklore and folklife studies, sociology, and popular music studies.

In the USA, state folklore societies were founded in the early years of the 20th century dedicated to collecting folksongs from the 'Old World', especially Child ballads. A large number of regional textual collections were made until the 1950s including an eclectic range of items: imported and native narratives, lyric songs, parlour songs, game songs, instrumental music and 'Negro' songs (Myers, 1993). John A. Lomax (1867–1948), born in Texas, collected songs from cowboys, miners, stage drivers, freighters and hunters and later, with his son Alan (*b* 1915), 'Negro' songs (*see* LOMAX family). In 1933, the two 'discovered' the black American blues singer and guitarist Leadbelly (1885–1949) and recorded much of his repertory for the Archive of American Folk Song of the Library of Congress (founded in 1928).

Members of the SOCIETY FOR ETHNOMUSICOLOGY, founded in Philadelphia in 1955, included a strong contingent of socio-cultural anthropologists who related the structure of all musics to social organization and who had turned their attention to problems of social change rather than stability as in Sharp's homogeneous model. Efforts continued, however, to delimit 'folk music'. Bruno Nettl (1965) distinguished between the styles and repertories of 'folk music', existing in societies that had urban professional musics sometimes called 'art' or 'classical' music, and 'tribal music' or, as he perceived it, the music of non-literate cultures. Nettl assumed an evolutionary perspective with 'folk' and 'tribal' musics as part of an earlier stage of musical development and the communal creation of folk music.

Cecil Sharp's definition of folk music began to come under sustained attack. The interaction of orally-transmitted music with broadsides, songsheets and manuscript or printed texts in Britain and North America became an issue. The implied notion of a bounded homogeneous and unchanging community was in line with blossoming functionalist academic models of Sharp's time. In the first half of the 20th century in Europe, folksongs were identified and classified using functionalist models, such as being part of annual- or life-cycle rituals or work songs. Within anthropology, 'tribes' were similarly analysed using functionalist models, which were soon to be recognized as being restricted in value. The Romanian folklorist CONSTANTIN BRĂILOIU scathingly identified folk music theories of the past as romantic (1958; 1959), and the static models of functionalism and structuralism in Western academic disciplines were augmented in the second half of the 20th century by post-structuralist, interpretive and postmodern perspectives. In China a recent functionalist definition has linked folk music among different ethnic groups to local sexual customs (Yang Mu, 1998).

3. FOLK REVIVALS. New folk music revivals swept through Europe in the last decades of the 20th century, each with their own powerful structuring ethos and complex of musical and social interaction. An understanding of the concept 'folk music' was crucial to each. Some were influenced by the American Folk Revival which, like the British one, 'appealed primarily to individuals who celebrated traditions not their own' (Jackson, 1993). The US Folk Music Revival came out of the social and economic setting of the 1940s in which many young

people believed that the parent generation had gravely mismanaged the world. Figures such as Pete, Mike and Peggy Seeger, and Alan Lomax, promoted engagement by college students and intellectuals in the ideals of populist folksong. 'Folksingers', who became 'stars' in urban contexts resurrected old styles but also created new songs with personal or political texts. By contrast, urban-based folk music enthusiasts remained a minority in Norway's Folk Music Revival which centred on the National Fiddlers' Association and concentrated on innovative, often virtuoso, approaches to performing folk music (Goertzen, 1997).

Scholars disagree about whether there were two 20th-century folk music revivals in Britain or whether they constitute two phases of the same revival. The first period had its origins in the 19th century when collections were published by middle-class enthusiasts with antiquarian and musical interests (*see* ENGLAND, §II; BALLAD, §I, 2; LUCY E. BROADWOOD; FRANK KIDSON; SABINE BARING-GOULD). Important initial architects of the second or post World War II revival, inspired by the American labour movement and the skiffle music of Lonnie Donegan, were the dramatist, songwriter and collector EWAN MACCOLL and singer and collector A.L. LLOYD, both of whom came from a background of left-wing socialism and radical Marxism. The driving ethos was to give importance to the music and values of working people and to make a stand against the perceived vacuousness and capitalism of pop music and its associated industry. Largely because of Lloyd, 'folk music' came to be perceived as emanating from not only the rural but also the industrial worker.

During the 1960s, the term 'folk' came closer to its American usage of singer-songwriters, such as Bob Dylan, Joan Baez, Caroline Hester and Judy Collins, who accompanied themselves on acoustic guitars and performed some traditional material. Soon it was used indiscriminately by the media to include any acoustic music. As the FOLK MUSIC REVIVAL began to develop, a distinction was made by the participants between 'contemporary folk music' and 'traditional folk music'. Contemporary songs, including protest songs or songs about social issues, usually accompanied by acoustic guitars, were performed in clubs such as the Troubadour in London; traditional songs and melodies, either unaccompanied or accompanied by instruments such as fiddles, melodeons, concertinas, tin whistles and pipes, were performed in 'traditional' clubs. The first traditional club, the Singer's Club in London, was followed shortly after by a host of others including the Fighting Cocks in Surrey (*see* ROD STRADLING); the Nottingham Traditional Music Club and the 'Sovereign' in Leeds (*see* BOB PEGG, CAROLE PEGG). Neo-traditional performers, who hunted out 'traditional' performers in order to learn from them and who shared their values, included singers such as Anne Briggs, Shirley Collins and Loiuis Killen, and groups such as the Watersons (*see* NORMA WATERSON), Webbs Wonders and The Old Swan Band. Traditional music venues tried to reverse the aesthetics of the pop star syndrome and often arranged seating to enable singing in the round in order to avoid the division between audience and performer. For neo-traditionalists, the definition of 'traditional' embraced all items in the repertories of traditional singers, including music-hall songs.

As the movement developed, both contemporary and traditional folk clubs began to develop 'traditions' of their own. The Critics Group, based at the Singer's Club, were a company of revival singers trained in vocal techniques and mannerisms considered to be intrinsic to a 'traditional' style, such as singing nasally with the hand cupped over one ear, and incorporated techniques from European traditional singers. Similarly, MARTIN CARTHY introduced new techniques for the acoustic guitar: sensitive finger-picking and open-string tunings that enabled drones to be produced. Soon each traditional folk club had its imitators of MacColl and Lloyd and every contemporary club had its own Martin Carthy. The sounds produced began to be an issue.

See also FOLK MUSIC REVIVAL.

4. SOUND-IDEALS. The organization of musical sound is one of the ways through which shared meanings are articulated. Values are not only represented in the social organization of musical performance but also in musical sounds themselves. One of the criticisms raised about the early collectors of folk music has been that their 'sound-ideals' did not coincide with those of their 'source' singers or musicians; their musicological value systems were those of the Western classical tradition. Across Europe in the late 19th and early 20th centuries, collectors tended to be leading composers of the day who largely considered their archives as a source of ideas for 'serious composition'. For instance, Bartók created huge archives in Hungary which were a source of inspiration for his music, and in England the Folk-Song Society was founded (1898) by CHARLES VILLIERS STANFORD, professor of music at Cambridge and of composition and orchestral playing at the Royal College of Music, and Welsh composer Joseph Parry. Committee members later included Vaughan Williams, Holst, Grainger and Butterworth.

Folk musics of the world had differing interactions with the sounds of classical and religious musics. They have been characterized as having regional qualities, such as the vocal polyphony of southern and eastern Europe and the parallel 2nds of Bosnia. The identification of such traits depends upon the agreed repertories of folk music.

Arguments about sound-ideals within the second British Folk Revival centred on the shape, speed and decorations of melodies, the uses of harmonization rather than drones, and the timbres produced. Sharp had recognized that English folksong tunes did not fit into the classical music sound-ideal of western European tempered scales and suggested that they were built on non-harmonic principles, used Dorian, Aeolian and Mixolydian modal systems, had varying tonality, frequently used extra wide intervals and so on. In order to introduce folksongs into schools, lyrics had to be bowdlerized and melodies adapted for piano accompaniments but Sharp preserved the characteristics of the traditional tunes and lyrics in his own notes. A few other enlightened collectors preserved the actual sounds produced by folksingers by using the new invention, the cylinder phonograph. In 1906, Percy Grainger recorded several outstanding singers, including JOSEPH TAYLOR of north Lincolnshire, whose singing of *Brigg Fair* inspired Delius' *English Rhapsody*.

As recording technologies improved, there was more widespread access to the sounds produced by traditional singers themselves. During the 1920s in America, record producers issued African and Anglo folksong (especially 'race' and 'hillbilly' later to be replaced by blues, soul, and country music styles). In 1939, Moses Asch (1905–86)

founded Asch Records (later Folkways) releasing recordings of Leadbelly and Woody Guthrie (Myers, 1993).

During the 1930s and 40s in England, the BBC began to build up a sound archive of folksingers and musicians from different parts of the British Isles. For instance, in 1939 A.L. Lloyd recorded the singing of 'Jumbo' Brightwell of Little Glemham, East Suffolk, and in 1946 and 1948 the fiddler Sam Bennett of Ilmington, Warwickshire, was recorded playing *Jockey to the Fair*, *Shepherd's Hey*, *Step and Fetch Her* and a broomdance tune. Great excitement was aroused by the 'discovery' of the traditional singer HARRY FRED COX of Catfield, Norfolk, and more recordings were made in the 'Eel's Foot' in East Suffolk by E.J. MOERAN.

During the 1950s, Alan Lomax collaborated with local scholars in publishing the results of extensive field collecting on the Columbia World Library series. With respect to England, Scotland, Ireland, Wales and Spain, these recordings were largely from tapes made by Lomax and his local associates. In England he worked with folksong collector Peter Kennedy making recordings of traditional singers from East Suffolk that were included in the 'Folk Song of Britain' record series, issued by the American label Caedmon in 1961 and re-issued by the English company TOPIC. In Bulgaria, France, Romania and Yugoslavia, the contents were assembled by specialists who drew on archival sources. Lomax subsequently made available supplementary field material from Italy (Folkways), Scotland (Tradition) and Spain (Westminster). These recordings formed the basis of Lomax's Cantometrics project (Lomax, 1968). In 1955 Kennedy made the film *Here's a Health to the Barley Mow* of singers, musicians and stepdancers at the Blaxhall 'Ship', East Suffolk (cf C.A. Pegg's video film, *Tune-up at the Ship*, 1985). Also during the 1950s and early 60s, recordings were made in Norfolk for the seminal album of *English Country Music*, including Walter Bulwer (fiddle and mandolin-banjo), Billy Cooper (hammer dulcimer), Reg Hall (melodeon and fiddle), Daisy Bulwer (piano), Mervyn Plunkett (tambourine, drum) and Russell Wortley (pipe-and-tabor), initially issued by Reg Hall and Bob Davenport (1962).

Having increasing access to such recordings during the early years of the second Folk Song Revival, the difference between the sweet sounds of contemporary folksingers and those of what came to be termed 'traditional' singers became obvious as did the differences between the traditional sounds of England, Scotland, Ireland and Wales. During the 1970s, the growing interest in 'traditional' music and song was reflected in the output of the two specialist record labels in England, Topic and Leader. In 1972, Leader transferred Grainger's original cylinder recordings to disc and released a compilation album.

Meanwhile the FOLK-ROCK movement of the early 1970s exacerbated the raging debate about sounds, with STEELEYE SPAN choosing to accompany traditional folk lyrics with Mid-Atlantic sounds using a fiddle style that was akin to Scottish and Irish styles in its ornamentation and speed, and MR FOX backing their own traditionally-inspired lyrics with harsher and slower English vocal and instrumental sounds. These two strands continued to develop with various bands organized by ASHLEY HUTCHINGS following the route of English sounds and different spin-offs of Steeleye Span pursuing less traditional or regional sounds. The journal *Traditional Music* gained ground during the late 1970s eventually metamorphosing into the electronic journal *Musical Traditions* in the early 21st century.

5. POLITICAL AND IDEOLOGICAL ISSUES. 'Folk music' as cultural construct, used for a variety of political agendas including nationalism, communism, fascism and colonialism, is the subject of ongoing research and debate.

From the late 18th century, the concept was linked to a variety of nationalist endeavours as compilations of folksongs began to proliferate (*see* EUROPE, §2). These were consolidatory, educational and aspirational. Kolberg's folksong compilations (1857; 1865), for instance, made during the period of partition between Russia, Austria and Prussia (1772–1914), were collected from the pre-partition Polish borders. Throughout the 19th century, folksongs were often published together with new songs inspired by the 'spirit of the people', often with piano accompaniment, with the aim of creating national music and forming national taste. In the early 20th century, Bartók (1931) attempted to define the essence of the Magyar musical style and thereby to distinguish Hungarian peasant music from that of the Gypsies with which it had been previously associated. In England, Sharp hoped to eventually found a 'National School of English Music' by the introduction of English folksongs into schools.

In the Middle East and Central Asia, nationalist projects included the codification of 'classical' and 'folk' idioms supported by the appropriate publications and institutions, conservatories and traditional music archives. The sharp division between 'art' (*san'at*) and 'folk' (*halk*) music by the founders of the Turkish Republic (established 1923) served to separate the new nation from its Ottoman past (*see* CENTRAL ASIA, §1). State run media have used folk musics as a means of creating the nation. In India, for instance, the state television network, Doordarhan was used.

An important strategy in creating socialist international and national identities under the former Soviet system was the identification of 'folk' or 'people's' music. In the former Soviet Central Asia, as across Eastern Europe, aspects of indigenous folk music were combined with the sound-ideals of Russian classical music and disseminated through theatres, colleges and schools. Bartók's methods of 'musical folklore' – involving the collection of folksongs and customs and the use of evolutionary perspectives – were compatible with Soviet ideology. Reaching for the supposed pinnacle of social and cultural development, the sizes and tunings of indigenous instruments were changed so that as 'national' instruments they could play in orchestras together with European instruments; traditional melodies were retained but adapted and 'folksong' was redefined as composed song that comprised lyrics in praise of their happy modern lives (cf. Pegg, 2001).

Folk music was also used as an ideological tool by other totalitarian systems. In common with Soviet communism, 'folksongs' under Chinese communism comprise newly-composed texts with State approved lyrics sung to already existing tunes (*see* CHINA, §IV, 2). And in order to ensure the racial superiority of Aryan music in Nazi Germany, folk music was grouped together with choral music in the Reich's Chamber of Music and controlled by the German Singers' Union (Deutscher Sängerbund) (Levi, 1994).

The extent to which the use of 'folk music' outside of Europe and America is a colonialist construction needs to

be further explored. Recently, some scholars have been challenging the idea that music can be classified into discrete categories of 'folk' in juxtaposition with 'classical/art' music (e.g. for South Asia, see Allen, 1998; Groesbeck, 1999). There is no equivalent indigenous concept to 'folk music' in sub-Saharan Africa and it is rarely used in the Pacific. The folk-art (or popular music distinction) is also recognized as a recent importation into the Arab world (*see* ARAB MUSIC, §II).

6. NEW GROVE USAGE. For European countries, the dictionary distinguishes between 'art' music (i.e. European classical and sacred musics), 'folk' or 'traditional' music and 'popular' music. However, the perspectives of contributors express different national intellectual and disciplinary traditions. 'Folk music' is sometimes used interchangeably with 'traditional' music: to distinguish it from art or popular musics (as in Europe, for instance, *see* ENGLAND, §II); to distinguish between indigenous rural and urban traditions (as in the Middle East); and to distinguish 'community music-making' from 'popular music' intended for mass dissemination or marketing (for instance, *see* CUBA). It has been used in sometimes essentialist and sometimes very loose ways. The definition of Jewish 'folk music' includes composed song (*see* JEWISH MUSIC, §IV; ISRAEL, §II). Since the 1980s and 1990s, a continuum has developed including World music, World Beat and Roots musics. Operating in a global context, these range from fusions of local folk music with Western pop sounds to the selection and elevation of indigenous folk musics on to the world stage.

CAROLE PEGG

Folk Music Revival. The folk revivals of the 20th century in the USA and UK involved the performance of traditional songs and dances by young singers and instrumentalists in coffee houses, clubs, concert halls and at special folk festivals. In addition, a number of 'source singers' were identified and brought into the revival.

The US Folk Revival dates from the late 1940s when the considerable commercial success of recordings by the Weavers was the catalyst for the formation of numerous folk groups among which were the Kingston Trio, the Limeliters and the Chad Mitchell Trio. The revival also included solo singers who sang ballads as well as their own compositions (Joan Baez, Caroline Hester and Judy Collins), blues players (Dave Van Ronk and Alexis Korner, Ray and Glover), source singers (Fred McDowell and Son House) and exponents of 'old time' white rural music (the New Lost City Ramblers).

The revival was founded on song collecting and field recordings undertaken in the first decades of the 20th century by such figures as Carl Sandburg, John and Alan

Lomax, and on the extensive musical repertory of such key source singers as Leadbelly and Woody Guthrie, along with early revivalists including Oscar Brand, Burl Ives and John Jacob Niles. Particularly in the field of rural blues, the revivalists 'rediscovered' recording artists from pre-1939, including Son House and Mississippi John Hurt.

The backdrop to the contemporaneous Folk Music Revival in England and Scotland (*see* ENGLAND, §II) was the work of song collectors in Britain stemming from the period of the formation of the English Folk Song Society in 1898 and associated primarily with Cecil Sharp. The hundreds of songs collected and published at this period were initially used in schools and as inspiration for compositions by Vaughan Williams, Holst, Grainger and others.

Half a century later, these songs, plus those codified by Francis James Child and those which continued to be performed by rural singers, provided much of the repertory for the British revivalists. Source singers in England included Fred Jordan (Shropshire), Walter Pardon (Norfolk) and Bob Copper (Sussex; of the Copper family), who was both the heir to a family folk singing tradition and a song collector for the BBC. In Scotland, the ceilidhs organized at the Edinburgh Festival in the early 1950s by the collector Hamish Henderson and others were attended by such major source singers as Jeannie Robertson and Jimmy Macbeath. In Ireland the piper Seamus Ennis was also a song collector. The songwriter and singer Ewan MacColl was a leading figure in the revival, providing an influential if controversial definition of what constituted the correct procedure for a revivalist singer.

The younger generation attracted to the Folk Music Revival in both sides of the Atlantic often had a more flexible attitude to issues of repertory. The revival spawned a large number of singer-songwriters who accompanied themselves on the acoustic guitar but had little in common with those concerned primarily to bear witness to the tradition. In this category were Paul Simon, Donovan, Phil Ochs, Tom Paxton, Joni Mitchell and, above all, Bob Dylan. In the UK, revivalists such as Martin Carthy and his daughter Eliza typify much stronger traditional links. The end of the 20th century saw folk revivals in many European countries.

DAVE LAING

Folk-rock. A term used for a broad range of popular music in which contemporary amplified instruments are used to reinterpret traditional music or to accompany contemporary songs in a folk idiom. It was first applied in 1965 in the USA when the Byrds recorded songs associated with the folk singers Pete Seeger (*Turn, Turn, Turn*) and Bob Dylan (*Mr Tambourine Man*). The group had an orthodox rock line-up of drums and electric guitars. The Byrds inspired others in turn, including Dylan, to attempt various forms of folk-rock synthesis. Dylan used electric guitars and the electronic organ playing of Al Kooper on his recordings before working with the Hawks (later renamed the Band) in concert. In New York, the Lovin' Spoonful performed the charming and witty compositions of John Sebastian in the manner of an electric jug band. However, 'folk rock' was soon appropriated by the record industry as a marketing concept, used to describe almost any group employing vocal harmonies and an acoustic or semi-acoustic instrumental sound. Such groups included Simon and Garfunkel, Sonny and Cher, the Turtles, the Mamas and the Papas and Harper's Bizarre.

In Britain, the pioneers of folk-rock included Fairport Convention, a group whose initial aesthetic was drawn from West Coast groups such as Jefferson Airplane as well as the Byrds. Fairport Convention then turned to traditional music for inspiration, followed by such groups as Steeleye Span and Mr Fox in the development of electric folk music. Steeleye Span's *Hark! The Village Wait* and the eponymous début album of Mr Fox were among the first recordings of the genre, initiating two different strands within British folk-rock. Steeleye Span fused the texts and melodies of traditional songs with mid-Atlantic pop; Mr Fox wrote their own songs, inspired by traditional themes, and combined the uncompromising sounds of English village bands and singers with those of rock. Folk-rock excited strong passions within the folk revival. It was condemned by 'purists' such as Pete Seeger in the USA and Ewan MacColl in Britain who saw the use of amplified instruments as a fatal compromise with show business and the music industry.

Electric folk music also emerged in many other European countries in the 1960s and 70s. In Ireland, the groups Sweeney's Men and Horslips created different syntheses of traditional and contemporary musics. In Brittany the harpist Alain Stivell and the electric guitarist Dan ar Bras renewed the local Celtic repertory. The Swedish group Hedningarna provided a variation on the formula by treating traditional instruments such as the Hardanger fiddle and hurdy-gurdy with contemporary techniques of reverb and sampling. Outside Europe, other variants of the combination between indigenous musics and modern rhythms or technologies were developed, as in Brazil by Chico Science and the group Naçao Zumbi and in Australia by Yothu Yindi.

Although many of the European folk-rock musicians above continued to perform at concerts and festivals throughout the 1990s, new forms of transforming folk music were developing. The most important of these was connected with the growth in local variants of rap music around the globe where musicians integrated sounds and lyrics from their own cultures into the black American genre. Also, in 1999 the latest revival of songs from the United States folk movement of the 1950s occurred when the group Snakefarm made arrangements of them in melancholic trip hop style on the album *Songs From My Funeral.* (D. Laing and others: *The Electric Muse: the Story of Folk into Rock*, London, 1975)

DAVE LAING

Folk-Song Society. Organization founded in London in 1898 and amalgamated with the English Folk Dance Society to form the ENGLISH FOLK DANCE AND SONG SOCIETY.

Folkways. American record company. It was created in 1948 by Moses ('Moe') Asch (*b* Warsaw, 1905; *d* New York, 19 Oct 1986) to issue American and other folk music. Asch, the son of the renowned Yiddish writer

Sholem Asch, established Folkways on the shoulders of two predecessor labels (Asch Records and Disc Records) which had issued folk, jazz, Jewish and symphonic music during World War II and in the immediate post-war years on 78 r.p.m. discs. It was during the war that he began to record Leadbelly, Woody Guthrie, Pete Seeger, Cisco Houston and Sonny Terry, the founding fathers of American folk music. With the reissue of these artists on LP in the 1950s and 60s – as well as with the release of the *Anthology of American Folk Music* in 1952 (a collection of 84 rural southern recordings of the late 1920s and early 30s) – Asch substantially outlined the musical canon at the heart of America's folk music legacy. He continued to issue recordings of important American folk artists from the late 1950s until his death in 1986, including Ella Jenkins (a leading proponent of folk music for children), the New Lost City Ramblers, Dave Van Ronk and Memphis Slim.

In its 38-year history, Folkways Records became a repository not only for American folk music but for indigenous folk musics from around the world, often presented to Asch by anthropologists who had recorded ceremonies and rituals in the course of their fieldwork. Its catalogue broadened over the years to include spoken word recording of world literature, electronic music and documentary recordings of historical importance, particularly from the era of the American civil rights movement. With Asch's death, the Folkways catalogue was transferred to the Smithsonian Institution's Center for Folklife Programs, which keeps all of the recordings available to the public while issuing new recordings, consistent with Asch's eclectic vision, on the Smithsonian/Folkways label.

PETER GOLDSMITH

Follia. *See* FOLIA.

Folquet [Folc] **de Marseille** [Fulco Anfos] (*b* ?Marseilles, *c*1150–60; *d* Toulouse, 25 Dec 1231). Troubadour. According to his *vida* he was born in Marseilles and was the son of a Genoese merchant named Amfos. His name first appears in a document in Marseilles dated 23 January 1178, where the reference is to 'Fulco Anfos'; the possibility that he was born in Genoa, however, cannot be discredited. The *vida* states that after the death of his father Folquet was left a rich man, and he has been frequently referred to as a merchant.

His early career may be traced with some precision through allusions in his poems: it began in about 1180 at the court of Alfonso II of Aragon, continued in Nîmes and Montpellier until about 1187, and, according to songs related to the third crusade (1189), concluded in about 1195 (see Stronski's edn, pp.68–75). The *vida* states finally that he 'abandoned the world and entered the Cistercian order with his wife and two sons'. He became abbot of Thoronet Abbey in Provence in about 1201 and was later Bishop of Toulouse from about 1205 until his death.

In spite of the scepticism with which the Provençal *vidas* must be regarded, the apparently inexplicable conversion from merchant and secular poet to prominent churchman in Folquet's later life is supported by documentary evidence. The *Chanson de la croisade contre les albigeois*, for example, mentions 'L'evesque de Tholosa Folquets, cel de Maselha'. Johannes de Garlandia's *De triumphis ecclesie* is even more explicit, identifying 'Fulco, presul' as 'civis et inde Marsilie', but also as a 'joculator'.

While Bishop of Toulouse, Folquet became protector of St Dominic and was a co-founder of the Dominican order in 1215. He also established the university in Toulouse in 1229, where Johannes de Garlandia taught for a brief period. He was apparently inactive as a poet for the last 35 years of his life. Although names of other troubadours occur in Dante's *La divina commedia* (notably Bertran de Born and Arnaut Daniel), Folquet is the only one to appear in *Paradiso* (canto ix), where he recounts his early sinful life and subsequent conversion. He was certainly one of the most remarkable men of his time, and his poetic and musical output, though considerable, is only one facet of a long and richly varied career.

There are 29 poems extant bearing ascriptions to Folquet, 13 of them surviving with melodies. Folquet's songs obviously became well known since three served as models for later songs: *En chantan m'aven a membrar*, *Greu feira nuls hom faillensa*, *Si tot me sui*; and one, *Tan m'abelis*, was quoted at the beginning of a motet. Several (*Amors merce no mueira*, *Ben an mort*, *S'al cor plagues*, *Si tot me sui*, *Us volers outra*) also served as models of strophic construction and rhyme scheme for poems that survive without music.

The formulaic nature of troubadour melody may be seen with particular clarity in his works: eight begin with a melodic formula of two or more repetitions of the note *a*, moving most typically to *b*♭ and then to *g* and cadencing finally at a lower pitch. The first lines of these songs are shown in ex.1, with the simplest and clearest version of the formula in first place.

This formula is common to the works of other troubadours and, by way of contrafacta (e.g. *Greu feira*, *Si tot me sui*, *Tan m'abelis*), to other repertories as well; it dominates the melodies of Folquet, however, and may perhaps be a personal contribution of his to the stock of

Ex.1

Greu fei - ra nuls hom fail - len - - sa
Tan m'a - be - lis l'a - mo - ros pen - sa - mens
Mout i fetz gran pec - cat a - mor

ROBERT FALCK

Folville, Eugénie-Emilie Juliette (*b* Liège, 5 Jan 1870; *d* Castres/Dourgnes, 19/28 Oct 1946). Belgian pianist, violinist, teacher and composer. She began to study music with her father and later entered the violin class of Ovide Musin at the Liège Conservatoire. She also studied the violin with Charles Malherbe and César Thomson, counterpoint and fugue (*premier prix* 1887) at the Conservatoire, composition with Jean-Théodore Radoux and the piano with Delaborde in Paris. In 1879 she embarked on a virtuoso violin and piano career, travelling throughout Europe. She was also a pioneer in the revival of the harpsichord, and taught historical performing practice and the piano at the Liège Conservatoire.

Her many compositions exhibit a distinctive compositional craft, accomplished scoring, some chromaticism, and an elegance of style paralleling that of Massenet. Her only opera, *Atala* (1892), was well received when presented in Lille and Rouen in 1892 and 1893. Other significant works include the music for theatre *Jean de Chimay* (1905), the *Concertstück* and *Triptyque* for cello and orchestra, concertos for violin and for piano, the symphonic poem *Oceano Nox*, and three orchestral suites (*Scènes champêtres*, *Scènes d'hiver*, *Scènes de la mer*). Sacred works include *Chant de noël* for chorus and orchestra, *a cappella* motets and organ music. She also composed *mélodies*, cantatas, piano works and chamber music. (*SchmidlD*)

JAMES R. BRISCOE

Folz [Voltz], **Hans** [Hans von Wurmss] (*b* Worms, ?before 1440; *d* Nuremberg, Jan 1513). German Meistersinger. After spending some time in northern Spain and Augsburg, he was settled by 1459 in Nuremberg, where he worked as a barber and surgeon. Between 1479 and 1488 he also engaged in printing, especially his own works. Through his various enterprises he became a wealthy man. As the writer of 48 epigrammatic couplets (*Reimpaarsprüche*), 12 Shrovetide farces (*Fastnachtsspiele*), two treatises and nearly 100 Meisterlieder he proved himself the chief exponent of Nuremberg Meistergesang in the 15th century. Hans Sachs, who published reprints of Folz's works, held him in high esteem, describing him as a 'durchleuchtig deutsch' poet. Folz sided vigorously with those who wished to perform their own *Töne* (*see* TON (i)) as well as those of the old masters; this has long been misinterpreted as a reform of Meistergesang but is in fact a conservative defence of established Nuremberg practice. His melodies survive only in late 16th-century sources, though autograph collections (texts only) survive in *D-WRz* Q566 and *Mbs* Cgm 6353 (both from the second half of the 15th century). They are firmly within the tradition of this art form, differing at most in a more rational disposition.

CHRISTOPH PETZSCH/MARTIN KIRNBAUER

Fomin, Yevstigney Ipat'yevich (*b* St Petersburg, 5/16 Aug 1761; *d* St Petersburg, 16/28 April 1800). Russian composer. The orphaned son of a cannoneer, he was admitted shortly before his sixth birthday to the Foundling School of the Imperial Academy of Fine Arts, a charitable institution set up by Catherine II to foster a new generation of Russian artists. After nine years of general instruction he went on to specialized training in music at the academy, where his teachers included Hermann Raupach, composer of *Dobrïye soldatï* ('The Good Soldiers'), a popular Singspiel of the day. On his graduation with honours in 1782, Fomin went on a four-year scholarship to Bologna to study with Padre Martini, though he actually worked mainly with Martini's assistant (and, from 1784, successor) Stanislao Mattei. In 1785 he was elected (as 'Eugenio Fomini') to the Accademia Filarmonica. With the possible exception of Maksym Berezovs'ky, his predecessor in Bologna, no countryman of Fomin's could claim a comparable musical education – or a comparable professional technique – until the institution of the conservatory system in Russia some 80 years later. There is no doubt that he was the finest Russian composer of dramatic music in the 18th century.

On his return to St Petersburg in autumn 1786, Fomin was immediately put to work setting one of the empress's librettos to music: *Novogorodskiy bogatïr' Boyeslavich* ('Boyeslavich, Champion of Novogorod'), after one of the Russian national epics (*bïlinï*) as retold by Chulkov. Fomin completed the work – a 'comic opera compiled from stories, Russian songs and other sources' in five acts with ballet – in about a month; it was performed at the Hermitage the same year.

Fomin's effort evidently failed to please. He did not receive a court appointment until 1797, after the accession of Paul I; nor were his operas performed in the capital during the decade following his début. Indeed, Fomin's very whereabouts are uncertain in this period. What evidence there is seems to connect him with Gavriil Derzhavin (1743–1816), not only the greatest poet of the period but also a highly placed official, who in the late 1780s served as provincial governor of Tambov in south-central Russia and opened the first municipal theatre there in 1787. It was in Tambov that the libretto of Fomin's next opera, *Yamshchiki na podstave* ('Postal Coachmen at the Relay Station'; 1787), was published (anonymously) in 1788. A manuscript copy discovered in Derzhavin's archive in 1933 has established the great folksong collector Nikolay Aleksandrovich L'vov, Derzhavin's brother-in-law, as the author of the libretto. Whether the composer spent any time in Tambov during the period of Derzhavin's service there, as Dobrokhotov (1968) has suggested, and whether he led provincial serf orchestras or managed the theatre on Count Sheremet'yev's estate (where his unlucky first opera was revived), are at present open questions.

Towards the beginning of this obscure decade Fomin composed what would eventually prove his most successful opera: *Amerikantsï* ('The Americans'), to a 'heroic' libretto modelled on Sedaine's *Le déserteur* by the later fabulist Ivan Krïlov (1769–1844), then a youth of 19. According to the title-page of the holograph score, the opera was written in St Petersburg in 1788, but was rejected by P.A. Soymonov, director of the court theatre, on account of its 'revolting' scene of attempted human sacrifice. It was not performed until very shortly before the composer's death, when it was given a lavish production in the court theatre. (By this time Fomin had found official employment in the Imperial Theatres, as a répétiteur.) The many ensembles far surpass, in their formal mastery and scope, the work of any Russian contemporary. The success of *The Americans* made Fomin's (posthumous) reputation, and was undoubtedly responsible for the many apocryphal attributions to him, the most conspicuous being that of Sokolovsky's *Mel'nik-koldun, obmanshchik i svat* ('The Miller who was a Wizard, a Cheat and a Matchmaker').

Fomin's theatrical masterpiece, however, was not an opera but the melodrama *Orfey* ('Orpheus'), set to a tragic poem by the neoclassical author Yakov Knyazhnin as a vehicle for the actor Ivan Dmitrevsky in 1791 (Moscow, 1953). He also wrote choruses for tragedies by Knyazhnin and Vladislav Ozerov. Except for the finale of Act 1, his last opera, the posthumously produced *Zolotoye yabloko* ('The Golden Apple'), to a libretto adapted by one I. Ivanov from the myth of Daphnis and Chloë, has reached posterity in the same mutilated form as his first: only the orchestral parts survive.

WORKS

STAGE

Novogorodskiy bogatïr' Boyeslavich [Boyeslavich, Champion of Novgorod] (comic op, 5, Catherine II), St Petersburg, Hermitage, 27 Nov/8 Dec 1786
Yamshchiki na podstave [Postal Coachmen at the Relay Station] (comic op, 1, N.A. L'vov), ?Tambov, Municipal, 1788, *RU-SPtob**, lib *SPsc**; ed. I. Vetlivtsïna (Moscow, 1977); excerpts in *IRMO*
Vecherinki, ili Gaday, gaday devitsa, otagadïvay, krasnaya [Evening Parties, or Tell my Fortune, Fair Maiden] (comic op, 2), estate of A.R. Vorontsov, Tambov province, *c*1790; music lost, lib (St Petersburg, 1788)
Amerikantsï [The Americans] (comic op, 2, I.A. Krïlov, rev. A.I. Klushin), St Petersburg, Bol'shoy, 8/19 Feb 1800, vs (St Petersburg, 1800); excerpts in *IRMO*
Klorida i Milon [Chloris and Milo] (pastoral op, 2, V. Kapnist), St Petersburg, Bol'shoy, 6/18 Nov 1800, music lost
Zolotoye yabloko [The Golden Apple] (2, I. Ivanov), St Petersburg, Bol'shoy, 15/27 April 1803
Doubtful (music lost): Koldun, vorozheya i svakha [The Wizard, the Fortune-Teller and the Matchmaker] (comic op, 3, I. Yukin, after A. Ablesimov), lib (St Petersburg, 1789); Nevesta pod fatoyu, ili Meshchanskaya svad'ba [The Bride Takes the Veil, or A Middle-Class Wedding] (comic op, 3), lib (Moscow, 1790); Parisov sud [The Judgment of Paris] ('heroic trifle', 1, L'vov), ? not composed, lib dated 17 Oct 1796, intended as entr'acte (intermedio) for Kapnist: *Yabeda* [Chicane] (see Keldïsh 1985)

SACRED VOCAL

Uslyshit tya, gospod [Hear, o Lord], 4vv (Moscow, 1795)
Kheruvimskaya [Cherubim Hymn], 4vv (Moscow, 1797)

RICHARD TARUSKIN

Fondazione Rossini. Organization founded in 1940 in PESARO.

Fonds [fond] **d'orgue** (Fr.: 'organ foundation'; 'foundation stops'). The 32′, 16′, 8′, and 4′ flue ranks in French organ terminology; the actual tonal implications reflect the stoplists typical of each period (*see* REGISTRATION, §I, 5). Gigault's 'fonds d'orgues' registration (*Livre de musique pour l'orgue*, 1685) was an expansion of the 'Concert de flûtes' and implied the *Positif* coupled to the *Grand orgue*; this definition was based on the era's flute-like Principal tone which remained the norm well into the 19th century: Bédos de Celles (*L'art du facteur d'orgues*, 1766–78) concurred with this conception. By extension, *Fond d'orgue* designated a compositional style, a slow piece of rather vocal character. A sparser musical texture toward the end of the 18th century ultimately offset the gradual enrichening of the stoplists with Bourdons, 4′ flutes and additional treble-only ranks. As flue pipework became more diversified in timbre and intensity throughout the 19th century, the 'fonds' – henceforth conceived as a plural term – took on an orchestral character, allowing and indeed encouraging great subtlety in registrational colour. Between 20% and 60% of a late 19th-century French organ – depending on its overall size – would consist of varied 8′ FOUNDATION STOPS. The composers of Franck's era further understood the term 'les fonds' or 'jeux de fonds' as the flue portion of each division, as opposed to the reeds and upperwork placed on a separate pallet box with a pedal-operated wind cut-off ('anches' or 'jeux de combinaison'). Although postwar French organ specifications somewhat curtailed unison flue ranks, composers of Messiaen's generation continued to use 'fonds' in the same generic way.

KURT LUEDERS

Fongaard, Bjørn (Einar) (*b* Oslo, 2 March 1919; *d* 26 Oct 1980). Norwegian composer and musician. He studied harmony and the piano with Kristian Lange, and in 1945 studied both the piano and the guitar at the Oslo Conservatory. He worked as a guitarist, and as a teacher of guitar at the conservatory (1945–9, 1956–73), continuing to teach there after its reorganization as the Norges Musikkhøgskole (1973–6). In the early 1950s his composition studies were with Brustad, with whom he particularly studied polytonality; at the same time he took lessons in 12-note technique from Karl Andersen.

His is a very large output, the most significant compositions of which are all based on specially defined scale systems. From his studies of Hindemith's technique he developed new possibilities through his use of central pitches within his own constructed scales. His 12 Piano Sonatinas from 1953 already show his interest in single-pitch through to six-pitch systems. From 1960 he devoted himself to working with microtonal structures, developing his own composition technique and modifying instruments for the performance of his microtonal works. The symphonic poem *Uran 235* is built on microtonal scales taken from the upper part of the overtone series (from the 16th partial), combined with a free, unmeasured notation of rhythm. The absence of traditionally tempered scales and a regular pulse imbues the music with a floating quality; this demanding piece waited 33 years for its first performance in 1999. In discovering electronic music he refined and developed his ideas further from 1975.

ELEF NESHEIM

Fonghetto [Funghetto, Fonghetti, Fongheto], **Paolo** [Paolo Luca] (*b* Verona, *c*1572, bap. 19 Oct 1572; *d* after 1628, before June, 1630). Italian composer. He trained for the priesthood at the Scuola degli Accoliti of Verona Cathedral, where he also received his musical education from, among others, Ippolito Baccusi. He was ordained early in 1596 and later became one of the resident priests of the Mensa Cornelia. In 1610 and probably thereafter he taught singing to members of the Scuola degli Accoliti and to private pupils. His name is last mentioned in household records in 1629. He was the first Veronese composer to publish instrumental and vocal works with basso continuo; his two-part instrumental capriccios are early examples of the type. His 1595 publication, the contents of which he described in the dedication as 'praecoces fructus', includes a mass clearly designed for provincial use, since it may be performed by three voices as written, by three voices with bass part transferred to the top part, or by two voices without the bass.

WORKS

Lamentationes in hebdomada maiori decantandae, missaque triplici modo concinenda, 3vv (Verona, 1595)
Capricii, et Madrigali, 2vv (Verona, 1598)
Missa, psalmi omnes ad vesperas, completorium, motecta, et concentus, cum duobus Magnificat, 8vv, bc (org) (Venice, 1609)
Salmi. . .concertati, 4vv, bc, op.8 (Venice, 1620; bc pubd 1621)
2 madrigals, 3vv, 1594[10]; sacred canzonetta, 1599[13]

PIER PAOLO SCATTOLIN

Fonotipia. Italian music publishers. The Società Italiana di Fonotipia was founded in 1904 in Milan. Its musical adviser was Umberto Giordano. From the outset there was close involvement with Odeon, the International Talking Machine Company of Berlin; indeed Fonotipia was virtually Odeon's Italian section. There were frequent reorganizations and changes of ownership, and Fonotipia eventually became part of EMI which issued an historic series largely of Fonotipia origin in the 1930s. The label depicts a seated angel, wings spread, holding a lyre in one hand while the other operates a press.

The catalogue consisted primarily of opera but also included violin and piano works. Recording was done almost entirely in Milan, but also occasionally in Paris; the standard of orchestral accompaniment is generally noticeably better than that on other labels. Artists who recorded mainly or exclusively for the firm include Giuseppe Anselmi, Alessandro Bonci, Victor Capoul, Adamo Didur, Léon Escalaïs, Salomea Krusceniski, Victor Maurel, Mario Sammarco, Rosina Storchio, Riccardo Stracciari, Francesco Vignas and Giovanni Zenatello. Many recordings have been re-released on CD. Jean de Reszke and the Romanian soprano Hariclea Darclée may also have been recorded in Paris but no copies are known.

ELIOT B. LEVIN

Fonseca, Julio (*b* San José, 22 May 1885; *d* San José, 22 June 1950). Costa Rican composer. He studied music with his father, a military band musician, at the Escuela Nacional de Música in San José (theory and solfège), and later with Alvise Castegnaro. A government grant (1902–6) enabled him to continue his studies in Milan with Ricci, Coronaro and Ferroni (piano and harmony), and at the Brussels Conservatory with Tinel (composition) and Louis Van Dam (piano). In 1906 he returned to Costa Rica, where he was appointed Instrumentista Oficial de las Bandas de la República (arranger) and *maestro de capilla* at the church of La Merced, San José (1922–50), taught at the Colegio Superior de Señoritas (1927–42) and the Escuela S Cecilia (1942–50), was founder-director of the Euterpe Music Academy in 1934, and was founder and professor of the Conservatorio Nacional in 1942. In 1914 he resided in New York, and he conducted a concert of his works in Washington, DC, in 1949; he spent the rest of his life in San José.

Fonseca is the most prolific composer in the history of Costa Rica, but his isolation from contemporary musical developments meant that his music, though full of charm and fresh inspiration, remained relatively conservative. It is tonal, sometimes Impressionist, showing fine command of harmony and form (with some counterpoint), good orchestration and a lively rhythm.

WORKS
(*selective list*)

Stage: Caperucita encarnada (children's op); Caperucita roja (children's op); Money is not all (operetta)

Vocal: Himno del centenario de la aparición de la Virgen de los ángeles, chorus, orch, 1934; Himno-cant. a la música, chorus, orch, 1935; Marcha festiva de la Orden Mercedaria, chorus, orch, 1937; 5 masses; 3 cants.; 55 songs

Orch: Leda, waltz intermezzo, 1914; Oh! Costa Rica, Suite tropicál sobre temas costarricenses, 1934; Gran fantasía sinfónica sobre motivos folklóricos, 1937; Las ruinas de Ujarrás, ov., 1938

Chbr and solo inst: Sonata, B♭, vn, pf, 1904–5, Pf Trio, *c*1905; Pf Qnt 'El Cenáculo y el Gólgota'; Str Qnt; Suite 'Wheaton Hills', pf; other pf pieces, incl. 2 mazurkas, Nocturne, Notturnetto, 12 pasillos, 22 waltzes

BERNAL FLORES ZELLER

Fonseca Luzio, Pedro da (*b* Campo Maior, *c*1610; *d* ?Vila Viçosa, after 1662). Portuguese composer. From 1638 he was parish priest of the church near the palace of the dukes of Bragança in Vila Viçosa, and on 15 August 1640 he officiated at the marriage of a relative of the composer brothers João Laurenço Rebelo and Marcos Soares Pereira, who were witnesses. Baptised Pedro da Fonseca, he began to add 'Luzio' to his name in 1638 and used it consistently from 1640, possibly in honour of his brother Bartolomeu da Fonseca Luzio, who died in 1642. According to Stevenson, he composed a polychoral Requiem for the King's brother, Duarte, and corresponded with the King on the compositional techniques used in this and other pieces. In 1663, he was succeeded as *mestre de capela* by the chaplain, João Gomes Vaqueiro (see Alegria, 1983).

Five psalm settings for four voices by Fonseca Luzio are given pride of place in a manuscript (in *P-VV*) copied by Pedro da Crus in 1735. A mass, a *Magnificat*, nine psalm settings, two lessons for Holy Week and 47 villancicos were included in the library of João IV in Lisbon; none of these works survives.

MICHAEL RYAN

Font [Fons], de la. *See* DELAFONT.

Fontaine, Pierre (*b c*1380; *d c*1450). French composer. He apparently came from Rouen and may have received his musical training in the cathedral there. He is listed in the chapel of Philip the Bold, Duke of Burgundy, in 1403; from 1405 to 1407 he was a *clerc* in the newly built Ste Chapelle in Bourges, where he was a colleague of Guillaume Legrant. From 1415 to 1419 Fontaine served with the composers Nicolas Grenon, Guillaume Rouge, Cardot and others as chaplain to the new Duke of Burgundy, John the Fearless. Following the death of Duke John on 10 September 1419, he and another Burgundian singer travelled to northern Italy and were inscribed as members of the chapel of Pope Martin V on 30 March 1420. Sometime between 1428 and 1430 he returned to the court of Burgundy and remained there as a singer in the chapel of Duke Philip the Good for almost 20 years. His name last appears in the lists of the Burgundian chaplains for 1447, although no other singer was engaged 'in place of Fontaine' until 1451.

Pierre Fontaine seems to have written only French secular chansons, if we are to judge from his surviving works. (The motet *Regali ex progenie* by Fonteyns in the Old Hall Manuscript (*GB-Lbl* 57950) and the Kyrie by Perrinet in the Apt Manuscript (*F-APT* 16 bis), ascribed to Pierre Fontaine by some present-day writers, are undoubtedly not by the same man.) Seven chansons with his name survive in various 15th-century manuscripts. Six are rondeaux and one is a ballade. Most are in the simple, treble-dominated style of the northern French chanson of the early 15th century. His ballade *Pastourelle en un vergier* is typical of the modest scope of his songs: the music occupies only 11 bars in modern transcription, less than one-fifth of the length of many ballades of the earlier, post-Machaut generation. Although only a few of his works survive today, Pierre Fontaine was evidently well known to his contemporaries; he is mentioned in Binchois' motet *Nove cantum melodie*, and appears to be the 'Perinet' named in Du Fay's rondeau *Ce moys de may* and the 'Fontaine' to whom the anonymous rondeau *Fontaine, a vous dire le voir* is addressed.

Fontaine-Besson. *See* BESSON.

Fontainebleau. French château, south of Paris, used for musical performances in the 17th and 18th centuries; *see* PARIS, §V, 2. The American Conservatory, at which Nadia Boulanger taught, is at Fontainebleau.

Fontana, Bill (*b* Cleveland, OH, 25 April 1947). American composer, sound sculptor and radio producer. He studied philosophy at John Carroll University (1965–8) and composition privately with Louis Lane (1967–8); he attended the New School for Social Research (BA 1970) and also studied with Philip Corner (1968–70). In 1972–3 he was composer-in-residence and music director for the Toronto Free Theater. He compiled an archive of natural sounds for the Australian Broadcasting Commission (1975–8) and another for the Oakland Museum in California (1979), where he was a consultant to the Natural Sciences department. In 1983, with the aid of a grant from National Public Radio, he collected material for and compiled 365 programmes of sounds, which were broadcast daily in San Francisco under the title 'Soundscapes'. He has been artist-in-residence at various universities throughout the world as a composer, sound sculptor, sound recordist, and radio producer for noncommercial networks. He is considered a pioneer of sound installation pieces; his works in this field belong equally to the areas of music, sculpture, architecture and acoustics. In his early work, Fontana concentrated on the relocation of sound into a new context. *Entfernte Züge* (1983) took the sounds of trains, announcements and the movement of people in the Cologne main railway station and broadcast them in the deserted ruins of the Anhalter railway station. In *Metropolis Köln* (1985) microphones were placed at various acoustical landmarks around Cologne including church bell towers, bridges, streets and two locations along the Rhine. These sounds were then mixed and broadcast live in the Roncalliplatz. This turned the city into a living sound sculpture.

WORKS

(selective list)

Phantom Clarinets, 2 cl, 1975; Handbell Sculptures nos.1–3, 1975–7; Wave Spiral, temple bells, 1977; Sculptural Music Systems, orch, 1977; Music for a Resonant Space, 2 cl, 1977; Music for Carillon, 1977; Standing Wave Sculpture, sine wave generator multitrack tape, 1977–8; Motion through Space as a Way of Changing Pitch, aluminium rod, 8-track tape, 5 pfmrs, 1978; Piano Sculpture, 4 pf, 1978; Ocarina Sculpture, multiple ocarinas, 1978; Sound Sculpture for Brass Band, 1978; Space between Sounds, tape delay, tape, 1978–80

Flight Paths out to Sea, 1980; Grid Projections, slide projections, tape, 1980; Oscillating Steel Grids along the Cincinnati Covington Suspension Bridge, 1980; Incoming Wavefronts meeting a Shape of Land over Time, 1980; Landscape Sculpture with Foghorns, 1981; Sound Sculpture with a Sequence of Level Crossings, 1982; Oscillating Steel Grids along the Brooklyn Bridge, 1983; Sound Recycling Sculpture, 1983; Soundscapes, 365 4-minute radio programmes, 1983; Entfernte Züge, sound sculpture, 1983; Metropolis Köln, sound scultpure, 1985; Vertical Water, sound sculpture, 1991; Earth Tones, installation, 1992; Spiraling Sound Axis, installation, 1993; Sound Island, sound sculpture, 1994; Wave Trains, installation, 1996; Acoustical Visions of Venice, sound sculpture, 1999; Wave Memories, sound sculpture, 1999; Musical Information Network Lyon, forthcoming

STEPHEN RUPPENTHAL/R

Fontana, Fabrizio (*b* Turin, ?*c*1610; *d* Rome, 28 Dec 1695). Italian organist and composer. He was organist of Turin Cathedral in 1632 but spent much of his working life in Rome. In 1651 he was a member of the Congregazione di S Cecilia. He became organist of S Maria in Vallicella and continued to hold this post while acting as Alessandro Costantini's substitute at S Pietro from 24 September 1657. After Costantini's death on 20 October 1657, he was appointed organist of S Pietro. On 7 March 1664 he was organist of the second choir at the first oratorio in S Marcello, and he played the 'violone' (probably cello) at similar oratorios from 1674 to 1678. In 1653 and 1688 he was *guardiano* of the organists' section of the Congregazione di S Cecilia. On 13 August

1691 he retired from S Pietro and received a pension 'on account of his old age and in recognition of his outstanding service'. In spite of failing sight he became organist of S Maria dell'Anima on 15 March 1692, a post he held until his death. As a composer he is known for keyboard music. The 12 *Ricercari* for organ (Rome, 1677; ed. G. Doderer, Milan, 1975) are modelled on Frescobaldi's *Fantasie* of 1608 and show the same interest in contrapuntal problems; the preface states that they were the first to be printed in Rome for half a century. They are deliberately written in a *stile antico e grave* and with Battiferri's *Ricercari* (Bologna, 1669) are the last Italian keyboard pieces in this conservative style. Toccatas by Fontana appear in the anthologies *The Lady's Entertainment or Banquet of Music* (London, [1708]) and *A Second Collection of Toccatas* (London, 1719). Other surviving works include a corrente (in *I-Rvat* Vat.Mus.569; ed. in Silbiger, *JAMS*, 1980, and Johnsson), three 'preludes' (in *D-Hs*, see *ApelG*), which appear to be from the printed *Toccatas* of 1719, and two cantatas: *Giuda disperata* (*I-Rvat* Vat.Mus.426) and *L'Impotente* (*I-Bc* Q46).

JOHN HARPER

Fontana, Ferdinando (*b* Milan, 10 Jan 1850; *d* Lugano, 12 May 1919). Italian writer and librettist. An adherent of the artistic avant-garde movement known as the 'scapigliatura', he first made his name as a poet and dramatist, many of his works being written in Milanese dialect. Ponchielli brought him into contact with the young Puccini, for whom he wrote the librettos of *Le villi* and *Edgar*. His career as a librettist effectively came to an end in 1898 when, as a radical republican, he was suspected of having fomented the popular riots of that year and consequently banished to Switzerland, where he spent the rest of his life in reduced circumstances.

Fontana's theatrical credo is set forth in his manifesto, *In teatro* (1884), which among other bizarre theories proclaims the need for an opera synopsis to form an independent work of art; hence, no doubt, the verses that link the two acts of *Le villi*, which were intended to be read by the audience, not declaimed from the stage. His most successful libretto is *Asrael*, written for Alberto Franchetti, which with its scenes in heaven and hell shows the influence of Boito's *Mefistofele*. Fontana was also the Italian translator of d'Albert's *Tiefland* and of four of Lehár's operettas, including *Die lustige Witwe*. Several of his *romanze* were set by Paolo Tosti.

JULIAN BUDDEN

Fontana, Giovanni Battista (*b* Brescia, ?1589; *d* ?Padua, ?1630). Italian composer and violinist. Knowledge of his life and work is confined to a few documents, the most extensive of which is the preface to a posthumous memorial publication, *Sonate a 1. 2. 3. per il violino, o cornetto, fagotto, chitarone, violoncino o simile altro istromento* (Venice, 1641/R1985; examples in AMI, vii, 92; HAM, no.198; Mw, xv, 1960; Diletto musicale, xiii–xv, 1962, and cdxlii, 1969; ed. F. Cerha, Vienna and Munich, 1976). He is described as being from Brescia and as having also worked in Venice, Rome and finally Padua. His death was attributed to 'the voracity of the pestilence', that raged in northern Italy in the years 1630–31. Another Brescian, Cesario Gussago, dedicated a sonata to him (in RISM 1608[2]). Other documents may refer to the musician. One of them, a property assessment of 1627 for a Gio: Batta Fontana, gives his age as 38, his residence as Padua, and refers to extensive connections with Brescia. An *atto di morte* dated 7 September 1630 for a "Zan Batta Fontana" aged 50, is the only one among the Paduan death registers of 1625–30 for a person bearing that name (see Baroncini).

The 1641 collection comprises six sonatas for solo violin and continuo and 12 ensemble sonatas for one to three violins and continuo, the latter group often including a technically demanding concertante part for bassoon or cello. None of the individual works can be firmly dated: it can only be stated that they represent sonata composition probably from its beginnings to about 1630. All are divisible into numerous contrasting sections; in about a third of them some sections are repeated, suggesting an arch form. Repeated periods are often elaborated with diminutions. Except for a few short sections recalling the style of vocal recitative, the melodic material is on the whole related to that found in canzonas and dance pieces of the period. A nervous, variegated rhythmic idiom is found in some of these works; the sixth sonata, for example, abounds with sudden bursts of diminutions and triplets. The underlying contrapuntal and harmonic vocabulary is quite conservative, with the bass line often a regular voice part rather than a truly accompanimental line. Works such as sonatas 5, 6 and 16 show Fontana to be a leading figure in the early development of the sonata, especially the solo sonata, of which he and Marini were the first important composers.

THOMAS D. DUNN

Fontana, Julian (*b* Warsaw, 1810; *d* Paris, 24 Dec 1865). Polish composer, pianist and writer. He studied law at Warsaw University and music under Elsner at the Warsaw Conservatory, where he became a friend of Chopin. After the suppression of the 1831 uprising he emigrated to Hamburg; in 1832 he went to Paris, where he taught the piano and gave concerts. From 1833 to 1837 he lived in France and England, and from 1842 to 1851 he lived in New York and Havana, giving concerts in the USA with the violinist Sivori. In 1852 he went to live in Montgeron, near Paris, where he became a friend of the Polish poet

Mickiewicz and a member of Parisian literary society. Owing to deafness he had to give up his musical career; he died, poor and alone, by his own hand. The most important of Fontana's compositions are piano pieces: *Marche funèbre* op.1, *Rêverie* op.2, *Douze études* op.8 and two fantasias entitled *Souvenirs de l'île de Kuba* op.12 in which he used black American melodies; he also composed songs and published Polish folksongs (with English texts) in London. His writings include a study on Polish orthography, one on folk astronomy and historical and political articles in Polish newspapers. Fontana copied out about 80 of Chopin's works and acted as intermediary between the composer and his publishers. He made a posthumous edition of Chopin's works (opp.66–77), which was published by Schlesinger in 1855 and 1859. Chopin dedicated to Fontana the two polonaises op.40 (manuscript in *GB-Lbl*).

ELŻBIETA DZIĘBOWSKA

Fontana, Vincenzo (*fl* 1545–55). Italian composer and poet. The only indication of his activity is the publication *Canzone villanesche … a tre voci alla napolitana* (Venice, 1545), which suggests a sojourn in Naples. He may have been the Vincenzo da Venafro (Abruzzo) who in 1546 selected music for the Prince of Salerno's production of the comedy *La Philenia* at his palace in Naples. By 1555 Fontana was a leading member of the literary Accademia Bocchi in Bologna. The 22 poems he presumably wrote for musical settings in the Neapolitan style are, in large measure, dependent on literary idioms; only seven contain regional expressions. Fontana was clearly influenced by Nola, with whom he shared a predilection for animated, syncopated rhythms, humorous false starts and imitative textures, generally avoiding parallel 5ths except at cadences. Their works were far more attractive to northern arrangers than the pedestrian, uniform *villanesche* of Maio and Cimello. Fontana's Neapolitan songs received widespread attention, being arranged for four voices by Perissone (1545), Donato (1550), Barges (1550), Lassus (1555, 1581; 5 ed. in RRMR, lxxxii–lxxxiii, 1991), Nasco (1556), Waelrant (1565) and Scandello (1566), and intabulated for vihuela by Pisador (1552) and Fuenllana (1554; ed. in C. Jacobs: *Miguel de Fuenllana, Orphenica Lyra*, Oxford, 1978) and for lute by Kargel (1574). In the majority of these arrangements Fontana's superius tune was placed in the tenor: in this way it was possible to derive new harmonic and contrapuntal combinations from the model while preserving the essential properties of the borrowed melody. When it was retained in the superius there was usually a great deal of literal quotation from the model's other parts. The linear integrity of the borrowed tune was respected by all of Fontana's arrangers except Barges, Scandello and Lassus (1581), who quoted fragments or expanded upon its motifs. Four of his *villanesche* appeared in Burno's *Elletione de canzone alla napoletana a tre voci … libro primo* (RISM 1546[18]): two anonymously, one attributed to Rosso and the other to Signor Paulo. Fontana's *Mill'anni sono* was reprinted anonymously in *Canzoni alla napolitana de diversi* (1557[19]). A slightly reworked version of his *Passan madonna* is found in Maio's *villanesca* book of 1546 and attributed to Maio in *Elletione*.

DONNA G. CARDAMONE

Fontanelli, Alfonso (*b* Reggio nell'Emilia, 15 Feb 1557; *d* Rome, 11 Feb 1622). Italian composer, courtier and statesman. His travels as a statesman enabled him to make the acquaintance of many of the important Italian musicians of the time. His compositions and his letters are among the most important documents of the early *seconda pratica*.

1. LIFE. Fontanelli's early musical education seems to have come from Gasparo Pratoneri (Spirito da Reggio), not Salvatore Essenga as has been previously surmised (Sirch, 1986). In addition to music, Fontanelli also showed from an early age a talent for literature and oratory that was to stand him in good stead as a courtier and statesman. He wrote at least one *favola pastorale* (*Corilla*, 1596–7, lost) and doubtless a number of lyric poems (of which only two have so far been identified, printed in Pocaterra and Guasco).

Fontanelli's father, Count Emilio Fontanelli, died in 1579, and in 1580 Alfonso married Veronica of the Conti di Correggio; they had one child, who died in infancy. Fontanelli's activity as a servant of the Este family began in 1584, in which year he helped organize the festivities for the official visit of the Ferrarese Duchess Margherita d'Este to Reggio. In the same year he became *maestro di camera* of Alfonso d'Este, Marquis of Montecchio and uncle of Duke Alfonso II of Ferrara; in 1586 he passed into the service of the marquis's son Cesare, the future Duke of Modena. His service in the court of Cesare took him to Rome in 1586 and again in 1587, the second time with the delicate charge of settling the affairs of the debt-ridden Cardinal Luigi d'Este (Marenzio's employer), who had died in late 1586. This protracted stay in Rome probably brought him into contact not only with Marenzio, but also with other Roman composers active in the 1580s. It was presumably his skill in handling Luigi's estate (and perhaps reports of his musical skills) that caused him to be called in 1588 to the main centre of Este patronage, the court of Duke Alfonso II at Ferrara. His first surviving compositions probably come from the end of this period (Newcomb, 1974).

Fontanelli's status as an increasingly trusted representative of the Este court was to take him to the principal centres of musical activity in Italy. Repeated official visits to the Gonzaga court in Mantua are documented in the early 1590s, as are visits to the Medici court in Florence in 1590 and 1592. In 1591 and 1593 he returned to Rome with Duke Alfonso to plead the case of the Este succession in Ferrara with Pope Clement VIII. In 1594 he accompanied Carlo Gesualdo in his visits to Florence, Venice, Venosa and Naples as part of the travels surrounding Gesualdo's marriage to Eleonora d'Este, sister of Cesare. His first wife having died, Fontanelli married Maria

Biancoli in 1591. His first published book of madrigals (1595) appeared with the group of madrigal books by Luzzaschi, Gesualdo, and other Neapolitan musicians published by the Ferrarese court in 1594–7. In Ferrara during those years there arose the famous dispute between Monteverdi and Artusi over dissonance treatment that led to Monteverdi's proclamation of the *seconda pratica*. In all contemporary writings Fontanelli is listed as one of the leaders of this new style, and Orazio Vecchi's preface to the second edition of Fontanelli's first book confirms that his music had become involved in this controversy (although, as noblemen, neither Fontanelli nor Gesualdo were likely to be subject to Artusi's direct attack).

Duke Alfonso II died childless in late 1597 and the duchy of Ferrara reverted to the Church; Cesare d'Este was forced to retire to the Duchy of Modena and Reggio, bestowed on the family by the Empire. Fontanelli followed the court to Modena and assumed the position of *maestro di camera* to Duke Cesare. This office again sent him to Florence (1599 and 1601), Rome (1600, with Orazio Vecchi, with whom he returned via Florence) and Paris (1600).

In November of 1601 Fontanelli was stripped of his property and banned from Este territory for the murder of his wife's lover. In early 1602 he joined the service of Cardinal Alessandro d'Este, Cesare's younger brother, as *maggiordomo* and effective head of the Roman household (reportedly a very lavish one) during the frequent periods when Alessandro was in Modena. A letter of April 1603 from Fontanelli to his friend and confidant Ridolfo Arlotti (Sirch, 1994) tells of the Thursday evening musicales that Fontanelli held in the Roman palace, attended by many of the principal musicians of the city. His second book of published madrigals (1604) appeared during this period.

Presumably through the offices of Alessandro and other influential friends, Fontanelli was returned almost immediately to the good graces of Duke Cesare, whose official resident in the papal court he became in 1605. Fontanelli continued to travel widely, and to visit musicians wherever he was. It seems that he also continued to compose. A letter of Marco da Gagliano (Vogel, 1889, 552–3) reports that Fontanelli had been in Florence in June of 1608, that his visit had led to continuous music-making, and that he had delighted musicians there with his 'usual exquisite madrigals' – presumably unpublished ones. Fontanelli was frequently at the Florentine court in the first decade of the century, where he belonged to the musical Accademia degli Elevati (Strainchamps, 1976). He is mentioned in the preface to Peri's *Euridice* (1600) and the dedication to Del Turco's *Primo libro de madrigali* (RISM 1602[9]), and he stood as godfather to one of Peri's sons in March 1608 (Kirkendale, 1993).

In late November 1608 Fontanelli – apparently responding to heavy pressure from Duke Cesare, whose wife was a Medici – assumed the post of *maggiordomo maggiore e Cavaliere d'honore* at the court of the Archduchess Maria Maddalena of Austria, the recently arrived wife of Prince and soon-to-be Grand Duke of Florence, Cosimo II. On 24 December of the same year he was appointed *Capo principale et d'autorità* over all the musicians of the Medici court (Santi 1910, 357). It would appear that Fontanelli was brought in to try to calm the bitter internecine fighting that went on among the musicians of the Florentine court, fighting that had been especially marked during the wedding festivities in October 1608 (Carter, 1983). Contrary to what is reported in some scholarship, Fontanelli does not appear to have been directly involved in these October festivities, but to have been brought in afterwards to restore order and decorum in the Medici music establishment. He remained in the post until mid-January 1610, when he remarked in a letter to his friend Arlotti that he could 'take it no longer'.

In 1611–12 Fontanelli was sent to the court of Spain as the Este resident. In the next years he continued to travel widely in Italy (Milan, Turin, Venice, Rome) on missions for the Este court. By 1615 letters of his friend the poet Alessandro Tassoni remark on his renewed permanence in Rome, again in the circle of Cardinals Montalto and Scipione Borghese, among the richest and most powerful of the Roman cardinals. By early 1617 he had become increasingly involved with the Oratorio dei Filippini at the Chiesa Nuova (S Maria in Vallicella), for which he provided music at least from 1620 onwards. An undated letter from this period (Morelli, 1991, pp.26, 180–81) describes his life at this time, including musical visits to Cardinals Este, del Monte and Montalto. At the end of 1621 Fontanelli took priestly orders. A letter of Tassoni dated 5 March 1622 reports that he had died of an insect bite received in the Oratorio della Chiesa Nuova. The official record of his death gives the date as 11 February (Morelli, 1991).

2. Works. Fontanelli's music has long been both lauded and neglected. Becker wrote that he was among the best madrigalists of his time, and Einstein considered him the most gifted of the many noblemen-composers at the end of the century (whose number included such figures as Striggio and Gesualdo). His first printed book of madrigals is decisively in the new Ferrarese style of the 1590s, a style also represented by some pieces from Gesualdo's first four books and from Luzzaschi's fourth, fifth and sixth books. Like his colleagues in this style, Fontanelli was at times bold and experimental in his handling of dissonance and in his use of direct chromaticism and wide-ranging harmonies. But, like his mentor Luzzaschi and unlike Gesualdo, this is not the primary identifying feature of his style.

It is in his handling of texture that Fontanelli, like the later Luzzaschi, is distinctive. Fontanelli avoided the trio texture characteristic of the villanella and beloved of Marenzio, Wert and Monteverdi (mostly parallel 3rds or 6ths in the upper voices over an independent lowest voice). He also avoided almost entirely the diminution-like melismas characteristic of the 'luxuriant style' madrigals written for the various new *concerti di donne* of the 1580s. Much of his writing is discontinuous and complex in texture, with nervous imitation of jagged subjects declaimed in quavers and rich in cross-relations. Unlike almost all the madrigals of the closing years of the century, in many passages in Fontanelli's madrigals it is nearly impossible to imagine a *basso seguente* and accompaniment by a chordal instrument. He was a master at avoiding strong cadential articulations in the course of a piece, and, again like Luzzaschi, he knew the rhetorical and articulative value of silence: the rest for all voices, often preceded by the weakest of cadences or none at all. Sections isolated by this method were usually repeated with their material recomposed, often involving the vertical rearrangement of the component parts. As a madrigalist Fontanelli was a miniaturist. Most of his

pieces are no more than 35 breves long and take under three minutes to perform. The result was, as Gagliano said in 1608, *madrigali rarissimi* – exquisite lyric pieces meant for connoisseurs, both as performers and listeners. The preface to Fontanelli's second book (1604) says that the composer had been careful to avoid sameness of style, even lowering his style on occasion, in order to please all tastes. Although most of the pieces in the book are in the exquisite and rarified style of the first book, there is also a polyphonically much simpler style reflected mainly in the last pieces of the collection. One must recall that Fontanelli was no longer composing for the esoteric tastes of the Ferrarese court.

Although documents make it clear that Fontanelli continued to compose after 1604 (Vogel, 1889, Strainchamps, 1976 and Morelli, 1991), none of this music has been identified. It has been suggested (Newcomb, 1974) that a manuscript of anonymous madrigals (in *I-MOe*) is a collection of pieces written by Fontanelli in the years immediately preceding July 1590 (when he referred to a manuscript collection of madrigals from his pen). The pieces in this manuscript, in their expansiveness and in some of their texts, suggest a composer more oriented towards Rome than was Fontanelli in the first book of 1595. If the composer of the manuscript is indeed Fontanelli, this Roman quality may reflect his sojourns in Rome in the later 1580s; the manuscript also would offer the only full collection of datable pieces by a member of the new Ferrarese-Neapolitan school of the later 1590s written during the decade before 1594.

ANTHONY NEWCOMB

Fontanes, Joaquim António Peres (*c*1750–*c*1820). Portuguese organ builder. He built two impressive organs for Lisbon Cathedral (one still in the cathedral, the other now in Santa Engrácia), and some instruments for provincial Franciscan churches, including Lamego (1791) and the convent of Nossa Senhora da Conceição (1797) at Ponta Delgada in the Azores. His involvement with the construction of the six organs for Mafra (1792–1807), undertaken by royal command, indicates that his reputation as a builder was more extensive than the surviving evidence suggests. A study of the relevant documentation and a comparison of components of the Mafra organs with counterparts made by Fontanes and António Machado e Cerveira elsewhere suggest that the principal builder may have been Fontanes, and that he subcontracted much of the work to Cerveira. The specifications of the Mafra organs may not have been entirely typical of Fontanes' tonal style. The organs built for Lisbon Cathedral suggest a preference for the older Baroque tradition, with façades that are more Baroque than Classical, a compass of 51 notes (*C–d‴*), and the inclusion of a small *eco* division. Nevertheless, there are features which are typical of foreign and contemporary organ building trends. Of 20 half-stops in the bass and treble, 13 are common; there is a Corneta inglesa eco in the treble and a treble Clarinette stop in both the Principal and *eco* divisions.

There are several references to builders by the name of Fontanes or Fontana, and there is circumstantial evidence to suggest that they were members of the same family. Simão Fontanes, from Santiago de Compostela, built a large organ for Orense Cathedral between 1731 and 1734 in collaboration with Filipe Felix Feijoo. He also built two monumental organs for Braga Cathedral between 1737 and 1738: his inscription on the gospel organ confirms both his Spanish and Franciscan origin. Following the project at Braga, he may have collaborated with his pupil FRANCISCO ANTÓNIO SOLHA in Amarante. Although nothing can be proved because the instrument is now in ruins, from the stylistic aspects it is possible that Fontanes was also responsible for the great organ of S Gonçalo. However, references to Simão Fontanes seem not to exist after 1738. An inscription found inside the wind-chest of the organ of S Vicente de Fora, Lisbon, refers to João Fontanes de Maqueisa and gives the date of rebuilding as 1765. A builder named Fontanes appears to have worked on the organ in the Episcopal palace, Coimbra, shortly before his death at Mafra in 1770, and there is an inscription dating from about 1763 in the

organ in the Seminary church, Coimbra, which refers to Bento Fontana de Sequeira (previously interpreted as Maqueixa or Maqueisa by Azevedo and others). The latter builder is known to have sold an organ to the Franciscan church of the Incarnation, Mafra, in about 1770; he was also an assistant organist at Mafra at that time.

W.D. JORDAN

Fontanes, Simão (*fl* 1731–8). Portuguese organ builder. He is best known for his two organs built for Braga Cathedral (1737–8). He was possibly related to JOAQUIM ANTÓNIO PERES FONTANES.

Fontei [Fonte, Fonteio], **Nicolò** (*b* Orciano di Pesaro, nr Fano; *d* probably Verona or Venice, 1647 or later). Italian composer and organist. He had probably settled in Venice before 1634, by which time he was closely associated with GIULIO STROZZI and BARBARA STROZZI (also see below). There is no evidence of his relationship with them after 1636, though he may well have been one of the musicians who performed at the meetings of the Accademia degli Unisoni, which Giulio Strozzi founded in 1637. In January 1638/9 he was, according to the title-page of his 1638 book, organist 'in aede Sancte Mariae Cruciferorum' (presumably S Maria de' Crocicchieri, Venice), and he may have entered the priesthood at about this time. In the dedication to his op.5 (1640) he mentioned that he and his music had been favourably received at Verona, but its wording does not support Gaspari's conclusion that he was then living there. He certainly intended to continue his career as an organist in Venice, for on 22 January 1640 he competed against Giacomo Arrigoni, Cavalli and Monferrato for the post of second organist at S Marco. Although he was unsuccessful (the post was awarded to Cavalli) it is likely that he continued to live in Venice, where his only known opera was performed in 1642. In 1645, however, he did move to Verona, where on 13 May he succeeded Simone Zavaglioli as choirmaster of the cathedral and teacher of the acolytes. Apart from an absence between April and November 1646, he remained at Verona until 1647 and may have died there. Federico Mompellio's suggestion (in *MGG1*) that he left in 1647 to enter the service of the Duke of Mantua seems to be based on the ambiguous wording of the dedication to his op.6: the desire he expressed there to be regarded as the duke's servant appears to be a form of conventional politeness rather than an appeal for new employment.

Fontei wrote his first two books of *Bizzarrie poetiche poste in musica* for Barbara Strozzi; Giulio Strozzi provided all the texts for the first book and most of those for the second. The solo arias, many of them with a ritornello for one or two instruments, which make up the greater part of the first book are characterized by rather clumsy, short-breathed melodic phrases. Fontei's melodic style matured rapidly, however, and by the time of his op.4 (1639) he was able to handle the sensuous lines of the Venetian triple-time bel canto aria with complete assurance, as can be seen, for example, in the aria over an ostinato bass (marked 'as slowly as you can') that forms the central section of the lament *La bella Erinna su le sponde*. His continuing mastery of the Venetian triple-time aria can also be seen in his sacred music. In the solo motet *Peccavi, O bone Jesu* (RISM 1645[3]), for example, three stanzas set as strophic variations in an exquisite bel canto style are introduced by an arioso which includes a hint of the *genere concitato* in the setting of the phrase 'quoniam irritavi iram tuam'. Although Fontei wrote secular music for only one, two or three voices, the scoring of his sacred music encompasses a wider range, from solo works – some, such as *Laudate pueri* in op.6, with obbligato and optional instruments – to the eight-part ceremonial Mass in D minor in the same collection, which includes parts for continuo, two violins and three further, optional instruments.

Fontei was a pioneer of rondo or refrain structures in secular vocal music. His settings of *Hor tra l'aure* and *Beltà non ho* (both in op.1) seem to be the earliest published examples of rondo cantatas. The first of these comprises an opening section in triple time followed by three stanzas set as a strophic-bass cantata; between the stanzas a refrain in two sections and a ritornello are performed. Each of the three stanzas of the duet *Scorre amor* (in op.4; ed. in Whenham), the first two set as solos and the third as a duet, is rounded off by a triple-time duet refrain marked 'presto'. Fontei used rondo structure with more freedom in the pastoral dialogue of Lidio and Lilla, *Lilla, se Amor non fugga* (also in op.4), a complex work of considerable musical merit. Bearing in mind his connections with Giulio and Barbara Strozzi, it may be more than coincidence that its subject matter – the contrast between, and the interrelationship of, song and tears, love and misery – resembles that of the so-called *Contesa del Canto e delle Lagrime*, two papers read before the Accademia degli Unisoni and published in 1638. Although much of the text is set in alternate arioso and triple-time sections, focal points are provided by two strophic canzonettas, 'Amor fra 'l canto è ascoso' and 'Amor fra 'l duol s'asconde', sung by Lilla.

JOHN WHENHAM

Fonteio [Fonteijo], **Giovanni.** *See* NIELSEN, HANS.

Fontenay, Hugues de (*b* ?Paris, late 16th century; *d* after 1635). French composer. The only established fact about him is that on 20 January 1615 Cardinal de Sourdis appointed him canon of St Emilion, Bordeaux. The letter of appointment was addressed to him as a cleric in the diocese of Paris, which may have been the basis of Fétis's claim that he was born there. Pierre Trichet, of Bordeaux, wrote an epigram in his honour in 1635, which indicates that he was still alive then: possibly it was meant to celebrate the 20th anniversary of his appointment at Bordeaux. All his music is lost. It is known to have included three separately published masses, two for four voices and one for six (Paris, 1622), which were still in the Ballard catalogue of 1707, and *Preces ecclesiasticae, liber primus* (Paris, 1625), which consisted of several motets, three five-part Tenebrae lessons and a *St Matthew Passion*.

WILLIAM HAYS

Fonteyn, Dame **Margot** [Hookham, Margaret] (*b* Reigate, 18 May 1919; *d* Panama City, 21 Feb 1991). English dancer; *see* BALLET, §3(ii).

Fonteyns (*fl c*1400). English composer. He may have been connected with Fountains Abbey in Yorkshire. His only known composition, preserved in the Old Hall Manuscript (ed. in CMM, xlvi, 1969–73; no.51), is a three-part descant setting in score of the Marian antiphon *Regali ex progenie*. There is no reason to suggest an identification with PIERRE FONTAINE.

For bibliography *see* OLD HALL MANUSCRIPT.

MARGARET BENT

Fontyn, Jacqueline (*b* Antwerp, 27 Dec 1930). Belgian composer. She was taught the piano by Ignace Bolotine and Marcel Maas, and studied composition first with Marcel Quinet (1947–59), then in Paris (1954–5) with Max Deutsch, who introduced her to serial techniques. She furthered her studies in Vienna (1956) and at the Chapelle Musicale Reine Elisabeth, Belgium (1956–9). In 1961 she married the composer Camille Schmit, who encouraged and influenced her through the rigour of his own work. She held appointments as professor of counterpoint at the conservatories in Antwerp (1963–70) and Brussels (1969–71), and taught composition at the latter (1971–90). From 1991 she devoted herself entirely to her own composition. Among the awards she has received are the Oscar Espla Prize (Alicante, 1961) and the Arthur Honegger prize (1987). In 1988 she was awarded a commission by the Koussevitzky Foundation of the Library of Congress in Washington.

From the early *Danceries* (1953) – where a feeling of tonality is still present – to *La fenêtre ouverte* (1996), a constant evolution can be followed in Fontyn's musical style. With *Capriccio*(1954) she made a first step into dodecaphony which she adopted freely until 1979. From *Ephémères* on, she explored a new track, working on invented modes. *Filigrane* is the beginning of a controlled aleatorism with free playing on given notes, but done with great care and economy. Fontyn aims to invent a specific form for each composition, developing the musical material organically. She says that her favourite instrument is the orchestra; indeed, her compositions always show colourful instrumental combinations. Her style, a kind of modern impressionism, is characterized by clearness, transparency and well-balanced concision.

CHRISTINE BALLMAN

Foord, Thomas. *See* FORD, THOMAS.

Foort, Reginald (*b* Daventry, 21 Jan 1893; *d* California, 22 May 1980). English organist. He studied the organ with Parratt at the RCM and was appointed organist and choirmaster at St Mary's, Bryanston Square, in 1911, gaining the FRCO the same year. His theatre organ career began in Edinburgh in 1925 and he made his cinema début in 1926 at the New Gallery Cinema in London. He went on to become resident organist at many leading theatres. Foort was the first to broadcast on a Wurlitzer organ in Britain, and in 1936 became the first BBC staff theatre organist. He left the post after two years to tour vaudeville theatres with a 30-ton, five-manual pipe organ which became BBC Theatre Organ no.2 after World War II. In 1951 Foort went to live in America, where he remained for the rest of his life, becoming organist of Temple Sholom in Chicago and then of a temple in Miami. His recording output was immense, and he is best remembered for his transcriptions of well-known classical and light orchestral music on the theatre organ. He wrote *The Cinema Organ* (London, 1932) and composed several pieces in the lighter idiom.

NIGEL OGDEN

Foot (i). A section of a verse, usually of two or three syllables, one of which carries the ictus or principal stress. For example, an unaccented (or short) followed by an accented (or long) syllable (⏑–) comprises an iambic foot.

HOWARD MAYER BROWN/MARTIN RENSHAW

Foot (ii). In organ building, EIGHT FOOT (8′), SIXTEEN FOOT (16′), FOUR FOOT (4′), TWO FOOT (2′) and so on are used to differentiate stops that sound at written pitch from those that sound at higher or lower octaves or even at other intervals. The terminology derives from the fact that an open organ pipe sounding *c* will be approximately eight feet (2·4m) long (the other pipes of the same stop, will, of course, be different lengths). Thus an 8′ stop sounds at written pitch, a 16′ stop an octave lower, a 4′ stop an octave higher, a 2′ stop two octaves higher and so on. In a $2\frac{2}{3}'$ stop, depressing the *c* key will sound a pipe one-third as long as normal ($2\frac{2}{3}'$ being one-third of 8), i.e. a 12th above the written pitch, or *g′*, the third partial. Similarly, a $1\frac{3}{5}'$ stop sounds two octaves and a 3rd above written pitch (*e″* when the *c* key is depressed); a $3\frac{1}{5}'$ stop one octave and a 3rd above (*e′* for *c*); a $5\frac{1}{3}'$ stop a 5th above written pitch (*g* for *c*); and so on. By extension this terminology can be used to distinguish one octave from another (hence, 4′ octave, 8′ octave, and so on).

The terminology is also used by analogy to describe harpsichord registration: a unison set of strings is also called an '8′ stop' (whatever the actual length of the strings might be), an octave set a '4′ stop' and a sub-unison set a '16′ stop'.

Italian organ builders do not refer to feet but instead count diatonic scale degrees from the fundamental. Thus a $2\frac{2}{3}'$ stop is called in Italian 'alla duodecima' (at the 12th).

See also REGISTRATION.

HOWARD MAYER BROWN/MARTIN RENSHAW

Foot (iii). The part (usually the lowest) of an organ flue pipe below the mouth; it supports the pipe and conveys wind received in the toe-hole from the WIND-CHEST and directs it via the WINDWAY to the flue. The corresponding part of a reed pipe is known as the BOOT.

HOWARD MAYER BROWN/MARTIN RENSHAW

Foote, Arthur (William) (*b* Salem, MA, 5 March 1853; *d* Boston, 8 April 1937). American composer, organist, pianist, piano teacher and theorist. He began his study of music at the age of 12 with Fanny Paine, a local piano teacher. After two years she took him to play for the Boston musician B.J. Lang, on whose advice he enrolled in Stephen A. Emery's harmony class at the New England Conservatory. In 1870 he entered Harvard College, where he studied counterpoint and fugue with John Knowles Paine; he also led the Harvard Glee Club in the two years before his graduation in 1874. That summer he began organ lessons with Lang, who was so encouraging that Foote decided on a career in music rather than law. He returned to Harvard for another year's work with Paine and in 1875 received the first MA in music to be given by an American university. He made eight trips abroad over a 20-year period, beginning with the first Bayreuth Festival in 1876; he also took a few lessons with Stephen Heller in France in 1883.

On his graduation from Harvard Foote opened a teaching studio on Beacon Hill in Boston next door to the Harvard Musical Association, an organization in which he was active all his life. In 1876 he made his piano recital début in Boston and was appointed organist at the Church of the Disciples, moving two years later to the First Unitarian Church, a post he retained until 1910. He introduced a series of chamber music concerts in Boston in 1880 and was active as a piano recitalist until around 1895. He married Kate Grant Knowlton in 1880; their only daughter, Katharine, was born in 1881.

Foote's first compositions were three pieces for cello and piano op.1, and a set of three piano pieces op.3, both of which were published in 1882 by Arthur P. Schmidt of Boston, the firm which became virtually the sole agent for

Arthur Foote

his music. Foote composed steadily for 45 years, publishing his last numbered work (op.80) in 1919. Of his entire output, only 42 works were not published. He arranged and edited many piano pieces for Schmidt, often using the pseudonyms Ferdinand Meyer and Carl Erich. Most of his major orchestral works were given their premières by the Boston SO, and the Kneisel Quartet gave several first performances of the chamber works.

In his finest works Foote was a memorable composer. His style, firmly placed in the Romantic tradition, is characterized by lyrical melodies, expressive phrasing, and clear formal structure. He excelled in writing for strings and achieved particular popularity in his lifetime with the Suite in E major op.63 and *A Night Piece* for flute and strings. Of his works for full orchestra, the *Four Character Pieces after the Rubáiyát of Omar Khayyám* op.48 is noteworthy for its colourful instrumental writing. His strong melodic gift is exemplified in such songs as *I'm wearing awa'* and *An Irish Folk Song*.

Foote was highly regarded as a pedagogue, earning his livelihood mainly from private piano instruction. He was guest lecturer at the University of California, Berkeley, during the summer of 1911, and from 1921 until his death in 1937 taught piano at the New England Conservatory. With Walter R. Spalding as joint author, Foote wrote a popular theory text, *Modern Harmony in its Theory and Practice* (1905/*R*). He wrote two other short manuals, *Some Practical Things in Piano Playing* (1909) and *Modulation and Related Harmonic Questions* (1919/*R*), many journal articles, and *An Autobiography* (1946/*R*). He was one of the founding members of the American Guild of Organists and its national president from 1909 to 1912, and was active in the Music Teachers National Association during its early years. He was elected to the National Institute of Arts and Letters in 1898, to the American Academy of Arts and Sciences in 1913, and received honorary doctorates from Trinity College and Dartmouth College.

WILMA REID CIPOLLA

Foppa, Giuseppe Maria (*b* Venice, 12 Aug 1760; *d* Venice, 1845). Italian librettist. He was educated partly at a Jesuit college and became an archivist; later he held several government posts. Foppa was a prolific author: he wrote novels, poetry and plays, and translated many French dramatic works into Italian. Foppa's father was an amateur violinist, and music-making was important in the household (Galuppi was a close friend). Foppa studied singing with Girolamo Fortuni and harmony with Francesco Bianchi and Carlo Faggi, organist at S Marco. He was on familiar terms with Ferdinando Bertoni and other Venetian composers. During the 1790s he participated in Venetian musical life, particularly around the four

ospedali. For the Mendicanti he wrote the texts for several oratorios and cantatas, many of which were set by Mayr.

Foppa's first opera libretto was *Alonso e Cora*, produced during Carnival 1786. By the end of his career in 1819 he had written over 100 librettos which were set by many of the most important composers of the day, among them Andreozzi, Bianchi, Coccia, Fioravanti, Gardi, Generali, Nasolini, Paer, Portugal, Spontini and Zingarelli. He carried on long and important collaborations with Mayr (12 operas, 1796–1810), Farinelli (14 operas, 1800–17) and Pavesi (11 operas, 1803–19). For Rossini he wrote *L'inganno felice* (1812), *La scala di seta* (1812), *Il signor Bruschino* (1813) and *Sigismondo* (1814).

The librettos are mostly comic. Many are one-act *farse* (*farse giocose*), a genre popular in Venice from the early 1790s to about 1815. He also wrote full-length comic operas, *drammi giocosi* or *eroicomici*. Many of the works he called *commedie* combine spoken dialogue with musical numbers and reflect the influence of *opéra comique*. His one *tragicommedia* (*Ginevra degli Almieri*) and one *operetta di sentimento* (*La madre virtuosa*) demonstrate the influence of the French *larmoyante* genre. Foppa drew his comic material from the *commedia dell'arte*, the French and Neapolitan theatres and Goldoni.

Foppa's serious works are mainly *drammi per musica*. He preferred French sources, for example Marmontel (*Alonso e Cora* and *Lauso e Lidia*), Beaumarchais (*Eugenia*) and Corneille (*Euristea*), but also drew from mythology and ancient history as well as adapting some of his own spoken dramas (*Don Gusmano*). He also wrote a handful of dramas that mixed spoken dialogue with music, of which *Dorval e Virginia* (1793) is a celebrated example. Based on an episode from the French novel *Paul et Virginie* by Bernardin de Saint-Pierre, Foppa's libretto captured the ideological spirit of the age with its emphasis on the purity and innocence of youth, the wholesomeness of rustic life and the nobility of self-sacrifice.

In his *Memorie storiche*, published in Venice in 1840 (an appendix followed in 1842), Foppa reaffirmed the classic function of the theatre to educate, and warned against theatrical representations that undermined the morality and good habits of the public. While his admonitions may seem anachronistic against the backdrop of Italian Romanticism, his contributions to the operatic stage remain a testament to the philosophical idealism of a past era.

RONALD SHAHEEN

Forberg, August Robert (*b* Lützen, nr Leipzig, 18 May 1833; *d* Leipzig, 10 Oct 1880). German music publisher. He opened a book and music shop in Leipzig in 1862. The company achieved international fame principally through the commission work undertaken by C.F.W. Siegel; Forberg's major activity was as a commissioning agent for well-known foreign music publishers. The founder's son Robert Max Forberg (1860–1920) became a partner in 1885 and the sole proprietor after 1888. In 1908 the company's catalogue carried over 6000 titles, which covered a wide range of musical taste. Both Forbergs contributed to the spread of Tchaikovsky's works in Germany; as the assign of the Jürgenson publishing firm, Robert Forberg's company helped the dissemination of many works by well-known Russian composers. Other composers promoted by the firm include Kienzl, Smetana, Richard Strauss, d'Albert, Hausegger and Reger. After suffering severe war damage in 1943, the firm moved to Bonn (1949) and to Bad Godesberg in 1951.

HANS-MARTIN PLESSKE

Forbes, Elliot (*b* Cambridge, MA, 30 Aug 1917). American musicologist and choral conductor. He studied with Archibald T. Davison, A. Tillman Merritt and Walter Piston at Harvard University, where he received the BA in 1941 and the MA in 1947. He taught at Princeton from 1947 until 1958, when he was appointed Fanny Peabody Professor of Music at Harvard. There he devoted his attention to undergraduate education and until 1970 conducted the Harvard Glee Club and Radcliffe Choral Society, a major university choral group. He has been professor emeritus since 1984. His historical writings are mainly concerned with choral music, especially that of Beethoven, and with Beethoven biography. His revised edition of Thayer's *Life of Beethoven* is a substantial contribution to Beethoven scholarship in English. Since 1959 Forbes has been general editor of the Harvard-Radcliffe Choral Music Series.

PAULA MORGAN

Forbes, John (*d* Aberdeen, Nov 1675). Scottish music publisher. He was a stationer at Aberdeen, where he began publishing in 1656. In 1662 he and his son John (*b* Aberdeen; *d* Aberdeen, late 1704 or Jan 1705) were appointed official printers to the town and university by

Aberdeen town council. They immediately ventured into music printing, presumably with town council backing; their first musical publication was *Songs and Fancies: to Thre, Foure, or Five Partes, both Apt for Voices and Viols* (1662, 2/1666, 3/1682), which was Scotland's first secular printed music book. Its presentation and contents now appear old-fashioned, resembling London madrigal part-books around 1600; it is prefaced by a short 'Exposition of the Gamme', lifted almost word for word from Morley's *A Plaine and Easie Introduction* of 1597. The three editions vary slightly in content; altogether they contain 77 different songs, of which there are 23 by Dowland and his English contemporaries, six other English anonymous partsongs, ten ballad tunes, six Italian songs by Gastoldi with English texts, seven 'new English-Ayres' from recent Playford publications and, most importantly, 25 Scottish items, 16 from the 16th century. Curiously, only the cantus partbook was ever issued; it seems likely that Forbes was printing with sales to burgh music schools in mind (the Aberdeen music school is mentioned on the title-page). As music-school pupils mostly had unbroken voices, a preponderance of cantus copies would be required; other voice parts were perhaps supplied by Forbes in manuscript to individual order. The 1666 and 1682 editions also exist in impressions marked 'on sale in Edinburgh'. Only one copy of the 1662 edition is extant (now in *US-SM*).

In 1666 Forbes issued the first edition of the so-called Aberdeen Psalter, *Psalm Tunes to Four Voices*; it contains 14 metrical psalm tunes and one polyphonic psalm setting, 'Bon accord in reports'. The latter had originally appeared in the 1625 Psalter, also printed in Aberdeen and possibly the work of Andrew Melvill, doctor of the music school at the time. This collection, too, seems to have been aimed at the educational market. It was reprinted as *The Twelve Tunes, for the Church of Scotland* in 1671 and 1706. In 1681 the firm issued *Festival Songs, or Certain Hymns Adopted to the Principall Christian Solemnities*.

After the death of the younger John Forbes the business passed, in January 1705, to his widow Margaret, then in December 1710 to his son-in-law James Nicoll. Nicoll issued the fourth and fifth editions of the Aberdeen Psalter in 1714 and 1720.

DAVID JOHNSON/KENNETH ELLIOTT

Forbes, Sebastian (*b* Amersham, Bucks., 22 May 1941). Scottish composer. He was the elder son of the viola player Watson Forbes. He was a choirboy at Hampstead Parish Church before studying at the RAM (1958–60) and at Cambridge (1960–64), where he was a bass in King's College Chapel Choir. After working as a BBC music producer in London (1964–7, during which time he founded the Aeolian Singers), he taught at the University of North Wales until 1972. He then joined the staff at Surrey, and in 1981 he became professor of music. Additionally he has held posts as organist in London and at Trinity College, Cambridge.

Like others of his generation, Forbes was much inspired by the modernist composers promoted by the BBC Third Programme under William Glock. The Concertante (1963) shows the clear influence of Schoenberg and Messiaen; later works point to Gerhard (with whom he had a single lesson), but his range of reference is impressively wide. A meticulous craftsman, his best music is formally ingenious with a fluency borne of subtle harmonic plotting. While he has addressed most genres, his music tends to be most characteristic when, as in the vocal works and String Quartet no.4 (based on his choral cycle *This is England*), he is responding to specific poetic images.

CHRISTOPHER MARK

Forcer, Francis (*b* Durham, bap. 1 Dec 1649; *d* London, bur. 26 Jan 1705). English organist and composer. He was a chorister at Durham Cathedral from 1661 to 1665, when he became private organist to the Bishop of Durham.

In 1669 he ran away from the bishop's household while on a trip to London, and despite this became organist of Dulwich College on the recommendation of the Archbishop of Canterbury, who mentioned his 'skill in Musick' and his 'civill demeanor & sobriety of life'. He moved to St Giles Cripplegate in 1673 or 1674, and to St Sepulchre's, Holborn, probably in June 1676; he may also have been organist of St Bride's, Fleet Street, 1693–6. By the 1680s he was one of London's more prominent musicians. He was one of the Musical Society's stewards for the St Cecilia celebrations in 1684, and on 30 September 1686 he joined Blow, Purcell and John Moss in assessing the new organ at St Katherine Cree and choosing its organist.

Forcer also worked in the theatre. He wrote songs for Thomas Shadwell's *The Virtuoso* (May 1676), Aphra Behn's *Abdelazer* (?July 1676) and Thomas Otway's *The Orphan* (February 1680), all put on by the Duke's Company at Dorset Garden, and theatre suites for Mary Pix's *The Innocent Mistress* (?June 1697) and Charles Hopkins's *Boadicea, Queen of Britain* (November 1697), both put on by Betterton's company at Lincoln's Inn Fields. Some of his untitled suites were also probably written for plays. He was Richard Sadler's partner at Sadler's Wells, apparently from its opening in 1684, and on Sadler's death in about 1697 he went into partnership with James Miles. He was presumably responsible for establishing a music room there with an organ, and for putting on regular concerts in the summer. His son Francis (1677–1743) inherited property in Durham and Holborn, and eventually took over at Sadler's Wells.

Forcer was essentially a composer of light music. His songs are mostly simple tuneful airs, and while the dances of his theatre suites are attractive, he had difficulty coping with the demands of overtures; an extended five-part ground (in *US-NYp* Drexel 5061) is overambitious. His keyboard music is rather more interesting, and would repay investigation. He was the principal scribe of two manuscripts (*US-NH* Filmer 15 and 16), the first of which he seems to have used to teach Amy Filmer the keyboard, starting in the spring of 1678. It contains keyboard arrangements of songs by Purcell and William Turner, as well as pieces by Blow and at least one by Forcer himself.

PETER HOLMAN

Forcheim [Forchheim], **Johann Wilhelm.** *See* FURCHHEIM, JOHANN WILHELM.

Forchert, Arno (*b* Berlin, 29 Dec 1925). German musicologist. He was educated in Berlin: from 1947 to 1950 he studied music (with the piano as his main subject) at the Klindworth-Scharwenka Conservatory and the Hochschule für Musik; from 1950 he studied musicology with Gerstenberg, Adrio and Dräger at the Freie Universität, where he took the doctorate in 1957 with a dissertation on the late works of Praetorius. From 1956 to 1960 he was director of the department of music education at the John Petersen Conservatory, Berlin, and from 1959 to 1967 he was an assistant lecturer in the musicology department of the Free University, where he completed his *Habilitation* in musicology (1967) with studies on musical thought in the early 19th century. From 1960 to 1969 he was also a lecturer at the Berlin-Spandau School of Church Music. In 1972 he was appointed professor at the Music Academy of Detmold. He founded a music department in 1977 run jointly by Paderborn University and the Detmold Musikhochschule to facilitate cooperation between these institutions; located in its own building in Detmold, its organization is unique in Germany. Forchert was appointed professor at Paderborn University in 1981 and president of the Heinrich-Schütz Gesellschaft in 1988. He retired in 1991 and was honoured with a Festschrift on the occasion of his 60th birthday (*Festschrift Arno Forchert*, ed. G. Allroggen and D. Altenburg, Kassel, 1986). He is principally involved with music of the 17th and 19th centuries, and is the editor of the collected edition of the works of J.H. Schein and (from 1989) of the series Detmold-Paderborner Beiträge zur Musikwissenschaft.

HANS HEINRICH EGGEBRECHT

Forcroy le neveu. *See* FORQUERAY family, (4).

Ford, Andrew (*b* Liverpool, 18 March 1957). English composer and writer, active in Australia. After studying with Cowie and Buller at the University of Lancaster, he became fellow in music at the University of Bradford (1978–82). In 1983 he moved to Australia to teach at the University of Wollongong's school of creative arts, producing many ensemble pieces and two operas for young performers, *The Piper's Promise* (1986–7) and *The World Knot* (1987–8). He was composer-in-residence at the Sydney Opera House (1985) and at the Australian Chamber Orchestra (1993–5). In 1995 he left academic life to become a broadcaster, producing a major 10-part retrospective of the 20th century, 'Illegal Harmonies' (1997). Ford's music demonstrates the influence and stimulus of language, literature and ideas and of a wide range of popular and art music. His works show a wide rhetorical range, particularly in vocal music, from wry or whimsical theatricality, as in *A Martian Sends a Postcard Home* (1986) and *Harbour* (1992), to a more elemental sense of musical ritual reminiscent at times of Birtwistle, as in *The Widening Gyre* (1993).

WORKS

(*selective list*)

Stage: Pictures of Lily (music theatre, 1) 1981; Poe (op, G. Devlin), 1981–3; The Piper's Promise (children's op, S. Rowley and J. Falk), 1986–7; The World Knot (children's op, Devlin), 1987–8; Deirdre of the Sorrows (radio score, M. Buzacott), 1989; Parabola (music theatre, B. Blackman), 1989; Whispers (music theatre, R. Hall), 1990; Casanova Confined (music theatre), Bar, tape, 1995

Orch: Conc. for Orch., 1980; Prologue, Chorale and Melodrama, 1981; Epilogue to an Op., 1982; The Big Parade, 8 insts, str qnt, str octet, 3 orch, 1985–6; Imaginings, solo pf, concertino group (vib, cel, hp, elec org), orch, 1990–91; The Widening Gyre, 2 vn, vc, chbr orch, 1993; The Great Memory, vc, orch, 1994; Manhattan Epiphanies, str, 1994–7

Ens: Chbr Conc. no.1, fl, cl, pf, vn, vc, 1979; Bright Ringing Morning, 2 fl, b cl, trbn, 3 perc, 2 vc, 2 db, 1981; Chbr Conc. no.2: Cries in Summer, fl, cl, pf, vn, vc, 1983; Deep Blue, fl, cl, trbn, perc, pf, vn, vc, 1986; On Canaan's Happier Shore, cl, mand, gui, perc, vn, va, db, 1987; Chbr Conc. no.3: In Constant Flight, fl, cl, perc, pf, vc, 1988; Pastoral, 3 vn, 2 va, 2 vc, db, 1991; Dance Maze, ens, 1997; The Unquiet Grave, va, ens, 1997–8; Tattoo, 12 timp, 4 pf, 1998; Icarus Drowning, 2 cl, hp, perc, str qt, 1998

PETER McCALLUM

Ford, Bruce (Edwin) (*b* Lubbock, TX, 15 Aug 1956). American tenor. His steady rise to a leading position among Mozart and Rossini tenors of his generation has been grounded in gifts of musicianship as well as technique, which have also equipped him to master many other musical styles, ranging from Rameau through Verdi to contemporary US composers such as Floyd and Glass. After study at the universities of West Texas State and Texas Tech, and a period with Houston Opera Studio, he made his début at Houston and spent periods in Germany (Wuppertal, 1983–5, Mannheim, 1985–7). A remarkable facility in both the highest and lowest registers and in intricate *fioriture* has given Ford unusual authority over Rossini's vocal writing, both in comic and serious tenor roles: he has sung Agorante (*Ricciardo e Zoraide*) at Pesaro, Almaviva at Covent Garden, James (*La donna del lago*) at La Scala, and Orestes (*Ermione*) at Glyndebourne. His wide vocal compass has also afforded him an impressive command of Mozart's Mithridates (notably at Covent Garden in 1992 and 1994). And in other Mozart roles, such as Belmonte, Ferrando (which he has sung at Salzburg) and Tamino, his graceful, long-breathed control of line and dynamics makes ample amends for an occasional rawness of timbre. Ford's recordings include Almaviva, Meyerbeer's *Il crociato in Egitto* and Mayr's *Medea in Corinto*.

MAX LOPPERT

Ford, Ernest (A. Clair) (*b* Warminster, 17 Feb 1858; *d* London, 2 June 1919). English composer and conductor. He was a chorister at Salisbury Cathedral, and won the first Goss Scholarship at the RAM (1875), where he was a pupil of Sullivan. He also spent some time in Paris studying with Lalo. In 1886 his motet *Exaudivit Dominus* was performed at the 250th anniversary of Harvard University. Most of his other compositions were for the theatre and included operas (*Daniel O'Rourke*, 1884; *Nydia*, 1889; *Joan*, 1890; *Jane Annie*, 1893; *Mr Jericho*, 1893) and ballet music, excerpts from his *Faust* being given under Henry Wood in 1897. Ford held a professorship of singing at the GSM, where he was in charge of the opera class. He conducted Sullivan's *Ivanhoe* at the Royal English Opera House, Cambridge Circus, and for some years directed the Royal Amateur Orchestral Society. His *Short History of Music in England* (London, 1912) is informative on Sullivan and late 19th-century musical life.

ROBIN H. LEGGE/E.D. MACKERNESS

Ford [Foard, Foord, Forde, Fourd, Fourde], **Thomas** (*d* London, bur. 17 Nov 1648). English composer and viol player. He was appointed one of the musicians to Prince Henry in 1611, initially at a yearly salary of £30, but from March 1612 he received £40. Later he became one of the lutes and voices to Prince Charles, serving him after his coronation and up to the Civil War in 1642. On 1 January 1627 Ford was among 31 musicians who received

as 'Newyeares gifts given by the Kinges Ma[tie] ... to each of them in guilt plate five ounces a peece'. In July 1634 he was granted a £20 increase of pension for life. The charter of the Corporation of Musick in Westminster (15 July 1635), which gave the King's musicians authority over the training and performance of musicians in the capital and its immediate environs, lists Ford as one of the Corporation's first two wardens (the second being Jerome Lanier) with the authority to administer the 'corporall oathes'. Ford was buried at St Margaret's, Westminster. Under the terms of his will, dated 12 November 1648, several musicians received bequests including Walter Porter and Henry Cooke. At his death he was apparently enjoying a double place, both as 'composer to the private musick' and as 'a viall, among the lutes and voices' at a combined yearly salary of £80 plus liveries. After the restoration of the monarchy in 1660 this double vacancy was filled with the appointments of Charles Coleman 'for ye Viall' and Henry Lawes as 'Composer'. Ford also seems to have been in receipt of an annuity of £120 granted by Charles when Prince of Wales.

Ford's *Musicke of Sundrie Kindes* (London, 1607) is in two parts, dedicated respectively to Sir Richard Weston of Skreens, Roxwell, Essex, and to Sir Richard Tichborne. Among the ayres are such famous pieces as *What then is love, sings Coridon, Faire sweet cruell, Since first I saw your face* and *There is a ladie, sweet and kind*. The ayres are given alternative four-part vocal settings. The lyra viol duets include *M. Southcote's Paven* with its galliard (MB, ix); other titles that might help to identify the circle in which Ford moved at this stage in his life are *The baggepipes: Sir Charles Howard's delight*, and *Snatch and away: Sir John Paulet's toy*. Some pieces contain indications of a pizzicato technique common in lyra viol playing: 'thumpe them with the first and second finger of the left hand according to the direction of the pricks'.

Ford contributed two anthems to Sir William Leighton's *Teares or Lamentacions of a Sorrowfull Soule* (RISM 1614[7]) and a large number of three-part songs (ATB) both sacred and secular survive in manuscript, notably at Winchester College and Christ Church, Oxford. A number require the support of a basso continuo (missing from the set in *GB-Och*). Also in manuscript are some six-part anthems and madrigals, including *'Tis now dead night*, a 'Passion on the Death of Prince Henry'. Ford's viol music includes six fine five-part fantasias (anonymous in *Lbl* Add.17792–6, but ascribed to him in *Lcm* 1145).

Although Ford's work in the context of his time has not yet been authoritively assessed, it is possible to say that the music merits better than its present relative obscurity. Hsieh has written of the anthems – perhaps the least well-known works – that some 'are equal to the works of the most eminent composers of the period'. The lute-songs, such as the delicately elegant *Since first I saw your face*, rank with the best in a genre not lacking in great works. The lyra viol duets are so finely idiomatic as to suggest that Ford must have been an excellent performer; the depth of expression and originality of one like the *Pauin, M. Maynes Choice* show him to have been a composer of true inspiration.

WORKS

19 anthems, 3–6vv, 1614[7], *GB-DRc, Lbl, Llp, Ob, Och, Ojc, US-NYp*; 2 ed. in EECM, xi (1970), 34, 146

4 sacred canons, 1652[10]

Musicke of Sundrie Kindes, 4vv, insts (London, 1607/*R*); songs ed. in EL, 1st ser., iii (1921, 2/1966); 2 lyra viol duets, ed. in MB, ix (1955, 2/1962), 205, 206

35 partsongs, 3vv, *GB-Och* [bc lost], *WCc*

6 fantasias a 5, *Ckc, Lbl, Lcm, Ob*; 1 ayre a 4, *Lbl, IRL-Dm*; 1 almaine a 3, *GB-Och*; Fa mee fa, 2 b viols, *Ob*

IAN SPINK/FRANK TRAFICANTE

Forefall. A type of appoggiatura. *See* ORNAMENTS, §§3 and 6.

Foreground (Ger. *Vordergrund*). In Schenkerian analysis (*see* ANALYSIS, §II, 4) the LAYER in a piece or movement that preserves the contrapuntal and rhythmic essentials but lacks some ornamentation or its embellishment (including note repetition) or indications of scoring.

The word 'foreground' is sometimes used more loosely in analytical writings to denote the surface of the piece, as opposed to 'background' which is equated with structure.

WILLIAM DRABKIN

Forest (*fl* first half of the 15th century). English composer. No initial or forename is given in the sources, and no Forests with specifically musical credentials appear in archives. Identification therefore remains uncertain, though the name is not common, and there is only one strong candidate, John Forest, onetime Dean of Wells, who was born about 1365–70 (obtaining a papal dispensation by 1390 to take holy orders despite illegitimate birth) and died on 25 March 1446. Full details of his ecclesiastical preferments are given in A.B. Emden: *A Biographical Register of the University of Oxford to A.D. 1500* (Oxford, 1957–8). He was a member and benefactor of Lincoln College, Oxford, and a lifelong canon of Lincoln Cathedral, also holding prebends at various times at Durham, York, Lichfield, Southwell, Salisbury and Wells. He was Archdeacon of Surrey from 1415 and Dean of Wells from 1425 until his death, having obtained in 1429 a papal indult to visit his archdeaconry by deputy for five years, owing to old age, failing sight and infirmity. This has cast doubt upon the identity of John Forest with the composer as being inconsistent with the fresh, blossoming and youthful music presumably composed at this time. However, he lived for a further 17 years and cannot have been totally decrepit; also, it seems that some of his most advanced compositions may have been copied into the Old Hall Manuscript not much later than 1425. Identification with a close contemporary of Leonel Power's is stylistically convincing. John Forest was particularly active in the Winchester diocese, and closely associated with Cardinal Beaufort, Bishop of Winchester from 1404 (translated from Lincoln); this may reflect some personal patronage. Forest also appears in the records of Christ Church, Canterbury, perhaps significantly, given Leonel Power's association there after the death of his patron in 1421.

Forest was apparently one of the earliest English composers to cultivate the long panconsonant duets,

smoothly spun ornamental melodic lines, omnipresence of 3rds and essays in textual declamation, sometimes understood by the term *contenance angloise*. His name is mentioned, together with those of Dunstaple, Leonel, Plummer, Frye and others, in Hothby's *Dialogus*. Forest's style has much in common with that of the 'later' motets of Power, including an instability of metre, though he is perhaps more inclined to write strings of parallel 3rds and 6ths. Like Power also, Forest seems to have had a special partiality for *Alma Redemptoris mater*, having used the text in one antiphon setting (*Alma Redemptoris/Anima mea/Alma Redemptoris*) and the plainchant in another (*Ascendit Christus/Alma Redemptoris*: this marriage of the text of one antiphon with the plainchant of another is found in even closer form in Power's *Salve regina*, which is based on *Alma Redemptoris*). The reasons for assigning him the Credo on this melody (possibly an isolated survival from a cyclic mass) may turn out to be a circular argument, especially since they depended on Bukofzer's inaccurate observation (in MB, viii, 1953) that the plainchant usage was identical to that in *Ascendit Christus*. Its signatures (Є C Є) are not characteristic of Forest, who favoured O and C, though he did use major prolation for the lower parts of the Credo that is ascribed to him by name: its upper part is written in perfect time.

The two Old Hall antiphons and the anonymous Credo copied by the same scribe have long duets for discantus and contratenor, an unusual feature outside the isorhythmic motet, of which Forest's sole surviving example uses the classical structure of Dunstaple, with three statements of the colour, each of two taleae, and regular isorhythm in the upper voices.

Apart from tenor usage, there is no certain case of plainchant paraphrase, though clear allusions can be found to the relevant melodies in the upper parts of *Ascendit Christus* (see critical commentary to MB, vii, no.61) and *Tota pulcra es*. In one source only, *Alma Redemptoris* is provided with a different text to the second part (*Anima mea*), possibly as an alternative for liturgical reasons rather than to produce a simultaneous, motet-like rendering. Four of the texts associated with Forest's antiphon settings are for Vespers for the Vigil of the Assumption (he used four out of the six prescribed in the Sarum Antiphoner) and the other two are for the Nativity of the BVM.

WORKS

Edition: *The Old Hall Manuscript*, ed. A. Hughes and M. Bent, CMM, xlvi (1969–73) [OH]

Credo, 3vv; ed. in DTÖ, lxi, Jg.xxxi (1924/*R*)

Gaude martyr cum triumpho/Collaudemus venerantes, *MOe* α.X.1.11 (isorhythmic)

DOUBTFUL WORKS

Gloria, 3vv (ascribed to Forest in *D-Mbs* 3232a, and to Hugo de Lantins in *I-Bc* Q15; its pairing in the latter to a Credo by Hugo as well as the musical style suggests authorship by Lantins)

Credo Alma redemptoris mater, 3vv; ed. in DTÖ, lxi, Jg.xxxi (1924/*R*) (ascribed to 'Anglicanus')

Credo, 3vv, OH no.74 (anon. in source)

For bibliography *see* OLD HALL MANUSCRIPT.

MARGARET BENT

Forest, Jean Kurt (*b* Darmstadt, 2 April 1909; *d* Stahnsdorf, nr Berlin, 2 March 1975). German composer. Between the ages of six and 16 he studied at the Spangenberg Conservatory, Wiesbaden. He was subsequently (1926–41) employed as a violinist, viola player, répétiteur and Kapellmeister in several German cities. His first attempts at composition (from 1935) were occasional works that fulfilled specific practical demands. After military service and internment in the USSR (1942–8), he settled in Berlin, where he held various posts (consultant on choral music, chief conductor, deputy departmental head) at Berlin Radio (East), East German radio and East German television. From 1954 he dedicated himself exclusively to composition. He became a member of the DDR Academy of Arts in 1970.

Central to Forest's oeuvre are stage works designed to provoke moral confrontations with 20th-century historical topics such as fascism, war, and the explosion of the atomic bomb. In the 1960s he steadily reduced the size of his instrumental forces and derived all melodic and harmonic constellations from a single musical cell (although this sometimes took the form of a 12-note series, he did not adopt strictly serial procedures). The main features of his style are episodic forms, a vigorous and unadorned musicality, captivating orchestral effects and instrumental works on programmatic ideas.

WORKS
(*selective list*)

STAGE

Ops: Der arme Konrad (after F. Wolf), 1957, Berlin, 1959; Tai Yang erwacht (after Wolf), 1959, Halberstadt, 1960; Wie Tiere des Waldes (after Wolf), 1963, Stralsund, 1964; Die Passion des Johannes Hörder (after J.R. VERA GRÜTZNER

Forest Gate College of Music. London conservatory founded in 1885 and amalgamated with the London Academy of Music in 1904. *See* LONDON, §VII, 3.

Forestier, Mathurin (*fl c*1500–35). French composer. Lowinsky suggested he was the same person as Mathurin Dubuysson, a singer in the Ste Chapelle, Paris, between 1489 and 1513. If Forestier was close in age to the composers whose sacred music appears with his in manuscripts from the Netherlandish court scriptorium, he was probably born around 1470 and may have died as late as the 1530s. These works (all ed. in CMM, civ, 1996) include three Masses (*Missa 'Intemerata virgo'*, 4vv, on the third and fourth sections of Josquin's *Vultum tuum*; *Missa 'Baises moy'*, 5vv, on Josquin's chanson; and *Missa 'L'homme armé'*, 5vv, also attributed to Mouton) and two motets on sequence texts (*Alma chorus domini*, 4vv; and *Veni Sancte Spiritus*, 6vv, also attributed to Josquin) which reveal a fondness for canonic textures reminiscent of Josquin and Mouton, most remarkably in the final section of the *Missa 'L'homme armé'*, a canon for seven voices out of one on the well-known melody.

Three four-voice chansons in a more modern style (*L'aultre jour en ung jardin* in 1538[13], and *Frere Bidault* and *O cruaulté qui m'as mis* in 1541[7]) appear in sources later than any of the Mass manuscripts and may therefore have been written by a different man, especially since no first name is given for their author. Similarly, the earlier, untexted, three-voice setting of *La hault d'alemaigne* in 1504[3], attributed simply to 'Mathurin', may be by yet someone else, though no other composers of either name are currently known.

THOMAS G. MACCRACKEN

Foresythe, Reginald (*b* London, 28 May 1907; *d* London, 23 Dec 1958). English jazz pianist, composer and bandleader. The son of a West African barrister and a German mother, he was educated in England. During the late 1920s he travelled to the USA, where he wrote arrangements for Earl Hines's orchestra and was commissioned by Paul Whiteman to compose new works. In 1933 he returned to Britain and formed a band made up of two clarinets, bassoon, three saxophones, piano, double bass and drums – an unconventional instrumentation for jazz and dance music at that time. For this and later ensembles he wrote many short pieces, including *Serenade for a Wealthy Widow/Angry Jungle* (1933, Col.), *The Autocrat before Breakfast* (1934, Col.), *Dodging a Divorcee* (1935, Col.) and *Swing for Roundabout* (1936, Decca). In 1934 Foresythe returned to the USA to perform with Whiteman, and the following year he recorded in New York with a band that included Benny Goodman, John Kirby and Gene Krupa; apart from this occasion, however, he made little use of improvisation. After World War II he led another band, but his final years were spent in obscurity, playing the piano in small drinking clubs in London around Soho and Kensington.

Foresythe's witty shorter compositions created a permanent impact on his pre-war jazz contemporaries and foreshadowed by a couple of decades the use that American jazz arrangers were to make of woodwind and classical counterpoint; he also wrote longer works, such as *Southern Holiday: a Phantasy of Negro Moods* (1935, Col.).

CHARLES FOX/R

Forkel, Johann Nicolaus (*b* Meeder, nr Coburg, 22 Feb 1749; *d* 20 March 1818). German music historian, theorist and bibliographer. He is generally regarded as one of the founders of modern musicology.

1. LIFE. Forkel was the son of a cobbler, box maker and tax collector. He received early keyboard training from the local Kantor, Johann Heinrich Schulthesius; in matters of music theory he appears to have been largely self-taught, using printed treatises by Mattheson, J.A. Scheibe, Christoph Nichelmann and others as his guide. In 1766, at the age of 17, he left home for Lüneburg, where he served as a chorister at the Johannisschule (J.S. Bach had studied at the Michaelisschule, the town's other choir school). The following year Forkel moved to Schwerin, where he worked as a prefect, or assistant conductor, in the cathedral choir. There his skills were noticed by Duke Frederick 'der Fromme', who awarded him a stipend for two years of study at the University of Göttingen.

Forkel matriculated at the university in April 1769 and attended lectures in law, mathematics and ancient and modern philosophy. In 1770 he was appointed university organist, and from then until the end of his life he remained at the university, holding one academic music position or another. From winter 1772 he also gave private instruction, apparently until 1779, when he was appointed academic concertmaster and, soon thereafter, university music director. As music director, Forkel presented an annual concert series, typically consisting of 20 performances given between 5 p.m. and 7 p.m. on Sundays from Michaelmas to Easter. He supplemented these with lectures, often publishing related material in advance to stimulate interest (e.g. *Genauere Bestimmung einiger musikalischen Begriffe zur Ankündigung des akademischen Winter-Concerts von 1780–1781*, Göttingen, 1780; repr. in *Magazin der Musik*, ed. C.F. Cramer, i, Hamburg, 1783/*R*). The concerts continued until 1815; the lectures, until Forkel's death.

In 1781 Forkel married Margareta Sophia Dorothea Wedekind, the 16-year-old daughter of a Göttingen theologian. The union, which produced one son, ended in divorce in 1793. For his work as music historian and theorist, Forkel was awarded a doctorate 'without examination and without fees' by the university in 1787 and given the title *magister*. The first volume of his ambitious *Allgemeine Geschichte der Musik* appeared the next year, when Forkel also applied, unsuccessfully, for

the prestigious position of 'Director Musices und Cantor am Johanneum' in Hamburg that had been vacated by the death of his friend C.P.E. Bach; the post went to C.F.G. Schwencke. In 1792 Forkel issued his groundbreaking music bibliography, the *Allgemeine Litteratur der Musik*. He travelled in 1801 to Leipzig, Prague and Vienna to gather additional material for the *Allgemeine Geschichte*, the second volume of which appeared that year. Around this time Forkel also began to work with the Viennese archivist and librettist Joseph Sonnleithner on the *Denkmale der musikalischen Kunst*, a multivolume historical anthology of music. He sent off the manuscript to volume i in March 1803, and the music was subsequently engraved and proofed, but before it could be printed, the plates were melted down by French soldiers during the occupation of Vienna in 1806, and Forkel, disheartened, abandoned the project.

In 1801 Forkel began to serve as adviser for *Oeuvres complettes de Jean Sebastien Bach*, Hoffmeister & Kühnel's emerging series of Bach's keyboard music. This work led to the firm's publication, in 1802, of his important biography, *Ueber Johann Sebastian Bachs Leben, Kunst und Kunstwerke*, which was based on material that he had assembled for the third and last volume of the *Allgemeine Geschichte*. Despite the fact that Forkel continued to write and lecture for 16 more years, he did not return to the *Allgemeine Geschichte*, and it remained unfinished at the time of his death (five notebooks of material, *Miscellanea musica*, survive in *D-Bsb*).

2. Works. The *Allgemeine Geschichte*, the magnum opus of Forkel's historical studies, was the first German attempt at a comprehensive history of music. Volumes i and ii cover the period from antiquity to the end of the 16th century; volume iii, never completed, would have carried the account to Forkel's time. Its encompassing approach links it with the earlier histories of Hawkins and Burney, but the incorporation of late-18th-century theories on aesthetics, philosophy and sociology (Forkel was extremely well read and had a personal library of over 2500 books) gives it a distinctive, metaphysical slant. Forkel cast his survey within the framework of universal history then being taught at the University of Göttingen by Johann Christoph Gatterer (1727–99) and August Ludwig Schlözer (1735–1809), according to which history was viewed as a succession not of facts, but of ideas, and as the movement of mankind from natural wildness to a cultivated state of perfection. This perfection was to be achieved through constant progress and improvement (much like the growth of a person from infancy to adulthood) and the development of ethics and sublime mental capabilities. Universal history thus paralleled many aspects of Enlightenment philosophy. Forkel presented the history of music as a gradual evolution from simple to complex, ascribing a decisive role to the appearance of harmony, which enabled composers, in time, to liberate music from its reliance on words and to write instrumental music (which was sublime because it conveyed feeling in its purest guise). Music history thus gained a developmental and psychological dimension. In Forkel's opinion, fugue was the richest instrumental procedure, since its polyphonic combination of leading and imitative parts seemed to reflect the harmonious union of individuals from different levels of society working towards common goals: 'The general feeling of mankind itself pronounces the fugue as the highest and most dignified masterpiece of art that is worthy to be brought before posterity'. Perhaps for this reason Forkel departed from the Enlightenment idea of uninterrupted progress and held up Bach's music, with its fugal counterpoint, as the model for late-18th-century composers.

Forkel's approach to music theory, seen most clearly in *Ueber die Theorie* and the lengthy preface to volume i of the *Allgemeine Geschichte*, was to stress that music was a profound expression of human feeling rather than – as Rousseau and Burney believed – a superficial stimulation of the senses. He allied music not with mathematics, but with language: just as syllables gave rise to words and words to comprehensible paragraphs, so notes gave rise to melodies, and melodies to comprehensible forms. In this development, harmony, again, played the decisive role, placing music 'in the position of becoming a complete, rich, and diverse language of feelings, just as the most developed language of ideas had become for reason'. To Forkel, both melody and harmony were critical, but the feeling generated by the two was the most important element of all. For instance, in a published analysis of C.P.E. Bach's Sonata in F minor, H173 (W57.6) (discussed at length in Powers), Forkel judges the piece in terms of the emotions produced by its themes and movements and the composer's ability to balance and contrast those emotions. By promoting this subjective analytical approach at the University of Göttingen, Forkel was able to shift music from a science to a fine art, allied with language, philosophy, history and literature.

Forkel's remarkable *Allgemeine Litteratur* set the standard for later bibliographies in terms of thoroughness and organization. It contains some 3000 entries, from antiquity to the late 18th century, with well-ordered comments on the content and quality of each source. After Forkel's death the volume was expanded and translated into Italian by Peter Lichtenthal as part of his *Dizionario e bibliografia della musica* (vols.iii and iv; Milan, 1826), and it was updated and enlarged by the Leipzig organist and manuscript collector Carl Ferdinand Becker as *Systematisch-chronologische Darstellung der musikalischen Literatur* (Leipzig, 1836/*R*). In his original preface Forkel announced a comprehensive bibliography of music scores, but he never carried out the plan.

Ueber Johann Sebastian Bachs Leben, Kunst und Kunstwerke, Forkel's seminal biography, marked the formal beginning of the Bach revival, and it remains a primary source. Based on information received directly from Bach's two eldest sons, Wilhelm Friedemann and Carl Philipp Emanuel, it contains many facts that would otherwise have been lost (such as the origin of the Goldberg Variations). Forkel focusses mainly on Bach's keyboard works and his accomplishments as a keyboard player, composer and teacher, portraying him as a German cultural hero ('Be proud of him, O Fatherland; be proud, but at the same time, be worthy of him!') whose preludes and fugues, trio sonatas and other masterpieces eclipsed the music of Forkel's day. He also claimed, incorrectly, that Bach had simplified and shortened his compositions, stripping them of 'useless diminutions and embellishments'. While Forkel was mistaken in his attempt to align Bach with the Enlightenment cause, his biography remains a primary source in Bach scholarship.

Forkel's own compositions were judged 'dry' in his own time and are largely forgotten today. In Göttingen

he published two sets of sonatas for keyboard (1778, 1779), a set of sonatas for keyboard, violin and cello (1783), and keyboard variations on *God Save the King* (1791). Other pieces were published in Augsburg and London; manuscripts of additional vocal, instrumental and keyboard works (especially keyboard concertos) survive, mainly in Berlin (*D-Bsb*).

Forkel was not the first to lecture on music at a university (C.G. Schröter, L.C. Mizler von Kolof and others did so before him), nor the first to write an extensive musical biography (John Mainwaring wrote his famous book on Handel some four decades earlier). Nevertheless, his activities at the University of Göttingen and his published writings helped to establish the discipline of musicology as we know it today.

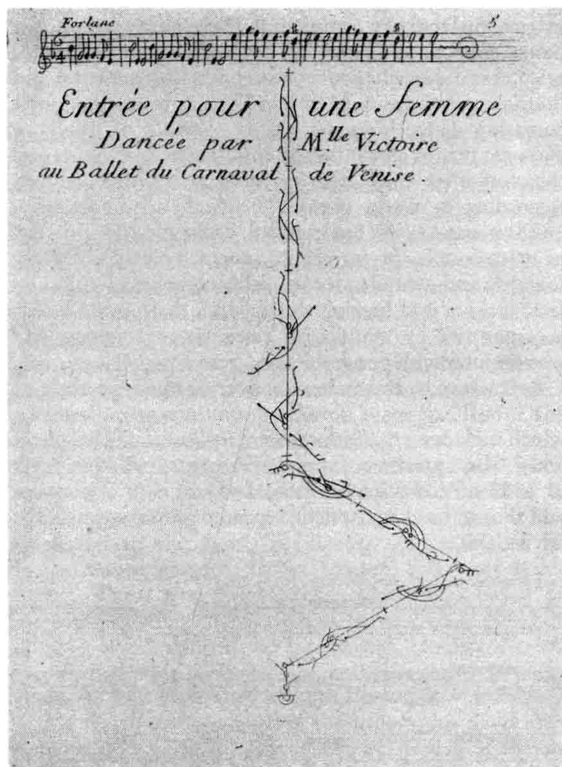
GEORGE B. STAUFFER

Forlana [furlana] (Fr. *forlane*). A lively north Italian folk dance, associated particularly with Venice; it became an aristocratic French court dance and instrumental *air*, flourishing from about 1697 to 1750. It was an energetic courtship dance from the Italian province of Friulia, a Slavonic region controlled by the Venetian republic, and therefore may have had its roots in Slavonic dances. According to Carlo Blasis (*The Code of Terpsichore*, 1828) it was a lusty, but graceful, dance of flirtation. One or more couples performed at once, the partners moving towards and away from each other, touching hands and feet, turning and beating the air with their arms. It was accompanied by mandolins, castanets and drums, and was popular with gondoliers and 'street people'.

References to the forlana appear in music as early as 1583 in Phalèse's *Chorearum molliorum collectanea*, which includes a 'ballo furlano', *L'arboscello*. This piece, which also appears in Jakob Paix's organ tablature book of 1583 as *L'arboscello, ballo furlano*, is in duple time and shows the characteristic repeated phrase segments of the forlana (ex.1).



Ex.1 *L'arboscello ballo furlano* (from **RISM** 1583[21])

The popularity of the forlana in French court life seems to have been established with its use in Campra's *opéra-ballet L'Europe galante* (1697) and *comédie lyrique Le carnaval de Venise* (1699). The latter includes two forlanas, the first used as a dance entry for a troupe of Slavs, Armenians and Gypsies. The illustration shows the first strain of the second forlana, which exhibits several characteristics of the music: balanced, four-bar phrase structure, 6/4 or 6/8 metre in a moderate tempo, frequent repetition of phrase segments, an upbeat of a crotchet or quaver (depending on the time signature), simple harmonies, and an implied drone bass. The rondeau form prevailed, beginning and ending with a short refrain usually eight bars in length and containing one or more longer couplets.

14 forlana choreographies are extant in the Beauchamp-Feuillet notation; six of them are for theatre dances (including some in Campra's ballets) and the others are for social dancing (Little and Marsh, 159). The steps of the choreography generally fall two to a bar, corresponding to dotted minims in the music, and where there are three steps to the bar the rhythm is minim–crotchet–dotted minim. These steps include the more lively patterns of French court dancing, such as the *pas de rigaudon*, *pas de sissone*, *pas de bourrée* and *assemblé* – that is, steps using many leaps, hops and jumps. Since no choreographies exist for the Venetian forlana it is hard to make a comparison, but it is probable that much of the original lustiness was discarded in the French court versions. In England and France the forlana was also popular as a contredanse.

Music for danced forlanas, in addition to those already mentioned, may be found in Campra's *Les fêtes vénitiennes* (1710) and *Les âges* (1718), and in stage works by Mouret, Lalande and Rameau. Stylized forlanas were

Choreography and first strain of the second forlana 'Entrée pour une femme, dancée par Mlle Victoire' from Campra's comédie lyrique 'Le carnaval de Venise' (1699): engraving from Feuillet's 'Recüeil de dances' (1704)

composed by François Couperin (the fourth of the *Concerts royaux*, 1722), Bach (First Orchestral Suite BWV1066), William Corbett (Concerto no.6 in *Le bizzarie universali*, 1728) and G.J. Werner (*Der wiennerische Tändelmarckt*, *c*1750). A number of other pieces appear to be forlanas even though they are not designated as such: examples are the third movement of Mondonville's Trio Sonata op.2 no.2 (1734), the second movement of Leclair's Violin Sonata op.9 no.3 (1743) and the third movement of his Trio Sonata op.4 no.3 (*c*1731–3). Chausson included a forlana in his *Quelques danses pour piano* op.26 (1896), and there is also one in Ravel's *Le tombeau de Couperin* (1914–17). The third movement of Elliott Carter's Sonata for flute, oboe, cello and harpsichord (1952) is a forlana, according to the composer, although it is not so called. Other 20th-century composers of forlanas include Tailleferre, Pierre Ferroud and Claude Arrien.

The forlana is still found as a folk dance in many regions of Italy and in Italian communities in other countries.

Form. The constructive or organizing element in music. This article is concerned with the concept of form itself, not with the historical evolution of particular forms or genres (for which see articles under appropriate titles). Form might be defined simply as what forms have in common, reflecting the fact that an organizing impulse is at the heart of any compositional enterprise, from the most modest to the most ambitious. Yet the act, and art, of composition is not synonymous with the selection and activation of formal templates, and composers oblige writers on music to confront the infinite flexibility of the relation between 'form' as a generic category (such as ternary, canon, sonata) and the musical work as the unique result of the deployment of particular materials and processes. Practice particularizes, just as theory generalizes, and discussion of musical form has been especially vulnerable to the tensions which arise between these very different ways of thinking.

Discussions which concentrate exclusively, or primarily, on matters of musical form lie within the domain of musical pedagogy, rather than of criticism or analysis: their object is to instruct fledgling composers in how musical structures are correctly put together. When the subject is that of particular, and valued, compositions, the critical discussion of musical character and style, or the technical examination of tonal or post-tonal structures and matters concerning motivic and rhythmic processes, tends to have priority over considerations of form as either a generic category or an organizational process or template, which might even be distinct from other modes of organization. For example, Salzer distinguishes between 'structure' as revealed in Schenkerian voice-leading and harmonic analysis, 'form' as 'the organization and division of that structure into definite sections, and the relation of those sections to each other', and 'design' as the organization of the compositional surface, in terms of its thematic and rhythmic material (Salzer; Rothstein).

Definitions of form in both pedagogical treatises and texts on musical aesthetics have commonly given priority to the need for form to be unified and integrated, with contrasts and diversities subordinate rather than predominant. Moreover, form has generally been theorized as implying not simply organization, but organicism – with frequent recourse to biological or botanical analogies. In *Fundamentals of Musical Composition*, Schoenberg declared that 'form means that a piece is organized: i.e. that it consists of elements functioning like those of a living organism . . . The chief requirements for the creation of a comprehensible form are *logic* and *coherence*'. For Langer, in contrast, form 'is always a perceptible, self-identical whole; like a natural being, it has a character of organic unity, selfsufficiency, individual reality'.

The argument that formal organization is essentially and inevitably organic reflects the principles of aesthetics formulated during the 18th century, notably by Shaftesbury and Baumgarten. These principles can be traced back to the Aristotelian description of a tragedy as the

'imitation of an action that is whole and complete in itself'. A whole is that which has a beginning, a middle and an end, but the relationship between these elements must not be arbitrary or obscure. Aristotle (*Poetics*, 7 and 9) wrote that 'of simple plots and actions the episodic are the worst' – 'episodic' meaning the absence of probability or necessity in the sequence of episodes which make up the plot as presented in the play. It is clear from this that form (as an organic or episodic sequence of events) and content ('plots and actions') are difficult to separate when the character of an art-work, and not simply its formal framework or structural model, is under discussion, and this difficulty has been a determining factor in studies of musical form which aspire to rise above the purely pedagogical.

Since the 18th century theorists of musical form have reiterated the need for wholeness, symmetry and proportion, though without necessarily imposing a limit to the number of acceptable compositional designs. In an apparent effort to resist the conventionalizing constraints of formal modelling, A.B. Marx argued that 'there are as many forms as works of art' (*see* ANALYSIS, §II, 3), but the tendency of theorizing forms has inevitably been to explore degrees of uniformity: the conditions under which formal frameworks can be defined, and successfully imitated, and in which particular formal categories – chaconne, minuet and trio, and so on – can provide a common organizational underpinning for an infinite variety of musical materials and compositional procedures. What has come to be known as formalist aesthetics – in Hanslick's formulation, the principle that 'the beautiful is not contingent upon nor in need of any subject introduced from without, but . . . consists wholly of sounds artistically combined' – does not in itself imply a limited category of 'beautiful' formal frameworks. Yet as theorizing became more systematic, and writing about music both critically and historically more formulaic, categorizations of various kinds gained the upper hand, until, as Dahlhaus observed, 'the theory of form was a description of genres'. As such, it was ill-equipped to confront the protracted crisis of 20th-century music and its fraught relationship to 20th-century social and political history.

The fact that there is more to composition than form, and that discussing form separately from content in all but the most directly technical sense is, as stated above, purely pedagogical, has encouraged musicological interpretation of the musical work as a multivalent entity. For Nattiez, a composition is not merely 'a whole composed of "structures". . . . Rather, the work is also constituted by the procedures that have engendered it (acts of composition), and the procedures to which it gives rise: acts of interpretation and perception'. The effect of this and other later 20th-century strategies is to challenge the stability and singularity of formal categorization as a means of defining and determining the essence of the musical work. Dahlhaus's assertion that 'to expect a discussion about musical form to produce definitions and prescriptions would be naive. It is by no means certain what form in music is, and any attempt to formulate rules would provoke nothing but derision' is provocative precisely because it turns conventional thinking on its head, and as such it fits well alongside the paradoxical reading of the 20th-century situation found in Adorno's understanding that 'form represents the progressive rationalization, integration and control of all aspects of the musical material at the same time as the material itself, as handed-down genres and forms, is tending towards fragmentation and disintegration'. Since, as Paddison notes, 'for Adorno the "critical" and "authentic" work strives for a consistency of form which is achieved without concealing the fragmentary character of its pre-formed, handed-down material', it is clear that the Schoenbergian prescription for formal comprehensibility – 'logic and coherence' – can no longer be taken at face value. It is as if, in *Fundamentals*, Schoenberg was identifying 'classical' procedures which students should first accept as models out of respect for tradition, but which are actually no longer available for authentic, free, post-tonal composition, however sincerely the composer strives to recover or re-create them. In Adorno's world, that striving cannot succeed, since 'art of the highest calibre' – including Schoenberg's – pushes beyond totality towards a state of fragmentation'.

Dahlhaus was willing to preserve the distinction between a concept of form signifying 'musical coherence on a large scale' and *musique informelle* (exemplified by the radical music of the 1950s and 60s) whose purpose was 'to draw undivided attention to the isolated detail, to the individual musical moment'. Since 'the symptom of extreme *musique informelle* is the heterogeneous nature of the details from which a musical shape is constructed' and 'disconnected matter stands side by side in sharp contrast', the distinction between 'formed' and 'unformed' music is clear, and aesthetic judgments can derive from this distinction, whether one is regarded as good and the other bad, or both are believed to have equal potential for successful or unsuccessful use. This second position can be traced in the attitude that seeks to project the nature of the musical work as dependent not on form as organic – a principle of design that is ultimately singular, rational in the Schoenbergian sense – but on a view of any composition (from any era) as a discourse, something in which the play of different, often ambiguous meanings is the decisive factor. Far from being restricted to the role of 'progressive rationalization', which *musique informelle* rejects, form from this perspective is freed to participate fully in a new world of decentred heterogeneity. This transformation of structure into discourse reinforces the contrast between 20th-century readings of form and those of earlier eras, following the perception that although music is not 'literally a language', it 'becomes most essentially itself when it emulates certain principles found in language' (Clarke).

Given that these principles still involve basic distinctions between similarities and contrasts, their analytical use does not of itself promote less rigorous, less systematic exploration of formal design, as Clarke's analysis of Haydn shows. Yet the implication is that music is emulating 'certain principles found in language' by 'saying' something as the result of adopting certain formal procedures. What the composition says is, however, inherently and irreducibly ambiguous, since the very identity of any text (musical or otherwise) is equivocal and multivalent. Post-structuralist thinking about form therefore proposes that a text itself 'subverts the very idea of identity, infinitely deferring the possibility of adding up the sum of a text's parts or meanings and reaching a totalized, integrated whole' (Johnson).

Such a position seems to be at the furthest possible remove from the Aristotelian principles which underlie classical aesthetics, and pre-20th-century theories of musical form. But the shift from classicism to modernism in composition has helped to promote the exploration of such anti-classical, deconstructive strategies, and just as the application of linguistic analysis to classical music enriches one's awareness of its essential unity and stability, so its employment in relation to post-classical and modernist compositions reinforces the post-structuralist perception that to seek to impose a unified framework on a modernist composition is no less 'violent' than to approach it as a sequence of fragments which may or may not achieve coherence through a balance of opposites. Johnson observes that 'if anything is destroyed in a deconstructive reading, it is not the text, but the claim to unequivocal domination of one mode of signifying over another', and the 'careful teasing out of warring forces within the text itself', which Johnson proposes as the goal of deconstructive analysis, is particularly appropriate as a means of exploring the formal richness and multiplicity of musical structures which move through time rather than existing as solid, visible objects in space.

It is inevitable, and appropriate, that the concept of deconstruction in musicology should be surrounded by controversy, given the proposition, as formulated by Subotnik, that 'characteristically, a deconstruction results in (at least) two readings of a single text that coexist but cannot be reconciled with each other. In deconstructionist terminology, the relative weight of these two readings is "undecidable"'. There will be many musical works, particularly from periods before the 20th century, for which different, irreconcilable readings of their basic form (as distinct from what that same work expresses through its particular materials and processes) will be unlikely, and even when the composer has consciously worked with more than one formal model, as in the case of Webern's Variations for Orchestra op.30, the alternatives are not so much irreconcilable as complementary and interactive. Subotnik's claim that 'in the deconstructionist view, a text is a profoundly indeterminate construct, functioning always as part of an ongoing, open-ended process of historical discourse' and that 'no single meaning can be definitively assigned to a text' underlines the sense in which 'meaning' is implicated in form, yet not identical with it. Even when the form can convincingly be assigned to traditional general categories like ternary, sonata, or variation, as with the movements of Beethoven's Symphony no.9, the meaning of the material through which the form is projected remains open to new and different interpretations (Cook). Ultimately, therefore, form is a factor making for relative stability in the inherently open-ended process of musical communication.

ARNOLD WHITTALL

Formant. The relationship between amplification, or degree of resonance, and frequency, for any device (whether mechanical or electronic) that modifies, transmits or radiates sound. The graph representing the relationship between amplification and frequency is usually called the 'formant characteristic'.

Three typical examples of the source of a formant will help to clarify the meaning. The body of a violin converts the almost inaudible sound of the strings by a process of resonance and radiation into a very much louder sound, but in so doing it imposes its own formant on the sound; different frequency components in the string vibration are enhanced by different amounts, and so the timbre is changed. Second, the bore characteristics and the size, shape and position of the side holes of a woodwind instrument change the wave-form set up by the reed in the pipe and so impose a formant which leads to a characteristic timbre for each instrument. Third, the cavities of the throat and nose modify the harmonic-rich buzzing sound of the vocal chords and impose formants that are characteristic of the person and also of the different vowel sounds; each vowel sound – regardless of whether spoken by a male or female, adult or child – has formant peaks at well-defined frequencies. Problems arise if the recognizable strong peaks in a formant occur in regions for which no frequencies are present in the basic sound; thus it is difficult to distinguish one vowel from another in a high-pitched human voice, and the timbre differences between instruments are much less pronounced at high pitches than lower down the scale. *See also* SOUND, §6(iv).

CHARLES TAYLOR

Formé, Nicolas (*b* Paris, 26 April 1567; *d* Paris, 27 May 1638). French composer, singer and priest. He was probably educated at the choir school of Notre Dame, Paris. By the time he was 20 'his ability in both music and letter' was such that on 4 July 1587 he was admitted to the Ste Chapelle du Palais as a clerk; in a document of 28 February 1590 he described himself as a *chantre ordinaire* there. During the next two years the chapter reprimanded him on many occasions for drunkenness, lack of moderation and negligence in carrying out his duties. From the first quarter of 1592 his name appears in the records of the royal chapel as an *haute-contre*, with a salary of 150 livres. One of the *sous-maîtres* under whom he worked was Eustache Du Caurroy. As soon as Du Caurroy died, on 7 August 1609, he succeeded him as *sous-maître* and composer of the royal chapel in alternation with Eustach Picot. Formé held both offices until his death; in the year of his death he was thus able to write in the dedication to Louis XIII of his Mass for double chorus that as well as serving 'the late King Henry the Great for 18 years' he

had spent '28 years of humble service and continual allegiance' in Louis' household. He was sensitive and passionately devoted to music to the point of fainting when one of his works was performed in public. Yet he was also eager to obtain honours and lucrative benefices: in 1624 the king made him abbot *in commendam* of the abbey of Notre Dame de Reclus in the diocese of Troyes, although he resigned in 1634 in favour of his nephew; and on 11 November 1626 he was made a canon of the Ste Chapelle. Apart from these official privileges he assiduously set about increasing his wealth, through property, loans, recognizances and so on, as can be seen from his will, drawn up in 1631, and by the list of his possessions compiled after his death. The text of his epitaph survives (*F-Pn* fr.8219, p.47).

The numerous anecdotes about Formé sometimes illustrate his irritable, arrogant and undisciplined nature or his lax morals and fondness for drink but also the enthusiasm with which those in high places greeted his music. On the one hand, for example, he was at loggerheads with the other canons of the Ste Chapelle because he lived with his mistress in his own house. On the other hand, Richelieu invited him to direct a concert in his palace, and Dubois de l'Estourmière, Louis XIII's valet, related in his memoirs how he told Louis XIV of his father's particular affection for Formé's motet *Nonne Deo subjecta erit anima mea* (which is lost). One can also believe Sauval's report that after Formé's death, Louis XIII collected his works together and locked them away in a cupboard to which he held the key; it is possibly because of this that some at least of his music has survived. Sauval added that these works subsequently fell into the hands of Jean Veillot, 'who turned them to his own good account'.

As a composer Formé is known only by sacred works. In the dedication to Louis XIII of his celebrated Mass published in 1638, cited above, he prided himself on being the first Frenchman to write for double choir in the Venetian style, but this is an idle boast, since several others had done so before him, among them Le Jeune, Du Caurroy and d'Ambleville. In this mass, however, and also in the motets *Domine, salvum fac regem* and *Ecce tu pulchra es, amica mea*, he did break new ground in his explicit use of the concertante style, contrasting a quartet of soloists with a five-part choir: the style, partly fugal partly homophonic, heralds that of the *grands motets* of Versailles. There is no mention of instrumental accompaniment in the score. But it seems unlikely that, at a time when the continuo was becoming more and more accepted in France, such fundamentally modern music was conceived for *a cappella* performance. Moreover the nature of the music implies accompaniment, although it is doubtful if instruments other than organ were used because of the restrictions that the church imposed on the performance of liturgical music, especially masses. There survived in manuscript a series of *Magnificat* settings by Formé based on the eight church tones. Sections for four voices alternate with Gregorian chant, thus confirming that the works were intended for liturgical use, perhaps in the royal chapel or the Ste Chapelle. They are written in a basically unadorned syllabic style, which is, however, varied by imitative entries based on the chant and by the use of contrasted vocal groups. Formé's surviving music is fine enough for the loss of his other works to be a matter for regret.

WORKS

Aeternae Henrici magni ... missam hanc duobus choris, 4/5vv (Paris, 1638); San and Ag, ed. A. Gastoué (Paris, n.d.); also contains 2 motets: Domine salvum fac Regem; Ecce tu pulchra es, amica mea, ed. D. Launay, *Anthologie du motet latin polyphonique en France au début au XVIIe siècle* (Paris, 1963)
Messe en contrepoint simple, par b mol, 4vv (Paris, before 1707), lost
8 Magnificats sur les 8 tons, 4vv, *F-Pn*

DENISE LAUNAY/JAMES R. ANTHONY

Formellis [Formelis], **Wilhelmus** [Guilelmus] (*b* *c*1541; *d* probably at Vienna, 4 Jan 1582). Composer and organist, possibly of Flemish birth, resident in Austria. He must have entered the Kapelle of the future Emperor Maximilian II in Vienna late in 1552 or in January 1553, since in a letter of January 1578 he requested a pension on completing 25 years' service. From 1566 various entries in the court account books show that, as well as playing the organ, he taught the instrument to Archduchess Anna (who later married Felipe II of Spain). He remained in Maximilian's service when he became emperor and then served Rudolf II; both showed their appreciation of him by several times giving him substantial grants of money. Only a few of his works have survived, all of them sacred. Five six-part motets appeared in anthologies of the 1560s (one in RISM 1564[3] and a total of four in 1568[2-4] and 1568[6]). The latter collection also includes the eight-part occasional motet *Arma manusque Dei* (ed. in CMM, lxiv, 1974), written in 1566 at the time of Maximilian II's campaign against the Turks. It uses *cori spezzati* technique, and its asymmetrical choral groupings produce dynamic gradations of a kind then very popular at the imperial court. A few other motets by Formellis survived

in manuscript, together with intabulations of chansons by Berchem and Lassus (see *EitnerQ* and *MGG1* for details), but some of these may not now be extant.

ALBERT DUNNING

Formentelli, Barthélémy (*b* Courquetaine, Chaumes-en-Brie, 21 Jan 1939). French organ builder. He was apprenticed for seven years to Victor Gonzales's workshop at Châtillon-sous-Bagneux, and then worked for four years at Philipe Hartman and Jean Bourgarel's workshop in Rainant, Jura before moving to Verona, where he opened his own workshop. He finally settled in Pedemonte (near Verona) in January 1964, where in 1989 his eldest son, Michel Octave Formentelli (*b* 28 Dec 1970), began working as an assistant. By 1995 Barthélémy had built or restored more than 100 organs, 100 harpsichords and 40 fortepianos. Among his most important new organs are those at the conservatories at Parma (1971), Piacenza (1974) and Padua (1975), Rovereto Cathedral (1975), Meymac, Corrèze (1984), Lemmens Institute, Leuven (1990), Basilique Ste Bernadette, Lourdes (1992), St Etienne de la Cité, Périgueux (1993), and Stroppari, Vicenza (1995). His major restorations have included those carried out on two late 16th-century organs, by Claudio Merulo (Parma Conservatory, 1965) and Luca Biagi (S Giovanni in Laterano, Rome, 1988).

UMBERTO PINESCHI

Formes, Karl Johann (*b* Mülheim, 7 Aug 1815; *d* San Francisco, 15 Dec 1889). German bass. He made his début at Cologne in 1842 as Sarastro. Engaged at the Kärntnertortheater, Vienna, he created Plumkett in Flotow's *Martha* (1847). Forced to leave Vienna for political reasons, in 1849 he sang in London for the first time at Drury Lane. He made his Covent Garden début in 1850 as Caspar (*Der Freischütz*) and sang there regularly until 1868. His roles included Bertram (*Robert le diable*), Marcel (*Les Huguenots*), Leporello, Rocco and Peter the Great (*L'étoile du nord*). He also took part in the première of the three-act revision of Spohr's *Faust* (1852) and the first London performance of Berlioz's *Benvenuto Cellini* (1853), in which he sang the Cardinal. In 1857 he appeared at the New York Academy of Music, returning there for the next 20 years. In 1872 he took part in the première in the USA of Marschner's *Der Templer und die Jüdin*. After his retirement from the stage in 1878, he taught singing in San Francisco. His voice combined a solid, resonant lower register with considerable flexibility, and he was particularly admired as Caspar.

His brother Theodor (*b* Mülheim, 24 June 1826; *d* Endenich, 15 Oct 1875), a tenor, made his début in 1846 at Budapest as Edgardo (*Lucia di Lammermoor*). After singing in Olmütz, Vienna and Mannheim, he was engaged at the Berlin Hofoper (1851–64), where he sang the title roles in the first local performances of *Tannhäuser* (1856) and *Lohengrin* (1859). Two other brothers, Wilhelm (1831–1884) and Hubert, were also singers.

ELIZABETH FORBES

Formes, Theodor. German tenor, brother of KARL JOHANN FORMES.

Formes fixes (Fr.: 'fixed forms'). Poetic forms, particularly of the 14th and 15th centuries, that directly affected the musical forms of practically all song settings of the period. For French song the main such forms are: the ballade, particularly important in the 14th century (*see* BALLADE (i)); the rondeau, which became by far the predominant form in the 15th century (*see* RONDEAU (i)); and the VIRELAI, which had something of a career in the 14th century but was then dropped until its revival in the middle of the 15th century. All three involve complex repetition patterns with a refrain and music in two main sections (*see* OUVERT). According to the early 15th-century *Reigles de la seconde rhetorique* (ed. E. Langlois, *Recueil d'arts de seconde rhétorique*, Paris, 1902, p.12), it was Philippe de Vitry who first used them. But all three forms can be found in one shape or another in the monophonic songs of the 13th century and earlier. Moreover, none of Vitry's songs has been identified: the earliest coherent such repertory is in the work of Guillaume de Machaut, who composed 42 ballades, 22 rondeaux and 33 virelais. Some time very late in the 15th century all three *formes fixes* were abandoned by composers, though traces of their design can be heard in French music through the first half of the 16th century, and the rondeau in particular continued to be cultivated by poets.

Slightly different versions of these forms were cultivated in the song repertories of other European languages. In mid-14th-century Italian music, the madrigal is important (*see* MADRIGAL, §1) but was largely replaced by the BALLATA, a form closely related to the virelai. Other forms related to the virelai include the 13th-century Spanish CANTIGA, the 15th-century English CAROL, the 15th- and 16th-century Spanish CANCIÓN and VILLANCICO, and the Italian BARZELLETTA (*see also* FROTTOLA). The German BAR FORM is loosely related to the ballade. All of these are sometimes called *formes fixes*.

See also CHANSON.

DAVID FALLOWS

Formica, Antonio [Antonino] (*b* Licata, Sicily, ?*c*1575; *d* Palermo, 17 March 1638). Italian composer. He came of a noble Palermo family and was the first pupil – at any rate in Palermo – of Antonio Il Verso, who included pieces by him in four of his own collections. On 1 April 1605 his fellow pupil G.B. Calì dedicated to him his book of two-part ricercares. On 31 August that year he was received (one year before his fellow pupil Giuseppe Palazzotto e Tagliavia) into the Congregazione dell'Oratorio dei Filippini at Palermo, and on 15 December he became a cleric. In February 1606 he became a deacon and priest. On 21 October 1608 he was made a full member of the order, in whose service he spent the rest of his life: from 1614 onwards he was several times appointed its director of music, and he was provost from 17 April 1621 to 28 May 1623 and during the period 1632–3. His music is characterized by skilful counterpoint, rhythmic variety and flexible harmony, achieving an effective realization of the sense of the words.

PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI

Formosa, Riccardo (*b* Rome, 1 Sept 1954). Australian composer. Formosa's initial professional experience was in rock music, as a member of the Little River Band in Melbourne. He subsequently enrolled at the NSW Conservatorium (now Sydney Conservatorium) in 1979–80, where his teachers included Don Banks and Martin Wesley-Smith; he then studied privately with Richard Toop before going to Rome to work with Donatoni at the Accademia di S Cecilia.

Donatoni had already been a major influence on Formosa during his Australian student years, though the most impressive work of this period, *Dedica* for amplified oboe and orchestra, embraces a much wider range of Italian influences, including Maderna. Direct contact with Donatoni led to more profound absorption of his teacher's methods, and his subsequent works are notable in equal measure for their arcane technical procedures (a series of codes, often extrapolated from the names of dedicatees) and a brilliant, lucid surface which unites immaculate craftmanship with memorable invention. The outstanding works of the mid-1980s are *Pour les vingt doigts*, *Iter* and *Vertigo*. Formosa's frankly tortuous compositional method, which made the production of anything but chamber works exceptionally difficult, led to a personal crisis. In 1987, after completing just 11 works, he stopped composing concert music and returned to the commercial world, working primarily as a studio arranger and producer. His decision to do so was widely regarded as an enormous loss to Australian music.

RICHARD TOOP

Formschneider [Andre, Andreae, Grapheus, Enderlin, Endres], **Hieronymus** [Jeronimus] (*b* Mergentheim [now Bad Mergentheim]; *d* Nuremberg, 7 May 1556). German printer. It has been suggested that his father was Fritz Enderlin (Lenckner, 154), and he was certainly mentioned in an imperial document in 1515 as 'Iheronimussen Enderlin, formbsneider zu Nurnberg'. However, he used the latinization 'Andre' almost exclusively by 1504 and until the early 1520s, after which he replaced his family name with a designation of his principal profession, 'Formschneider'. ('Grapheus' is found only in three colophons presumably written by Hans Ott.)

Formschneider, resident in Nuremberg by 1515 and receiving citizenship in 1523, was Albrecht Dürer's principal woodcutter from 1515 to 1528 and the official die sinker of Nuremberg from 1535 to 1542. Although only a part-time printer, between 1525 and 1555 he printed at least one edition in each of all but three years. He did not have a shop for sales, and it appears that most of his printing was commissioned. One of the most gifted block and type cutters of the German Renaissance, he cut the many illustrations and diagrams in, among others, Dürer's treatises and Hans Gerle's lutebooks, and cut and cast the founts, including only the second single-impression music typeface in Germany and the famous Neudörfer-designed *Fraktur*; his finest print is Ostendorfer's *Warhafftige Beschreibung des andern Zugs in Osterreich.*

Opening of the discantus part of the introit 'Benedicta sit Sancta Trinitas' from Isaac's 'Choralis Constantinus', i (Nuremberg: Ott, 1550), printed by Hieronymus Formschneider

Formschneider's role solely as commissioned printer is seen most clearly in his six titles for Ott; the *Choralis constantinus*, the first volume of which was printed for Ott's widow (see illustration) and the others for the Augsburg bookseller Georg Willer; and Senfl's odes, the printing commissioned by Minervius through Hieronymus Baumgartner of Nuremberg. Although music became central to his printing activities, there is no evidence that he had any understanding of or special interest in it.

EDITIONS

H. Gerle: Musica teusch (1532); H. Gerle: Tabulatur auff die Laudten (1533); H. Ott, ed.: Der erst Teil: 121 newe Lieder (1534[17]); L. Senfl, ed. S. Minervius: Varia carminum genera (1534); [H. Ott], ed.: Schöne auszerlesne Lieder (1536[9]); H. Gerle: Musica teutsch (1537); H. Gerle: Tabulatur auff die Lauten (1537), lost; L. Senfl: Magnificat octo tonorum (1537); H. ROYSTON GUSTAVSON

Fornaci, Giacomo (*b* Chieti; *fl* early 17th century). Italian composer. He was a Celestine monk. He is known by *Amorosi respiri musicali*, for one to three voices and continuo (Venice, 1617; 1 song ed. in Goldschmidt, appx, 39f; 1 dialogue ed. in Racek, 244f). The 20 pieces it contains, over half of them monodies, cover a wide range of forms current at the time and include settings of some specially popular poems such as Guarini's *Tirsi morir volea*, but the music is relentlessly undistinguished. According to Gerber he also published *Melodiae ecclesiasticae* (Venice, 1622), of which no copy survives.

NIGEL FORTUNE

Fornari, Andrea (*b* Venice, *c*1753; *d* Venice, 26 Oct 1841). Italian woodwind instrument maker. In a petition dated 18 January 1792 he claimed to have made – besides instruments for the study of mathematics and physics and for navigation – all kind of woodwinds, including flutes and recorders in different sizes, shawms and 'salmuò' (Chalumeau). He also names the renowned oboists Pietro and Giuseppe Ferlendis as testifying to the quality of his work. Surviving instruments by Fornari are mainly oboes and english horns (respectively 20 and 27 listed in *YoungHI*). Most of his instruments are dated (1791–1832) and show accurate craftsmanship. The earlier oboes have an original vase-shaped top joint without a bulb. Those made after 1810 show the influence of the Dresden school. All the english horns are curved and covered with leather. The earlier instruments include precious materials such as ivory (even for the keys) and ebony; the later ones are less opulent (perhaps due to the economic crisis in Venice). Fornari also invented a sort of basset-oboe, now in the Museo Teatrale a Scala in Milan. His son Pietro (*b* 1793) played the clarinet and also made woodwind instruments. Some of the later instruments with the stamp FORNARI / A VENEZIA may have been made by him.

ALFREDO BERNARDINI

Fornari, Matteo [Matteuccio] (*b* Lucca, *c*1655; *d* Rome, Nov 1722). Italian violinist. Corelli's favourite pupil and close friend, he was one of the greatest violin virtuosos active in Rome at the end of the 17th century and the beginning of the 18th. From 1678 (when he played for the first time at S Luigi dei Francesi on the feast day of the church's patron saint) almost until Corelli's death, he rarely failed to appear alongside his teacher as second violinist. He must have begun his apprenticeship with Corelli before 1678, because his payment at S Luigi dei Francesi was higher than that of the other violinists except for Corelli himself, indicating that he was already a fully formed player. In 1678 also Fornari became a member of the Congregazione di S Cecilia, a necessary qualification for practising as a musician in Rome. From the beginning of the 1680s master and pupil became inseparable. They took up residence together in the Palazzo al Corso of their patron Cardinal Benedetto Pamphili, and together moved in 1690 to the Palazzo della Cancelleria of a rival patron, Cardinal Pietro Ottoboni. Wherever Corelli was asked to play – at meetings of the Arcadian Academy, at celebrations of the Accademia del Disegno di S Luca or at S Luigi dei Francesi and S Marcello – Fornari was almost always his second violin. When Corelli became too ill to play in public Fornari frequently stood in for him, and when his teacher died in 1713 he took his place at the head of Ottoboni's orchestra at the Cancelleria, directing it until 1720. It was, however, Giuseppe Valentini, an excellent violinist and successful composer, who inherited Corelli's post at S Luigi dei Francesi. Corelli left Fornari all his violins and manuscripts, as well as the responsibility for overseeing the publication of his Concerti grossi op.6, which appeared in 1714, dedicated to Fornari.

ENRICO CARERI

Förner, Christian (*b* Löbejün, 1610; *d* Wettin, 1678). German organ builder. He was the son of the master builder and mayor of Wettin, Lorenz (?Martin) Förner, and was taught by his brother-in-law, J.W. Stegmann (*d* 1637; probably identical with 'Johannes N. von Wettin', who was dismissed for his critical remarks on the occasion of the examination of the famous Gröningen organ). Förner was interested in mathematics and physics and attempted to use scientific knowledge in organ building, as he described in *Vollkommener Bericht, wie eine Orgel aus wahrem Grunde der Natur in allen ihren Stücken nach Anweisung der mathematischen Wissenschaft soll gemacht, probieret und gebauet werden* (1684). He invented the hydraulic wind pressure gauge.

Förner's work included repairs to the organs built by David Beck at Schloss Gröningen (1592–6) and St Martini, Halberstadt, and to the instrument built by Esaias Compenius at St Martini, Croppenstedt, as well as four new organs: at Halle Cathedral (1665–7; the instrument Handel played as organist from 1702 to 1703); at Ulrichskirche, Halle (1673–5; built to Förner's specifications and under his supervision by L. Compenius); at Schloss Neu-Augustusburg, Weissenfels (1673; frequently played by Bach, several of whose works take its peculiarities into acount); and at Fischbeck an der Weser. It is possible that Förner was the teacher of Bernhard Schmidt (1629–1708; later known in England as 'Father Smith'). Förner, with his experimental approach to organ building, may be regarded as a clear model for the important central German organ builders Johann Tobias Gottfried (who was his pupil) and Tobias Heinrich Gottfried Trost.

HANS KLOTZ/FELIX FRIEDRICH

Fornerod, Aloÿs-Henri-Gérard (*b* Montet-Cudrefin, 16 Nov 1890; *d* Fribourg, 8 Jan 1965). Swiss composer. He studied music in Pully, Lausanne, and from 1909 at the Schola Cantorum in Paris under d'Indy (composition), Sérieyx (counterpoint) and Lejeune (violin). For one term (1910–11) he followed Pfitzner's orchestration course, at Strasbourg and then returned to Lausanne, where he played the violin in the symphony orchestra (1911–13) and conducted choirs (1916–18) for which he wrote several religious pieces. His conducting work continued with the Choeur des Alpes of Montreux and then the Harmonie des Alpes of Bex (1932–8). He worked as a theory teacher in Lausanne at the Institut de Ribaupierre (1921–49) and the conservatory (from 1926); he also taught in Morges (1940–47) and Saint Maurice, Valais (1948–54), and from 1954 until his death he was director of the Fribourg Conservatoire. In addition, he worked as a critic for the *Tribune de Lausanne* and the *Semaine littéraire* of Geneva, and from 1960 to 1965 he was French editor of the *Revue musicale suisse*.

WORKS
(*selective list*)

Stage: Oedipe roi, op.5 (incid music), chorus, orch; Antigone, op.5b (incid music), chorus, orch, 1952; Geneviève, op.36 (opéra comique, J. Bruyr, after Boccaccio), 1951–2, Lausanne, 1954

Orch: Sym. no.1, F, op.1, 1915–17, disowned; Sym. no.2, E, op.8, 1919–22, disowned; Pastorale, op.19, vn, orch, arr. vn, pf; Le voyage de printemps, op.28, 1940–41; Suite, orch; Pf Conc., op.29, 1943–4; Prométhée enchaîné, op.34, 1948; Deuxième concert, op.35, chbr orch, 1949

Sacred vocal: 3 Motets, op.2, SATB, 1918; 3 Motets, op.4, SATB, 1918; Ave Maria, op.6, 1v, org, 1919; Messe brève, op.12, SATB (1926); 3 Motets, op.15, SATB; Angelus Domini, op.22, chorus; Messe brève, op.23, SAB, org, 1934; Missa septimi toni, op.25, SATB, 1935; Salve regina, op.26, SATB; TeD, op.37 (Ronsard), solo vv, chorus, orch, 1954; Messe solennelle 'Ancilla Domini', op.38, solo vv, chorus, orch, 1957; Ps ciii, op.41, male chorus, 1959; Hymne à la très-sainte Trinité, op.43 (G. de Reynold), chorus, brass, db, perc, 1961; Ave Maria, op.44, male chorus

Secular vocal: 2 choeurs, op.7 (T. de Banville), 1921; Elaine, op.9, solo vv, male chorus, orch, 1923; 2 mélodies, op.10, ?1924; 3 mélodies, op.13, before 1927; Une jeune fille parle, op.17 (Moréas), chorus, *c*1927; Chanson de toile, op.18 (Fornerod), 1v, pf, unpubd; Déesse aux yeux d'azur, op.20 (Moréas), female chorus, orch/pf; Madrigal, op.21 (Calderón, trans. J.P. Florian), 1v, pf, 1930; 5 chansons françaises, op.30, 1v, pf, 1944; 4 chansons de Savoie, op.32, 1v, pf, 1947; Bucoliques, op.33 (Virgil, trans. X. de Magallon), 1v, pf, 1947; 9 vocalises, op.46, 1v, pf, unpubd; other songs and choral pieces

Chbr: Sonata, op.11, vn, pf, 1925; Concert, op.16, 2 vn, pf (1959); Sonata, op.24, vc, pf, 1934; Divertissement pastoral, op.31, ob, cl, bn, 1946; Str Qt, op.47, 1964; other pieces

Kbd: 4 interludes dans les tons grégoriens, op.3, org, 1920; 2 petites pièces, op.14, pf, 1927; Le voyage de printemps, op.27, suite, pf, 1940–41; Sonatine, op.39, pf, 1959; other pieces

ETIENNE DARBELLAY

Forns y Cuadras, José (*b* Madrid, 12 Jan 1898; *d* Geneva, 6 Sept 1952). Spanish musicologist and composer. He studied music at the Madrid Conservatory, where he was taught composition by Emilio Serrano and won the conservatory's composition prize (1919). From 1921 to

his death he held the chair of music history and aesthetics at the Madrid Conservatory. As a composer he wrote mostly zarzuelas (including *El toque de oración*, *La veneciana* and *Flores de lujo*) and scores for various films. But he was more influential in disseminating knowledge of the history and aesthetics of music, particularly through his two books, *Estética aplicada a la música* (Madrid ?1924, 7/1943), and *Historia de la música* (Madrid, 1925–33), which have appeared in several editions and for many years were standard textbooks in nearly every conservatory in Spain as well as many in Latin America. He was also notable for his untiring defence of the rights of Spanish musicians (having also taken the doctorate in law), through various national and international societies of which he was a member.

JOSÉ LÓPEZ-CALO

Foroni, Jacopo (*b* Valeggio, nr Verona, 25 July 1825; *d* Stockholm, 8 Sept 1858). Italian composer and conductor. He studied in Verona with his father Domenico Foroni. His first opera, *Margherita* (1848), was reviewed favourably by Alberto Mazzucato in the *Gazzetta musicale di Milano*. In 1849 he was appointed conductor of the orchestra of the royal theatre and chapel in Stockholm, where he presented works which were still unperformed in Italy, such as symphonies by Shumann and orchestral works by Berlioz. In 1850 he wrote the opera *Cristina di Svezia* for Stockholm and three sinfonias (single-movement overtures) for Milan. The sinfonias were published immediately by Ricordi, a unique occurrence in mid-19th-century Italy. Their appearance in score meant that they were widely circulated: the first one in particular remained in the repertory of Italian conductors from Angelo Mariani in the 19th century to Toscanini in the 20th. In his last opera, *I gladiatori* (1851), Foroni applied his new style of orchestral writing. In a letter to Mazzucato (1856) he stated that he had finished a treatise on orchestration (now lost) in which he analysed different techniques from Bach to Verdi.

Like Michael Costa and Mariani, Foroni was one of the first musicians to combine the activities of *concertatore* (assistant conductor and coach) and conductor, which at that time in Italy were still undertaken by two people. As an orchestral composer he displayed a vast knowledge of contemporary music. Thanks to his activity as a conductor abroad he could assimilate Berlioz and Liszt's technique of thematic transformation, even though he did not abandon completely the Italian formal tradition of the Rossinian ouverture. Nevertheless, Foroni developed further the Italian symphonic tradition, especially as regards the orchestration. In 1878 Filippo Filippi defined him as 'a symphonist to take your hat off to' and in 1879 Franco Faccio noted 'the irresistible enthusiasm of all audiences' for his sinfonias.

WORKS

OPERAS

Margherita (melodramma semiserio, 2, G. Giachetti), Milan, Re, 1848, *I-Mr*

Cristina di Svezia (dramma, 5, after G. Casanova), Stockholm, 1850

L'avvocato Patelin (commedia, 2), Stockholm, 1850, unfinished

I gladiatori (Spartaco) (tragedia lirica, prol, 3, G. Peruzzini), Milan, Cannobbiana, 1851, *Mr*

OTHER WORKS

Vocal: L'italiana (grido di guerra), unison vv, pf, 1847; Ai lombardi (canto di guerra, A. Zoncada), 3vv, 1848; Cantata sinfonica, for the birthday of the King of Sweden, 1850; Tre romanze, 1v, pf, 1850: La lontananza, Il desiderio, L'âme du purgatoire

ANTONIO ROSTAGNO

Forqueray [Forcroy]. French family of composers, viol players and organists.

(1) **Antoine Forqueray** [*'le père'*] (*b* Paris, 1672; *d* Mantes, 28 June 1745). Son of Michel Forqueray (1650–1714/5), a violinist and dancing-master who settled in Paris in 1670. The *Mercure galant* of April 1682 records that at an early age Forqueray

> had the honour ... of playing the *basse de violon* before the king, making His Majesty so pleased that he commanded that someone should teach [Forqueray] to play the bass viol ... he profited so much from the lessons that ... there are few who equal him.

According to his obituarist, he remained at court for five or six years and was educated with the court pages. At least six viol players were employed at court, including Marin Marais, but several sources state that he was taught only by his father, and d'Aquin noted that he was never a pupil of Marais. Forqueray often entertained the king during mealtimes and was called upon to play for foreign ambassadors. At the end of the 1689 he became *ordinaire de la chambre du roi*. La Borde recorded that by the age of 20 he was 'the most accomplished viol player of his time'. He also built up a reputation as a teacher; the Duke of Orléans (the future regent) and his son Louis, the exiled Duke of Bavaria and the Duke of Burgundy were among his pupils.

In 1697 he married Henriette-Angélique Houssu, daughter of an organist and herself a harpsichordist. They lived for a time at the residence of the Prince of Carignan, where (3) Jean-Baptiste Forqueray was born. Antoine gave concerts with his wife, but the marriage was unsuccessful: his wife left him five times, describing her husband as hot-headed. They separated in 1710, after which Antoine lived in high style, neglecting his impoverished family until ordered to provide for them. In 1731 he retired to Mantes. There was some reconciliation with his family, although he altered his will several times to exclude his son: he evetually left him 20,000 livres and some valuable viols, although the bulk of his estate went to his surviving daughter.

Contemporary writings reveal Forqueray as a player of exceptional virtuosity, keenly interested in the latest developments from Italy. The *Mercure de France* (August 1738) describes how 'he wished to do on the viol everything that they [the Italian violinists] could do on the violin'. The report continues that he succeeded in his ambition, translating their technical acrobatics into passage-work for the viol 'with startling accuracy'; this made his music 'more piquant and more recherché' than that of Marais. Above all Forqueray possessed a brilliant

gift for improvisation; his obituarist testifies to his 'lively and fertile imagination' and Le Blanc recalls he would 'affect to be whimsical, fantastic and bizarre'. The regent showed his appreciation of Forqueray's extraordinary talents by presenting him with lavish gifts that included covering him for a debt of 100,000 livres from speculation in the Mississippi company. Although Forqueray's obituarist refers to 'about 300 pieces' surviving by him, apart from the book of *pièces de viole* published as his, by his son, in 1747 (see below), only five *pièces de viole* (four in *F-Pn* Vm[7] 6296), two transcriptions by Visée for theorbo (*B* 279152), a handful of dance melodies and a manuscript for three viols ascribed to 'Forcroy' (in *Lm*) are known. These pieces are limited in harmonic vocabulary but demonstrate a love of virtuosity and a delight in the use of high registers.

(2) **Michel Forqueray** (*b* Chaumes-en-Brie, bap. 15 Feb 1681; *d* Montfort-l'Amaury, 30 May 1757). Cousin of (1) Antoine Forqueray. A pupil of Jean-Baptiste-Antoine Dupuis, organist at Chaumes Abbey, Michel arrived in Paris between 1698 and 1702. He became organist of St Martin-des-Champs in 1703 and on 20 July 1704 organist of St Séverin; he retained both posts until he died. D'Aquin wrote in 1752 that 'M. Forqueray, organist of St Séverin, still preserves the beautiful touch and the graces that attracted so much praise in his youth'. An inventory taken at his death included a Ruckers harpsichord valued at 800 livres.

(3) **Jean-Baptiste(-Antoine) Forqueray** [*'le fils'*] (*b* Paris, 3 April 1699; *d* Paris, 19 July 1782). Son of (1) Antoine Forqueray. Like his father, who taught him, Forqueray was a child prodigy. When he played to Louis XIV at the age of five or six the court was astonished 'by the prodigious technique he possessed at so young an age' (La Borde). He suffered the neglect and jealousy of his father, who about 1715 had him incarcerated in Bicêstre prison and in 1725 had him banished from the country. Fortunately he already had pupils of influence (including Le Monflambert) who rallied to his support and had the sentence revoked; Forqueray returned to France in February 1726 after a two-month exile. Later the same year Quantz remarked on Forqueray's skill in the *petit choeur* at the Académie Royal; in 1727 he toured Rennes and Nantes with Guignon.

On 29 July 1732 Forqueray married Jeanne Nolson and went to live with her at the house of her brother-in-law and guardian, Chevalier Etienne Boucon. Boucon was a great amateur of all the arts; his daughter Anne, who like Jeanne Nolson was an accomplished harpischordist, married Mondonville; Rameau was also a member of the Boucon family circle, as was Guignon. During the 1730s Forqueray played regularly at the house of the *fermier-général* Ferrand, and in autumn 1737 played Telemann's 'Paris Quartets' with the composer. Telemann recalled in his autobiography with awe: 'if only words could describe the wonderful way the Quartets were played by Herren Blavet, Guignon, Forcroy the Son and Edouard [cellist]'. Following the death of Jeanne Nolson on 22 December 1740 (there were no children from the marriage), Forqueray married the celebrated harpsichordist Marie-Rose Dubois on 13 March 1741. D'Aquin wrote: 'everyone knows of the talents of Madame Forqueray: her reputation is magnificent'. On 14 September 1742 Forqueray officially succeeded to his father's court position, which he held until 7 July 1779. Contemporary descriptions of his playing rank him almost with his father, indeed d'Aquin believed them to be quite equal.

In 1760 he seems largely to have retired from playing and taken up a new career editing Italian works for publication; Mme Leclair remained his engraver. He received a court pension from 1 January 1761 and after that appeared as a 'vétéran de la musique du roi'. He also worked for the Prince de Conti, retiring only at the prince's death in 1776. At a feast given by the prince in 1766 Espérandieu, secretary to Prince Friedrich Wilhelm of Prussia, heard Forqueray play. At Espérandieu's request Forqueray sent five letters to the viol-playing crown prince, containing advice on the best viols to acquire, viol set-up, good fingering and sound bowing technique (*c*1768, *D-Bsb*; facs. in *Viole de gambe: methodes et traités*, ed. J.-M. Fuzeau, Courlay, 1997). Forqueray declined a request to visit the prince in Potsdam due to poor health; later he suffered from paralysis.

In 1747 Forqueray published a volume dedicated to his pupil Princess Henriette-Anne (daughter of Louis XV) entitled *Pieces de viole avec la basse continuë composées par Mr Forqueray le père* (Paris, 1747/*R*; ed. C. Denti, Fribourg, 1984–). The attribution of these pieces to Antoine Forqueray is enigmatic for they are progressive works, grandly conceived in a style similar to that of Leclair. Harmonically, the pieces are full of diminished and augmented chords, Neapolitan sixths, chords of the ninth and colourful progressions. In the *avertissement* to the publication Forqueray admits to adding the bass (and thus the figures) and fingering the viol part himself. Three pieces which he claims are solely his work are marked with an asterisk, but they are stylistically indistinguishable from the other 29, ostensibly by Antoine. It thus remains unclear to what extent these are the father's work or the son's. To maximise the distribution of the pieces, Jean-Baptiste published them simultaneously in a version for solo harpsichord, possibly made by Marie-Rose (1747/*R*; ed. C. Tilney, Paris, 1970). These idiomatic transcriptions fundamentally reinterpret the material, making greater use of counterpoint, bass octaves and flowing arpeggiated bass figurations.

Forqueray's *Pieces de viole* represent the culmination of the French virtuoso viol tradition. Examined in conjunction with the letters that he wrote to Prince Friedrich Wilhelm, they provide us with a unique source not only on mid-18th-century French viol technique but also on the performance of (unmarked) contemporary violin music, notably by Leclair and Guignon. Forqueray meticulously marked his music with most progressive fingerings (notably using high positions across the strings and sequences employing matching fingerings), intricate italianate bowings and ornamentation (with two types of vibrato). Most striking of all is his experimentation with seven different timbres (using high positions on the bass strings) and 260 different chord patterns, including 42 different arrangements of diminished chords. The boldly creative and individual approach displays a profound understanding of the viol's potential and is stimulated far more by contemporary French violinists than by viol playes such as Dollé or Roland Marais.

(4) **Nicolas-Gilles Forqueray** [*'le neveu'*] (*b* Chaumes-en-Brie, bap. 15 Feb 1703; *d* Chaumes-en-Brie, 22 Oct 1761). Nephew of (2) Michel Forqueray and second cousin of (3) Jean-Baptiste Forqueray. He studied with

Dupuis, settled in Paris in 1719 and soon, as an organist, achieved the position of *maître de la chapelle et musique* to Louis XV. In due course he obtained many organ posts: he succeeded Charles Houssu at the church of the Cimetière des Innocents (1731), Fouquet at St Laurent (1732) and St Eustache (1733) and Dandrieu at St Merri (*c*1738). In 1734 he married Elisabeth-Nicole Séjan and taught her nephew, Nicolas Séjan (also his godson), who later became organist at Notre Dame. Poor health forced him to relinquish his positions, although he took over St Séverin at his uncle's death before retiring to Chaumes. Ancelet listed him, alongside Marchand, Daquin and L.-N. Clérambaulb, as one of 'the most highly regarded organists' of his day. None of his compositions for keyboard is known to have survived, and even the *airs à boire* ascribed to 'Forcroy le neveu' might be the work of (2) Michel Forqueray; these were published in the Ballard *Recueils* of August and October 1719, April, June and December 1721, and July 1722.

LUCY ROBINSON

Forrest, George. American composer and lyricist. He collaborated with ROBERT WRIGHT.

Forrester, Maureen (Kathleen Stuart) (*b* Montreal, 25 July 1930). Canadian contralto. After studies with Sally Martin, Frank Rowe and Bernard Diamant, she concentrated on a concert career. Her New York début (Town Hall, 1956) attracted extraordinary critical attention and engagements soon followed with leading American orchestras. In Europe she appeared at festivals in Berlin, Montreux and Edinburgh, and the Holland festival, earning particular praise for her Mahler singing; she sang in Verdi's Requiem under Sargent at a Promenade Concert in 1957. Her first major operatic engagement was as Gluck's Orpheus, in Toronto in 1962. Subsequently she sang, among other roles, Cornelia in *Giulio Cesare* (1966, New York City Opera), La Cieca in *La Gioconda* (1967, San Francisco), Erda (1975, Metropolitan), Madame Flora in Menotti's *The Medium*, Mistress Quickly, Brangäne, Arnalta (*L'incoronazione di Poppea*), Ulrica, Clytemnestra, Mme de Croissy (*Dialogues des Carmélites*) and the Countess (*The Queen of Spades*), which she sang at La Scala in 1990. A character actress of considerable wit, she was a singer of rare tonal opulence with a high standard of musicianship and interpretative imagination. She has made many recordings, including Gluck's Orpheus, Handel operas and works by Mahler.

Forsell, (Carl) John [Johan] **(Jacob)** (*b* Stockholm, 6 Nov 1868; *d* Stockholm, 30 May 1941). Swedish baritone. He made his début as Rossini's Figaro at the Stockholm Opera in 1896 and sang there regularly until 1911, and as a guest until 1938. In 1909–10 he appeared with success at Covent Garden as Don Giovanni, and at the Metropolitan in numerous roles including Telramund, Amfortas, Germont, Tonio and Prince Yeletsky. He was notable, especially as Don Giovanni, not only for the beauty and skill of his singing, but for the vivacity and zest of his whole dramatic performance – qualities which were still evident as late as 1930, when his fiery and elegant Don Giovanni, in Italian at Salzburg, provided a marked contrast to the sedateness of an otherwise German-speaking cast. From 1924 to 1939 Forsell was director of the Stockholm Opera; from 1924 to 1931 he taught at the Stockholm Conservatory, where his pupils included Jussi Björling and Set Svanholm. He made numerous recordings, all in Swedish, between 1903 and 1925.

DESMOND SHAWE-TAYLOR

Forssell, Jonas (Carl Arne) (*b* Stockholm, 7 Dec 1957). Swedish composer and administrator. He studied composition with Eklund and instrumentation with Mellnäs at the Royal College of Music in Stockholm (1979–82), where he also studied jazz and arrangement with Bengt-Arne Wallin. He chiefly plays the clarinet and baritone sax. He has also worked as a theatre musician and actor and has also written music for the municipal theatres in Göteborg and Uppsala and for the National Theatre which tours throughout the country. He was the director of the Norrlandsopera from 1996 to 1998.

The Norrlandsopera commissioned from him the artistically successful *Hästen och gossen* ('The Horse and the Boy', 1988). His breakthrough work, however, was the comic opera *Riket är ditt* ('Thine Is the Kingdom', 1990–91), the subject of which was nuns' concealment of refugees threatened with deportation; this attracted attention because of its lighthearted treatment of a current and

controversial topic. Performed at the Vadstena Academy in 1991 and 1992, this prizewinning opera was also broadcast on radio and television.

WORKS
(*selective list*)

Stage: Show (theatre music), chorus, speaking chorus, b cl, trbn, vc, 1983; Hästen och gossen [The Horse and the Boy], op, 3, 11vv, spkr, fiddler, orch, 1988; Riket är ditt [Thine Is the Kingdom] (op buffa, 3, Forssell), 9 vv, mute actors, chbr ens, 1990–91; En herrgårdssägen [A Mansion House Legend], vv, insts, 1993; Purpurporten [The Purple Gate], 4vv, pic, hn, tuba, vn, hp, perc, 1994; Kampen om kronan eller Gustav Vasa hade fyra söner [The Struggle for the Crown or Gustavus Vasa Had Four Sons], spkr, orch, 1994–5; Prinsessan och månen [The Princess and the Moon], op for children and adults, 1995–6

Vocal: Vaggsång till Maria [Lullaby to Mary], SATB, 1979; Hönsskit [Poultry Shit], music-dramatic scene, B, pf, 1982; 3 Songs, 1v, perc: Älskandes klagan [Complaint of the Lovers], 1984; Påsk 1968 [Easter 1968], 1991; Tiden och en flicka [Time and a Girl], 1991

ROLF HAGLUND

Forster. English family of violin makers and music publishers. They were working in London from *c*1760 to 1841.

(1) **William Forster (i)** (*b* Brampton, Cumberland, 1739; *d* London, 14 Dec 1808), known as 'Old Forster', was instructed by his father in the making of spinning-wheels and violins. He went to London in 1759 and within a short time had established himself in St Martin's Lane. By the early 1770s his violins, copies of Stainer instruments, were in demand, and he had learnt to make the thick dark-red varnish with which almost all Forster instruments are covered. In due course, in common with his London contemporaries, he came to be influenced by Cremonese instruments, particularly those of the Amatis. Benefited by royal patronage, he moved to the Strand about 1785, by which time he was styling himself 'violin maker to the Prince of Wales and Duke of Cumberland'. He also made violas, cellos and double basses (including three at the king's command), and had excellent bows made for him. He was also active as a music seller and publisher, issuing instrumental music by J.C. Bach, G.M. Cambini and Haydn (over 100 works; Forster made an agreement with Haydn in 1781 for the publication rights in England of his music and many of the manuscript copies he received from the composer are now in the British Library).

(2) **William Forster (ii)** (*b* London, 7 Jan 1764; *d* London, 24 July 1824), the son of William Forster (i), followed in his father's trade; his earliest known violins were made in 1779. For many years the two worked side by side, writing in respectively 'Senr' and 'Junr' on the printed label. Most of the instruments were also signed in ink on the rib above the tail-button, together with the date and serial number. William Forster (ii) took over the selling and publishing side of his father's business after his marriage in July 1786, and as well as reissuing some of his father's publications he published annual country-dance books. In 1816, following a speculation in a business of which he was not knowledgeable, he went bankrupt. His last years showed declining business activity, and his sudden death in a young woman's chambers prompted a coroner's inquest.

(3) **William Forster (iii)** (*b* 14 Dec 1788; *d* 8 Oct 1824), son of William Forster (ii), was trained as a violin maker but became an entertainer. Simon Andrew Forster (*b* 13 May 1801; *d* 2 Feb 1870), another son, carried on the business after his father's death and made about 60 good instruments. Much of his work was of a lesser character, although he was capable of finer work of the calibre of his ancestors. His *The History of the Violin* (London, 1864) gives much valuable information about his family and other English makers and lists all the numbered Forster instruments, in most cases with the name of the first purchaser.

CHARLES BEARE, PETER WARD JONES, PHILIP J. KASS

Förster. German firm of piano makers. Friedrich August Förster (*b* Oberseifersdorf, nr Zittau, 30 July 1829; *d* Löbau, 18 Feb 1897) founded the firm in Löbau (1859) and was producing about 500 uprights a year by the 1880s. Franz Cäser Förster (*b* Löbau, 7 Feb 1864; *d* Löbau, 20 Feb 1915), the son and successor of the founder, established a second factory in Georgswalde, Bohemia, in 1900. From 1924 to 1931 the company built several quarter-tone instruments (*see* MICROTONAL INSTRUMENTS, Table 2; described in A. Förster: *Der Viertelton-Flügel*, Löbau, 1925) to accommodate music by such composers as Alois Hába. Even though the important Grotrian-Steinweg firm took an interest in quarter-tone pianos for a while, the instruments never attained a wide distribution. Förster went on to make an electric piano, the Elektrochord, to the design Oscar Vierling of Berlin patented in 1933. Although the instrument was in other respects a conventional grand piano, electrical amplification enabled the attack and decay of the note and the harmonic development from each fundamental to be modified. Like the earlier Neo-Bechstein-Flügel, a similar instrument but without any soundboard, it could have a radio and gramophone built into it. Besides these experiments, the firm has maintained a steady production of medium-quality instruments, reaching a total of 161,500 pianos in 1995 under the management of Wolfgang Förster (*b* Löbau, 6 May 1933).

MARGARET CRANMER

Förster, Christoph (Heinrich) (*b* Bibra, Thuringia, 30 Nov 1693; *d* Rudolstadt, ?5/6 Dec 1745). German composer. He studied first with the organist Pitzler, then left Bibra for Weissenfels where he learnt thoroughbass and composition from Heinichen. When Heinichen went to Italy, Förster became a pupil of Georg Friedrich Kauffmann at Merseburg. In 1717 he was appointed violinist in the Merseburg court orchestra and later became Konzertmeister there. While employed at the court Förster dedicated six sonatas, six cantatas and 12 concertos to the duchess; he also learnt Italian, the predominant language for secular vocal music. Förster was granted

leave of absence from Merseburg on several occasions: in 1719 he visited Heinichen at Dresden and in 1723 went to Prague where he met Fux, Caldara, Conti and other eminent musicians involved in the coronation celebrations of Charles VI. In August 1742 he played a leading part (under Johann Graf) in the birthday festivities of Prince Friedrich Anton of Schwarzburg-Rudolstadt, and the following year was appointed vice-Kapellmeister at Rudolstadt. Among works written for this court is a birthday cantata dedicated to Princess Bernhardine (5 May 1745). When Graf died in 1745 Förster succeeded him as Kapellmeister, but held this post for only a few weeks before his own death. There is some confusion surrounding Förster's activities between 1739 and 1743. Loewenberg (*Grove5*) stated that he held an appointment at Sondershausen during this period, but in Förster's application for the post at Rudolstadt (3 March 1743) he merely said he had been Kammermusikus and Konzertmeister at Merseburg 'for a long time'.

In his own day Förster was greatly respected as a composer of church music. Gerber thought highly of the cantatas; when a boy he had sung many 'agreeable' arias by Förster in the local church at Sondershausen. In his instrumental music, Förster has been described as one of the leading exponents of the French overture: the overture in A major (ed. Riemann) shows a fine sense of form and a keen appreciation of instrumental colour. Whereas the orchestral suites are indebted to French models, the sinfonias and concertos display the influence of the Italian style. Förster's chamber music invites comparison with Telemann's. Both composers show the same ability to combine learned counterpoint and melodious themes, the same predilection for voice change and love of short melodic phrases in the *galant* manner.

Few of Förster's works were printed in the 18th century. The two main publications were a set of six symphonies published by Haffner (Nuremberg, 1747) and six *Duetti oder Trii* for two violins and optional continuo engraved by Telemann (see Mattheson). Förster was an extremely prolific composer. According to Walther he had written over 300 pieces by 1732, and the Breitkopf catalogues mention numerous works by him. It is obvious that existing work-lists are far from complete. Unfortunately many manuscripts lack the distinguishing Christian name so that authorship is open to dispute. The list below contains only works positively identified as Förster's.

WORKS

STAGE

music lost

Das Verlangen als die Quelle aller menschlichen Affecten (serenata), Sondershausen, 1740

Der auserlesene Beytrag zum vergnügten Alter (serenata), Sondershausen, 1740

2 It. ops, Rudolstadt, 1743, 1745

VOCAL

Laudate Dominum (Ps. cxvii), 4vv, orch; Sanctus, 5vv, orch; Mass (Ky, Gl), 4vv, orch: all *D-Bsb*

At least 26 church cants.: complete yearly cycle of 22 formerly owned by C.P.E. Bach; others, *SHs*, *B-Bc*

6 It. cants., solo vv, chorus, orch, some in *D-SHs*: Inimica d'amore; Zeffiretti; Clori, sei tutta bella; Vieni ô morte; Zeffiretto; Sei gentile, advertised in Breitkopf catalogue (1765–8)

Birthday cant., 4vv, insts, 1745, *RUl*

2 wedding cants., 4vv, insts, *SHs*

PIPPA DRUMMOND

Förster, Emanuel Aloys (*b* Niederstaina, Saxony, 26 Jan 1748; *d* Vienna, 12 Nov 1823). Austrian composer and teacher. Between 1766 and 1768 he served as a bandsman in the Prussian army. In 1768 he settled in Mittelwalde (now Mezibor), northern Bohemia, where he composed his first work, a set of variations in G minor, in 1769. He dedicated many of his simple divertimentos and keyboard concertos written between 1772 and 1774 to one Constanzia Genedl. Förster may have visited Vienna as early as 1776, and settled there permanently as a freelance artist during the 1780s. He became acquainted with Haydn, Mozart, and subsequently Beethoven, who recommended him highly as a composition teacher and whose op.18 may well have been influenced by Förster's quartets.

Förster's main achievements are his piano sonatas and his chamber music. His early keyboard works show his attempts to assimilate the pre-Classical style and *Empfindsamkeit* of (especially) C.P.E. Bach; he revealed himself as a mature composer with an individual style in the op.5 flute sonatas, the op.7 quartets and the op.12 piano sonatas. Many of his later piano sonatas are highly imaginative and original compositions, though the piano writing is sometimes awkward. The quartets and quintets are similarly often powerful and dramatic, and a few of the later unpublished quartets and sonatas are quite experimental harbingers of Romanticism. Mozart's works of the late 1780s, especially those in the minor mode, such as the C minor Fantasy K475 and Sonata K457 (which Förster arranged for string quintet), the G minor Quintet K516, and the G minor Symphony K550, and Haydn's opp.76–7 quartets were Förster's main points of departure. He was also a pioneer in composing large chamber ensembles for piano, strings and wind; the piano quartets feature the opposition of the keyboard to the string trio and quite elaborate viola writing. Förster was an important link between the mature styles of Mozart and Haydn and the early works of Beethoven, and his experiments with form and tonality helped to undermine the equilibrium of the High Classic period.

Förster's music enjoyed at best a *succès d'estime*. He had to publish much of his music at his own expense, and

his only musical works published after 1804 were illustrations (mostly preludes and fugues) to later editions of his *Anleitung zum General-Bass* (Leipzig, 1805), and contributions to such collective publications as *In questa tomba oscura* (Vienna, 1808) and the Diabelli Variations of 1823. Only a few of his works are available in modern editions.

WORKS

unless otherwise indicated, all works without publication details are in manuscript in A-Wn, and all printed works were published in Vienna; for spurious works see Longyear (1975)

CHAMBER

Edition: *E.A. Förster: 2 Quartetten, 3 Quintetten*, ed. K. Weigl, DTÖ, lxvii, Jg.xxv/1 (1928) [incl. thematic index of chamber music] [W]

R.M. LONGYEAR/MICHAEL LORENZ

Forster, Georg (*b* Amberg, Upper Palatinate, *c*1510; *d* Nuremberg, 12 Nov 1568). German editor and composer. While a chorister at Elector Ludwig V's court in Heidelberg around 1521, he began to study ancient languages at the university, receiving the BA in 1528. Together with his colleagues in the electoral choir, Caspar Othmayr, Jobst vom Brandt and Stephan Zirler, he received instruction in composition from the Kapellmeister Lorenz Lemlin. Forster's years in Heidelberg were decisive, for during this time he started to collect songs.

He moved to Ingolstadt in 1531 where he studied medicine. From 1534 until 1539 he continued his studies at Wittenberg. He pursued his interest in literature under Philipp Melancthon's tutelage. Luther included him among his dinner-table companions and encouraged him to compose settings of biblical texts. It is very likely that in selecting pieces for the first and second parts of the *Frische teutsche Liedlein*, Forster followed Luther's wishes. Furthermore, Forster may have had a close relationship with the Wittenberg printer Georg Rhau, who published most of his 18 sacred compositions.

In 1539 Forster began to practise medicine in Amberg. At the same time he began his work as an editor, publishing the first two parts of the *Frische teutsche Liedlein* (1539–40) and a collection of motets (1540). He transferred his medical practice to Würzburg in 1541 and in 1542 entered the service of the Count Palatine Wolfgang in Heidelberg, whom he accompanied as personal physician on a French campaign. After taking the doctor's degree at Tübingen in September 1544, he returned to Amberg and from early 1545 to Easter 1547 served as the city physician. Finally he moved to Nuremberg, where he remained until his death.

Forster was highly esteemed as a physician, scholar and musician. In the preface to the second edition of his treatise, *De arte canendi* (1540), Haiden referred to him as 'Vir ut literarum et Medicinae ita et Musicae peritissimus'. His personal library, numbering about 100 volumes, shows the broadness of his interests and learning.

In music, his secondary field of interest, he was a collector, editor, composer, arranger and writer of texts. All these capabilities combine to give the *Frische teutsche Liedlein*, Forster's single most important contribution, its particular character. The largest work of its kind in the 16th century, it contains 382 songs mainly for four voices, covering the course of the German Tenorlied from the late 15th century to the end of its flowering in the middle of the 16th. Among the approximately 50 composers represented are Isaac, Hofhaimer, Senfl, Othmayr and Brandt. It is also very important because it includes the works of many lesser masters in a wide range of genres and compositional styles. The work enjoyed great popularity: the first part was reprinted four times, the second three and the third twice. The melodies used for tenors and occasionally discants were taken predominantly from highly cultivated *Hofweisen* (court songs) and Gesellschaftslieder. Nevertheless, the number of folksongs and folklike tunes is relatively large, particularly in the second part; several survive only because they were included in this collection. Forster was concerned to provide the possibility for a completely vocal performance. This is specially true of the first part, which contains primarily

earlier works, originally with text only in the tenor. Forster texted subordinate voices, constantly improved underlay and composed his own texts for pieces whose texts were lacking or unsuitable. The second part contains mostly pieces which Forster himself performed during his student years at Amberg and Wittenberg. The majority of his own 36 secular songs and the compositions of his Heidelberg friends are found in the last three parts. The greatest number of pieces (51) was written by Jobst vom Brandt, followed by Forster himself and Ludwig Senfl.

Forster's talents as a composer far exceed the level of a dilettante, but in general he was quite conservative. In some pieces he adhered strictly to cantus firmus technique and used a moderate amount of imitation. In his songs he paired voices only occasionally, which distinguishes him from his more progressive contemporary Othmayr.

The importance of Forster's work as an editor and collector extended far beyond his own lifetime. Numerous composers used his *Frische teutsche Liedlein* well into the 17th century as a textual source for German lieder.

EDITIONS

Ein Ausszug guter alter und newer teutscher Liedlein, einer rechten teutschen Art (Nuremberg, 1539[27]); ed. in EDM, xx (1942)
Der ander Theil, kurtzweiliger guter frischer teutscher Liedlein (Nuremberg, 1540[21]); ed. in EDM, lx (1969)
Der dritte Teyl, schöner, lieblicher, alter, und newer teutscher Liedlein (Nuremberg, 1549[37]); ed. in EDM, lxi (1976)
Der vierdt Theyl schöner frölicher frischer alter und newer teutscher Liedlein (Nuremberg, 1556[28]); ed. in EDM, lxii (1987)
Der fünffte Theil schöner frölicher frischer alter und newer teutscher Liedlein (Nuremberg, 1556[29]); ed. in EDM, lxiii (1997)
Selectissimarum mutetarum, 4–5vv, tomus primus (Nuremberg, 1540[6])
Tomus tertius psalmorum selectorum (Nuremberg, 1542[6])

Some songs ed. in Cw, lxiii (1957)

Förster, Josef. *See* FOERSTER, JOSEF.

Förster, Josef Bohuslav. *See* FOERSTER, JOSEF BOHUSLAV.

Förster, Kaspar (*b* Danzig [now Gdańsk], bap. 28 Feb 1616; *d* Oliva [now Oliwa], nr Danzig, 2 Feb 1673). German composer and singer. He received his early instruction in music from his father (who was also called Kaspar and who was a bookseller in Danzig and Kapellmeister of the Marienkirche there from 1627 until his death in 1652). He then studied composition with Marco Scacchi, director of music at the Polish court in Warsaw, and from 1633 to 1636 in Rome with Carissimi. By 1637 he had returned to Danzig and was then employed as singer and choral conductor at the Polish court until 1652. The same year he was appointed Kapellmeister to King Frederik III of Denmark. In 1655 he returned to Danzig to fill his father's post at the Marienkirche, but stayed only two years before returning to Italy and Venice, where he served as an army captain in the fifth Turkish war. For this he was made a Knight of the Order of St Mark. In 1660 he revisited Rome, performing under Carissimi. He resumed his post in Copenhagen in 1661 and retired from it to Oliva in 1667.

Matheson provided an account of Förster's singing:

> In the year 1667 Kapellmeister Förster came to Hamburg and visited our [Christoph] Bernhard. They performed a Latin piece by Förster for ATB. He had brought the alto, a castrato, with him from Copenhagen. Bernhard sang tenor and Förster sang bass, playing continuo at the same time. His voice sounded like a soft and pleasing sub bass [an organ pedal stop] in the room, but outside the room like a trombone. He sang from the A above middle C down to the A three octaves below.

Many of Förster's surviving vocal compositions are indeed scored for three solo voices, with very low bass parts. All his surviving compositions are in the Düben collection (in *S-Uu*) with some concordances in German collections. The sources are secondary copies, and the date and place of composition are in most cases hard to establish. Förster's music shows strong Italian influences in its colourful, dissonant harmonic language and smoothly flowing melodies. His sacred concertos all have Latin texts and resemble contemporary Italian small-scale motets. They are scored for one to six solo voices and strings, with a typically italianate predominance of three voices and two violins.

Most of the concertos include extended solo sections in arioso style; some of them contain distinct recitatives and arias (e.g. *O plausus orantes*). The soprano duet *Dulcis amor Jesu* is typical of Förster's fine, emotive settings of mystical texts. The dramatic biblical dialogues are clearly modelled on Roman examples, especially those of Carissimi.

According to Mattheson, a sonata by Förster 'in *stylo phantastico*', for two violins and bass viol, was performed at the house of Christoph Bernhard in Hamburg in 1666. The seven sonatas by Förster that survive are in several distinct sections and include vigorous fugal writing, virtuoso solo passages and dance sections. Förster must be considered a major figure among his generation of north German musicians, particularly for his role in the transmission of the Italian style to the north (an influence that can be traced in the music of Buxtehude). In Bernhard's *Tractatus compositionis augmentatus* Förster is recommended as a good example of German music, together with Schütz and Kerll.

WORKS

in S-Uu unless otherwise stated

Catalogue in Przybyszewska-Jarmińska (1987)

DRAMATIC BIBLICAL DIALOGUES

Ah peccatores graves, SSATTB, 2 vn, 2 va, bc
Congregantes Philistei [Dialogi Davidis cum Philisteo], SATB, 2 vn, va, bc, *D-Bsb*, *S-Uu*; ed. B. Przybyszewska-Jarmińska (Warsaw, 1995)
Et cum Jesus ingressus, ATB, bc
Quid faciam misera, SSB, 2 vn, bc; ed. Noske (1992)

Vanitas vanitatum [Dialogo de Divite et paupere Lazaro], STB, 2 vn, 2 va, bc; ed. in ŹHMP, xxxiv (1994)
Viri israelite [Dialogus de Judith et Holoferne], SATB, 2 vn, 2 va, bc; ed. B. Przybyszewska-Jarmińska (Kraków, 1997)

OTHER SACRED VOCAL

Ad arma fideles, SSB, [5 va], bc, *D-Bsb*, *S-Uu*; Beatus vir, SAB, 2 vn, bc; Benedicam Dominum, SAB, 2 vn, bc; Celebramus te Jehova, SS, 2 vn, bc; Confitebor tibi Domine, d, SATB, 2 vn, bc; Confitebor tibi Domine, F, SATB, 2 vn, va, bc; Confitebor tibi Domine, C, SSATTB, 7 insts, bc; Credo quod redemptor, AT, 2 vn, bc
Domine Dominus noster, SSATB, 5 va, bc; Dulcis amor Jesu, SS, 2 vn, bc; Gentes redemptae, ATB, 2 vn, bc; Intenderunt arcum, SAB, bc; Inter bracchia Salvatoris mei, S, 4 va, bc; In tribulationibus, SATB, [2 vn, 2 va], bc; Jesu dulcis memoria, B, 2 vn, bc, *D-Bsb*, *Dl*, *S-Uu*, ed. F. Kessler, *Danziger Kirchen-Musik* (Neuhausen-Stuttgart, 1973)
Laetentur coeli, SSB, [2 vn], bc; Lauda Jerusalem Dominum, SSATB, 2 vn, 2 va, vle, bc; Laudate pueri Dominum, ATB, 2 vn, vle, bc; O bone Jesu, SAB, 2 vn, [va], bc, *D-Dl*, *S-Uu*; O dulcis Jesu, SS, bc; O plausus orantes, ATB, 2 vn, bc; O quam dulcis, SAT, 2 vn, vle, bc; O vos omnes, SAB, 2 vn, b viol, bc
Peccavi super numerum, SATB, 2 vn, bc, *D-Bsb*, *S-Uu*; Quanta fecisti Domine, SATB, 2 vn, b viol, bc; Quid faciam misera, SSB, 2 va, bc; Redemptor Deus, SS, 2 vn, bc; Repleta est malis, ATB, 2 vn, bc, ed. B. Przybyszewska-Jarmińska (Warsaw, 1995); Stillate rores, ATB, vn, bc; Vulnerasti cor meum, SSB, bc

SECULAR VOCAL

Cosi va chi serve donna, canzonetta, SSB, bc
Onda che presto, aria, SAB, bc
Silentio mortali, aria, SSB, bc
Sotto la luna, aria, ATB, 2 vn, bc
Der lobwürdige Cadmus (op, A.F. Werner), Copenhagen, 25 Sept 1663, lost

INSTRUMENTAL

6 sonatas a 3 (B♭, d, c, F, G, G), 2 vn, b viol/vle/bn, bc; 4 ed. in Berglund (1994), 1 ed. F. Kessler, *Danziger Instrumentalmusik des 17. und 18. Jahrhunderts* (Neuhausen-Stuttgart, 1979)
Sonata a 7, 2 cornettos, bn, 2 vn, va, vle, bc; ed. F. Kessler (Neuhausen-Stuttgart, 1979); ed. R.P. Block (London, 1979)
2 untexted 3-part canons in M. Scacchi, *Xenia apollinea* (1643), 213ff

KERALA J. SNYDER/LARS BERGLUND

Forster & Andrews. English firm of organ builders. The firm was founded in 1843 by James Alderson Forster (*b* Hull, *c*1818; *d* Upper Norwood, Surrey, 15 May 1886) and Joseph King Andrews (*b* London, *c*1820; *d* Hull, 5 Nov 1896), both of whom had been apprenticed to J.C. Bishop (*see* BISHOP). Working from premises in Charlotte Street, Hull, they built large numbers of organs for churches and chapels in the north of England, and further afield.

Their earlier instruments had classical specifications, low wind pressures and long compasses down to *G′*; *C*-compasses began to be used after 1850. Edmund Schulze influenced the firm's work; Forster and Andrews visited him often while he was erecting the Doncaster Parish Church organ, and he recommended them for work he had declined at the Kinnaird Hall, Dundee. It is said that they employed a German flue voicer, one Vogel; the German influence may be at least partly responsible for the vigour and brilliance of their best work compared to the typical mid-Victorian English organ. Typical large schemes of this period included All Souls, Halifax (1868), West Bromwich Town Hall (1878) and Holy Trinity, Southport (1880).

James Forster (1847–1925) took over management of the business on his father's death, by which time it had 120 employees. In 1897 he engaged Philip Selfe as manager. Selfe introduced pneumatic actions (little used until then) and modernised the firm's conservative tonal schemes. He became a partner and assumed direction when Forster retired in 1904. He was responsible for ambitious new instruments for the Queen's Hall (1907) and the City Hall, Hull (1911). The business was bought by John Christie in 1924 and finally absorbed by Hill, Norman & Beard in 1956.

Forsyth. English firm of publishers and music and instrument dealers. The brothers Henry Forsyth (*d* July 1885) and James Forsyth (*b* 1833; *d* Manchester, 2 Jan 1907) were the third generation of Forsyths to work for Broadwood; they started their own business in Manchester in 1857, selling, hiring, tuning and repairing pianos. They published music from 1858, but this activity became important only in 1873, when they produced the first numbers of Charles Hallé's *Practical Pianoforte School* and opened a London publishing house at Oxford Circus. Their list grew to include works by Stephen Heller (a friend of Hallé), Berlioz, Stanford and Delius. The firm also shared significantly in the management of leading concerts in Manchester, in particular the Hallé concerts. In 1901 the firm became a limited company; it now sells pianos, orchestral and school instruments, sheet music by all publishers and records. James's son Algernon Forsyth (*b* 28 Oct 1863; *d* Manchester, 31 October 1961) succeeded his father. The firm remains a family business, and concentrates on educational music: Hallé's tutor was followed by the Walter Carroll piano albums, the most famous of which, *Scenes at a Farm*, was unique in its day for the use of rhymes to stimulate the child's musical imagination.

The Forsyth Collection of antique instruments, keyboard, strings and woodwind, although it does not belong to the firm, is housed at its Manchester premises.

MARGARET CRANMER

Forsyth, Cecil (*b* Greenwich, 30 Nov 1870; *d* New York, 7 Dec 1941). English writer on music and composer. He studied at Edinburgh University and then at RCM with C.H.H. Parry and C.V. Stanford. After playing the viola in the Queen's Hall Orchestra for some years, he moved to New York in 1914, and worked for the music publishers H.W. Gray until his death. His compositions include two operas (*Westward Ho!* and *Cinderella*), two masses, a viola concerto, choral, orchestral and chamber works; he is chiefly remembered, however, for his writings, particularly his orchestration manual, in its time the most comprehensive treatment of the subject.

H.C. COLLES/R

Forsyth, Malcolm (Denis) (*b* Pietermaritzburg, 8 Dec 1936). Canadian composer and trombonist of South African origin. He earned undergraduate and postgraduate degrees from the University of Cape Town. After playing the trombone with the Cape Town SO (1961–7), he emigrated to Canada in 1968 where he joined the music faculty at the University of Alberta. He continued his orchestral playing with the Edmonton SO (1968–71, 1973–80). His first major composition, *Sketches from Natal* (1970), is strongly influenced by the African melodies and rhythms that surrounded him as a youth. Other works including the Symphony no.1 (1972), *Music for Mouths, Marimba, Mbira and Roto-Toms* (1973), *African Ode* (1981–7) and 'Chopi', the third movement of *Tre toccate* (1987), share similar characteristics. *Atayoskewin* (1984), however, evokes the atmosphere of his adopted homeland, the Canadian North. A prominent feature of his style is the intricate manipulation of intervallic cells, orchestral textures and rhythmic patterns derived from African and popular musics. Other important aspects of his work are an appreciation of wit and humour revealed in the forms of pastiche and parody and a desire to communicate with a wide audience. The recipient of numerous commissions, Forsyth was recognized as Canadian Composer of the Year in 1989, and has received three Juno awards, for *Atayoskewin* (1987), *Sketches from Natal* (1995), and *Elektra rising* (1998).

WESLEY BERG

Forsyth, W(esley) O(ctavius) (*b* Markham Township, ON, 26 Jan 1859; *d* Toronto, 7 May 1937). Canadian pianist. He began musical studies in Toronto with Edward Fisher and from 1886 to 1889 studied in Leipzig with Bruno Zwintscher, Richard Hoffman, Martin Krause and Salomon Jadassohn. He returned to Toronto and joined the piano faculty of the Toronto College of Music. In 1891 he went to the college of music at Hamilton, Ontario, but moved to the Toronto Conservatory in 1893. From 1895 to 1912 he was head of the new Metropolitan School of Music. He taught the piano for several other institutions in Toronto until in 1924 the amalgamation of some of these took him back into the Toronto Conservatory, where he remained until his death. He was a frequent lecturer and critic, and contributed regularly to publications in Canada and the USA. He composed many songs and piano pieces. His style was conservative but he had a fine sense of the piano and a gift for writing attractive melodies. Forsyth was an outstanding piano teacher with a national and even international reputation.

CARL MOREY

Forte (It.: 'loud', 'strong'). A performance instruction often abbreviated *For.* or *F* in the 18th century and customarily notated *f* in modern editions. Its superlative *fortissimo* ('very loud') was abbreviated *Fortiss.*, *ffmo* and *FF* in the 18th century. Brossard (1703), however, categorically stated that the correct abbreviation for *fortissimo* was *fff* and that *ff* stood for *più forte* ('louder'), and many 18th-century theorists agreed with him. The extremes of *ffff* and *fffff* are more or less confined to the last years of the 19th century.

The introduction of *forte* in Giovanni Gabrieli's *Sonata pian e forte* (1597) was the model for the manner of its

use over the next century: *piano* was primarily an echo effect, and *forte* in the great majority of its early uses was merely an instruction to return to the normal dynamic. As late as 1802 H.C. Koch could state that in the absence of any instruction a movement should be assumed to begin loudly and that the subject of a fugue should normally be played *forte*. In 1768 Rousseau had written that the French needed no superlative equivalent to the Italian *fortissimo* because they always sang as loudly as possible anyway. But Printz (1668) had represented a more flexible viewpoint: he asserted that the normal dynamic was *frequentato* but that this was used only after a *forte* section to denote a return to normal; his view is endorsed by J.F.B.C. Mayer's definition of *frequentato* (*Museum musicum*, Schwäbisch Hall, 1732) as 'nicht zu leise und nicht zu stark' and by Walther (also 1732), who gave it as 'mit rechtmässiger Stimme, wie man insgemein zu singen pflegt'. Leopold Mozart (*Violinschule*, 1756) wrote that 'whenever a *forte* is written the tone is to be used with moderation, without foolish scrapings, especially in the accompaniment of a solo part'. In the mid-20th century attempts at serial treatment of dynamics assumed a more precise absolute, and relative, level (implied by *f*, *p*, etc.) than was the case.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Forte, Allen (*b* Portland, OR, 23 Dec 1926). American music theorist. He was educated at Columbia University, where he received the BA in 1950 and the MA in 1952. From 1953 to 1959 he taught at Columbia University Teachers' College, and from 1957 to 1959 he was a member of the theory faculty at the Mannes College of Music. In 1959 he joined the music department of Yale University; he was appointed professor of music there in 1968. He was editor of the *Journal of Music Theory* between 1960 and 1967. From 1977 to 1982 he was president of the Society for Music Theory. He was named a fellow of the American Academy of Arts and Sciences in 1995.

Forte's theoretical writings range from *Tonal Harmony*, a textbook on the underlying principles of harmonic practice, to analyses of the music of Webern. Much of his work shows the influence of Schenkerian theory. More recently he has investigated the uses of set theory and computer technology in the analysis of atonal music. His interests also include the music of the 18th and 19th centuries, and American popular song.

The Atonal Music of Anton Webern (New Haven, CT, 1997)

PAULA MORGAN

Fortepiano (i). A term sometimes used today for the piano of the 18th and early 19th centuries in order to distinguish it from the 20th-century instrument. German writers sometimes use the terms 'Hammerklavier' and 'Hammerflügel' for the same purpose. *See* PIANOFORTE, §I, 1, 6–8.

EDWIN M. RIPIN

Fortepiano (ii). *See* MUSICAL BOX.

Fortepiano a tavola (It.). *See* SQUARE PIANOFORTE.

Fortep'yanov, Vasily. *See* BOTKIN, VASILY PETROVICH.

Forti, Anton (*b* Vienna, 8 June 1790; *d* Vienna, 16 June 1859). Austrian baritone. He began his career playing the viola in the orchestra of the Theater an der Wien. In 1808 he was engaged as a singer by Prince Esterházy for his theatre at Eisenstadt. During his three seasons there he sang Dandini in the German-language première of Isouard's *Cendrillon*. From 1813 to 1834 he appeared at the Kärntnertortheater in Vienna. A very stylish singer and actor, he excelled in Mozart roles, especially Don Giovanni, the Count in *Le nozze di Figaro* and Sarastro. In 1814 he sang Pizarro in the first performance of the final version of *Fidelio*, and in 1823 he created Lysiart in *Euryanthe*. He also sang a number of tenor roles, including Rossini's Othello, Mozart's Titus and Max (*Der Freischütz*). His wife Henriette (1796–1818) sang Cherubino, and Zerlina to her husband's Don Giovanni.

ELIZABETH FORBES

Fortia de Piles, Alphonse-Toussaint-Joseph-André-Marie-Marseille, Comte de (*b* Marseilles, 18 Aug 1758; *d* Sisteron, Basses Alpes, 18 Feb 1826). French writer and composer, of Catalan ancestry. His father was *gouverneur-viguier* of Marseilles, and Alphonse was himself a godson of the city, an honour which is reflected in the inclusion of 'Marseille' among his christian names. He was an officer in the army until the outbreak of the Revolution. According to Choron he studied with the Neapolitan Ligori, a pupil of Durante. From 1782 instrumental works by him appeared in Paris, and between 1784 and 1786 four comic operas were produced in Nancy. He left France in 1790, but returned in 1792 to make his living in Paris as a journalist. In 1801 he retired to Sisteron and became a successful writer on philosophical, political and satirical subjects. Two of his works, the pamphlet *Quelques réflexions d'un homme du monde sur*

les spectacles, la musique, le jeu et le duel (Paris, 1812) and its sequel *A bas les masques! ou Réplique amicale* (Paris, 1813), deal with music criticism and aesthetics, and show him to have been an adherent of Gluck and Méhul.

WORKS

all printed works published in Paris

OPERAS

La fée Urgèle (oc, 4, ?C.-S. Favart), Nancy, 1784; ov. and entre-act (n.d.); 9 airs pubd, lost

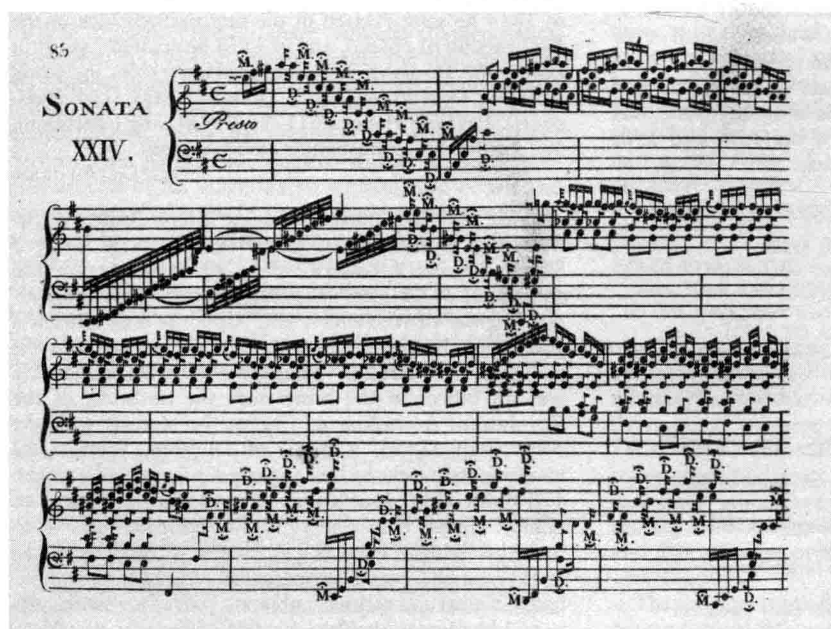
ROGER COTTE



Fortier, B. (*fl c*1736–40). French music engraver and printer, active in England. Though his musical activities in London were apparently short-lived (according to Hawkins he was also a watchmaker), he is renowned for the excellence of his engraving, particularly in his superb edition of Domenico Scarlatti's *Essercizi per gravicembalo* (1739), with notes and staves of a larger size than usual (see illustration). Other fine engravings by Fortier include Porpora's *Sinfonie da camera ... opra II* (1736), De Fesch's *XII sonate, VI per il violino e basso per l'organo ... e VI a duoi violoncelli ... opera ottava* (1736), a song by Farinelli, *Ossequioso ringraziamento* (*c*1737), Giuseppe Sammartini's *VI concerti grossi ... opra II* (1738) and Guerini's *Sonate a violino con viola da gamba ó cembalo* (*c*1740).

WILLIAM C. SMITH/PETER WARD JONES

Fortner, Wolfgang (*b* Leipzig, 12 Oct 1907; *d* Heidelberg, 5 Sept 1987). German composer and teacher. As a child he was taught the piano and the organ, and began to compose when he was only nine years old. After leaving school he studied in Leipzig: composition with Hermann Grabner, the organ with Karl Straube, musicology with Theodor Kroyer, German studies with Hermann August Korff and philosophy with Hans Driesch. In 1931, after taking the state examination for teaching the arts in higher schools, he was appointed lecturer in composition and music theory at the Heidelberg Institute of Church Music. Here, and at the Darmstadt summer courses started in 1946 by him and Wolfgang Steinecke, the North-West German Music Academy in Detmold (1954–7) and at the Musikhochschule in Freiburg (1957–73), Fortner established his reputation as one of the foremost composition teachers of his time. It is impossible to overestimate his influence on a whole generation of young composers from the 1950s to the 1970s. While effective in transmitting skills and techniques, he also took care to discover and encourage each student's individual talent, an ability borne out by the number of his former pupils who became successful composers, including, among others, Henze, Kelemen, Kelterborn, Paik and Zender. Over the same period Fortner was active in cultural-political bodies: he was a member of the Berlin Academy of Arts from 1955, the Bavarian Academy of Fine Arts from 1956, president of the German section of the ISCM (1957–71), president of the Dramatists' Union in 1975 and artistic director of Musica Viva in Munich (1964–78). His awards include the Berlin Schreker prize (1948), the Brunswick Spohr prize (1953), the North Rhine-Westphalia Grand Art Prize (1955), the Hamburg Bach prize (1960), the Freiburg

Opening of Sonata XXIV from Domenico Scarlatti's 'Essercizi per gravicembalo' (London, 1739), engraved by Fortier

Reinhold Schneider prize and the Gold Pin of the Dramatists' Union in 1977. On his 70th birthday he was awarded the Grosses Verdienstkreuz der Bundesrepublik Deutschland and honorary doctorates from the universities of Heidelberg and Freiburg.

While a student Fortner had two works performed in public: his massive choral work *Die vier marianischen Antiphonen* (later withdrawn) was given at the Lower Rhineland Festival in Düsseldorf in 1928, and his First String Quartet in Königsberg in 1930. These works testify to the composer's affinity to the Protestant church music tradition in Leipzig, which he encountered not only in his organ lessons with Straube (then Thomaskantor), but also in the Bach-Verein concerts Straube conducted, and in his composition lessons with Grabner, a former pupil of Reger. In later years Fortner emphasized J.S. Bach's considerable importance for his own work in the essay 'Bach in unsere Zeit' (1960); in Bach's fugues he admired 'the high science of the counterpoint' ('die hohe Lehre des Kontrapunkts') and 'the resurrection of the old motet principle of imitation out of a new structural thinking, rendered necessary and possible by major–minor tonality and self-sufficient instrumental music'. For Fortner, the linear counterpoint of 15th- and 16th- century *a cappella* music (which he found again in the works of Hindemith), Bach's fugal art and the serial structural thinking of Anton Webern all belonged in a single historical line of development. Fortner's compositions of the 1930s are mostly sacred and chamber works – polyphonic, with modal harmonies, Gregorian thematic material and also a more modern chromaticism, characteristics which increasingly reveal a freely tonal approach to gestural expression in sound, and a rhythmic cogency such as Fortner admired in Stravinsky. Reviews of the premières of the Violin Concerto, the *Shakespeare Songs*, the cantata *An die Nachgeborenen* on Brecht's poem and the Symphony, all works from the mid- to late-1940s, mention Fortner's innovative and individual style, and in particular the direct emotional appeal of the musical language, which was found to be disconcerting, captivating, aggressive, temperamentally expansive and exciting.

Fortner was intensely preoccupied with 12-note techniques in this period after 1945. He developed a specific principle related to the tradition of linear counterpoint, which he explained in his essay 'Zur Zwölftontechnik' (1952): 'I would identify as a principle used by myself the so-called "cutting" of a mode from the 12 notes, with non-serial relations within this mode. [I lay down] six notes, say (or maybe more, maybe fewer), as a harmonic field and use the remainder to form a mode, in which the melodic formation then proceeds freely but not serially'. An example of Fortner's contrapuntal procedure, using a mode of this kind, is found in the interlude of his cantata *Mitte des Lebens* (1951). In his serial works he sought equality among the 12 notes of the row, without restricting the usual contrapuntal and melodic-motivic working. He later extended this principle towards total serialism, predetermining rhythm above all, but also harmony.

Fortner's first works for the theatre consisted of incidental music for stagings by Karl Heinz Stroux of *Lysistrata* and *Ein Wintermärchen* (both 1946) and *Bluthochzeit* (1950). In his essay 'Zur Situation des musikalischen Theaters' (1950) he wrote, 'whether I shall ever write an opera is still very doubtful . . . I must confess that neither music drama nor the reversion to the old lyric opera represents the type of musical theatre that I could enjoy'. In the end he presented his idea of a music theatre appropriate to the age in works which elude categorization as operas. The lyric tragedy *Bluthochzeit* (after Lorca, 1956) is in actuality an expanded incidental music score, in which Andalusian folk idioms are combined with 12-note technique. In the three decades following its première in 1957, the work was given 22 other productions, which makes it one of the most successful operas composed since 1945. In Fortner's next work on a play by Lorca, *In seinem Garten liebt Don Perlimplín Belisa* (1961–3), he used 12-note elements in a leitmotivic way in the service of a subtle textual interpretation, without sacrificing the erotic sound-colour inspired by the original text. The orchestral improvisations prescribed for these passages are expanded in the full-length opera *Elisabeth Tudor* (libretto by Matthias Braun, 1968–71), as is the use of electronic means, which led to the use of live electronics in his last dramatic work, the one-act opera *That Time* (after Beckett, 1977).

Religious questions were a constant preoccupation, although as time went on Fortner composed increasingly less liturgical music. Rather his interest lay in sacred music outside the context of the church service. In the essay 'Geistliche Musik heute' (1956) he explained his view that there is 'no difference between spiritual and secular music'; any difference is confined 'to the subject matter of the work of art. In other words, if a present-day composer employs, say, 12-note melodic and harmonic techniques and . . . a predetermined serial rhythmic structure' – as Fortner himself did in his *Creation* (1954) – 'because these are the grammatical elements of his language, a language capable of expressing the eternal contents and subjects of art in a new way for present-day listeners, the spiritual subject can . . . be given musical form only in this language'.

This provides an explanation for the logical, consistent way in which Fortner developed as a composer. He found his own language through a detailed knowledge of tradition. Melodic expressivity, eruptive rhythm and rich sound colouring, obligation not to any school but solely to his own development: these are the distinguishing marks of his powerful compositions.

WORKS

STAGE

Cress ertrinkt (school play, 3, A. Zeitler), 1930; Lysistrata (incid music, Aristophanes), 1945; Die weisse Rose (ballet, 2 pts, after O. Wilde: *The Birthday of the Infanta*), 1950; Die Witwe von Ephesus (pantomime, G. Weill, after Petronius), 1953; Bluthochzeit (op, 2, after F. García Lorca), 1956; Corinna (op buffa, 1, after G. de Nerval), 1958; In seinem Garten liebt Don Perlimplín Belisa (chbr op, 4 scenes, after García Lorca), 1962; Carmen (ballet, choreog. J. Cranko), 1971; Elisabeth Tudor (op, 3 and epilogue, M. Braun), 1972; That Time (op, 1, after S. Beckett), Mez, Bar, actor, spkr, gui, hpd, pf, live elecs ad lib, 1977

BRIGITTA WEBER

Förtsch, Johann Philipp (*b* Wertheim am Main, bap. 14 May 1652; *d* Eutin, nr Lübeck, 14 Dec 1732). German composer. At the age of seven he entered the Frankfurt am Main Gymnasium, where he received his early training in music, possibly including lessons with Johann Andreas Herbst. In 1671 he matriculated at the University of Jena, studying philosophy and medicine for three terms. He continued his education the following year at Erfurt, where he studied law. He left Erfurt in 1674, and for four years his whereabouts are difficult to trace. It is known that he travelled extensively, spending time in Hamburg and Helmstedt as well as in many other areas of Germany and in France. It was at this period that he must have continued his musical training, perhaps, as J.G. Walther reported (*Musicalisches Lexicon*, 1732), working with Johann Philipp Krieger.

In 1678 Förtsch moved to Hamburg, and his career during the next 12 years assured his place in music history. At first he sang with the Ratschor, but soon he joined the opera as a singer. In 1680 he succeeded Theile as director of the Hofkapelle at Schloss Gottorf, Schleswig, the residence of Christian Albrecht of Schleswig-Holstein. In 1681 he temporarily returned to his university education and completed a doctorate in medicine at the University of Kiel. He returned from Gottorf to Hamburg more than once during the next several years because of a war between Schleswig-Holstein and Denmark. Between 1684 and 1690 he became the foremost composer of the Hamburg opera, writing at least 12 operas. He then ended his official connection with music in order to pursue a lengthy and remarkable career, first in 1690 as court physician at Schleswig and then in 1692 as physician to the Bishop of Lübeck at his residence in Eutin. Förtsch lived for the rest of his life in Eutin, where he carried out numerous political and diplomatic assignments, including the role of privy councillor to the bishop; and for a period after the death of the bishop in 1705, he actually administered the bishopric (Weidemann gives a complete account of his colourful career at Eutin).

Förtsch began his brief period with the Hamburg opera just six years after the opening of the theatre, and his operas were almost the only ones heard there during this period. Unfortunately all of them seem to be lost; so also are two manuscript collections containing 20 arias from seven of them, though excerpts were published by Wolff. From these excerpts one can perceive a strongly personal style, characteristically German in its use of strophic, songlike arias and strong bass lines and in its affective rhythmic and harmonic treatment of the words. Förtsch was also a prolific composer of church cantatas, which he probably composed at Gottorf between 1686 and 1688.

WORKS

OPERAS

all music lost

Croesus (L. von Bostel, after Minato), Hamburg, 1684
Das unmöglichste Ding (von Bostel, after F. Lope de Vega: *El mayor impossible*), Hamburg, 1684
Alexander in Sidon (Förtsch, after op by M.A. Ziani), Hamburg, 1688

GEORGE J. BUELOW

Fortspinnung (Ger.: 'spinning out'). A term devised by Wilhelm Fischer (1915) to stand for the process of continuation or development of musical material, usually with reference to its melodic line, by which a short idea or motif is 'spun out' into an entire phrase or period by such techniques as sequential treatment, intervallic transformation and even mere repetition. In ex.1 a four-note motif is spun out over a 12-bar period by threefold repetition within each bar and intervallic transformation from one bar to the next; as in many examples of the process, the harmony moves through a descending circle of 5ths. *Fortspinnung* has been contrasted with the building of periods and period-like structures by symmetrical or complementary phrases (*see* ANTECEDENT AND CONSEQUENT). However, the two techniques should be viewed not so much as distinct types of construction but rather as organizing principles – typifying respectively the Baroque and the Classical – whose interaction and coordination is of fundamental importance.

WILLIAM DRABKIN

Fortunati, Gian Francesco (*b* Parma, 27 Feb 1746; *d* Parma, 20 Dec 1821). Italian composer and conductor. After moving with his father to Piacenza, he began his musical studies under Omobono Nicolini. With financial assistance from the ducal court he was able to travel to Bologna where from 1767 to 1769 he completed his studies under Padre Martini. On his return to Parma in 1769 his first opera, *I cacciatori e la vendilatte*, was staged and well received. Subsequently he succeeded Traetta as *maestro di cappella* there and, in 1774, was entrusted with the direction of the singing school, succeeding Francesco Poncini. In 1780 he became conductor of the orchestra at the ducal theatre, a position which he held until 1796. In 1787 he was appointed music instructor to the duke's daughters. He made several journeys to Germany, on the recommendation of Maria Amalia, Duchess of Parma, to superintend performances of his operas; some of his vocal and instrumental music was thus written in Dresden and Berlin for Friedrich Wilhelm II. He retained his musical posts in Parma until the death of Duke Ferdinand II in 1802. In 1810 he became one of the eight members of the music section of the Institute of Sciences and Letters founded in Parma under the auspices of the French government.

Fortunati's music is of no extraordinary interest; it soon waned in popularity and was dropped from opera repertories. His importance as a teacher was more lasting; among his pupils was Paer. His son Ferdinando (*b* Parma, 1772; *d* ?after 1812), an oboist and horn player, served in the Berlin court orchestra from 1797 to 1801, and was shortly thereafter entrusted by Dessalines with the military music of the island republic of San Domingo.

GIAN PAOLO MINARDI

Fortunatus, Venantius (*b* nr Treviso, 530–40; *d* Poitiers, *c*600). Poet and churchman. He was educated at Ravenna, at that time under the rule of Byzantium. In 565 he went to Gaul, a journey that he later described as a pilgrimage to the shrine of St Martin at Tours. The immediate reason for the visit was more likely the wedding at Metz in 566

of King Sigebert to the Visigothic princess Brunhild, after which he spent a year at Sigebert's court and a winter at the court of Sigebert's brother Charibert in Paris. After a pilgrimage to Tours, he settled at Poitiers, where he became a close friend of Radegund, the widow of Clotaire, king of the Franks, and Agnes, abbess of the convent that Radegund had founded before the death of her husband. Fortunatus became Bishop of Poitiers not long before his death and was venerated as a saint during the Middle Ages (but was never canonized).

Fortunatus's works include a verse life of St Martin, a biography of Radegund, and many occasional works addressed to notable personages. Three of his religious poems were adopted in the liturgy of Holy Week and Easter: *Vexilla regis*, as a hymn for Vespers in Passiontide; *Pange lingua ... proelium*, to accompany the ceremony of the Veneration of the Cross on Good Friday; and *Salve festa dies*, for the procession of the newly baptized at Easter. The latter work is an excerpt from *Tempora florigero*, a poem in elegiac couplets on the subject of Easter, addressed to Bishop Felix of Nantes. These poems were very popular: a number of imitations of *Pange lingua* and adaptations of *Salve festa dies* were composed, for use on various feasts.

Most of Fortunatus's works were originally composed to honour specific events. *Vexilla regis* and *Pange lingua* commemorate the installation in 569 of a fragment of the True Cross in Radegund's convent in Poitiers. Although *Vexilla regis* is in the distinctively Christian form of iambic dimeter and Ambrosian stanzas, it evokes the pagan rhetorical form of the *basilikos logos*, used in late antiquity for the panegyric to a ruler delivered during the imperial *adventus* ceremonies, and adapted by Christians to welcome a bishop or celebrate the entry of relics. *Pange lingua* is in trochaic tetrameter catalectic (the metre of the marching chants of the Roman armies) and its phraseology shows the influence of works by Prudentius.

In his use of classical metres and style, Fortunatus was one of the most important late Latin poets, and his works illuminate many aspects of Merovingian culture and society. His influence on the Middle Ages was very significant; his idealized descriptions of Radegund seem to foreshadow the poetry of courtly love; and his poems on the Cross are among the first, and the finest, in a long tradition.

RUTH STEINER/SUSAN BOYNTON

Fortune, Nigel (Cameron) (*b* Birmingham, 5 Dec 1924). English musicologist. He read music and Italian at Birmingham University (1947–50; BA 1950), and his research into the development of Italian monody at Cambridge (1950–54) was supervised by Thurston Dart (PhD 1954). From 1956 to 1959 he was music librarian of London University; in 1959 he was appointed lecturer in music at Birmingham University and in 1969 became reader in music; he retired in 1985. From 1957 to 1971 he was secretary of the Royal Musical Association, and he edited the fourth and fifth volumes of its *Research Chronicle*; in 1971 he was elected a vice-president. He was a member of the Purcell Society committee (1963–94), serving as honorary secretary, 1976–83. He sat on the editorial committee of Musica Britannica 1975–7. He was a senior member of the editorial comittee of the *New Grove Dictionary* (1980) and played a part in the editorial work on the *New Oxford History of Music*. In 1981 he became co-editor of *Music and Letters*. His own research, notable for its care and precision, has dealt with Italian and English vocal music of the 17th century; his wide range of sympathies is reflected in his editorial work and in his teaching.

DAVID SCOTT/R

Forzando [forzato]. *See* SFORZANDO.

Forzano, Giovacchino (*b* Borgo San Lorenzo, Florence, 19 Nov 1884; *d* Rome, 18 Oct 1970). Italian playwright, librettist and director. After studying medicine he began

his career as a baritone, and then turned to the study of law. Having graduated, he became active as a journalist, contributing regularly to several of Italy's leading newspapers. In 1914 he made the acquaintance of Puccini, with whom he collaborated on *Suor Angelica* and *Gianni Schicchi* (both 1918), the last two panels of *Il trittico*, having declined *Il tabarro* on the grounds that he preferred to devise his own plots. Other composers to profit from Forzano's resourcefulness and adaptability as a librettist included Franchetti (*Notte di leggenda*, 1915; *Glauco*, 1922), Leoncavallo (*Edipo re*, 1920), Wolf-Ferrari (*Gli amanti sposi*, 1925; *Sly*, 1927) and Giordano (*Il re*, 1929); the temporary triumph of Mascagni's *Il piccolo Marat* (1921) was partly due to the powerful, almost cinematic vividness of Forzano's scenario. He was a stage director at La Scala (1920–30), and later directed propaganda films for the Fascist regime. His volume of reminiscences, *Come li ho conosciuti* (Turin, 1957), offers revealing sidelights on the composers with whom he worked.

JULIAN BUDDEN

Foscarini, Giovanni Paolo (*fl* 1629–47). Italian composer, guitarist, lutenist and theorist. He was one of the most important 17th-century guitar composers and served as a professional guitarist and lutenist in Brussels, Rome, Paris and Venice. A member of the Accademia dei Caliginosi at Ancona, he used the society's name together with his own academic name, 'Il furioso', as a pseudonym in his earliest publications. His first book for guitar is no longer extant but its contents, and those of the second book, were reprinted in part in his later collections. *Il primo, secondo e terzo libro* was the earliest engraved Italian guitar tablature; it contains selections from Foscarini's first two books in the *battute* style, and an additional third book, which introduces the pizzicato technique. Foscarini's fourth and fifth books were published together with the earlier material, using the original plates but with some changes to the dedications. *Il primo, secondo e terzo libro* and *Li cinque libri* include an elegant portrait of Foscarini (reproduced in Kirkendale, p.xii). He also published a philosophical discourse, *Dell'armonia del mondo, lettione due*, in 1647.

In the preface to *Il primo, secondo e terzo libro*, Foscarini indicated three distinct guitar styles: the older *battute* style; the strict pizzicato style, which he claimed is more appropriate to the lute than the guitar; and a style combining the two, which he particularly emphasized and which may have been his own innovation. This last style was favoured by later guitarists such as Corbetta, Bartolotti and Granata. Although his notation is sometimes inconsistent and incomplete, Foscarini's works cover the entire spectrum of Italian guitar music up to 1640 and they were highly regarded and copied in his own time and later.

WORKS

Libro primo (n.p., n.d.) [contents reprinted in Il primo, secondo e terzo libro della chitarra spagnola]
Intavolatura di chitarra spagnola, libro secondo (Macerata, 1629); 4 ed. in Hudson (1982)
Il primo, secondo e terzo libro della chitarra spagnola (n.p., n.d.) [incl. contents of 1629 book]
I 4 libri della chitarra spagnola (n.p., n.d.) [incl. contents of Il primo, secondo e terzo libro]; 14 ed. in Hudson (1982)
Li 5 libri della chitarra alla spagnola (Rome, 1640) [incl. contents of Il primo, secondo e terzo libro and I 4 libri]
Inventione di toccate sopra la chitarra spagnuola (Rome, 1640) [contents as Li 5 libri]

Dell'armonia del mondo, lettione due (Paris, 1647)

GARY R. BOYE

Foss, Hubert J(ames) (*b* Croydon, 2 May 1899; *d* London, 27 May 1953). English publisher and writer on music. He joined the Oxford University Press in 1921 and, after brief periods in the army and as assistant editor of *Land and Water*, in 1925 founded its London publishing department. A man of great energy and a musician of varied accomplishments as composer, pianist and concert promoter, he was able in the course of 20 years to initiate series of publications of church music, of English songs, and of commentaries (the Musical Pilgrim booklets), and to act as sole publisher for Vaughan Williams, Walton and Rawsthorne. He was also a friend and champion of Warlock, Moeran and Van Dieren. He edited three volumes of critical biographies of major composers, *The Heritage of Music*, and was himself the author of the first full-length study of Vaughan Williams; he also made substantial revisions to the second edition of Warlock's study of Delius and translated Leon Vallas's *La véritable histoire de César Franck* (Paris, 1950; Eng. trans., 1951/*R*). He prepared new editions of Tovey's *Essays on Musical Analysis: Chamber Music* (London, 1944/*R*), *Beethoven* (London, 1945/*R*), and *Essays and Lectures on Music* (London, 1949). Foss wrote a number of songs, notably seven settings of Hardy, and provided piano accompaniments with Vaughan Williams and Clive Carey for Maud Karpeles's *Folk Songs from Newfoundland* (London, 1934). In 1926 he founded the Bach Cantata Club for the systematic presentation of Bach's cantatas and occasionally conducted its concerts. He was interested in fine printing and founded the Double Crown Club; he was consequently able to assist in the production of the Oxford Lectern Bible. He resigned from the OUP in 1941 and devoted the last ten years of his life to freelance journalism, including the writing of programme notes, adjudicating and broadcasting. He was married to the singer Dora Stevens, and sometimes accompanied her in recitals.

H.C. COLLES/FRANK HOWES

Foss [Fuchs], **Lukas** (*b* Berlin, 15 Aug 1922). American composer, conductor and pianist. He began studies in the piano and theory in Berlin with Julius Goldstein. From 1933 to 1937 he was in Paris, where he studied the piano with Lazare Lévy, composition with Noël Gallon, orchestration with Felix Wolfes and the flute with Louis Moyse. Having moved to the USA with his family in 1937, he continued his studies at the Curtis Institute, where his teachers included Isabelle Vengerova (piano), Rosario Scalero and Thompson (composition) and Fritz Reiner (conducting). He also studied conducting with Koussevitzky during summers at the Berkshire Music Center (1939–43) and composition with Hindemith as a special student at Yale University (1939–40).

Precociously gifted, Foss began to compose at the age of seven, and at 22 he won wide acclaim for the cantata *The Prairie* on Carl Sandburg's poem. After its first performance by the Collegiate Chorale under the direction of Robert Shaw in 1944 this work received the New York Music Critics' Circle Award. From 1944 to 1950 Foss was pianist in the Boston SO and in 1945 he became the youngest composer ever to receive a Guggenheim Fellowship. In 1950–51 he was a Fellow of the American Academy in Rome and in 1950–52 the recipient of a Fulbright grant. His international reputation was enhanced with the première of his Piano Concerto no.2 in Venice (7 October 1951); he was the soloist.

In February 1953 Foss was appointed professor of music (composition and conducting) at UCLA, where in 1957 he founded the Improvisation Chamber Ensemble (clarinet, piano, cello and percussion). While living in California, he was music director of the Ojai Festival and directed 12 'marathon' concerts, each devoted to the music of one composer, or music from one region, at the Hollywood Bowl with the Los Angeles PO. He was elected to the National Institute of Arts and Letters in 1962. From 1963 to 1970 he was music director and conductor of the Buffalo PO. In 1963 at SUNY, Buffalo, he founded the Center for Creative and Performing Arts and presented concerts of new music. In 1971 he was appointed conductor of the Brooklyn Philharmonia (which changed its name in 1982 to the Brooklyn PO) and from 1972 to 1976 served as conductor of the Kol Israel Orchestra of Jerusalem. In Brooklyn, Foss gave more 'marathon' concerts, and in 1973 he began Meet the Moderns, a series of new music concerts and discussions with composers. In 1981, while continuing to hold his Brooklyn post and live in New York, Foss became music director of the Milwaukee SO, a position he retained until 1986. He has appeared as guest conductor with many orchestras in the USA and Europe, and has lectured widely at colleges and universities in North America.

Foss's development as a composer may be divided into three main periods, with a transitional phase of 'controlled improvisation' (1956–61). The first period (1944–60) was predominantly neo-classical and eclectic, represented by such works as the Symphony in G, the early concertos, various choral works, and the orchestral *Symphony of Chorales* based on chorales by Bach. Also present is an element of American populism, as in the setting of Sandburg's *The Prairie* and the comic opera *The Jumping Frog of Calaveras County* on the story by Mark Twain.

The transitional phase began in 1956 when Foss decided to experiment with ensemble improvisation, primarily for the benefit of his students at UCLA. A year later he founded the Improvisation Chamber Ensemble and formulated what he called 'system and chance music', a kind of controlled improvisation. This experience led to a profound change in Foss's compositional techniques: he abandoned tonality and fixed forms and opted for serialism, indeterminacy and graphic notation. A transitional work, *Time Cycle* for soprano and orchestra (1959–60), sets texts by W.H. Auden, A.E. Housman, Franz Kafka and Friedrich Nietzsche that probe the nature of time; originally performed with improvised interludes by Foss's group, *Time Cycle* won the New York Music Critics' Circle Award of 1961 and has remained Foss's most performed and recorded work. *Echoi* for four soloists (the players of Foss's ensemble) marks the definitive beginning of the experimental phase. Its point of departure is serialism, but used 'in a free, willful manner', with the performers invited to skip back and forth between different pages of the score.

Three works of this period – *Elytres*, *Fragments of Archilochos*, *For 24 Winds* – 'are based on the idea of a score containing on every page a sum total from which a different selection is extracted for each performance'. *Baroque Variations* (on themes by Handel, Scarlatti and Bach) includes a surrealist element in that the variations are 'dreams' in which the original music is fragmented and distorted. This surrealism pervades Variation III (*Phorion*), on Bach's Partita in E for solo violin; he described its desired effect as 'torrents of baroque semiquavers ... submerging into and emerging out of inaudibility'. There are little jokes too, such as the xylophone's spelling out of 'Johann Sebastian Bach' in morse code. The autobiographical suggestions in *Phorion* become explicit in *Curriculum Vitae with Time Bomb*: while an accordion plays themes remembered from Foss's own childhood (a Hungarian Dance by Brahms, Mozart's Turkish March, the Nazi anthem, etc.), percussion ominously ticks off a countdown; the final explosion, however, turns out to be a gentle pop from a child's cap pistol.

Foss has used the revelations of electronic techniques to refresh live performance. In *Ni bruit, ni vitesse* he explores the ability of two pianos to produce 'electronic' sounds, while in *MAP, a Musical Game* the players make tapes of themselves and then compete against the tapes and each other. Similarly, his String Quartet no.3 and *Solo* for piano both use hypnotic repetition in the minimalist style, but even here Foss cannot resist subtly altering the patterns. With the more conservative musical taste of the 1980s and 90s, Foss revisited the neo-classicism and Americana of his first period, composing again in traditional instrumental and choral genres, but not forgetting the experimental techniques of his second period. In his *American Cantata* (1976) he strove 'to be as crazy as I was in my avant-garde music and yet tonal'. His guitar concerto, *American Landscapes*, combines folk guitar styles and tunes with novel plucking and percussion techniques in the solo part. Similarly, in the wistful and antiquarian *Renaissance Concerto*, the solo flute's key clicks add percussive effect. These later works present music that is frank in sentiment, imaginative in an almost pictorial way, yet refined and witty in execution.

For all their diverse styles, Foss's works spring from a distinct personality: enthusiastic, curious and receptive to every kind of musical idea. Not coincidentally, these are the same attitudes he has instilled in audiences with his performances of the classical repertory and new music. In short, he has been one of his era's most communicative and representative composer-performers.

WORKS

DRAMATIC

The Tempest (incid music, W. Shakespeare), 1940; The Heart Remembers (ballet), pf, 1944; Within these Walls (ballet), pf, 1944; Gift of the Magi (ballet), orch, 1945; The Jumping Frog of Calaveras County (op, 2, J. Karsavina, after M. Twain), 1949, Bloomington, IN, 18 May 1950; Griffelkin (op, A. Reed, after H. Foss), 1955, broadcast, NBC TV, 6 Nov 1956, staged, New York, 7 Oct 1993; Introductions and Goodbyes (op, 1, G.C. Menotti), B, chorus, 1959, New York, 5 May 1960; Search into Darkness (film score), 1962

GILBERT CHASE/DAVID WRIGHT

Fossa, Johannes de (*b* c1540; *d* Munich, 1603). Flemish composer, active in Germany. The name suggests that he was a native of Fosses (in the province of Namur), a small town dependent on the principality of Liège. When he copied Guyot's *Te Deum* he stated explicitly that he had been his pupil; he may well have studied under him at Liège for Guyot was choirmaster of St Paul there from 1546 to 1554 and of the cathedral from 1558 to 1563. Several musicians with the name 'de Fossa' figure in the archives at Liège; none, however, is called Johannes. A Johannes de Fossa is nevertheless mentioned in a letter from Duke Philibert of Savoy dated 12 January 1557. The first precise information known about Fossa is that in 1569 he was appointed second Kapellmeister at the Munich court. In 1571 he became master of the choristers and continued in the service of the Dukes of Bavaria until his death. After the death of Lassus in 1594 Fossa took responsibility for the chapel music and in 1597 he was given the official title of first Kapellmeister. On his retirement in 1602 he was succeeded by Ferdinand de Lassus, eldest son of Orlande.

Proske noted that in his compositions Fossa was influenced by Lassus, as one might expect, though not lacking a style and charm of his own.

JOSÉ QUITIN/HENRI VANHULST

Fossato, Giovanni Battista (*b* Genoa; *fl* 1628). Italian composer. He is known only by his *Arie ad una et a più voci* with continuo (Naples, 1628). In a verbose dedication and preface he said that he was still a young man and that he and his family had enjoyed the favour of the father of the dedicatee, G.B. Serra, Prince of Carovigno (which is near Brindisi). The book contains 25 pieces (which he said had been circulating for some time and been performed to great applause), including 15 trios, *partite* for two voices over the Ruggiero and romanesca, and an 'aria variata' for solo voice.

COLIN TIMMS

Fosse, Bob [Robert] **(Louis)** (*b* Chicago, 23 June 1927; *d* Washington DC, 23 Sept 1987). American choreographer, director and dancer. He made his professional début at 13, tap-dancing in vaudeville and burlesque houses; at 15 he choreographed fan dancers in a night club act. These experiences influenced his later work far more than the conventional dance training he had received as a child. After dancing in the Broadway revue *Dance me a Song* (1950), Fosse made several appearances in Hollywood musicals, most notably in *Kiss Me, Kate* (1953), before being invited by George Abbott to choreograph *The Pajama Game* (1954), which established Fosse as Broadway's most sought-after stager. In the hit number 'Steam Heat' he deployed many of the features that would become his trademark: a small group of dancers in abstract costumes, frequently using hats, and performing tight, angular steps in a vigorous, acrobatic combination. Furthermore, he abandoned the fluid lines of the ballet-influenced tradition of Broadway dancing for a jerky style which flaunted itself with pelvic movements and an overt sexuality. The hit shows *Damn Yankees* (1955), *Bells Are Ringing* (1956) and *New Girl in Town* (1957) consolidated his reputation, and in 1959 he directed the musical *Redhead*, after which he rarely choreographed without the overall control which directing gave him.

Fosse's greatest success came with *Sweet Charity* in 1966, conceived as a vehicle for Gwen Verdon, then his wife. More than in any other dance musical a character was explored through choreography. His subsequent successes, *Pippin* (1972) and *Chicago* (1975), were triumphs of his ingenuity over mediocre material. Although his cinematic version of *Sweet Charity* (1968) was a disappointment, his devotion to the sleazier side of show business made him the ideal interpreter of Kander and Ebb's *Cabaret* (1972), for which he won an Academy Award. His only other musical film, *All That Jazz* (1979), was a bizarrely accurate prediction of the circumstances surrounding his own death. Fosse's last success in the theatre, *Dancin'* (1978), was essentially a dance revue with no book or new score, and demonstrated his growing inability, or unwillingness, to collaborate.

ROBERT HOWIE

Fossis, Petrus de (*d* Venice, before 23 July 1526). French singer. He appears on the first extant list of singers at S Marco, Venice, which dates from April 1486. On 31 August 1491 he was named *maestro di cappella* of the basilica, with responsibility for teaching the choirboys, a position he held until his death, although ill-health forced him to relinquish his duties to Pietro Lupato in October 1525. He was admired as a singer by Pietro Contarini of Venice, who called him a Frenchman (*Argo vulgare*, 1541). In 1502 the Venetian humanist Angelo Gabrieli, noting his fame not just in the art of music, praised his singing of a composition (or poem) written by Giovanni Armonio on the occasion of Anne of Foix-Candale's visit to Venice on her way to become Queen of Hungary. If Fossis was a composer, no works exist to prove it. He left his books to the monastery of S Salvatore, Venice; two of them, collections of music treatises, are now in *I-PAVu* 361 and 450.

BONNIE J. BLACKBURN

Foster, Arnold (Wilfred Allen) (*b* Sheffield, 6 Dec 1896; *d* London, 30 Sept 1963). English conductor, composer and educationist. At the RCM he was a pupil of Vaughan Williams, from whom he derived his interest in folk music. He became a music master at Westminster School (1926) and subsequently director (1939–61). He also taught at Morley College, where he succeeded Holst as director of music from 1928 to 1940, and at the Institute of Education at London University from 1945.

His music is mostly based on folksong. Probably best known are his felicitous arrangements of Manx folksongs; he also arranged English folkdance tunes for small orchestra, primarily for the use of the English Folk Dance and Song Society. Larger works were the Piano Concerto on Country Dance Tunes (1930) and the ballad opera *Lord Bateman* (1948–56) to a libretto by Joan Sharp, based on the ballad. He also wrote a ballet, *Midsummer Eve*, for the Silver Jubilee of the English Folk Dance

Society in 1925, an *Autumn Idyll* (1926, rev. 1930) and a suite for voice and strings, *The Fairy Isle* (1947), based on Manx folk tunes. He founded two choirs, the English Madrigal Choir (1928–40) and one bearing his own name (in 1946, until his death after one of its concerts) which performed madrigals, works by Purcell and modern works.

FRANK HOWES

Fóster, Gerónimo Baqueiro. *See* BAQUEIRO FÓSTER, GERÓNIMO.

Foster, John (i) (*b* c1620; *d* Durham, 20 April 1677). English cathedral musician. He was a chorister of Durham Cathedral in the 1630s, and from Christmas 1660 until his death he served as organist and Master of the Choristers. Three services and eleven anthems by him survive in whole or part (*GB-DRc*) but do not appear to have circulated outside Durham. His First Service was composed in 1638 when he was still a chorister. His transcripts of the organ parts of anthems and services by Mundy (possibly William Mundy) constitute important sources for those works (*DRc* A3). Details of the Dallam organ erected in 1661–2 are in his hand (*DRc* A5).

BRIAN CROSBY

Foster, John (ii) (*b* Bentley, nr Doncaster, 1752; *d* High Green, nr Sheffield, 4 Oct 1822). English psalmodist. An amateur musician, he was by profession a coroner. He lived in High Green and (according to A. Gatty: *A Life at One Living*, 1884) was responsible for the suppression of dog- and cock-fighting. In the preface to his first book, *Sacred Music, Consisting of Anthems, Psalms & Hymns* (Sheffield, c1820), he described how he 'devoted a few leisure hours to Musical Composition' in order to encourage local choirs, and how in west Yorkshire, and the borders of adjacent counties, nearly every village had a choir, accompanied by instruments, some of which, in size and skill, approached 'the dignity of an Oratorio'. A second book was also published (c1820). Foster's music needs competent performers; it is well written in a Classical style, and unusual in that it is fully scored with elaborate symphonies. His most ambitious setting, of Psalm xlvii (Old Version), requires an orchestra of strings, flute, oboes, bassoon, horns, trumpet and drums, and survives in mutated versions as part of the Sheffield pub-carolling tradition, where it is known as 'Old Foster' and sung to *While shepherds watched their flocks by night*.

SALLY DRAGE

Foster, Lawrence (Thomas) (*b* Los Angeles, 23 Oct 1941). American conductor. He studied in Los Angeles, principally with Fritz Zweig, and also received important advice from Karl Böhm and Bruno Walter. His first engagement was in 1959 with the Young Musicians Foundation Debut Orchestra in Los Angeles, and he was its music director for four years. He attended the Bayreuth Festival masterclasses, 1961–3 and the Berkshire Music Center in 1966 and 1967, winning the Koussevitzky Conducting Prize in his first year there. From 1961 to 1964 he was associate conductor of the San Francisco Ballet, and from 1965 to 1968 assistant conductor of the Los Angeles PO. He made his London début conducting the English Chamber Orchestra in 1967. He first conducted the RPO in December 1968, and was its chief guest conductor from 1969 to 1974. In 1969 he shared the North American tour with Kempe; after his successful concert in Houston he was offered a series of guest engagements with the Houston SO and became its principal conductor in 1971 and music director in 1972. He conducted opera briefly at Stuttgart in 1964, and began an association with Scottish Opera in 1974. He made his Covent Garden début in 1976, conducting the revised version of Walton's *Troilus and Cressida*. After resigning his Houston post in 1978, Foster concentrated his activities in Europe; he conducted the Orchestre National (now Philharmonique) de Monte Carlo from 1979 to 1990 and from 1981 to 1988 was Generalmusikdirektor in Duisburg. He was music director of the Lausanne Chamber Orchestra from 1985 to 1990, and of the Aspen Music Festival from 1990 to 1996. From 1988 to 1992 he was music director of the Jerusalem SO and in 1996 he became music director of the Barcelona SO.

Foster deals with difficult contemporary music with uncommon sympathy and skill. Among the premières he has given are Harrison Birtwistle's *Tragoedia* (1965) and *The Triumph of Time* (1972), Alexander Goehr's Piano Concerto (with Barenboim, 1972), and Gordon Crosse's Symphony no.2 (1975). He is quiet and direct on the podium and inclined to understatement in his interpretations. The care with which he prepares himself is exemplary, and his performances of music in all styles are marked by both rhythmic vitality and great structural intelligence.

MICHAEL STEINBERG/R

Foster, Myles Birket (*b* London, 29 Nov 1851; *d* London, 18 Dec 1922). English organist, composer and writer on music. The eldest son of the painter of the same name, he rejected a career in stockbroking and studied privately in London from 1871 to 1873 with James Hamilton Clarke, then at the RAM where Arthur Sullivan, Frederick Westlake and Ebenezer Prout were among his teachers. Foster was organist successively at St James's, Marylebone (1873–4), where H.R. Haweis was rector, St George's, Kensington (1875–9), and at the Foundling Hospital (1880–92). During this latter period he was also choirmaster at St Alban's, Holborn, and organist at His Majesty's Theatre. In 1875 he became a fellow of the RCO, in 1889 he founded the RAM Club; he became a fellow of the RAM in 1895. He was an examiner for Trinity College of Music from 1888 until a few years before his death, and as a consequence travelled in Australia, New Zealand and South Africa.

Foster composed a Symphony in F♯ minor, 'Isle of Arran', overtures, chamber music, numerous songs, partsongs, short cantatas (including several for children) and a substantial amount of church music, including an Evening Service in A which was performed at the Festival of the Sons of the Clergy in 1883. Many of his works were published but all are now forgotten. His most lasting achievement is as the writer of two books which are still valuable factual and bibliographical tools. His *History of the Philharmonic Society of London, 1813–1912* (London, 1912) is a detailed and accurate record of all the concerts given by the Society during its first 100 years. His book on the English anthem, *Anthems and Anthem*

Composers (London, 1901/*R*), has an extensive bibliography which includes over 1400 anthems by 221 English composers born after 1800. Foster also acted as an editor for Boosey.

ROSEMARY WILLIAMSON

Foster, Sidney (*b* Florence, SC, 23 May 1917; *d* Boston, 7 Feb 1977). American pianist and teacher. He began his studies with Walter Goldstein in New Orleans. At the age of ten he entered the Curtis Institute, where he was a pupil of Isabelle Vengerova and David Saperton (diploma 1938). In 1940 he became the first winner of the Leventritt Award, and in 1941 he made his début with the New York PO in Carnegie Hall, performing Beethoven's Third Piano Concerto. He then embarked on an international career, making tours of the USA, Europe, Israel and Japan; in 1964 he performed 16 concerts in the Soviet Union. One of the first internationally renowned pianists to teach at an American state university, Foster held positions at Florida State University (1949–51) and then at Indiana University (1952–77), where he developed a reputation as an outstanding teacher. His playing was remarkable for its virtuosity and his repertory notable for including lesser-known works of the 19th and early 20th centuries. He made several recordings for the Musical Heritage Society; these included two Mozart Concertos, Beethoven's 'Appassionata' Sonata and Schumann's op.16, *Kreisleriana*.

BEN ARNOLD

Foster, Stephen C(ollins) (*b* Lawrenceville, now part of Pittsburgh, 4 July 1826; *d* New York, 13 Jan 1864). American songwriter of Scots-Irish descent.

1. Life. 2. Works. 3. Reputation and influence.

1. LIFE. He was born the ninth child of William Barclay Foster, a businessman and sometime politician, and Eliza Clayland Tomlinson. Though neither parent was musical, their daughters' education in voice and piano and Mrs Foster's subscriptions to literary magazines brought music and poetry into the home. The details of his life and career are sketchy. His first biography, an introduction to a collected edition of his songs, written by his brother Morrison (1896), offered impressions that have been repeated unquestioningly. As the keeper of the family papers, Morrison retained only selected correspondence and manuscripts, destroyed embarrassing items, and portrayed the songwriter as a naive genius, devoted to his parents, a dreamer and hopelessly inept at business. Emerson's more recent biography (1997) helps relate Foster to the other cultural figures and movements of his era in Pittsburgh, Cincinnati and New York.

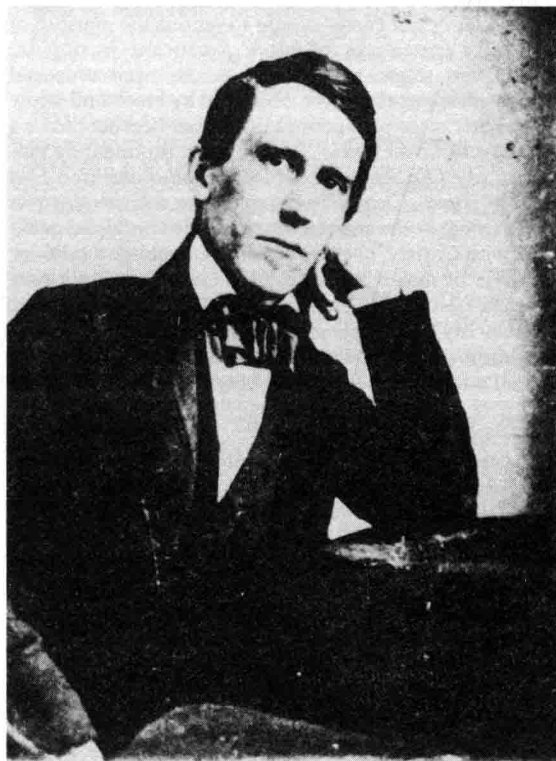
From the age of five, Foster grew up in Allegheny City (now Pittsburgh's north side), where he heard contrasting musical styles in Scots-Irish, German, Italian and American neighbourhoods and in public halls. He received a thorough education at private academies in Allegheny and at Athens and Towanda in northeastern Pennsylvania. He taught himself the flute (his principal instrument), clarinet, violin, piano and guitar sufficiently to perform socially. Although he did not study composition formally, he was helped by the German-born Henry Kleber (1816–97), who from 1830 began a career as songwriter, music teacher, impresario, accompanist, conductor and music dealer in Pittsburgh. When he was 14 Foster composed the *Tioga Waltz*; his first published work was *Open thy lattice love* (1844), a barcarolle setting of a poem by George Pope Morris. Foster was attracted to the parlour ballads of Henry Russell and William Dempster, and to the songs and dances of the blackface minstrel shows. With a group of friends that included the writer Charles Shiras, who later collaborated with Foster on a musical play *The Invisible Prince* (performed 1853, now lost) and the song *Annie My Own Love* (1853), Foster first tried out his polka-songs *Lou'siana Belle* and *Susanna* (*Oh! Susanna*) and the dirge *Uncle Ned* (*Old Uncle Ned*).

Like his brothers, Foster was expected to find work in industry, and served from late 1846 to 1849 as a bookkeeper for his brother Dunning's steamship company in Cincinnati. His main interest was music, however, and he offered his minstrel songs in manuscript copies to professional performers and the ballads and piano dances to young ladies, making presents of neatly inked scores. *Susanna* became an instant hit, even before he offered it to the publisher W.C. Peters in Cincinnati for a token payment. As the 'marching song of the '49ers' in the California Gold Rush and the unofficial theme song of the wagon trains of the westward expansion, the song became known by members of all levels of society and all ethnic and racial groups, its melody and words – "I come from Alabama, with my banjo on my knee" – becoming enduring as icons of Americana.

Largely on the unprecedented popularity of the minstrel songs, he signed a contract with the New York publishers Firth, Pond & Co. in 1849, then in 1850 returned to Pittsburgh and married Jane Denny McDowell. From 1851 until his death, initially to the disapproval of his family, he wrote songs professionally, becoming the first person in the United States to earn his living solely through the sale of compositions to the public. In February 1852 he took his only trip to the South, a delayed honeymoon with Jane on a steamboat down the Mississippi River to New Orleans. In 1853 he wrote a new contract with Firth, Pond & Co., and in January 1854 produced *The Social Orchestra*, a collection of 73 of his own and other composers' melodies arranged as instrumental solos, duets, trios and quartets to accompany quadrilles and other social dancing. In the same year he ceased writing minstrel melodies and began arranging his most popular songs for guitar accompaniment, focussing his efforts on parlour ballads such as *Jeanie with the Light Brown Hair* and *Hard times come again no more* (1854), the unaccompanied quartet *Come where my love lies dreaming*, the comedic *Some Folks*, his only temperance song *Comrades fill no glass for me* (all 1855) and *Gentle Annie* (1856).

In 1853–4 Stephen and Jane were separated, Shiras died in 1854, and in the following year Foster lost both parents and all but ceased writing music. He produced one published song each in 1856 and 1857; with debts mounting, in 1857 he sold the future rights to his previous work back to his publishers Firth, Pond & Co. and F.D. Benteen. He wrote a new contract with Firth, Pond & Co. in 1858, although still not producing songs, and was soon overdrawn. In 1860 he moved to New York to be near the publishers and theatres, and returned briefly to minstrelsy with *The Glendy Burk*. The same year *Old Black Joe* (*Poor Old Joe*) appeared, a synthesis of his

ideals for stage and parlour ballads. His wife and daughter returned to Pennsylvania, and his remaining three years were his most productive if least inspired, with 98 titles including 27 Sunday School hymns. He collaborated with the lyricist George Cooper on music hall songs such as *If You've Only Got a Moustache* and the comic duet *Mr. & Mrs. Brown* (issued posthumously in 1864). His one enduringly memorable song from this period is the serenade *Beautiful Dreamer*, written in 1862 but published after his death.



Foster's difficulty in earning a living was due in part to a lack of legal recourse with publishers and the absence of performing or mechanical rights; he frequently borrowed against future earnings and accrued unpayable debts. During the Civil War his health declined and he resorted to alcohol. Weakened by a fever and an untreated burn from an overturned lamp, on 10 January 1864 he collapsed in his New York hotel room, struck a wash basin and gashed his head: he died three days later at Bellevue Hospital. After a funeral at Trinity Episcopal Church in Pittsburgh where his birth and marriage had been registered, he was buried in Allegheny Cemetery in Lawrenceville.

2. WORKS. From the start Foster concentrated his attention on songs for the home and for the stage, demuring when asked to write other genres. His 287 authenticated works include songs with piano accompaniment, arrangements of his songs with guitar accompaniment, vocal duets, quartets, hymns, piano pieces and other instrumental works and arrangements published as *The Social Orchestra*. He left a number of unfinished songs and instrumental pieces, mostly in a sketchbook he kept from 1851 until his final departure from Pittsburgh for New York in 1860.

By far the majority of the songs are ballads of sentiment, centred on longing for a place or an absent loved one, written for women who undertook the formal music-making in the home. Only 23 of the songs have 'southern' themes, but these provided 90% of his income while his contracts were in force. Foster had little knowledge of professional blackface minstrelsy, and even less about the American South: his letters (23 Feb 1850 and 20 June 1851) enclosing new songs prior to publication revealed that he was unfamiliar with the Christy Minstrel's voices and instruments and that he had not even heard this widely popular band. Foster composed lyrics and music instead from his own experience of parlour poetic imagery and from the perspective of northern urban society. Hamm (1979, 1983) has identified the immigrant influences in Foster's music, noting that the composer had to appeal to all tastes in order to sell sufficient copies of his songs to support himself; Austin has made a similar point about the imagery of Foster's lyrics. Even in the minstrel songs of pathos, beginning with *Uncle Ned* but increasingly in *Old Folks at Home* ('Way down upon de Swanee Ribber'), *My old Kentucky home, good-night! (My Old Kentucky Home)*, *Massa's in de cold ground*, and *Old Black Joe*, Foster drew not so much on stage conventions as on the themes of longing for home and family that were so prevalent in his parlour repertory, thus appealing across all boundaries of ethnicity, race, national origin, economic level and class.

Morrison Foster's story of their family's bonded servant taking the young Stephen to a black American church where he 'was fond of their singing and boisterous devotions' has stoked the imaginations of scriptwriters, whose scenes have given rise to the false impression that Foster copied and sold for his own profit the traditional music of its unrecompensed creators. A more pervasive myth sees Foster as an American Thomas Moore (ii) or proto-Bartók, who gathered appealing melodies which he then reworked in his published compositions. Hamm's analysis, however, reveals Foster's command of British pleasure-garden song, Irish and Scottish melodies, Italian opera airs, German Lieder and other national schools of song, without documentable trace of black American styles. The early songs such as *Ah! May the red rose live alway!*, *I would not die in spring time*, and the duet *Turn not away!* especially show the influence of Anglo-American concert music. The Irish influence predominates in *Gentle Annie* and *Jeanie with the Light Brown Hair*. For the piano introduction to *Sadly to mine heart appealing* Foster did borrow eight bars of *Robin Adair* from a book of Scottish melodies, but in the song itself the Germanic tradition is most apparent. Opera is his model for the duets *The Hour for Thee and Me* and *Wilt thou be gone, love?* (on a text from Shakespeare's *Romeo and Juliet*) and the solo *Linger in blissful repose*. He did not typically use syncopation, something considered a marker for black American rhythmic influence, but rather the Scotch snap, frequently to set a two-syllable name as with Mary, Annie, Dolly and Lily.

Foster wrote most of his own lyrics, which usually preceded his work on the musical setting, Morrison's claim to the contrary notwithstanding. Here he took a similarly eclectic approach, drawing on his familiarity with the themes and conceits of immigrant song-poetry: grieving for family and friends, recalling earlier homes

Stephen C. Foster

and longing for the carefree joys of childhood. Events in Foster's life might have suggested ideas for his songs, but he transformed them from the specific to the universal. His sentiments crossed boundaries of race and social standing and transcended barriers of class and political power throughout the United States and abroad.

A chronological survey of Foster's output reveals his foresighted approach to racial conciliation. His early song *Nelly was a lady* (1848, published 1849) was among the first songs by a white author or composer to portray a black husband and wife as a loving, faithful couple, and to insist on the term 'lady' for the woman. The dialect in Foster's minstrel lyrics, often exaggerated in later editions and in imitations of his work by other songwriters, is limited in his authorized editions mostly to selectively substituting 'd' for 'th', 'b' for 'v' and 'a' for 'e' ('whar' instead of 'where'); other vernacular touches not necessarily denoting race are either contractions or the adding of 'a' to the beginning of present participles of verbs. Foster abandoned these along with race-specific terms in the early 1850s, and his stage-song imagery thoroughly merged with his parlour ballad style. His first minstrel song published without dialect is *My old Kentucky home, good-night!* (drafted in dialect in 1852, copyrighted in 1853), and the first to appear in fully standard English is *Old Dog Tray* (1853), although in 1860 he briefly went back to dialect (*The Glendy Burk*) in an apparent attempt to boost flagging sales. The illustrated sheet-music covers of his authorized editions lack the cartoon caricatures of black Americans or black-face performers that proliferated on other minstrel music and on pirated and foreign editions of his songs. He admonished Christy to perform his tragic plantation songs 'in a pathetic, not a comic style' which would engender pity and compassion rather than derision.

Whether or not Foster sought to redress the injustice of insensitive caricatures of black Americans in popular culture, his tragic minstrel songs conveyed universal human emotions that were embraced by black and white alike. Early stage productions of Harriet Beecher Stowe's anti-slavery novel *Uncle Tom's Cabin* prominently employed *My Old Kentucky Home, good-night!* and *Old Folks at Home*. Clearly Foster sought to reform minstrels songwriting: at the start of his career Foster felt he could unite with Christy 'in every effort to encourage a taste for this style of music [minstrelsy] so cried down by opera mongers' (letter, 23 February 1850). Two years later, after Christy had paid Foster to name him as the composer and author of *Old Folks at Home*, Foster expressed himself more clearly (letter, 25 May 1852):

> As I once intimated to you, I had the intention of omitting my name on my Ethiopan songs, owing to the prejudice against them by some, which might injure my reputation as a writer of another style of music, but I find that by my efforts I have done a great deal to build up a taste for the Ethiopian songs among refined people by making the words suitable to their taste, instead of the trashy and really offensive words which belong to some songs of that order.

He wrote frolicking tunes that entered oral tradition as instrumental numbers, such as *Nelly Bly*, *Camptown Races*, *Angelina Baker* (all 1850) and *Ring, ring de banjo!* (1851). But his minstrel songs, usually written as solos with four-voice chorus, increasingly portrayed sympathetic, dignified, compassionate, even tragic characters: *Oh! Boys, carry me 'long* and *Old Folks at Home* (both 1851), *Massa's in de cold ground* (1852), *My old Kentucky home, good-night!* and *Old Dog Tray* (1853). His parlour ballads such as *Ah! May the red rose live alway!* (1850), solos with refrain but (in the early years) lacking the multi-voice chorus, were more prolific but collectively less remunerative.

3. Reputation and influence. The estimation of Foster as a composer varies widely. Within two months of his death *Harper's New Monthly Magazine* proclaimed that 'The air is full of his melodies. They are our national music'. Contemporary reviews noted that his songs sounded distinctively American, and were unprecedentedly popular. The singers who have performed Foster's songs include Jenny Lind, Adelina Patti, John McCormack, Paul Robeson, Richard Crooks, Marilyn Horne and Thomas Hampson. Foster's melodies have been arranged for many combinations of instruments and voices, beginning with the piano variations by Henri Herz, extending through Dvořák's setting of *Old Folks at Home* for soloists, chorus and orchestra, and continuing through Fritz Kreisler's violin encores and Robert Shaw's choral arrangements. Foster's contemporary advocates of refined culture, led by John Sullivan Dwight (*Dwight's Journal of Music*, 19 November 1853), excoriated them: 'they persecute and haunt the morbidly sensitive nerves of deeply musical persons', and 'such and such a melody *breaks out* every now and then, like a morbid irritation of the skin'. Such scorn notwithstanding, the American songwriter George F. Root credited Foster with creating the 'people's song', seemingly simple words and music combined in such a way 'that it will be received and live in the hearts of the people'.

The appraisal of Foster has also shifted with changing social views. In the late 19th century, the post-Reconstructionist recasting of minstrelsy as 'coon songs' coincided with a condescending view that Foster's songs elevated and ennobled the crude music of uncultured peoples; simultaneously, black Americans' sense of ownership is reflected in the assessment by W.E.B. Du Bois that *Old Folks at Home* and *Old Black Joe* were different from the debasing minstrel songs, and in Henry T. Burleigh's singing of Foster's melodies along with black spirituals for Dvořák. By the second quarter of the 20th century, Foster's songs were freely performed on radio and in films, and he was acclaimed as 'America's troubadour'; *My old Kentucky home, good-night!* was adopted as the official state song of Kentucky (1928) and *Old Folks at Home* as that of Florida (1935). Josiah Kirby Lilly, an Indianapolis philanthropist and bibliophile, issued a facsimile edition of Foster's complete works in 1933, and in 1940, Foster was the first musician elected to the Hall of Fame for Great Americans. Between 1939 and 1952 three Hollywood biographical films appeared.

Following the Civil Rights movement of the 1950s and 60s, which heightened sensitivity to minstrelsy's racism, many schools in the USA abandoned Foster's songs. In the 1980s and 90s, however, they gained new currency, partly through scholarly research into the songs' history of interpretations and significance for racial conciliation, partly because of their continued circulation among American country and folk-music performers, partly through worldwide interest in Americana, and partly because the American entertainment industry continued to use them as iconic melodies in cartoons, films and television shows. Ethnomusicologists have recorded them along the Tibetan border in China; black South Africans taught them in their schools under Apartheid; since the

1880s when Luther Whiting Mason created a system of music education for Japan, all Japanese children have sung the music of Foster along with Mozart and Schubert as part of a mandatory eight-year music curriculum. In the 1850s Foster's songs were the first significant body of identifiably American song; by the end of the 1990s, a handful of Foster's songs remained among the best-known music in the world.

WORKS

Principal editions: M. Foster: *Biography, Songs and Musical Compositions of Stephen Foster* (Pittsburgh, 1896)
Foster Hall Reproductions: Songs, Compositions and Arrangements by Stephen Collins Foster 1826–1864 (Indianapolis, 1933; suppl. 1938)
S. Saunders and D.L. Root: *The Music of Stephen C. Foster: a Critical Edition* (Washington and London, 1990)

MSS in US-Puf; unless otherwise stated, dates are those of copyright, and songs are listed in chronological order of copyright or composition with lyrics by Foster

VOCAL

Songs, 1v, pf acc.: Open thy lattice love (G.P. Morris), 1844; There's a good time coming (C. Mackay), 1846; What must a fairy's dream be?, 1847; Where is thy spirit Mary, written 1847; Stay summer breath, 1848; Summer Longings (D.F. MacCarthy), 1849; Mary loves the flowers, 1850; Ah! May the red rose live alway!, 1850; Molly do you love me?, 1850; The Voice of By Gone Days, 1850; The Spirit of My Song (M.V. Fuller), 1850; [as Milton Moore] I would not die in spring time, 1850; Lily Ray, 1850; Give the stranger happy cheer, 1851; Mother, thou'rt faithful to me, 1851; Sweetly she sleeps, my Alice fair (after C.G. Eastman), 1851; Farewell! Old Cottage, 1851; Once I Love Thee, Mary Dear (W.C. Crookshank), 1851; Ring, ring de banjo!, 1851; I would not die in summer time, 1851; My hopes have departed forever (J.G. Percival), 1851; Laura Lee, 1851; Old Folks at Home, 1851; Willie My Brave, 1851; Eulalie (H.S. Cornwell), 1851; I cannot sing to-night (G.F. Banister), 1852; Maggie By My Side, 1852; Annie My Own Love (C.P. Shiras), 1853; Old Dog Tray, 1853; Old Memories, 1853; Little Ella, 1853

Willie we have missed you, 1854; Jeanie with the Light Brown Hair, 1854; Come with thy sweet voice again, 1854; Some Folks, 1855; The Village Maiden, 1855; Comrades fill no glass for me, 1855; Gentle Annie, 1856; I see her still in my dreams, 1857; Lula is gone, 1858; Linger in blissful repose, 1858; Where has Lula gone?, 1858; My Loved One and My Own (Eva), 1858; Sadly to mine heart appealing (E.S. Carey), 1858; My Angel Boy (H. Brougham), written 1858; Linda has departed (W.H. McCarthy), 1859; Parthenia to Ingomar (McCarthy), 1859; For Thee, Love, for Thee (after McCarthy), 1859; Fairy-Belle, 1859; Thou art the queen of my song, 1859

None shall weep a tear for me (R.H. Wilde), 1860; The Wife, 1860; Poor Drooping Maiden, 1860; The Glendy Burk, 1860; Jenny's coming o'er the green, 1860; Beautiful Child of Song, 1860; The Little Ballad Girl ('Tis My Father's Song), 1860; Don't bet your money on de Shanghai, 1861; Molly dear good night, 1861; Our Willie dear is dying, 1861; Lizzie dies to-night (M.B. Reese), 1861; Our bright, bright summer days are gone, 1861; I'll be a soldier, 1861; Oh! Tell me of my mother, 1861; Farewell mother dear, 1861; Farewell sweet mother, 1861; Nell and I, 1861; A penny for your thoughts!, 1861; A Thousand Miles from Home, written ?1861

I will be true to thee, written 1862; A Dream of my Mother and my Home, 1862; That's what's the matter, 1862; Slumber my darling, written 1862; No One to Love, 1862; No Home, No Home, 1862; Was my brother in the battle?, 1862; Beautiful Dreamer, written ?1862; The Love I Bear to Thee, 1863; I'm nothing but a plain old soldier, 1863; I'd be a fairy, 1863; Oh! There's no such girl as mine (after S. Lover), 1863; There are plenty of fish in the sea (G. Cooper), written 1863; Lena our loved one is gone, 1863; Larry's Good Bye (Cooper), 1863; There was a time (J.D. Byrne), 1863; Kissing in the Dark (Cooper), 1863; My wife is a most knowing woman (Cooper), 1863; Oh! Why am I so happy? (F.D. Murtha), 1863; The Song of All Songs (?J.F. Poole), 1863; Dearer than Life! (Cooper), written 1863; My boy is coming from the war (Cooper), written ?1863

If You've Only Got a Moustache (Cooper), 1864; Wilt thou be true? (Cooper), 1864; When old friends were here (Cooper), 1864; She was all the world to me (Dr Duffy), 1864; Sitting by my Own Cabin Door, 1864; When Dear Friends are Gone, 1864; Give this to mother (S.W. Harding), 1864; Tell me love of thy early dreams, 1864; Kiss me dear mother ere I die, 1869

Songs, 1v, with chorus (4vv unless otherwise stated), pf acc. (unless otherwise stated): Lou'siana Belle, TTAB, 1847; Uncle Ned (Old Uncle Ned), S S/A T/B B, 1848; Susanna (Oh! Susanna), SATB, 1848; Away Down Souf, SSTB, 1848; Nelly was a lady, 1849; My Brodder Gum, ATTB, 1849; Dolcy Jones, 1849; Oh! Lemuel!, [S]ATB, 1850; Nelly Bly, SS, 1850; Dolly Day, TTAB, 1850; 'Gwine to run all night' or De Camptown Races, [S]ATB, 1850; Angelina Baker, 1850; Way Down in Ca-i-ro, 1850; Melinda May, [S]ATB, 1851; Oh! Boys, carry me 'long, 1851; Farewell my Lilly dear, 2 vv, 1851; Massa's in de cold ground, 2 vv, 1852; My old Kentucky home, good-night! (My Old Kentucky Home), TSSB, 1853; Ellen Bayne, 2 vv, 1854; Hard times come again no more, 1 v or TSSB, 1854; The White House Chair, unacc., written 1856

Cora Dean, written 1860; Under the willow she's sleeping, [SA]B, 1860; Old Black Joe (Poor Old Joe), 3 vv, 1860; Down Among the Cane-Brakes, T[SS]B, 1860; Virginia Belle, 3 vv, 1860; Why have my loved ones gone?, TSSB, 1861; Sweet Little Maid of the Mountain, 3 vv, 1861; Little Belle Blair, T[SS]B, 1861; Little Jenny Dow, 1 v/T[SS]B, 1862; Better times are coming, SATB, written 1862; Merry little birds are we, T[SS]B, 1862; We are coming, Father Abraam, 300,000 more (J.S. Gibbons), TSAB, 1862; I'll be home to-morrow, TSSB, 1862; Happy Hours at Home, T[SS]B, 1862; Gentle Lena Clare, T[S]AB, 1862; We've a million in the field, TSAB, written 1862

Bring my brother back to me (Cooper), 2 vv, written 1863; While the Bowl Goes Round (Cooper), [S]ATB, written ?1863; Jenny June (Cooper), TSSB, 1863; A Soldier in the Colored Brigade (Cooper), TSAB, 1863; When This Dreadful War Is Ended (Cooper), TSAB, written 1863; Katy Bell (Cooper), 1863; Willie has gone to the war (Cooper), TSSB, 1863; For the dear old flag I die! (Cooper), SATB, written 1863; The Soldier's Home (Cooper), SSTB, 1863; Somebody's coming to see me to night (Cooper), [S]ATB, 1864; The Voices that are Gone, SSTB, 1865; Sweet Emerald Isle that I Love so Well (Cooper), [SA]TB, 1866

Songs, 1 v (unless otherwise stated), arr. with gtr. acc. by Foster: Eulalie, 1853; Oh! Boys carry me long, 1853; Massa's in de cold ground, 2 vv, 1853; My old Kentucky home, good night, 1853; Willie my Brave, 1853; Farewell my Lilly dear, 2 vv, 1853; Maggie by my Side, 1854; Willie we have missed you, 1854; Old Memories, 1854; Old Dog Tray, 1854; Ellen Bayne, 2 vv, 1854; Jeanie with the Light Brown Hair, 1854; Little Ella, 1854; Come with thy sweet voice again, 1854; Hard times come again no more, 1855; Gentle Annie, 1857

Song arr. with pf. acc: Our Darling Kate (words and music J. Mahon), 1 v, SATB, arr. ?1864

Vocal duets, pf acc.: Turn not away!, 1850; Wilt thou be gone, love? (adapted from W. Shakespeare: *Romeo and Juliet*), 1851; The Hour for Thee and Me, 1852; Mine is the mourning heart, T, S, 1861; Mr. & Mrs. Brown (Cooper), 1864

Vocal qts, unacc.: I would not die in spring time, S, A, T, B, arr. ?1850 [after Foster]; Come where my love lies dreaming, S, T, C, B, 1855; The Merry, Merry Month of May, [S, A, T, B], 1862 [tune after Foster 'The White House Chair']

Contribs. to collections of hymns: Water's Golden Harp for Sunday Schools (1863) [10 hymns]; The Athenaeum Collection of Hymns and Tunes for Church and Sunday School (1863) [9 hymns]; Heavenly Echoes: a New Collection of Hymns & Tunes for Sunday Schools and Social Meetings (1867) [2 hymns]

Other hymn tunes: Bury me in the morning, mother, 1863; Little Ella's an angel!, 1863; Suffer little children to come unto me, 1863; Willie's gone to heaven, 1863; Onward and Upward! (Cooper), 1863; We will keep a bright lookout (Cooper), written 1863

INSTRUMENTAL

Collection: *The Social Orchestra* (New York, 1854/*R*) [works by Foster and others, incl. traditional melodies, operatic arias and popular songs, arranged by Foster for various small instrumental groups; orig. works by Foster incl. Irene, Anadolia, Jennie's Own Schottisch and Village Festival]

Pf: Autumn Waltz, written *c*1846; Santa Anna's Retreat from Buena Vista, 1848; Soirée Polka, 1850; The Soiree Polka, arr. pf 4 hands, 1850; Village Bells Polka, 1850; Old Folks at Home Variations, written *c*1851; Old Folks Quadrilles, 1853: 'Old Folks at Home',

'Oh! Boys, carry me long', 'Nelly Bly', 'Farewell my Lilly dear', 'Cane Break Jig'; Holiday Schottisch, 1853

LOST AND DOUBTFUL WORKS

Stage: The Invisible Prince, or The War with the Amazons (spectacle, C. Shiras), Pittsburgh, 9 Nov 1853 [lost]

The Tioga Waltz, pf, [in M. Foster, 1896]; [Untitled Waltz dedicated to Maria Bach], pf [undated MS, reproduced in Morneweck, 1944]; Way Down South in Alabama, 1 v, SATB chorus, pf acc., (?1848); Long Ago Day, 1 v, pf acc., 1931; This will remind you, 1 v, pf acc., 1931; Camptown Races, 1 v, gui acc., 1852; Laura Lee, 1 v, gui acc., 1852; Some Folks, 1 v, 4 vv chorus, arr. gtr. acc., (?1858); All Day Long (C. Morton), 1 v, pf acc., 1864; Little Mac! Little Mac! You're the very man (?H.F. Thornton), 1 v, [S]ATB chorus, pf acc., (?1864)

Principal publishers: W.C. Peters (1846–8), Firth, Pond & Co. (1849–62), F.D. Benteen (1850–51), Daughaday, Hammond & Co. (1860–62), John J. Daly (1861–4), Horace Waters (1861–4), S.T. Gordon (1862–3)

DEANE L. ROOT

Foucault, Henri (*fl* Paris, 1690–1719/20). French music dealer and publisher. It is not known whether he was related to earlier publishers with the same family name, none of whom was apparently involved in music printing. Like other 18th-century music dealers, Henri Foucault was associated with the corporation of haberdashers and jewellers rather than that of the booksellers. He was originally a paper seller, with a shop 'A la règle d'or', rue St Honoré, but seems to have branched out from this trade by 28 June 1690, when a condemnation issued by the Conseil d'Etat accused him – in association with the engraver Henri de Baussen – of contravening Christophe Ballard's royal privilege by publishing 'divers airs de musique'. Two years later Foucault's name appears on the title-page of Marais's *Pièces en trio pour les flûtes, violons et dessus de viole*, in association with Hurel, Bonneüil and the composer, but he is still designated simply as 'marchand papetier'. However by 1697, in Ballard's edition of André Campra's *L'Europe galante*, he is advertised as a music dealer offering for sale manuscript copies of extracts from Lully's operas and early ballets in six folio volumes, as well as *symphonies* for violin, books of harpsichord and organ music, Latin motets, *leçons de ténèbres* and various novelties. He also offered to buy old operas and to copy music. Foucault thus functioned as a link between the composer and printer (using the services of various engravers, notably Baussen, Claude Roussel and F. du Plessy); he occasionally risked publication at his own expense, but more often shared the expense with the composer.

Foucault was the first music publisher seriously to threaten the Ballard monopoly. The Ballards, who had long dominated movable-type printing in France, had already encountered increasing competition from engraving. Between two collections of *Airs sérieux et à boire* by J.-B. de Bousset, published by Christophe Ballard in 1705–6 (*F-Pn* Rés. 1735 II), is a catalogue of printed music sold 'A la règle d'or', and this, together with the aforementioned advertisement of 1697, suggests that the rivals had reconciled their differences and were collaborating. In 1702 Foucault had collaborated with Baussen and Roussel in publishing a collection of *airs* by J.-B. de Bousset; in 1709 he republished this collection along with a second volume in association with Christophe Ballard's sister-in-law (Pierre Ballard's widow). A catalogue published by Christophe's son J.-B.-C. Ballard in 1719 still advertises Foucault's shop. The links between the two families were reinforced on 2 July 1724 when Henri Foucault's successor François Boivin married Christophe Ballard's granddaughter. Foucault must have died some time between 17 October 1719 and 1720, when his widow's name appears on the title-page of a collection of motets by André Campra. On 15 July 1721 his widow sold the shop and music business in the rue St Honoré to François Boivin, who traded there with his uncle, Michel Pignolet de Montéclair.

The catalogue of 1706 advertises sonatas by Corelli, Jean-François Dandrieu, François Duval and Michely, trios by Michel de La Barre, harpsichord books by D'Anglebert, Chambonnières, Lebègue, Gaspard Leroux and Louis Marchand, organ books by Jacques Boyvin, Gaspard Corrette, Pierre-Claude Foucquet and Lebègue, motets by Bernier, Brossard, Campra, J.-F. Lochon, J.B. Morin and Suffret, vocal anthologies (*Parodies bachiques* and *Brunettes*) and theoretical treatises by L'Affilard and Masson. Foucault also published violin sonatas by Mascitti (1704, 1706–7, 1711 and 1714) and Henry Eccles (ii) (1720; a second set was issued by Boivin in 1723), two books of motets and six books of *Cantates profanes à 1 & 2 voix* by Bernier (1703–18; two further ones by Boivin in 1723), a collection of motets by G.A. Guido (1707), a *Livre de musique d'église* by Alexandre de Villeneuve (1719), and two sets of cantatas by T.-L. Bourgeois.

FRANK DOBBINS

Fouchécourt, Jean-Paul (*b* Blanzy, 30 Aug 1958). French tenor. He trained as a conductor and saxophonist before turning to singing. He quickly acquired a reputation in French Baroque music, singing principal *haute-contre*

roles in Lully, Campra and Rameau, most notably with Les Arts Florissants under William Christie. He subsequently toured the world in opera from Monteverdi to Mozart, and more recently has undertaken light tenor roles in 19th- and 20th-century repertory such as Offenbach's *Les contes d'Hoffmann* at the Metropolitan, New York, and Ravel's one-act operas throughout Europe. Despite his versatility, he remains best known as an exponent of French dramatic music, and his fluent, sensual delivery, acute theatrical sense and command of refined nuance have adorned many performances and recordings of works by Lully (*Phaëton* and *Atys*), Mondonville, Campra, Charpentier and Rameau (*Les indes galantes* and *Hippolyte et Aricie*). Fouchécourt's comic virtuosity and mimicry in Rameau's *Platée*, which he sang with the Covent Garden Company in 1997–8, have been exceptionally well received. He is also an admired concert singer and a sensitive exponent of *mélodies*.

JONATHAN FREEMAN-ATTWOOD

Foucquet [Fouquet]. French family of organists. They occupied the post at St Eustache, Paris, for more than a century (1681–1783); a detailed genealogical table is given in *MGG1*. The earliest member of the family known to us is Gilles Foucquet (*d* 1646), organist of St Laurent *c*1622 and of St Honoré from 1630.

(1) **Antoine Foucquet (i)** (*d* Paris, 1708). His relationship to Gilles is unknown. He was organist to Queen Marie-Thérèse, wife of Louis XIV, around 1669, and probably succeeded Nicolas de Grigny at the basilica of St Denis. On 1 March 1681 he was appointed organist of St Eustache, and in 1696 he conferred the reversion of this post upon his son (2) Pierre. He had two other sons, one of them the organist (3) Antoine (ii).

(2) **Pierre Foucquet** (*d* Paris, late 1734 or early 1735). Son of (1) Antoine Foucquet. He succeeded Louis Marchand at St Honoré (17 Jan 1707) while he was still reversioner at St Eustache, but resigned on 18 June 1708. His successor, Piroye, was dismissed on 22 February 1712, and Pierre then became the regular deputy of his son, (4) Pierre-Claude, the new *titulaire*.

Three *Airs sérieux et à boire* (Ballard, Nov 1703, Dec 1705 and Feb 1711) can be attributed to him. He was one of the first French composers to write sonatas after Italian models; his four violin sonatas (two solo and two trio) mentioned in the manuscript *Catalogue de la bibliothèque de S. de Brossard* are unfortunately lost.

(3) **Antoine Foucquet (ii)** (*d* Paris, before 1740). Son of (1) Antoine Foucquet. He obtained the reversion at St Laurent in 1707, and was succeeded in 1726 by N.G. Forqueray. He must have been organist of St Victor around 1695, since he later handed on the post to his nephew (4) Pierre-Claude.

(4) **Pierre-Claude Foucquet** (*b* Paris, 1694 or early 1695; *d* Paris, 13 Feb 1772). Organist and composer, son of (2) Pierre Foucquet and Charlotte Rolland. He was the most illustrious representative of this family: he took over from Piroye at St Honoré on the latter's dismissal and succeeded his uncle Antoine at the Abbey of St Victor (before 1740). He is first mentioned as organist of St Eustache in documents following his mother's death (1741). On 18 May (or 18 June) 1758 he was appointed organist of the royal chapel, replacing Dagincourt, and on 17 April 1761 he succeeded Jollage at Notre Dame for the October quarter, his colleagues being Daquin, Balbastre and Armand-Louis Couperin. The inventory after his death shows him to have lived in some comfort. His wife, Cécile Télinge, by whom he had six children (four daughters and two sons), survived him by almost four years. Biographical data are sparse and his life was certainly very quiet. If his official functions at Notre Dame and especially in the royal chapel brought him some recognition, it is worth noting that apparently he never appeared at the Concert Spirituel or in any public concert.

Foucquet's surviving works are few and include no organ music. Although the three harpsichord books were published between 1749 and 1751, the clear evolution between the first and last suggests that they were composed well before, as does the preface to book 1:

> The special study that I have made of the organ and harpsichord impels me to share with the public the fruit of my labours. I shall be happy if this first essay finds favour. The harpsichord as well as the organ can express all the things that good music should portray. I have tried to represent them in several pieces which I have composed and which I shall publish presently, to prevent the faulty copies that exist from spreading further.

The first book comprises a preface, a method for learning the keyboard in one lesson, tables of ornamentation and scale fingerings, and eight pieces with descriptive titles. Compared with those of Couperin, Rameau, Dandrieu and Corrette, Foucquet's ornament table is the most informative. His fingerings show him to be an experienced teacher. The pieces which follow, all in G, are less original than those of the other books. *Le feu* is notable for its frankly descriptive style and its virtuosity.

The second book is composed of six pieces in F and seven in A, all with such evocative titles as *La marche des pèlerins de Cythère*, *Le passe-temps* and *La destrade*, which serve to indicate the spirit in which the piece is to be played. In this collection the rondo form is used frequently, including varied rondos like *La laborieuse* and rondos with two themes like *Soeur Agnès*, anticipating the rondo-sonata. The third book is in three parts: *Les forgerons*, a theme and variations, is followed by two groups of pieces in G and C-c, each containing an allemande remarkable for its ample and majestic style and complex harmony. A minuet in G at the end of the book bears no relation to the rest of the contents.

While remaining faithful to harpsichord sonority, Foucquet was not insensitive to modern tendencies and took advantage of such pianistic devices as arpeggiations, long rising and falling scales, and chord effects. The evolution from old-fashioned, short binary forms to new, more highly developed ternary forms can be seen in his works. Certain of his pieces such as *Soeur Agnès*, *L'Hortense* and the allemandes deserve to be brought out of oblivion to illuminate this particularly happy period of French musical history.

WORKS

La belle Sylvie me dit chaque jour, 2vv, bc, in Ballard: Récueil d'airs sérieux et à boire (Paris, 1719)

Les caractères de la paix, pièces de clavecin, op.1 (Paris, 1749/*R*)

Second livre de pièces de clavecin (Paris, 1750–51/*R*)

Les forgerons, le concert des faunes et autres pièces de clavecin, IIIe livre (Paris, 1751/*R*)

Minuet in G, in Musikalisches Allerley von verschiedenen Tonkünstlern, ix (Berlin, 1763)

Both Pierre-Claude's sons held their father's post at St Honoré. The elder, François-Pierre-Charles Foucquet (1726–65), received

the reversion on 4 March 1743. Louis Marc (*d* after 1790) succeeded his brother as reversioner and occupied the post after the latter's death until 1780, when he resigned for reasons of health. He had obtained the reversion of the position of organist at St Victor on 11 July 1755, but on his father's death the chapter decided to open the post to competition (26 February 1772). Nothing is known of the last Foucquet at St Eustache, Marie-Louis, except that he occupied that post before 1783.

JACQUELINE GACHET

Fouet (Fr.). *See* WHIP.

Fougstedt, Nils-Eric (*b* Raisio, nr Turku, 24 May 1910; *d* Helsinki, 12 April 1961). Finnish conductor and composer. After attending the Helsinki Conservatory from 1927 to 1933, where his teachers included Erik Furuhjelm, he studied composition with Max Trapp in Berlin, conducting in Salzburg, and both composition and conducting in Italy, France and the USA. From 1932 to 1961 he taught music theory and choral conducting at the Helsinki Conservatory (the Sibelius Academy since 1939) and joined Finnish Radio as a conductor in 1944, becoming chief conductor of the RO in 1951. As a guest conductor he performed in many European countries; he also conducted several choirs, including the Academic Choral Society (1946–50) and the Solistikuoro (later Radiokuoro), which he founded in 1940 and directed until 1954.

Fougstedt's compositions show a development from Nordic late-Romanticism (Piano Trio, 1933) through a free tonality in the manner of Bartók and Hindemith (Second Symphony, 1949) to dodecaphonic writing. Moreover, his *Angoscia* (1954) is probably the first Finnish 12-note orchestral score. A more mature command of this technique is displayed in *Trittico sinfonico* (1958), performed at the ISCM Festival in Rome in 1959. Fougstedt's choral works, about 60 in number, are fine examples of *Gebrauchsmusik*.

ERIK WAHLSTRÖM/ILKKA ORAMO

Fougt, Henric [Henry] (*b* Lövånger, Swedish Lapland, 1720; *d* ?Stockholm, 1782). Swedish printer and publisher active in London. After studies at Uppsala University and some years of clerical work he became a general book printer. About 1760 he developed his own version of Breitkopf's improvements in printing music from movable type, using a system of 166 characters. He applied for a patent in 1763, and in the following year was granted a privilege for music printing in Sweden for 25 years. Lacking economic support, however, he left Sweden in 1767 and in November of that year arrived in London, where he began to issue music in his new type. After submitting his first work, an edition of Uttini's Six Sonatas op.1, to the Society for the Encouragement of Arts, Manufactures and Commerce, he obtained a resolution from that body that his method of printing was superior and much cheaper than any that had been in use in Great Britain; he later printed this resolution as a preface to his edition of Sarti's Three Sonatas.

Fougt may be considered a pioneer of cheap music, for he sold his music at 'one penny per page, or 18 for a shilling', far less than the sixpence a page which was the average price of music at that time. He apparently aroused ill-feeling among the rest of the trade, though Hawkins was probably wrong in saying that they drove him out of the country by undercutting his publications. During his three years in London he published about 80 sheet songs and instrumental pieces, and eight more substantial items, including the sonatas mentioned above, a set by Nardini, and other sets by Giacomo Croce, Benedetto Leoni, Bartolomeo Menesini and Giovanni Andrea Sabatini. The works of these last four composers are now known only from Fougt's publications, but Parkinson's suggestion that the names may be fictitious is untenable, at least in the cases of Leoni and Sabatini, since their existence is verifiable from other sources. The typography is of excellent clarity, though the results are not as elegant as the best engraved music of the period.

A dispute in 1769 over a supposedly pirated edition of Dibdin's *The Padlock* may have hastened the end of Fougt's London career. In 1770 he sold his plant and type to Robert Falkener and returned to Stockholm, where in 1773 he was granted a new privilege by Gustavus III and enjoyed patronage as royal printer. Falkener, who was also a harpsichord maker, continued to issue sheet songs in Fougt's style until 1780, and was the author and printer of *Instructions for Playing the Harpsichord* (1770).

PETER WARD JONES

Foulds, John (Herbert) (*b* Hulme, Manchester, 2 Nov 1880; *d* Calcutta, 24 April 1939). English composer and conductor. Largely self-taught and the son of a Hallé Orchestra bassoonist, he composed copiously from childhood. During the 1890s he acquired performing experience as a cellist in theatre and promenade orchestras in England and Wales; he also travelled on the Continent. In 1900 he joined the ranks of the Hallé's cello section under Richter, who encouraged Foulds as a conductor, taking him to the 1906 festival of the Allgemeiner Deutscher Musikverein in Essen, where he met Delius, Humperdinck and Mahler. He also studied conducting with Lamoureux, Mahler and Nikisch.

However, encouraged by Henry Wood's performance of his tone poem *Epithalamium* at the 1906 Queen's Hall Promenade Concerts, Foulds left the Hallé to concentrate on composition. He found success in light orchestral and salon music. The *Keltic Suite* (1911) was much performed; its slow movement, the *Keltic Lament*, became a popular light classic through innumerable arrangements. In 1912 there began a fruitful collaboration with the actor-director Lewis Casson; over a 20-year period, Foulds became one of Britain's leading stage-music composers.

During World War I, he was active in music-making for the troops; he was appointed music director of the central YMCA in 1918, and conductor of the London University Musical Society in 1921. His *A World Requiem* (1919–21), composed in memory of the war dead of all nations, was recommended for national performance by the committee of the newly formed British Music Society and adopted by the British Legion as the musical component of the Armistice Night commemorations; its annual performances at the Royal Albert Hall during 1923–6, by a chorus and orchestra numbering over 1200 conducted by Foulds, constituted the first Festivals of Remembrance. After 1926 the Legion's patronage lapsed. Foulds spent part of 1927 in Sicily before settling for three years in Paris, where he worked as a cinema pianist and composed some of his most radical works. Returning to England in 1930, he wrote his highly personal study of contemporary music and its sources of inspiration, *Music To-day*, published in 1934.

In 1935 he travelled to India. His interest in its music, non-European modes and rāgas, and music for meditation, had earlier been awakened by his second wife, the violinist Maud McCarthy (in the 1920s he had essayed a vast Sanskrit opera, *Avatara*, which he subsequently destroyed, though the *3 Mantras*, the preludes to the acts, survive). After a year investigating Indian music first-hand, he was appointed Director of European Music at All-India Radio, Delhi, where he broadcast frequently as a commentator, solo performer and conductor. He also coached Indian musicians to read Western musical notation and perform as an ensemble on Indian instruments; a project never fulfilled was an 'Indo-European orchestra' combining the resources of both continents. He died suddenly from cholera shortly after being transferred to reorganize music at AIR's Calcutta station.

Foulds's idiomatic eclecticism, and his frequently adventurous and unorthodox musical ideas, resist easy classification. His extreme versatility, talent for memorable tunes, instrumental colour and national or exotic characters, made him a natural purveyor of light music and theatre scores. Though such works supported him financially he regarded them as sidelines to his more serious compositional output, which, however, was for the most part ignored or rejected. Indeed for decades after his death, Foulds was only remembered, if at all, as the composer of the *Keltic Lament*.

Music To-day declared his intellectual openness to the whole gamut of modern techniques, which he absorbed and employed as the context required. His most admired contemporaries included Busoni, Skryabin and Bartók; among English-speaking composers his output has affinities with Grainger and Holst. Upon an early stylistic basis deriving from Schumann, Brahms, Liszt and Wagner, Foulds steadily expanded his range to command diatonic dissonance, folksong elements, extreme chromaticism, bitonality, in synthesis with pioneering advances of his own. As early as 1896 he introduced quarter-tones in a string quartet; they recur throughout his works in passages requiring a certain kind of colouristic intensity. Strict composition in ancient Greek modes (eg. in *Hellas*) led him to explore non-diatonic scales generally, to some extent realizing Busoni's vision of modal composition as laid out in *Entwurf einer neuen Ästhetik der Tonkunst*.

Many of his modal studies (eg. in *Essays in the Modes*) relate to Southern Indian rāgas, and he made use of Indian additive rhythms before Messiaen. These Indian interests intersected with his leanings towards esoteric spirituality to produce explorations of harmonic stasis and 'timeless' repetition (eg. *Gandharva-Music*) that foreshadow the minimalism of 50 years later. His largest works tend to synthesize the multifarious tendencies pursued separately in smaller ones: *The Vision of Dante* is an example from an early stage in his development, as the *Mantras* and *A World Requiem* are respectively more radical and conservative examples from his maturity. In the *Dynamic Triptych* and *Quartetto intimo* he produced his most impressive contributions to the genres of concerto and quartet. The vitality, exuberance and technical command of Foulds's best works are remarkable, and they constitute an important and individual contribution to the British music of the early 20th century.

WORKS
(*selective list*)

VOCAL-ORCHESTRAL

The Vision of Dante, concert op, op.7, solo vv, chorus, orch; The Song of Honour (R. Hodgson), op.54, spkr, SSAA ad lib, chbr orch; A World Requiem, op.60, solo vv, boys' vv, chorus, org, orch, 1919–21; 3 Mantras, op.61b, women's vv ad lib, orch

MALCOLM MACDONALD

Foulis, David (*b* Colinton, nr Edinburgh, 8 Oct 1710; *d* Edinburgh, April 1773). Scottish amateur composer. A physician by profession, he studied medicine at Leiden and Reims in the early 1730s and probably picked up some musical training on the Continent at the same time. He was a director of the Edinburgh Musical Society, 1739–40. He became a Fellow of the Royal College of Physicians of Edinburgh in 1737. His main compositions are his *Six Solos for the Violin with a Bass for a Violoncello or Harpsichord*, published as 'composed by a Gentleman' (Edinburgh, *c*1774; ed. M. Brown, Glasgow, 1986); they were probably written slowly over a long period, and are tuneful, with a skilfully written violin part. A *Minuet* and a *March* (both for violin and basso continuo), attributed to 'Dr F', appear in Neil Stewart's *Collection of Marches and Airs* (Edinburgh, *c*1761).

DAVID JOHNSON

Foundation stops (Fr. *fonds d'orgue*; Ger. *Grundstimmen*). Term for the unison- and octave-sounding ranks of pipes of the organ. The French term FONDS D'ORGUE is used more specifically to denote Principal and Flute ranks.

Foundery Chapel. John Wesley's first headquarters (1739–78), where the Methodist style of hymn-singing first developed. *See* LONDON, §I, 7(i).

Foundling Hospital. London charitable institution founded in 1739 by Thomas Coram. *See* LONDON, §I, 5.

Fountain, Primous, III (*b* St Petersburg, FL, 1 Aug 1949). American composer. A largely self-taught musician, he performed on the trumpet and double bass and arranged for jazz ensembles as a youth; he began to compose while attending high school in Chicago. He has won several awards, including the BMI Composition Award (1967), Guggenheim Fellowships (1974, 1977) and the American Academy and Institute of Arts and Letters Goddard Lieberson Fellowship (1984). For three years he enjoyed the patronage of the composer and producer Quincy Jones, who commissioned new work and provided financial support. Under the direction of Michael Tilson Thomas, the Buffalo PO gave the first performance of Fountain's revised *Ritual Dances of the Amaks* in 1977 (with a new second movement commissioned by Thomas) and performed it on a tour that concluded at the Carnegie Hall. This work is characterized by atonality, the use of fragmented melodies, occasional lyrical passages and repeated rhythmic patterns that incorporate folk-jazz rhythms. As illustrated by *Caprice* (1978), his orchestral compositions often contain dramatic contrasts in register and colour. Some of his works share an affinity with dance: in 1995 he received a commission from the Frankfurt Ballet Company, and one of his best-known early works, *Manifestation*, was choreographed by Arthur Mitchell for the Dance Theatre of Harlem. In later years Fountain, who is African American, has explored the music and indigenous instruments of West Africa, alongside the earlier influences on his style, Stravinsky and Miles Davis. (*SouthernB*)

Fouque, (Pierre) Octave (*b* Pau, 12 Nov 1844; *d* Pau, 22 April 1883). French musicologist and composer. After studying classics and harmony at Pau, he went to Paris, where he took organ lessons from Charles Chauvet and was admitted to Ambroise Thomas' composition class at the Conservatoire. In 1869 he competed unsuccessfully for the Prix de Rome, and in 1876 he became a librarian at the Conservatoire. His three operettas, choral works, songs, piano pieces and set of orchestral variations reveal

skill and taste. He contributed to numerous periodicals including *Avenir national*, *Echo universel*, *Le ménestrel*, *République des lettres* and *Revue et gazette musicale*, and wrote several books of substantial historical value, particularly *Michel Ivanovitch Glinka: d'après ses mémoires et sa correspondance* (Paris, 1880); *Histoire du théâtre Ventadour, 1829–79* (Paris, 1881); and *Les révolutionnaires de la musique: Lesueur, Berlioz, Beethoven, Richard Wagner, la musique russe* (Paris, 1882).

Fouquet. *See* FOUCQUET.

Fourd, Thomas. *See* FORD, THOMAS.

Fourestier, Louis (Félix André) (*b* Montpellier, 31 May 1892; *d* Boulogne-Billancourt, 30 Sept 1976). French conductor and composer. He studied at the Montpellier Conservatoire (cello and harmony) and then, from 1909, at the Paris Conservatoire with Dukas, d'Indy, Leroux and Gédalge. In 1925 he won the Prix de Rome for *La mort d'Adonis*. After making his conducting début in Marseilles and Bordeaux he was appointed conductor at the Opéra-Comique (1927–32), and in 1938 he moved to a similar post at the Paris Opéra, having founded in 1928 (with Ansermet and Cortot) the Paris SO, which he conducted until its demise. He also made tours throughout France and abroad, and in 1946–8 he conducted at the Metropolitan Opera. From 1945 to 1963 he was professor of conducting at the Paris Conservatoire, where he radically changed the teaching methods in conducting and trained a whole generation of French conductors. After retiring he taught at the international summer school in Nice. His compositions include a string quartet and orchestral works, some with solo voice.

PAUL GRIFFITHS

Four foot. A term used in reference to organ stops, and by extension also to other instruments, to indicate that they are pitched an octave above the EIGHT FOOT or 'normal' pitch now based on $c' = 256$ Hz. A pipe of average Diapason scale and 4′ (1·2m) in length would in fact speak somewhat lower than $c = 128$ Hz, but the foot too has changed in length since this terminology was first used in the 15th century (Delft Oude Kerk, 1458). In the classic Werkprinzip organ design, the Chair organ is of 4′, the Great of 8′, the Pedal of 16′.

PETER WILLIAMS

Four Freshmen, the. American vocal group. It was formed in 1948 by Don Barbour (*b* Greencastle, IN, 19 April 1927; second voice), Ross Barbour (*b* Columbus, IN, 31 Dec 1928; third voice), Bob Flanigan (*b* Greencastle, IN, 22 Aug 1926; lead voice) and Hal Kratzch (bass), who were studying music in Indianapolis. They gained a recording contract with Capitol Records, aided by the bandleader Stan Kenton. Among their best-known recordings were *In a Blue World* (1952), *It happened once before*, *Mood Indigo* and *Graduation Day* (1956; later recorded in a similar style by the Beach Boys). The group made over 30 albums during the 1950s and 60s including *The Four Freshmen and Five Trombones* (1956) and *The Four Freshmen and Five Guitars* (1960). The group represented a modernizing force in the sphere of close harmony quartets in American popular music, moving away from the barbershop style to introduce elements of jazz. In doing so, they influenced younger groups such as the Hi-Los and the Beach Boys. Although the Four Freshmen continued to perform into the 1990s, there were frequent personnel changes and Flanigan was the only remaining founder member.

DAVE LAING

Fourmentin (*fl c*1560). French composer. He wrote two *quarillons*, descriptive vocal pieces exploiting bell-like melodies (*Réveillez vous tous plaisans amoureux*, for four voices, in RISM 1559[11], and the five-voice *Réveillez vous tous plaisans compaignons*, 1562[4]). Their model was Janequin's *Chant des oiseaux* which begins with the same clarion call 'Resveillez-vous'. These chansons were popular enough to be frequently reprinted. Fourmentin also left one six-voice chanson, in the more conventional courtly style, *Par trop amour me pourchasse* (1559[10]). He may be identifiable with Philippe Fromentin, a singer from the diocese of Noyon, who was a vicar and *maître des enfants* of Reims Cathedral in 1558. (All three chansons are ed. in SCC, x, 1994.)

FRANK DOBBINS

Fourneaux. French family of reed organ makers. Jean-Baptiste-Napoléon Fourneaux (*b* Leard, Ardennes, 21 May 1808; *d* Aubanton, Aisne, 19 July 1846) began his career as a clockmaker. In 1830 he settled in Paris and in 1836 bought the business of Chameroy, a maker of accordions and mechanical organs since 1829. Fourneaux became a significant maker of accordions at the exhibition of 1844 he received a silver medal for his *orgues expressifs*. He built another model of reed organ which he called the 'Orchestrion', and invented the percussion action in reed organs.

His sons Jean-Nestor-Napoléon Fourneaux and Jean-Louis-Napoléon Fourneaux (*b* Paris, 1830) expanded the business which was located in the 10e arrondissement of Paris: in 1860 they were employing 46 workers. Jean-Louis-Napoléon made further improvements to the *orgues expressif*, and was responsible for a number of inventions, including the 'melodina' (1855), the 'pianista pneumatique' (1863), the 'orgue-violiphone' (1879), and the 'piano exécutant' (a PIANO PLAYER; 1883). Jean-Nestor-Napoléon was the author of the *Petit traité de orgue expressif* (Paris, 1863), *Instrumentologie: traité théorique et pratique de l'accord des instruments à sons fixes ... contenent une théorie complète du temperament musicale et des battements* (Paris, 1867) and, with J.B.A.M.J. Déon, *Methode simplifée pour l'accompagnement traditionel ... plainchant sur l'orgue-harmonichordéon* (Paris, 1864).

M.C. CARR/ARTHUR W.J.G. ORD-HUME

Fournet, Jean (*b* Rouen, 14 April 1913). French conductor. He studied at the Paris Conservatoire and made his début at Rouen in 1936. His first appointments were there (1938) and in Marseilles (1940), and from 1944 to 1957 he was music director at the Opéra-Comique in Paris. He

taught conducting at the Ecole Normale, Paris, 1944–62, and was conductor of the Netherlands RPO 1961–8, and artistic director of the Rotterdam PO, 1968–73. Fournet has toured as a guest conductor in Europe, North and South America, Israel and Japan; he conducted the first performance in Tokyo (1958) of *Pelléas et Mélisande*. He made his début with the Chicago Lyric Opera in 1965, and at the Metropolitan in 1987 with *Samson et Dalila*. Admired for his meticulous and exacting craftsmanship, he has a wide repertory that lays particular emphasis on Berlioz, Debussy and Ravel, and he has been much praised for his performances of *Dialogues des Carmélites* on both sides of the Atlantic. His 1955 recording at the Opéra-Comique of Rossini's *Il barbiere di Siviglia*, in French with spoken dialogue, was reissued on CD in 1988. Fournet's other recordings include *Les pêcheurs de perles*, Berlioz's Requiem, Martin's *Maria-Triptychon* (of which he gave the première in Rotterdam in 1969) and works by Dukas and Henkemans.

CHRISTIANE SPIETH-WEISSENBACHER, NOËL GOODWIN

Fournier, Pierre (Léon Marie) (*b* Paris, 24 June 1906; *d* Geneva, 8 Jan 1986). French cellist. He began to study the piano with his mother, but after an attack of polio at the age of nine took up the cello. He had lessons with Paul Bazelaire and André Hekking at the Paris Conservatoire, where he later taught (1941–9), after a period on the staff of the Ecole Normale de Musique (1937–9). A player of firm intellectual control, with smooth tone, easy technique, and a classical turn of phrase, he nonetheless cultivated a wide repertory and was an effective advocate of contemporary music. In 1925 he played in the first (private) performance of Fauré's String Quartet. Works written for him include Martin's Cello Concerto and Poulenc's Cello Sonata; among notable premières were sonatas by Martinů and Roussel's Cello Concertino. In 1943 he took Casals's place in trios with Thibaud and Cortot; in 1947 he joined Szigeti, Primrose and Schnabel for chamber concerts in many European centres, and the following year made his first tour of the USA. He later played in a trio with Szeryng and Kempff. Fournier made many recordings, including the Bach suites, Dvořák's Cello Concerto, Strauss's *Don Quixote* under Karajan and Beethoven's cello sonatas with Kempff. He was made an Officier of the Légion d'Honneur in 1963. Fournier's brother Jean (*b* Paris, 3 July 1911), a violinist, studied at the Paris Conservatoire and privately with Enescu, Thibaud and Kamenski. He played in a trio with Janigro and Badura-Skoda, and in sonata repertory with his wife, the pianist Ginette Doyen. From 1966 to 1979 he taught at the Paris Conservatoire.

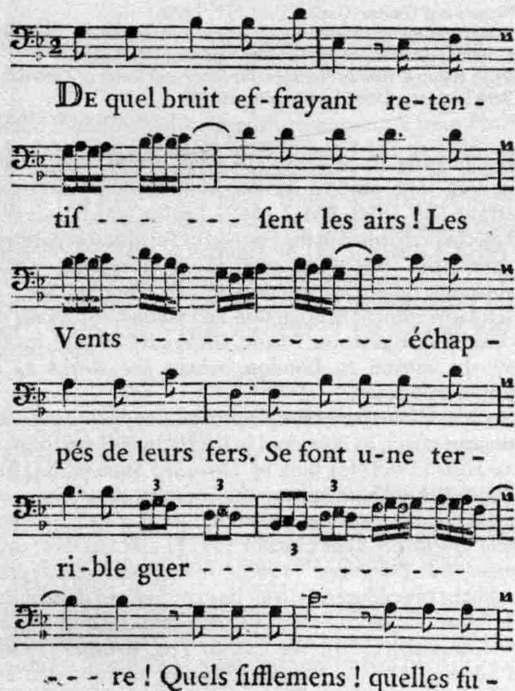
ROBERT ANDERSON



Fournier, Pierre-Simon [*le jeune*] (*b* Paris, 15 Sept 1712; *d* Paris, 8 Oct 1768). French typographer. The son of a typefounder, he was cutting punches and casting type by 1736, and in 1739 was registered in this craft with the printing section of the Chambre Syndicale of Paris. He issued his first specimen book, *Modèles des caractères de l'imprimerie*, in 1742. It was a tremendous achievement, showing (among other material) 4600 letters that he had cut in a wide range of styles with their sizes correlated in a logical and mathematical way. This system, quite new in typefounding, he had evolved in 1737, and he showed it in his *Modèles* as 'Table des proportions des differens caractères de l'imprimerie'.

Fournier's power of analysis and prodigious technical skill were clearly demonstrated in the six types that he devised for the printing of music. Two were for plainchant, one was for 'Hugenot music'. Three were for songs and instrumental music. The first of this group was designed for double impression, with the staff lines printed first and the notes and other signs overprinted in a second pass through the press (1756). The other two (1760) were based on a variation of a technique originated by Breitkopf which required only one pull at the press to deliver a complete copy.

In the foreword to his *Essai d'un nouveau caractère de fonte*, in which he demonstrated his 1756 type, Fournier drew attention to the stagnation that had settled over French music printing, claiming that French publishers could produce music characters in the form of squares or diamonds only. He had devised a method of rendering music from type as if it had been printed by copperplate engraving, but had laid it aside as only one person in France was allowed to undertake this sort of printing (Christophe-Jean-François Ballard, music printer to the king, 1750–65). Breitkopf had revived his interest in the subject, however, and the types he showed in the specimen were the outcome; he offered six short pieces of music set in round-headed notes as if engraved, with the words of the songs in his elegant italic, and the decorative title-page framed by some of his typographical border units: all very much in the taste of the day. Fournier had been 'obliged', as he wrote, 'to be the inventor, the cutter, the founder, the compositor and the printer'. This quotation defines his notion of the complete typographer: the master of a complex of related skills, a craftsman equipped and free to practise them all.

Unfortunately the regulations of the printing trade denied Fournier, as a cutter and founder of types, the right to print: the Ballard monopoly denied him the right to exploit his music. So in 1756 he applied to the Chambre Syndicale to be admitted as a printer, but was refused. He presented a petition, and after considerable controversy, on 27 July 1764, Parlement confirmed Ballard as sole printer of music to the king but decreed also that any other printer was authorized to print music should he so wish. Ballard, in the eyes of the establishment of the day 'a lazy man without much talent', took a serious view of this threat to his interest. On 23 October 1764, to demonstrate his still privileged status, he made a gesture towards having some of Fournier's music type seized at the officeof a printer who was using it to produce a book that was to be published by subscription. It was a gesture without substance: the Ballard monopoly had been broken.

During the time Fournier's petition was under consideration the reporter of the Grand Conseil had asked for a memorial on 'the affair of the music characters'. Fournier wrote one, and having extended the historical part 'to make it more interesting' he published it as a general account of typographical music printing (*Traité historique et critique*, 1765). Though it is polemical, the work contains much source material collected from the archives of letter cutters and founders and from notarial records, court registers and elsewhere, which gives it permanent value. The *Traité* is rounded off with an 'Ariette, mise en musique par M. l'Abbé Dugué à Paris, des nouveaux

Fournier's 'petite musique' from Jean Monnet's 'Anthologie françoise', ii (Paris: Barbou, 1765)

caractères de Fournier le jeune', in which his 'petite musique' and 'grosse musique' are used in two settings of words: the 'petite musique' shown as a vocal line only, the 'grosse musique' as a vocal line with an accompaniment for the harp.

In 1765 Fournier had the satisfaction of seeing his 'petite musique' used to splendid effect in Jean Monnet's *Anthologie françoise* (see illustration). Ideally suited to the scale of the pocket book, the type was adopted by printers to set favourite airs in comedies with music and for similar purposes. The type survived well, and as late as 1819 was in case at the Imprimerie Royale in Paris.

H. EDMUND POOLE/STANLEY BOORMAN

Fourniture (Fr.). French MIXTURE STOP. *See under* ORGAN STOP.

Four-note sol-fa. A traditional solmization system; *see* FASOLA.

Fourth (Fr. *quarte*; Ger. *Quarte*; It. *quarta*; Gk. *diatessarōn*). The INTERVAL between any two notes that are three DIATONIC scale degrees apart (e.g. C–F, E♭–A♭). Unless specified, the term usually implies 'perfect 4th', which is the sum of two whole tones and a diatonic semitone. The augmented 4th, the sum of three whole tones (i.e. the sum of a perfect 4th and a chromatic semitone), can occur diatonically (e.g. C–F♯ in G major or E minor); the diminished 4th, which is equal to a perfect 4th less a chromatic semitone (e.g. C–F♭, F♯–B♭), is never diatonic. The ratio of the perfect 4th in JUST INTONATION is 4:3.

The 4th has a unique position in Western music because it has been regarded as a PERFECT INTERVAL (like the unison, 5th and octave) and a dissonance at the same time. In ancient Greek music the basis of melody was the TETRACHORD, a set of four pitches encompassed by a 4th. The earliest forms of medieval parallel ORGANUM favoured it as the interval between the *vox organalis* and *vox principalis*. With the further development of polyphonic music in the 12th and 13th centuries, the 5th replaced the 4th as the most important CONSONANCE after the octave and the unison. By the 15th century the 4th appeared as a consonance only between the upper parts of a vertical sonority, for example in 6-3 chords of the fauxbourdon style and at 8-5-1 cadences (e.g. D–A–D); composers of the later 15th century, including Du Fay, sometimes deliberately avoided the 4th in three-part writing (*see* NON-QUARTAL HARMONY), and Tinctoris deemed it a dissonance in his *Terminorum musicae diffinitorium* (*c*1473).

Since the Renaissance the 4th has been considered a consonance only when it is understood as the inversion of the 5th. By itself it is considered not so much dissonant as 'unstable'; reckoning from the lower note, it lies halfway between the 3rd and the 5th that make up a triad and must therefore resolve to one of these (usually the 3rd). With the avoidance of triadic harmony in the 20th century, in both rigorously non-tonal and 'neo-modal' music, the 4th has come back into use as an important vertical interval. Moreover, chords built of perfect 4ths have come to be regarded as stable harmonic structures (particularly in the music of Hindemith; their use in Schoenberg's Chamber Symphony no.1 and Bartók's Concerto for Orchestra is well known), and the tonic 'triad' in which the 4th has been substituted for the 3rd (in C major, C–F–G–C instead of C–E–G–C) has been used effectively by composers like Stravinsky as the final sonority of a tonal work.

WILLIAM DRABKIN

Fourth flute. A RECORDER with lowest note *b♭′*, a 4th above the treble instrument.

Four Tops, the. American vocal group. Its members are Levi Stubbs (*b* Detroit, 1938), Abdul 'Duke' Fakir (*b* Detroit, 1938), Renaldo 'Obie' Benson (*b* Detroit, 1937) and Lawrence Payton (*b* Detroit, 1938; *d* Detroit, 20 June 1997). As the Four Aims, they cultivated the neat, jazz-influenced harmonies associated with such groups as the Hi-Los and the Four Freshmen, but as the Four Tops they made their international reputation during the mid-1960s with a series of stirring recordings composed and produced for Motown Records by Holland, Dozier and Holland. Their records featured Stubbs's gruff, pleading lead vocals

ably supported by the precise harmonies of the other members. Hit songs such as *Baby, I need your loving, I can't help myself, It's the same old song, Standing in the Shadows of Love* and *Bernadette* were characterized by swelling instrumental passages, dramatic pauses, unexpected rhythmic changes and elaborate studio production; the intricate arrangement of *Reach out, I'll be there* included oboes, Middle Eastern drums and flutes. In 1968 Holland, Dozier and Holland left Motown and the Four Tops's recording career went into artistic decline. Subsequently, they were successful reprising their Motown hits as nightclub and concert performers. For further information see N. George: *Where did our Love Go? The Rise and Fall of the Motown Sound* (New York, 1985).

DAVE LAING

Fou Ts'ong (*b* Shanghai, 10 March 1934). British pianist of Chinese birth. He grew up in a richly varied cultural milieu (his father was an eminent literary scholar) and had piano lessons from the Italian pianist and conductor Mario Paci in Shanghai until the outbreak of civil war in 1948. After gaining the third prize at the 1955 Chopin Competition in Warsaw, at which he was given the special award for playing mazurkas, Fou was offered a scholarship to study with Zbigniew Drzewiecki at the Warsaw Conservatory. In 1958 he decided to settle in London, which has remained his base. Since then he has toured in East Asia, Australia and South America, as well as becoming a particularly familiar recitalist throughout the United Kingdom.

His musical taste is wide-ranging. With a delicate touch and keen sensibility, he excels in composers requiring finesse and varied tone colour, and these qualities have led to notable performances of Mozart, late Schubert and Debussy. His recitals also frequently feature a substantial group of Chopin's works, although in recent years a tendency to rely on key bravura pieces by the composer has at times revealed some limits to his range of imagination as an interpreter.

JAMES METHUEN-CAMPBELL

Fowke, Edith (Fulton) (*b* Lumsden, nr Regina, SK, 30 April 1913; *d* Toronto, 28 March 1996). Canadian folksong collector. After studying literature and history at Saskatchewan University, she moved to Toronto in 1938 and was spurred to collect English-language folksongs in Ontario in the 1940s by a perceived dearth of recordings and publication of local music. She conducted fieldwork in southern Ontario, discovering a rich heritage of folk music especially in the Ottawa valley and Peterborough regions while also working for CBC radio. The author and editor of numerous books, articles and folksong collections, she was professor of folklore at York University, Toronto (1971–93). Recognized as a dedicated preserver and popularizer of folk traditions, her work lies in the tradition of such Canadian scholars as Marius Barbeau and Helen Creighton.

GORDON E. SMITH

Fowler, Jennifer (*b* Bunbury, 14 April 1939). Australian composer. She studied at the University of Western Australia (BA 1960, BMus 1967), during which time she had pieces performed in the Festival of Perth and broadcast by the ABC. She then worked as a teacher while establishing herself as a composer. In 1968 she won a Dutch Government Scholarship and studied for a year at the Studio of Electronic Music, University of Utrecht. In 1969 she moved to London, where she works as a freelance composer.

Her music often uses simple procedures to striking and distinctive effect, as is evident in the frequently performed *Blow Flute* (1983) for flute or *Threaded Stars* (1983) for harp, a work which explores the complex possibilities of a single melodic line. Several choral works, such as *Veni Sancte Spiritus – Veni Creator* (1971) and the haunting *Lament for Dunblane* (1996), reflect and reinterpret plainchant procedures. Fowler has maintained close links with Australia, as can be heard in works such as *Chant with Garlands* (1974), *We Call to You, Brother* (1988) and *Singing the Lost Places* (1996) for soprano and 14 instruments; *Singing the Lost Places* was commissioned by the Festival of Perth, and expresses the concept of 'singing the landscape', using Aboriginal place names from Western Australia as a text. Her music has been performed at many international festivals and has won several awards – *Ravelation* for string quintet (1971) was joint winner of the Radcliffe Award of Great Britain in 1971 and also won first prize in the International Competition for Women Composers in Mannheim in 1975.

WORKS

Orch: Look on this Oedipus, 1973; Chant with Garlands, 1974; Ring out the Changes, str, bells, 1978; Plainsong for Strings, 1992

SOPHIE FULLER

Fowler, John (*fl c*1460). English composer. A John Fowler was clerk of the Chapel Royal from 1433 to 1467, and may be the composer of a three-voice *O quam glorifica luce* in *GB-Cmc* Pepys 1236, which is attributed simply to 'Fowler'. The name, however, was a common one: a John Fowler was a member of the Queen's Chapel in 1411 and was still living in 1434; another (*d* 1472) was in charge of the King's Free Chapel in Nottingham Castle; and a third was a later member of the Chapel Royal, 1499–1518.

SYDNEY ROBINSON CHARLES

Fox. American firm of oboe and bassoon makers. The firm was founded in 1949 by Hugo Fox (*b* South Whitley, IN, 2 Feb 1897; *d* South Whitley, IN, 29 Dec 1969), a bassoonist with a serious interest in the acoustics of his instrument, in the wooded district of Indiana where he was born. From 1922 unitl that year he had been principal bassoonist of the Chicago SO; he also taught for 15 years at Northwestern University, as well as having worked as a bassoon reed-maker and repairman. Specializing in bassoons and in oboe and bassoon reeds, by 1960 he had produced 60 bassoons, 5,000 reeds for bassoon, and 10,000 for oboe. That year he was joined by his son Alan (*b* 1 April 1934), who in 1963 took over the managment. Despite the setback of a potentially disastrous fire in 1974, the company, which had recently added double bassoon and oboe to its production, has successfully continued to consolidate and expand its operations. Their bassoons in particular have in recent years enjoyed increasing favour among orchestral players worldwide. In addition to a full range of professional instruments, the company supplies under the Renard brand name inexpensive models for students. For this market the firm has pioneered the use of polypropylene, a synthetic material found to maintain excellent standards of intonation and response while offering advantages of durability and prive. The wood used for their bassoons, in addition to North American and European varieties of maple, is grown locally.

Although by training a chemical engineer rather than a musician, Alan Fox has became an acknowledged expert on double-reed acoustics. In an important article 'Defining the Two Types of Bassoons – Long and Short Bore' (*The Instrumentalist*, xxiii/4, 1968–9, pp.53–4), he identified two contrasting acoustical designs among the Heckel-system bassoons then in use, which he has since supplied as alternative models. Thanks to enlightened management and a constant process of research and development, Fox has now become the world major supplier of double-reed instruments, with a workforce of 80 and exporting one quarter of its production.

WILLIAM WATERHOUSE

Fox, Charles Warren (*b* Gloversville, NY, 24 July 1904; *d* Gloversville, 15 Oct 1983). American musicologist. He studied at Cornell University, taking the AB in 1926. He was an assistant in psychology at the University of Illinois (1926–9) and then returned to Cornell, taking the PhD in 1933. He also worked at the universities of Heidelberg (1928) and Munich (1929). In 1932 he joined the faculty of the Eastman School of Music as an instructor in psychology; he taught musicology there from 1934. He was also editor of *Notes* (the quarterly journal of the Music Library Association, 1941–2) and the *Journal of the American Musicological Society* (1952–9) and was president of the MLA, 1954–6. He was made professor emeritus in 1971.

Fox wrote on both the psychology of music and historical musicology, particularly on the music of the Renaissance. A symposium was held in his honour at Eastman in 1972, and the papers from this conference along with some additional articles were published as a Festschrift in 1979 (*Essays on Music for Charles Warren Fox*, ed. J.C. Graue, Rochester, NY, 1979).

PAULA MORGAN

Fox, Christopher (*b* York, 10 March 1955). English composer. He attended Liverpool University (BA 1976) where he studied with Hugh Wood, following which he continued composition studies with Jonathan Harvey at Southampton University (BMus 1977). He was awarded the DPhil at York University in 1984. He has been guest composer for the Darmstadt Ferienkurse (1984–94) and the DAAD Kunstlerprogramm in Berlin (1987), and became a senior lecturer in composition at Huddersfield University (1994) and chair of the British section of the ISCM in 1988. Fox won the Performing Right Society Prize at the Huddersfield Contemporary Music Festival in 1981. Fox's music is particularly notable for its variety. Common factors underlying the diverse works are an emphasis upon musical processes rather than individuated gestures and a general distrust of grandiose rhetoric, striving instead for a Stravinskian dryness and clarity of line.

Fox's work combines a love of pure sound and a distancing of the self from the creative process, in a manner that recalls both Cage and Feldman, with a more European concentration upon sophistication and intricacy of form. His aesthetic world comes perhaps closest to that of the group of composers such as Walter Zimmermann, Klarenz Barlow and Gerald Barry, who worked with Stockhausen and Kagel. Like some of these composers, Fox makes use of compositional algorithms and computer programs to generate some parameters in a work.

After an initial interest in music theatre, the earlier works of Fox prioritise process to a degree that approaches formalism; subsequently, beginning with the piano piece *More Light* (1988), there is a greater focus upon musical material, and a wider range of influences. These include the work of Kurt Schwitters, the writings of Derek Jarman and texts from the Glorious Revolution (in *A Glimpse of Sion's Glory*, 1992). Fox has also collaborated frequently with poets and artists.

WORKS

Music theatre: darkly, 4 pfmrs, 1981; Bewegung, 3 pfmrs, 1981
Vocal: Magnification, 1v, tape, 1978–80; American Choruses, 16vv (SATB), 2 elec org, 1979–81; 'L', ATTB, 1980; Alleluia, ATTBB, 1981, rev. 1997; 83 Hallelujahs, amp SATB, 1983; Missa est, Ct, T, recs, 4 viols, rebec, portative org, bells, 1983; Threnos, 1v, 1983; Ci-Gît, Mez, a fl, b cl, prep pf, va, vc, 1987; A-N-N-A Blossom-time, 1v, pf, 1988; I Sing for the Muses and Myself, 1v (ad lib), pf, 1991; A Glimpse of Sion's Glory, SSAATTBB, insts ad lib, 1992; Louisiana, 1v, pf, 1992; Trummermusik, Mez, hurdy-gurdy, 1993; Vanished Days (D. IAN PACE

Fox, Erika (*b* Vienna, 3 Oct 1936). British composer. She came to England as a refugee at the age of three. Fox won a scholarship to the RCM, where she studied the piano with Angus Morrison and composition with Bernard Stevens; she later continued her composition studies with Jeremy Dale Roberts and briefly with Birtwistle. Her highly individual music is influenced by the traditional music of Hungary and Romania as well as ḥasidic *niggun* and Jewish liturgical chant. She has written for a wide variety of ensembles, from solo works such as *Nick's Lament* (1984) for guitar to powerful orchestral music such as *Osen Shomaat* (1985). Her quartet *Kaleidoscope* (1983) won the Finzi Award. Her works have often been closely linked to music theatre: her puppet music drama *The Bet*, to a libretto by Elaine Feinstein, was performed at the Huddersfield Festival and in London at the South Bank and the Almeida Theatre. Her opera *The Dancer Hotoke* (1991), to a libretto by Ruth Fainlight, was commissioned by The Garden Venture (a scheme set up by the Royal Opera for the purpose of staging new, small-scale works) and was nominated for an Olivier Award. Fox has lectured on music at academic institutions in London, York and Sydney; in 1998 she taught and was visiting composer at the University of Auckland.

WORKS
(*selective list*)

Stage: The Slaughterer (Fox, after I.B. Singer), 1975; The Bet (E. Feinstein), 1990; The Dancer Hotoke (R. Fainlight), 1991
Orch: Cocytus, 1973; Litany, str, 1981; Osen Shomaat, 1985
Vocal: 8 Songs from Cavafy, Mez, fl, ob, bn, vn, pf, 1968; 9 Lessons from Isaiah, B, str qt, 1970; Voices, 5 solo vv + perc, 1976; Jeder Engel ist schrecklich, S, Bar, cl + b cl, hn, t trbn, b trbn, str qt, db, 1976; Frühling ist wiedergekommen, S, pf, 1988
Chbr: Round, 8 vn, 3 va, 3 vc, db, 1972; Lamentations for Four, 2 vc, 2 perc, 1973; Octet for Two, vc, pf, tape, 1977; Omega Serenade, 4 gui, 1978; Paths where the Mourners Tread, fl + pic + a fl, ob, hp, perc, vn, va, vc, db, 1980; Kaleidoscope, fl, hp, vib, vc, 1983; Quasi una cadenza, cl, hn, pf, 1983; Shir, wind qnt, tpt, trbn, str qt, db, pf, perc, 1983; Hungarian Rhapsody, fl + a fl, eng hn, A-cl + E♭-cl + b cl, tpt, pf, 1989; Tuned Spheres, cl, tpt, pf, 1995; Davidsbündler Lieder, fl, pf, 1999; David singt vor Saul, pf, ens, 2000
Solo inst: Epitaph for Cathy, basset cl + perc, 1980; Nick's Lament, gui, 1984; Rivka's Fiddle, va, 1986; On Visiting Stravinsky's Grave at San Michele, pf, 1988; The Moon of Moses, vc, 1992

SOPHIE FULLER

Fox, Roy (*b* Denver, 25 Oct 1901; *d* Twickenham, 20 March 1982). American band-leader. In 1917 he started to play the cornet professionally, leading his own bands throughout the USA from 1920. His distinctive muted style earned him the nickname 'the whispering cornetist'. After working as musical director for Fox Film Studios in Hollywood, he went to Britain to lead an American band at the Café de Paris (1930) and formed a recording band for Decca (1931) which included several notable British musicians including Lew Davis, Spike Hughes and Al Bowlly. He was resident band-leader of the Monseigneur Hotel (1931–2), Café Anglais (1932–3), Kit-Cat Club (1933–4) and Café de Paris (1934) and made national theatre tours (1934–8). His group was one of the most consistent and popular recording and radio bands in Britain during the 1930s. Illness caused Fox to go to Australia in 1938 and, unable to return to Britain during the war, he led small bands in New York. In 1946–7 he toured Britain with a new band but following bankruptcy

retired shortly afterwards to run an entertainment agency. He wrote an autobiography, *Hollywood, Mayfair, and all that Jazz: the Roy Fox Story* (London, 1975), and is discussed in A. McCarthy: *The Dance Band Era* (London, 1971).

Fox, Sam. American firm of music publishers. It was founded in 1906 in Cleveland, Ohio, and pioneered the publication of music composed for films; it was the first to publish original scores for major film companies, including Paramount and Warner Bros., and supplied scores for short subjects, 'March of Time' newsreels, film travelogues and documentaries. The company was also one of the first to publish instructional music and has continued to produce didactic works for jazz piano, guitar and accordion. In 1917 the firm became the exclusive publisher of John Philip Sousa, and it represented him until his death in 1932. About 1935 the company moved from Cleveland to New York; subsequently an administrative office was opened in Santa Barbara.

W. THOMAS MARROCCO, MARK JACOBS

Fox, Virgil (Keel) (*b* Princeton, IL, 3 May 1912; *d* West Palm Beach, FL, 25 Oct 1980). American organist. He studied at the Peabody Conservatory with Louis Robert, with Wilhelm Middelschulte in Chicago (1928–9) and with Marcel Dupré in Paris (1932–3). He made his début at the age of 14 in Cincinnati, and at 19 played in the Kingsway Hall, London, and in Carnegie Hall, New York. He was head of the organ department at Peabody (1938–42) and organist at Riverside Church, New York (1946–65). In 1962 he joined Catharine Crozier and E. Power Biggs in inaugurating the organ at Philharmonic Hall, New York. Fox and Biggs rivalled one another as the best-known organ recitalist in the USA. While Biggs achieved fame from broadcasting and recording, Fox was noted for his dazzling technique and his willingness to make any changes in written scores that would render them more accessible to the ordinary music lover. This was demonstrated not only in his recordings but also in his flamboyantly successful career at Riverside Church and in his energetic tours of the country, playing a large electronic organ that travelled with him together with an accompanying light show. He was a highly controversial artist who talked to the audience during his concerts and whose strong religious beliefs were said to be very much a part of this talk and of his enormous success on the concert stage.

VERNON GOTWALS/R

Fox Strangways, A(rthur) H(enry) (*b* Norwich, 14 Sept 1859; *d* Dinton, nr Salisbury, 2 May 1948). English musicologist, critic and editor. He was educated at Wellington College and Balliol College, Oxford (MA, 1882), and studied music for two years at the Berlin Hochschule für Musik. He became a schoolmaster at Dulwich College (1884–6) and a form master at Wellington (1887–1910), where he succeeded Alan Gray as the music master in 1893, a post he held until 1901, when he was made house master in college. During these years he wrote a Wellington College German Grammar and visited India, which aroused his interest in Indian music. When he left Wellington in 1910 he returned to India for eight months, collecting material for a book which is still a classic on its subject, *The Music of Hindostan* (1914); he also acted as Rabindranath Tagore's unpaid literary agent, 1912–14, obtaining Tagore valuable contracts and making possible his international career. Fox Strangways settled in London in 1911 and began to write criticism for *The Times*, soon after becoming a member of its staff. In 1925 he left to become music critic of *The Observer*.

To supplement the inevitable deficiencies of newspaper criticism he founded at his own risk and under his own editorship the quarterly *Music and Letters*, of which the first number appeared in January 1920. After 17 years he relinquished responsibility for it and the editorship, which passed to Eric Blom (1937–50; 1954–9). The 'Letters' of the title indicated not so much an equal concern with literary subjects as the highest kind of literary treatment of musical subjects; however, the translation of German lieder texts was for a number of years a special concern of his. He published *Schubert's Songs Translated* (London, 1925) with Steuart Wilson and a similar volume of Schumann (1929); he continued to translate the texts set by Brahms, Liszt, Wolf and Richard Strauss long after the movement of taste for lieder in the vernacular had passed. Another earlier interest, possibly connected with his encounter with unharmonized melody in India on his first visit, was folksong. In 1908 he joined the Folk Song Society and in 1929 contributed the chapter on folksong to the introductory volume of the 1929 edition of *The Oxford History of Music*; in 1933 he collaborated with Maud Karpeles in the biography of Cecil Sharp. He remained active in journalism until the outbreak of war in 1939, when he retired.

H.C. COLLES/FRANK HOWES

Foxtrot. A social dance of the 20th century. The foxtrot and such ephemeral dances as the 'horse trot', 'fish walk', 'turkey trot', 'grizzly bear', 'bunny hug' and other canters or 'trots' had their origins in the one-step, two-step and syncopated ragtime dances in the USA shortly after 1910. The basis of them was a slow gliding walk at two beats per step and a fast trot at one beat per step. The tempo varied between 30 and 40 bars per minute, and the dance could be done to almost any popular tune in simple duple metre with regular four-bar phrases. It is claimed to have been introduced to the USA by Irene and Vernon Castle in 1914. Both W.C. Handy and Irene Castle claimed that James Reese Europe (the Castles' musical director) created the dance to the accompaniment of Handy's *Memphis Blues*. The foxtrot reached London in summer 1914 and

the Continent immediately after World War I. It consisted in its original form of a box-step completed by a gliding walk performed forwards and backwards and quick runs of trotting steps and kicks. During the 1920s it developed into two distinct styles, a slow dance in the English style (later called the 'slowfox' in German-speaking countries) and the 'quickstep' (in German-speaking countries called the 'foxtrott').

The slow foxtrot was fashionably regarded as representing a rebellion against 19th-century styles of social dance. It was danced at about 30 bars per minute, with great attention given to deportment, using smooth gliding movements. The quickstep developed as bands took up faster jazz-influenced music, and became one of the most popular dances in England after a visit by Paul Whiteman's band in 1923. The foxtrot continued to absorb elements from and to give rise to other dances, including the black bottom, Charleston and shimmy. It has remained a popular dance in competitions and ballrooms, but the term is often now used in general reference to slow ballroom dancing.

PAULINE NORTON

Fraburgadi. *See* TIEFFENBRUCKER family.

Fracassini, Aloisio Lodovico (*b* Orvieto, 1733; *d* Bamberg, 9 Oct 1798). Italian violinist and composer, active in Germany. He studied under Tartini in Padua and under Ferrandini in Munich. In 1752, on Tartini's recommendation, he became violinist at the court of Adam Friedrich von Seinsheim, later Prince-Bishop of both Bamberg and Würzburg. Fracassini established himself at both towns in the joint court chapel, marrying the principal court singer, Anna Catharina Bayer, in 1762. He became Konzertmeister in 1764, and on the death of Franz Georg Wassmuth in 1766 assumed responsibility for the orchestra and opera. With the accession of Franz Ludwig von Erthal (1779–95) the court musical establishment was divided, and Fracassini settled permanently in Bamberg. In 1792 he wrote a memorandum on the regeneration of the court music, which had declined under Franz Ludwig, and with the accession of Christian Franz von Buseck in 1795 he was able to restore the orchestra, as attested by the accounts of Nicolai, von Murr and Wackenroder.

Fracassini's sacred and secular compositions were highly thought of by his contemporaries, but only a published set of *Vesperlieder* for two voices and continuo (Würzburg, 1779), three quartets (*D-HR*), seven sonatas for violin and continuo (*US-BEm*) and a motet, *Sonate montes saltate fontes* (*D-TEGha*), are now extant. Umstatt's inventory of music composed for the Bamberg court (1762) lists two arias for soprano, one serenade and five symphonies by Fracassini; his *azione teatrale Il natal di Giove* was destroyed in 1945. Fracassini had a high reputation as a violinist and as the director of orchestral and operatic performances; along with J.L. Schmitt, another Tartini pupil, he was influential in establishing Tartini's methods in Bamberg and Würzburg. His most important pupil was the Bamberg theatre conductor Anton Dittmaier, whom E.T.A. Hoffmann briefly and unsuccessfully replaced in 1808.

HANNS DENNERLEIN/R

Frajt, Ludmila (*b* Belgrade, 31 Dec 1919). Serbian composer of Czech descent. She was a pupil of Milojević and Slavenski at the Belgrade Music Academy; later she worked as music editor for the Avala film company and for Belgrade radio and television. A composer with a particular sensitivity towards timbre, she successfully assimilated elements of post-serial *Klangmusik* into her musical style, which is generally lyrical and intimate. Her vocal music, which is highly expressive and refined, is often inspired by folk music and rites, as exemplified by *Pesme rastanka* ('Songs of Departure', 1967) and *Zvona* ('Bells', 1981).

WORKS

2 Preludes, hp, 1966; Pesme rastanka [Songs of Departure], chorus, 1967; Asteroids, elecs, 1968; Pesme noći [Nocturnal Songs], female chorus, chbr orch, 1970; Lullaby, S, toys, 1971; Silver Sounds, str qt, 1972; Eclogue, chbr orch, 1973; Tužbalica [Dirge], female chorus, 1973; Kres [Midsummer Night], 3 choral groups, 1975; Nocturno, elecs, 1976; Figure u pokretu [Moving Figures], elecs, 1978; Zvona [Bells], chorus, tape, 1981; Music for 13 Str, 1983

MELITA MILIN

Frame drum. Directly struck drum (membranophone) with one or two heads stretched over a frame or hoop. *See* DRUM, §I, 2(vi) and TAMBOURINE.

Framery, Nicolas Etienne (*b* Rouen, 25 March 1745; *d* Paris, 26 Nov 1810). French writer, theorist and composer. While still a student in Paris, he wrote a comedy, *La nouvelle Eve* (1763), to which the censor objected; he then revised it and, as *Nanette et Lucas* with ariettes by the Chevalier d'Herbain, it had some success at the Comédie-Italienne in 1764. In 1768 his *La sorcière par hasard*, an *opéra comique* to his own text, was privately performed; its favourable reception may have led to his appointment in the same year as superintendent of music to the Comte d'Artois. The work was later revived with some success at the Comédie-Italienne, and the score was published.

Framery was not encouraged to pursue a career as a composer, however, and devoted himself to criticism, theoretical works and to writing and adapting librettos. From 1764 to 1768 he collaborated on Mathon de la Cour's *Journal de musique*. From 1770 to 1771 he edited the *Journal de musique historique, théorique, et pratique*; his 'Quelques réflexions sur la musique moderne', which appeared there in 1770, showed an unusual interest in German music, particularly that of Haydn, and attributed some of Philidor's qualities to its influence. However,

under the influence of the Encyclopedists, he espoused the cause of Italian music in France, opposing Gluck not as a *piccinniste* but as partisan of Sacchini. He adapted Sacchini's *L'isola d'amore* for the French stage (*La colonie*, 1775), and subsequently tried to persuade the composer to come from London. His adaptation of *L'olympiade* was intended for the Opéra, but rejected through Gluckist opposition; with spoken verse dialogue, it was given with success at the Comédie-Italienne in 1777 and formed a rallying point for the Italian party before Piccinni's first French opera (*Roland*, 1778). Framery adapted other Italian works for various theatres, and (according to Lajarte) assisted with the libretto of Sacchini's first work for the Opéra, *Renaud* (1783). In 1784 he won a competition with a libretto, *Médée*, based on an English tragedy by Glover, which he intended for Sacchini. His own setting of it, after the latter's death in 1786, was never completed.

Framery reviewed performances at the Opéra, Théâtre Feydeau and Concert Spirituel for the *Mercure de France*, and there published an accusation of plagiarism against Gluck (September 1776) and a eulogy of Sacchini (October 1786). He edited the *Calendrier musical universel* (1788–9) and translated poems of Ariosto and Tasso, and Azopardi's *Il musico prattico*. Framery was appointed editor instead of Suard of the musical part of the *Encyclopédie méthodique* (i, 1791). He enlisted the help of Ginguené and the Abbé Feytou, but must be held responsible for its erratic quality. His own contributions include a further attack on Gluck and commentaries on reprinted articles of Rousseau (*Dictionnaire*) and D'Alembert (*Encyclopédie*), but his work on theory of composition is of limited value. In 1802 he won a prize for his *Discours* on music and declamation, in which his ideas on prosody receive their fullest expression. Framery's admiration for Italian music led him to a dogmatic attitude on vocal melody, for which he demanded strict periodicity; hence he criticized Gluck's arias but allowed merit to his instrumental compositions.

An early advocate of a conservatory for Paris, Framery was involved in the organization of the Conservatoire in 1795. In his last years he was correspondent of the Institut, working on the *Dictionnaire des Beaux-arts* edited by A.-L. Millin; he also established and controlled an agency for the protection of authors' rights. He left at his death several unpublished musical essays, including a notice on the violinist Gaviniès. A number of airs by him, mostly in instrumental arrangements, were published in contemporary anthologies, and one appeared as a supplement to the *Journal de musique* (1770).

GERARD BÉHAGUE

Français, Jacques Pierre (*b* Paris, 3 July 1923). American violin dealer and restorer, of French birth. His family has been in violin making since the end of the 19th century, while their business origins can be traced back to Nicolas Lupot. Français was apprenticed during the Occupation to Victor Aubry at Le Havre, but after service with the Army of Liberation went to Mirecourt to work with Georges Apparut. He next went to New York for a period in the Rudolph Wurlitzer shop and decided to stay and establish his own business, which he opened in 1951 in the New York premise vacated by Emil Herrman. In addition to his activities as a dealer, he built up a good reputation for repairs and adjustments. About 1964 he was joined by two first-class restorers from the Wurlitzer workshop, René Morel and Luiz Bellini; the scope of the business expanded and in the later part of the century it cared for the needs of most of the USA's finest string players. In 1994 the business divided, Français continuing work as a dealer and Morel taking charge of the workshop. He formally retired from active violin dealing at the end of 1999. See *VannesE*.

CHARLES BEARE/PHILIP J. KASS

Françaix, Jean (René Désiré) (*b* Le Mans, 23 May 1912; *d* Paris, 25 Sept 1997). French composer and pianist. He was born into a musical family: his mother was a singer and teacher of singing, his father Alfred a composer, pianist, musicologist and director of the Le Mans Conservatoire, and it was they who shaped his earliest musical education. His precocious gifts were recognized by Ravel, who wrote to Alfred Françaix: 'Among the child's gifts I observe above all the most fruitful an artist can possess, that of curiosity: you must not stifle these precious gifts now or ever, or risk letting this young sensibility wither.'

His parents sent his first composition, a little piano suite *Pour Jacqueline*, to Editions Sénart in 1922. Marcelle de Manziarly, a composer on the publisher's selection panel, steered the budding musician towards Nadia Boulanger, who took charge of his study of composition and later played or conducted the first performances of several of his works, notably at the salon of the Princesse de Polignac. He also studied the piano at the Paris Conservatoire with Isidore Philipp and won a *premier prix* in 1930; an excellent pianist, he gave dazzling public performances of his own work. He was the regular accompanist of numerous interpreters, especially the cellist Maurice Gendron; he undertook many tours with Gendron and with the Trio Pasquier. His daughter Claude, also a pianist, was often his duet partner. She played with him in the first performance of his Concerto for Two Pianos (1965). He frequently performed his own works in cities such as Berlin, London, New York and Boston.

Françaix was a prolific composer, who seems to have possessed a constant disposition to create. His output was rich and diverse, and amounts to more than 200 pieces. He took pleasure in reusing traditional forms and genres: works entitled 'concerto', 'symphony' or 'cantata' unite with a charming eclecticism which places Françaix in the great French tradition.

The piano occupied an important place in his output, whether as a concertante instrument or in chamber music and duets. Virtuoso players found his first mature work for solo piano, the Scherzo (1932), to be an exciting, impulsive and technically difficult piece.

Early success came in 1932, with a performance of his Eight Bagatelles for piano and string quartet at the ISCM Festival in Vienna. Although an early Symphony (performed by the Orchestre Symphonique de Paris under Monteux on 6 November 1932) caused a scandal and was withdrawn by the composer, his Concertino for piano was received with enthusiasm at the Baden-Baden Chamber Music Festival in 1936. Heinrich Strobel wrote of this sparkling, witty piece: 'After so much problematic or laboured music, this Concertino was like fresh water, rushing from a spring with the gracious spontaneity of all that is natural.' The same gracefulness is characteristic of Françaix's music, including chamber works such as the String Trio (1933), the Wind Quartet (1933) and the Quintet for flute, harp and string trio (1934).

His first work for the theatre was a comedy for tenor, bass and small orchestra, *Le diable boiteux*. His operas and ballets demonstrate a taste for irony and satire, deployed in the tradition of Les Six. In 1933 he wrote *Scuola di ballo* and *Beach* for the Ballets Russes de Monte-Carlo, the first in a long series of ballets, two of which were given at the Paris Opéra: *Le roi nu* in 1936 and *Les malheurs de Sophie* in 1948. He worked with Roland Petit at the Théâtre Marigny to create *Les demoiselles de la nuit* in 1948 and *La dame dans la lune* in 1958. His distinguished film scores include the collaborations with Sacha Guitry on *Si Versailles m'était conté*, *Si Paris nous était conté* and *Napoléon*.

The opera *La princesse de Clèves*, after the novel by Madame de Lafayette, was greeted with unanimous critical acclaim when it was first performed at Rouen in 1965, but it has yet to be revived. He also made a notable contribution to the repertory of large-scale sacred works with *L'apocalypse selon Saint-Jean*, inspired by the Book of Revelation (1939).

Françaix was an excellent orchestrator, who made many arrangements and transcriptions of his own works, notably for Klaus Rainer Schöll's Bläser-Ensemble Mainz, as well as of works by Chabrier, Chopin, Mozart, Poulenc and Schubert – all composers for whom he had a special affection. The best-known of his orchestral arrangements is that of Poulenc's *L'histoire de Babar*, made at Poulenc's request.

His choice of literary subjects reveals a preference for the past: some of the best-known works in French literature were among the sources of his librettos. His style is resolutely tonal, yet it expresses his harmonic

language very freely. Françaix preserved the exposition–development–recapitulation structure, even in short pieces. His themes are melodic, or constructed from very simple motifs, exploiting the principles of repetition and variation to the full. The incessant jocular dialogues breaking out among instrumental parts in his works agreeably turn the musical discourse into something very like animated conversation in the form of brief phrases sprinkled with emphases and effects, different characters and great rhythmic variety. His music builds up a dynamic impetus on the foundation of dances such as the polka and the galop, displaying irresistible verve: these often difficult rhythms demand considerable virtuosity from performers.

From the Concertino for piano and orchestra to the Double Concerto for flute and clarinet (1991), most of the instruments of the orchestra are represented in his concertante works. The Concerto for 15 solo instruments is a kind of homage to the sonorities of the Classical orchestra. Exploiting the resources of traditional instruments, Françaix cultivated a personal aesthetic and drew on the sources of the past and on the colours of French music, in the manner of Ravel. Regarding atonality as an impasse, he took pride in claiming a position among neo-classical composers.

An undeniable sense of humour is revealed in Françaix's comments on his music: his avowed aim was 'to give pleasure'. He said punningly that his aim in writing his wind quintet was 'to do something that can be called "Français", with both an S and an X, that is, to be jolly most of the time – even comical . . . To avoid the premeditated wrong note and boredom like the plague. In sum, Emmanuel Chabrier is my good master.' He won the Florence Gould prize in 1950 and the Grand Prix Arthur Honegger in 1992.

WORKS
(*selective list*)

OPERAS

Le diable boiteux (chbr op, 1, after A.-R. Lesage), 1937, private perf., Paris, 30 June 1938 [for the Princesse de Polignac], Palermo, 22 April 1949; L'apostrophe (comédie musicale, 1, after H. de Balzac), 1940, Amsterdam, Opera, 1 July 1951; La main de gloire (opéra bouffe, 4, after G. de Nerval), 1945, Bordeaux, 18 May 1951; Paris à nous deux ou Le nouveau Rostignac (fantaisie lyrique, 2, P. Kast and Françaix), 1954, Fontainebleau, 7 Aug 1954; La princesse de Clèves (4, Françaix and M. Lanjean, after Mme de Lafayette), Rouen, Arts, 11 Dec 1965

OTHER DRAMATIC WORKS

Ballets: Beach (L. Massine, after R. Kerdik), 1933; Les malheurs de Sophie (G. Flevitsky, after Comtesse de Ségur), 1933; Scuola di ballo (Massine, after C. Goldoni), 1933 [from Boccherini]; Le roi nu (S. Lifar, after H.C. Andersen), 1935; Le jeu sentimental, 1936; La lutherie enchantée (S. Korty), 1936; Le jugement d'un fou (Françaix, after F. Rabelais), 1938; Verreries de Venise (A. Fauchier-Magnan), 1938; Les demoiselles de la nuit (J. Anouilh), 1948; Les camélias (choreog. S. Korty), 1950; Le roi Midas (J. Davril, after Ovid), 1952; La dame dans la lune (choreog. R. Petit), 1958; Le croupier amoureux (Bastide), 1967; Pierrot ou les secrets de la nuit (M. Tournier), 1981

Film scores: Si Versailles m'était conté (dir. S. Guitry), 1953; Napoléon (dir. Guitry), 1954; Si Paris nous était conté (dir. Guitry), 1955

MURIEL BELLIER

France. Country in Europe.

I. Art music. II. Traditional music.

I. Art music

1. The Middle Ages: (i) The ecclesiastical maîtrises (ii) The princely chapels and the Chapelle Royale (iii) Musical education. 2. The 16th century: (i) The Chapelle Royale and the princely chapels (ii) The Reformation and religious conflicts (iii) The university, the académies, the salons and guilds (iv) Music publishing (v) Instrument making. 3. The 17th and 18th centuries: (i) The musique du roi (ii) Opera: an affair of state (iii) Concert life in Paris (iv) Musical life in the provinces (v) Music publishing (vi) Instrument making. 4. The 19th century: (i) Opera (ii) Concert life (iii) Musical education (iv) Music publishing (v) Instrument making. 5. The 20th century: (i) To 1945 (ii) After 1945.

1. THE MIDDLE AGES. At the end of the 9th century, after the decline of GALLICAN CHANT, France was divided both linguistically and on the question of musical notation: the area in which the *langue d'Oc* was spoken used Aquitanian notation, while further north the notations of Brittany and Lorraine were employed (*see* NOTATION, §III, 1). So a Romanized liturgy was imposed, with the aim of standardizing the heterogeneous usages of Provence, Aquitaine and Burgundy. Based at the cathedrals, clerics and *scholares* united under the same rule to ensure the provision of singers for the Offices of the church and liturgical chant; choir schools were attached to these centres. In the 11th and 12th centuries, the focal point of the Carolingian renaissance shifted from Tours to Reims, together with the Capetian kings who regarded themselves as heirs to the Empire. Aquitaine resisted this pressure: south of the Loire there was unwillingness to accept Carolingian dominance, the episcopal schools and the merging of spiritual and temporal influences: and something of its regional character, and of the courtly art cultivated there, persisted in this area (*see also* TROUBADOURS, TROUVÈRES). Territorial unity would stem from the Ile-de-France, where the monarchy, the episcopal schools and the University gradually imposed their cultural model on the whole country.

(i) The ecclesiastical maîtrises. The origin of these choir schools (also known as *psallettes*) remains rather obscure. Initially young clerics received their training in the episcopal schools, where they were educated not only in chant and the liturgy but also in the liberal arts, including sacred and secular literature. They then took minor orders, eventually becoming priests and canons. During the 11th and 12th centuries groups specifically concerned with the performance of chant became progressively more distinct as the repertory itself grew richer; these groups were the responsibility of the chapters of cathedrals or collegiate churches. The two oldest institutions that seem to have acquired autonomy in this way, with one of two specialist *maîtres* directing them, are Chartres Cathedral in 1119 (by a papal bull of Calixtus II) and Notre Dame Cathedral in Paris in 1127. However, there is some doubt about the exact nature of these foundations, especially as the establishment of *maîtrises* in France, in the form they were to retain until the Revolution, did not begin before the 14th century. According to recent research, the foundation of *maîtrises* is shown by the records as follows:

1324	Amiens	1402	Poitiers (St Hilaire)
1330	Narbonne	1412	Nantes
1349	Senlis	1419	Beaune
1356	Saint-Quentin	1424	Châlons-sur-Marne
1369	Angers, Beauvais	1425	Dijon, Lille (St Pierre)
1371	Cambrai	1443	Rennes
1377	Rouen	1459	Vannes
1385	Reims	1461	Le Puy
1386	Toul	1463	Abbeville, Bordeaux (St André)
1389	Arras	1484	Cahors, Langres, Laval

The immediately striking feature of this distribution is the almost total absence of choir schools in the south of the country. The number of choirboys varied from four to eight, depending on the chapter's resources, and they would live in a community under the control of a master appointed by the chapter. The foundation of a *maîtrise* was almost always made possible by the allocation or assignment of prebends of canonries by the pope or the king. The appointment of not only a *maître de musique* but also a *maître de grammaire*, thus ensuring that the boys received a general education, varied from place to place (as did the organization of the *maîtrises* and their role in the wider community). At Chartres, for instance, the *maître de grammaire* was in charge of the *maîtrise* until the 16th century, when the *maître de musique* took over responsibility for the management of the school. A group of trained adult choristers, who had often taken minor orders, assisted the choirboys in providing music for the office. Certain benefices were reserved for these choristers, and depending on the area they might be described as *clercs de matines* (Notre Dame, Paris), *petits* and *grands vicaires* (Cambrai), *chapelains-chantres* (Langres), *heuriers-matiniers* (Chartres), or *cantoreaux* (Toulouse). While the *maîtres de musique* were always clerics at this period, organists enjoyed a more independent position in the *maîtrises*.

In addition to the cathedral and collegiate churches the *saintes-chapelles* enjoyed a special standing. They were

exempt from ecclesiastical jurisdiction and were under the direct protection of the king or one of the great princes, but their choir schools were organized in exactly the same way as those of the cathedrals or collegiate churches. The comprised the Ste-Chapelle du Palais in Paris, founded by St Louis, which had six choirboys in 1305 and was directed by a cantor from 1319; the Ste-Chapelle of Bourges founded by Jean, Duke of Berry in 1405, also with six choirboys, in which composers such as Grenon, Basiron and Fedé held the post of *maître*; and the Ste-Chapelle of Dijon founded by Philippe 'the Good' (1396–1467) in 1425 with four choirboys.

These *maîtrises* soon constituted a network extending over the whole country. They not only provided music for the liturgical offices but also encouraged the teaching of plainchant, and subsequently of polyphony and composition. A musician's compositional talents became a major factor in his appointment as a *maître*; it was his task to compose original works for solemn feasts and other important occasions. Some *maîtrises* acquired a special reputation for composition, including Cambrai, with Guillaume Du Fay as master, and Chartres (with Mureau, Antoine Brumel and Fresneau), Laon (Grenon) and Orléans (Johannes Tinctoris). There were many exchanges with the chapels of the princely courts; the best cantors of Philippe 'the Good', Duke of Burgundy, came from the Ste-Chapelle and Notre-Dame in Paris as well as Cambrai. The *maîtrises* also took part in mystery and morality plays (*see* MEDIEVAL DRAMA) and even (outside the liturgical context) in farces, despite repeated prohibitions issued by the ecclesiastical hierarchy. In 1465, for instance, the synod of Troyes banned the Feast of Fools, which was actually held inside churches at Epiphany and gave the choirboys a chance to let off steam. However, it continued to be held in many places well beyond the Middle Ages.

(ii) The princely chapels and the Chapelle Royale. Until the 14th century the kings and princes who controlled French territory engaged minstrels and instrumentalists to provide music for official ceremonies and for entertainments. After the reign of Philippe Auguste, however, a kind of royal liturgy began to emerge. A two-part CONDUCTUS, *Ver pacis aperit*, seems to have been composed for Philippe Auguste's coronation in Reims in 1179. The conductus *Gaude felix Francia* has also been preserved, and was apparently composed for the coronation of Louis IX in 1226. In any case, the royal prayer *Domine salvum fac regem* was sung at the coronations of the kings of France from the 13th century onwards. In the 14th century Paris began to emerge as the political and administrative capital of France, but it ceased to be the king's residence while it was entangled in the conflicts of the Hundred Years War. Charles VII had himself crowned in Paris but spent little time there, and Louis XI followed his example, while their successors preferred the royal residences in the Loire valley. In the 14th and 15th centuries France had many centres of musical activity, and musicians moved freely between them. Many permanent chapels were set up during this period.

From 1309 the seat of the papacy was in Avignon, where Benedict XII founded a college of twelve *cantores capellae*, most of them recruited from the north of France (Laon, Amiens, Thérouanne and Paris). According to Froissart, Gaston Phébus, Count of Foix (1331–91), had 'a great abundance of good singers' at his disposal at Orléans in 1388, and he issued invitations to foreign minstrels. At Bourges, Jean, Duke of Berry not only founded the Ste-Chapelle (1405) but also set up his own personal chapel, employing such composers as Solage. At Moulins, Charles I, Duke of Bourbon, assembled a chapel of 12 musicians (including Ockeghem from 1446 to 1448). Amédée VIII and Louis, dukes of Savoy, engaged such composers as Pietrequin Bonnel and Antoine Brumel for their chapel. At Angers and in Provence Count René of Provence maintained eight singers (including Beltrame Feragut), all of whom joined the Chapelle Royale after René's death.

In the 15th century the two foremost institutions, the chapel of the dukes of BURGUNDY and the king's Chapelle Royale, moved about the country quite frequently. The Duke of Burgundy's musicians did not become an established ensemble until about 1430; before that date, and without any real continuity, they had comprised singers from Notre-Dame and the Ste-Chapelle, and from Cambrai, six of whose singers had been at the papal court before entering the duke's service. Under Philippe 'the Bold' (1364–1404) the chapel was, according to one chronicler, 'more numerous and better chosen' than the king of France's own. While Philippe's education had been exclusively French, his successor Jean 'the Fearless' (1404–19) had been brought up in Flanders; when he became duke he spent most of his time in Paris, where the sixteen chaplains in his service included musicians such as Pierre Fontaine, Johannes Tapissier and Nicolas Grenon. Philippe 'the Good' took them into his chapel, but his most famous musicians were Gilles Binchois, Gilles Joye and Robert Morton. During his long reign (1419–67) he spent less time in Dijon than in Flanders,

Arras and Lille, where the Order of the Golden Fleece was instituted in 1454, accompanied by lavish musical ceremonies. He also founded *maîtrises* for four choirboys at Dijon and at Lille. The last of the great dukes of Burgundy, Charles 'the Bold' (1467–77), who had received a very good musical education himself, took his singers with him as he moved about the country. They included Hayne van Ghizeghem and above all Antoine Busnoys, who had been in Charles's service when he was Count of Charolais.

The Chapelle Royale of King Charles VI of France was still a relatively modest ensemble consisting of eleven singers, directed in 1399 by the *premier chapelain* Jehan du Moulin and then by Adam Maigret. Several of the singers were also members of the choirs of Notre-Dame or the Ste-Chapelle. In 1401 the dukes of Bourbon and Burgundy founded a short-lived *cour d'amour* which celebrated masses 'à note, à son d'orgues, chant et déchant'. Under Charles VII and Louis XI the court favoured the châteaux of the Loire as residences. Charles VII chose Jean de Ockeghem to direct his chapel, appointing him to the important post of treasurer of St-Martin, Tours. Having been *premier chapelain*, Ockeghem was appointed *maître de la chapelle de chant du roy* in 1465. He served three French kings over a period of 45 years. Under Louis XI, the beginning of whose reign saw a slight reduction in the numbers of musicians in the chapel, pride of place was given to religious ceremonies and to such composers as Johannes Fedé and Jehan Fresneau; Louis' favourite residence was the château of Plessis-lès-Tours. When Ockeghem died in 1497 he was succeeded by Evrard de la Chapelle.

Until the beginning of the 16th century musicians from the northern provinces were often attracted by offers from the courts and choir schools of northern Italy and the papal chapel, where their gifts for composition and skill in performing the polyphonic repertory were highly esteemed. However, the Council of Basle and the Pragmatic Sanction of Bourges (1438) gave the king of France considerable independence from the papacy in the granting of benefices, and church musicians in particular were now able to obtain positions offering more security. These events marked the beginning of the emancipation of the French church in its move towards Gallicanism.

(iii) Musical education. Long before the foundation of the universities, musical education was provided by monastic schools and then by the choir schools of a few large cathedrals. The precise role of Alcuin, Charlemagne's chief adviser, who became abbot of St-Martin in Tours in 796, is uncertain, but there is evidence that the liberal arts were taught in several regions of northern France, particulary at Reims under Remigius of Auxerre (893) and Gerbert d'Aurillac (972), at Chartres under Fulbert (1007) and at Fleury (Orléans) under Theodolphus and Abbon (965), not forgetting the contributions of Benedictines such as Aurelian of Réôme (at the abbey of St Jean de Réôme, diocese of Langres) and Hucbald (at the abbey of St-Amand near Valenciennes). With the rise of the universities in the 13th century, Paris grew in importance as a centre of learning, and many foreigners came to the city to study or teach the sciences of the *quadrivium*. These foreigners included Englishmen such as Robert Kilwardy, Robert Grosseteste and his disciple Roger Bacon, as well as the theorist known as 'Anonymus 4' (so called by Coussemaker), Hieronymus of Moravia, and, at a later date, Johann von Jenzenstein. Some of the greatest theorists of the day visited Paris: Johannes de Garlandia, Johannes de Grocheio and Johannes de Muris. Jean Gerson, who succeeded Pierre d'Ailly as chancellor of the university in 1395, was also a canon of Notre-Dame. A manual for choirboys dating from 1408 has been attributed to him: it prescribes the teaching of plainchant, counterpoint, and some 'déchants honnêtes' (inoffensive secular songs), but forbids the singing of bawdy songs. A miniature in a manuscript from Valenciennes shows him surrounded by his students. At this period the university cantor and organist was Guillaume le Bourgoing and the *maître de chant* was Jean Comitis, former *maître des enfants de choeur* at Notre Dame. The university lecturers of Paris were thus able to devote time to the practice as well as the theory of music. In the city, some specialist teachers were beginning to teach secular music as early as the 14th century: Jehan Vaillant is said to have 'kept a school of music in Paris'.

Minstrels and instrumentalists had evolved their own system of musical training within the profession. In Paris, under Charles VI, Guillebert of Metz noted the presence of 'escoles de ménestrels' in the rue des Jugléeurs. In the 14th and 15th centuries the northern regions of France had a custom of holding annual gatherings ('escolles') during Lent, for the purpose of exchanging professional information, for example about the making and playing of instruments, and new repertory. The most important gatherings seem to have been at Ypres (1313–1432), Beauvais (1398–1436), Cambrai (1427–40), Saint-Omer (1424–41), and in cities in the Low Countries (Bruges, Brussels, Mons). Elsewhere, we know only that the minstrels of Savoy usually met at Bourg-en-Bresse (1377–1407), and that Pedro III of Aragon used to send his minstrels 'to the schools' in France at the end of the 14th century. By the end of the following century, such

3. Minstrels at a feast playing fiddle, symphony, harp and psaltery; miniature from a French Bible moralisée, c1250 (GB-Lbl Harl.1527, f.36v)

customs had disappeared. However, there were links between certain minstrels' guilds and the ecclesiastical chapters: one of these confraternities had its headquarters in the church of Notre Dame-la-Grande in Valenciennes from the 13th century. In 1402 the minstrels of Fécamp were granted a charter allowing them to participate in monastic chant at certain times; in 1465 the minstrel guild of Amiens received permission to use a chapel in the cathedral as its headquarters; and after 1492 the *ménétriers* of Toulouse had their own chapel in the church of the Carmelite convent.

2. The 16th century. After the period described (inaccurately) as 'Franco-Flemish', music written in France lost much of the supremacy it had maintained in Europe since the 13th century, and the western European countries seem to have concentrated more on their individual repertories. In France itself there was a tendency to neglect the legacy of Josquin des Prez in favour of the Parisian Chanson and other music accessible to a wider public, while the mass and the motet showed the effect of secular influence, at least until the work of Lassus became dominant. Closer contact between poets and composers led to a refinement of the rules regulating the relationship between the two arts during the Pléiade period. However, Italian influence was the most striking feature of the century in France, as in most other parts of Europe. The madrigal had a crucial influence on the evolution of polyphonic song, particularly towards the end of the century, while the many Italian musicians active in France included the Mantuan Alberto da Ripa at the court of François I, Francesco de Layolle in Lyons (the centre of what was virtually a colony of Florentine emigrés) and Balthasar de Beaujoyeux and other violinists at the courts of Charles IX and Henri III.

When François I established Paris as the undisputed political and cultural capital of the country, the need seems to have arisen for the first time to create some kind of national tradition. The anonymous author of *L'art, science et pratique de plaine musique* (Lyons, 1557) referred to Charlemagne, describing him as anxious 'to teach the French people the very devout art and science of singing well', and mentioned Robert 'the Pious', Gregory the Great and Charles 'the Bold' as composers thanks to whom 'music is now the ornament of the chapels of princes and the diversion of high and noble courts ... now prospering in many provinces'. Baïf's Académie de Poésie et de Musique had Charles IX as its 'protecteur et premier auditeur' and according to its statutes its purpose was to serve 'the growth of our State and the adornment of the name of the French people'.

(i) The Chapelle Royale and the princely chapels. François I (1515–47) made his court an instrument of power marked by a new tendency towards centralization. Although Louis XII had composers such as Mouton, Divitis and Sermisy in his chapel, on his death the *chambre* consisted of only a handful of instrumentalists. Towards the middle of the 1520s the new king set up his *chapelle de musique*, reserved for great occasions and in the charge of a *maître* (Cardinal de Tournon), while its musical direction was entrusted to one and then to two *sous-maîtres* (Sermisy and Jean-Loys Hérault de Servissas in 1547). At the end of the reign a *composeur* (Pierre Sandrin) was added. François I introduced French violinists into the *écurie* to perform alongside the mainly Italian trumpeters, sackbut players and oboists and the Swiss fife and drum players. About 1526 he also founded a *chapelle de plain-chant* to provide music for the daily offices at court, directed by a *maître et surintendant*. The major development after 1530 was in the music of the *chambre*: this body of singers, lutenists and organists steadily grew in numbers, and on the king's death in 1547 it had some 25 members.

François I's successors retained the administrative framework he had created. Henri II (1547–59) recruited both Jacques Arcadelt and Janequin, making the latter *compositeur ordinaire* in his old age, but Charles IX (1560–74) took the greatest personal interest in music, giving his patronage to Baïf's Académie and showing particular appreciation of the works of Lassus, whom he attempted to bring to his court, and of the 'chromatic music' of Nicola Vicentino. Charles also had motets by Jean Maillard and the *Proverbes de Salomon* of his *maître de chapelle* Nicolas Millot dedicated to him.

Under François I a kind of royal liturgy had developed around such texts such as *Domine salvum fac regem*, sung at the king's coronation as early as 1223 and now serving as an official symbol of loyalty to the sovereign. Jean Mouton, who had earlier celebrated the birth of Louis XII's daughter Renée in 1510 with a *Non nobis Domine*, composed a four-part work on this text, possibly for the coronation of François I, while his motet *Exalta regina Galliae* was in effect a celebration of the king's victory at Marignan. Two other composers, Jean Maillard (1552) and Guillaume Costeley (1570), subsequently wrote music on the *Domine salvum* text, although we do not know for what occasions. Music was also composed for peace celebrations, royal births and weddings, both by 'official' composers such as Sermisy and by others whose links with the court are more obscure.

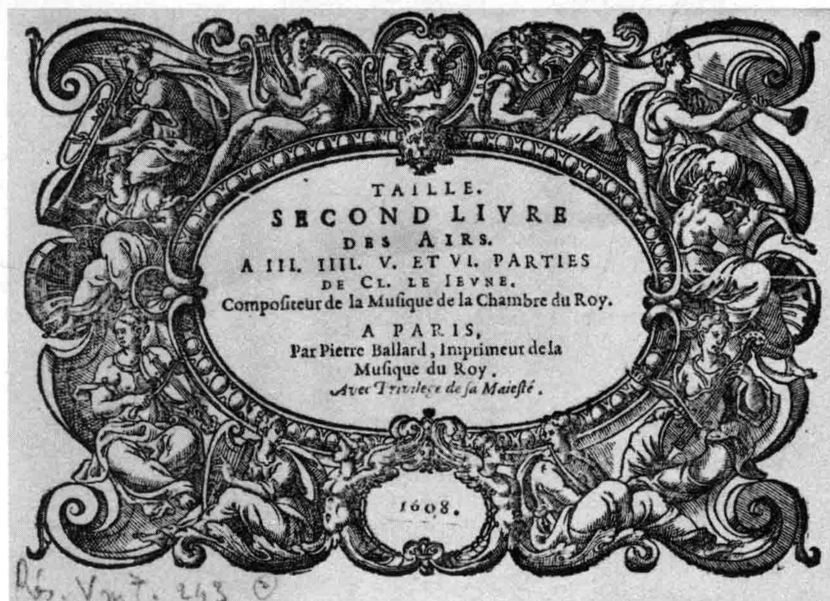
François I used his musicians to display his power: they were present at all events involving the royal family and accompanied him on his travels, as when he went to Bologna to meet Pope Leo X in 1515, at his meeting with

4. 'The Concert' by Nicolas Tournier, early 17th century (Musée du Louvre, Paris); the instruments depicted are bass viol, virginals, violin and lute

Henry VIII at the Field of Cloth of Gold in 1520, and at the negotiations for the Treaty of Nice in 1538.

Many princes and cardinals followed the example of the court and maintained their own chapels. Composers such as Valentin Bakfark and Simon Joly enjoyed the patronage of Cardinal François de Tournon, administrative head of the Chapelle Royale; François de Clermont, cardinal of Auch, employed Jean Lhéritier as his *maître de chapelle* after attracting Janequin to Auch Cathedral for a time; the Cardinal of Ferrara, Ippolito d'Este, appointed Pierre Sandrin as his *maître de chapelle*; Jean, Cardinal of Lorraine, and his nephew François de Guise both had well-equipped chapels; Count Guy de Bourbon, King of Navarre, employed the organist Nicolas de La Grotte, who subsequently pursued a career at court; and François, Duke of Anjou, King Henri III's brother, engaged Claude Le Jeune as his *maître de chapelle*. Although Lorraine was not part of the kingdom at that time, it was governed by music-loving dukes, notably Duke Charles III (1545–1608), to whom Fabrice Marin Caietain and Paschal de L'Estocart dedicated works.

(ii) The Reformation and religious conflicts. Religious conflicts played a major part both in modifying certain features of musical life and in developing the style and forms (*chansons spirituelles* and canticles) of the ecclesiastical repertory. Until the middle of the 16th century the relative tolerance of the government allowed many Calvinist communities to develop, and psalm singing became a driving force in their struggle for freedom of worship (*see* PSALMS, METRICAL, §II, 2). In 1551 groups of Calvinists began to go around Lyons singing psalms and abusing the Catholic clergy; psalms were sung publicly at the Pré aux Clercs in Paris in 1558; the following year in Bourges 'the said psalms [were sung] with much melody by large companies every evening', and the same thing happened in Béziers in 1561. The fashion for Protestant melodies from Strasbourg and Geneva was reinforced when such officially appointed musicians as Pierre Certon and Janequin made four-part settings of them, and it continued up to 1562, when the 150 psalms translated by Marot and Théodore de Bèze were distributed. The rift between the religious parties culminated that year in the destruction of many organs (at Le Mans, Rouen, Caen, Angoulême, etc.) regarded by Protestants as papist symbols. In the ensuing religious wars two of the leading composers of the time lost their lives: Claude Goudimel died in the St Bartholomew's Day massacres at Lyons in 1572, and Antoine de Bertrand was killed by Protestants at Toulouse in 1581. Claude Le Jeune only just escaped the Catholic League in Paris and took refuge in La Rochelle before becoming *compositeur ordinaire* to King Henri IV. After abjuring Protestantism in 1593, the king promulgated the Edict of Nantes (1598), which allowed Protestants freedom of worship in certain areas.



(iii) The university, the académies, the salons and guilds. The university had largely ignored stylistic developments in music and had lost much of its influence. Janequin and Goudimel studied there for a while; Oronce Finé, a professor at the university, published a lute manual; and Jean Pena and Pierre Forcadel edited the musical writings of Euclid, which were published in 1557 and 1565. However, there was no original thinking on music theory: the only treatises published at this time (by Menehou, Guilliaud and Yssandon) were short, elementary manuals. Musicians with an interest in the practice of their art turned instead to more progressive centres. Chief among them was the Académie de Poésie et de Musique, founded in 1570 by Joachim Thibault de Courville and Jean-Antoine de Baïf with the purpose of restoring 'the measure and rules of music as formerly employed by the Greeks and Romans'; one of its aims was to make the Académie a 'school to serve as a nursery from which poets and musicians will one day come', and where 'musique mesurée à l'antique' was taught (*see* VERS MESURÉS).

Meetings were held every Sunday in Baïf's house in the rue des Fossés-Saint-Victor on the left bank of the Seine. The music performed was secret to all but members of the Académie, and copying or communicating the works played at meetings was forbidden. The Parlement of Paris, with the support of the university, tried to oppose the registration of the letters patent on which the Académie was founded, but Charles IX overruled them. It is probable that while Lassus was in Paris he attended one of the meetings, for in a letter to Charles IX of August 1571 Baïf mentioned the 'notable personages, both French and foreign' received by the Académie. Hoping to convince the artistic world of the value of *musique mesurée*, Baïf had also planned to organize a meeting of all the musicians in Christendom to test the emotional effects of the works thus created. Under Henri III this first academy was followed by another, the Académie du Palais, directed by Guy du Faur de Pibrac, with its headquarters at the Louvre between 1576 and 1579. After the death of Courville in 1581 Baïf's colleagues were Jacques du Faur and Claude Le Jeune, and later Jacques Mauduit, who in 1585 composed a requiem mass for the funeral of Ronsard.

Music was still taught in charitable institutions such as that founded in about 1578 by the apothecary Nicolas Houel: a drawing of 1583 shows a viol quartet practising in his Maison de Charité Chrétienne. A new feature of this period was the emergence of 'salons' where intellectuals met to discuss poetry, music and art. Nicolas Le Gendre, Sieur de Villeroy, welcomed the poet Desportes and the musicians Certon and Denis Caignet into his house. Among the most influential salons was that of Catherine de Clermont, Duchess of Retz and a lady at court, who herself played the lute. Among the many writers and musicians she received were Baïf, Belleau, Tyard, Costeley and Le Roy.

This was the time when confraternities of Penitents were founded, under the influence of the Counter-Reformation. Music played an essential part in their activities, particularly during large-scale processions. Most of them were located in cities in the south of France such as Toulouse, Marseilles and Aix. The Confrérie Sainte-Cécile was founded at the Augustinian monastery in Paris in May 1575; a *surintendant* and four *maîtres*, elected by their colleagues, made annual awards for 'new motets or other worthy canticles'. Although its statutes have been preserved, we know nothing about its activities except that it probably took part in the procession of Penitents attended by Henri III in 1583. Much more is known about the Confrérie Sainte-Cécile founded at Evreux in 1570 by 21 citizens and the confraternity's first *maître*. From 1575 it organised a '*puy* or council of music' to award distinctions annually to the best compositions, which were then performed by the *maîtrise* of the cathedral. The names of musicians who received these awards up to 1589 include some of the greatest composers of the time: Lassus, Eustache Du Caurroy, Mauduit, Fabrice Marin Caietain, Paschal de L'Estocart and George de La Hèle. Another Confrérie Sainte-Cécile was founded at the church of St Pierre in Caen in 1564, but nothing is known of its activities.

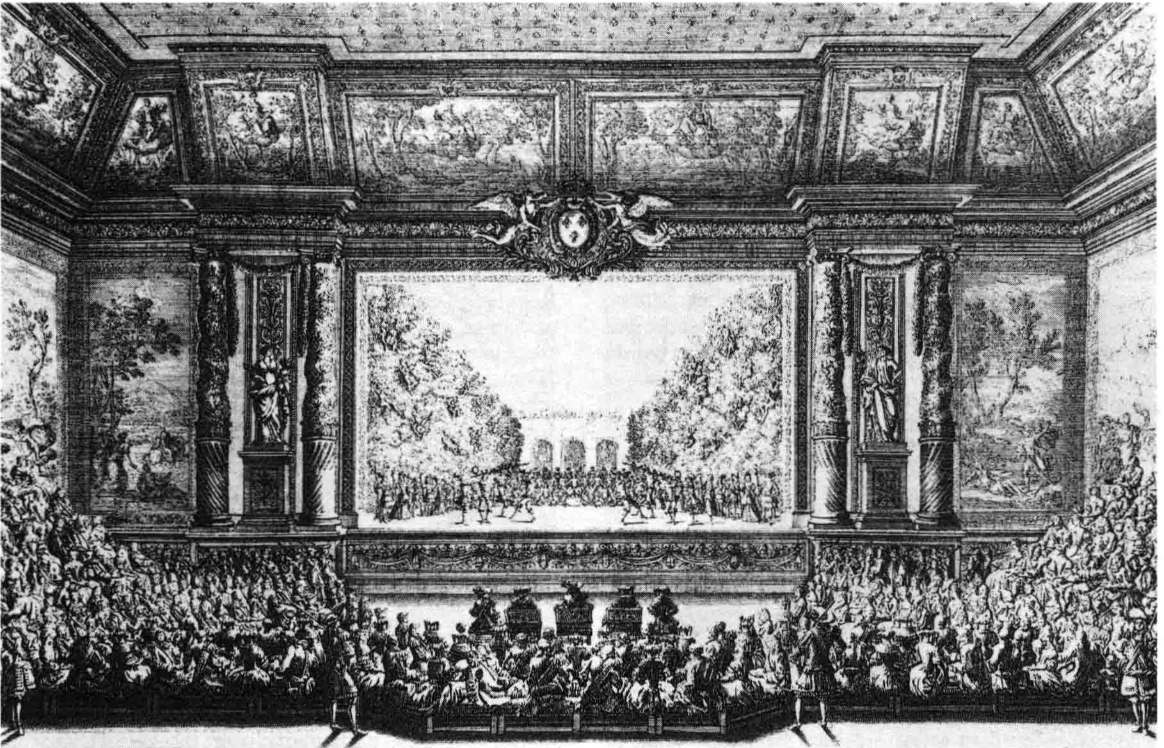
(iv) Music publishing. Music publishing began almost simultaneously in Lyons and Paris in 1528, with the *Contrapunctus* issued by Etienne Gueynard in Lyons and the *Chansons nouvelles* published by Pierre Attaingnant in Paris. It is possible that another Lyons printer (? Antoine Du Ry) had published woodcut engravings of a collection of motets by Layolle in about 1525; only one of the parts has been preserved. However, Attaingnant was the first to use the method of single-impression printing, also adopted by Jacques Moderne in Lyons in 1532. Attaingnant obtained a royal privilege in 1529, renewed in 1531, and in 1537 was describing himself as 'imprimeur et libraire du roy en musique'. By 1552 he had published over 150 collections of sacred and secular polyphonic, vocal, and instrumental music. In Lyons, Moderne published some 50 musical works between 1532 and 1557, sometimes pirated from his Parisian rival, but in the mainstream of the cosmopolitan repertory. There were other less prolific publishers in Lyons, such as the Beringen brothers, Robert Granjon and Simon Gorlier. In

5. *Title-page of Le Jeune's 'Second livre des airs' (Paris: Ballard, 1608)*

Paris the leading publisher in the middle of the century was Nicolas Du Chemin, who issued about 100 collections of music between 1549 and 1576, including nearly 700 chansons, among them the first settings of Ronsard's *Amours*. Finally, the most important publishers of the second part of the century were Adrian Le Roy, himself a lutenist and composer, and his partner and cousin Robert Ballard, the founder of a dynasty of music publishers. They produced over 300 music books of all kinds, and held privileges reviewed every 10 years, as well as bearing the title of 'printers to the king'. Their dedications to the Queen Mother, the King and the Duke of Orléans confirm their close relationship with the court and with officially recognized poets such as Ronsard, Dorat and Baïf.

The rise of music publishing made for wider distribution of musical works and gave composers the opportunity to extend their reputations. Printing in itself offered them professional openings: in Paris, Du Chemin engaged Claude Goudimel, Nicole Regnes and Loys Bisson as 'correcteurs' and in Lyons Moderne employed Francesco Layolle and probably Pierre de Villiers. While giving preference to composers already recognized by the public (Janequin, Arcadelt and subsequently Lassus), publishers also made contact with provincial *maîtres de chapelle* such as Cadéac (in Auch), Le Heurteur (Tours) and Clércau (Toul). Le Roy & Ballard took advantage of visits to Paris by foreign composers (notably Alfonso Ferrabosco and Alessandro Striggio), and 'discovered' the Toulouse composer Antoine de Bertrand. It was to Le Roy & Ballard that the Confrérie Sainte-Cécile at Evreux turned to provide advertising material for their annual *puy* competition, a connection that enabled the publishers, in their turn, to find new composers of talent. A new power in music was thus consolidated in Paris, while at the end of the century music publishing in Lyons was in decline.

(v) Instrument making. Instrument making grew and flourished at this period, encouraged not only by the rise of professional instrumentalists' associations organized by the Confrérie Saint-Julien, which had been founded in the rue St-Martin in 1328. The main centres of instrument making were Lyons and, above all, Paris. There seem to have been spinet and clavichord builders (H. de l'Oeuvre) and flute makers (Claude Rafi) in Lyons earlier than lute and violin makers, of whom there were about 40 in the second half of the century, some of German or Italian origin. The outstanding figure was the lute maker Garspard Duiffoprucgar (Tieffenbrucker) from Bavaria, who was active from 1553 to 1571. In Paris there were at least 70 instrument makers in the second half of the century; this figure does not include organ builders, some of whom called themselves 'master spinet makers'. Several, including the organ builders Antoine Dargillières and Francisque des Olliviers, the spinet makers Jean Potin, Médéric Lorillard and Jacques Le Breton, and the lute maker Pierre Aubry bore the title *facteur du roi*. The story that Charles IX ordered 24 violins from Andrea Amati is a legend of 18th-century origin. The instrument makers of Paris also imported flutes, guitars and lutes from Lyons, lutes from Germany and violins, lutes and cornetts from Padua, Venice and Brescia. François Richomme, one of the king's violinists, played a violin made in Cremona, valued on his death at 90 livres. In the second half of the century some makers were also producing violins 'after the fashion of Cremona', cornetts 'after the fashion of Venice' and so on. Demand seems to have been high: in 1575 Gervais Rebans acepted an order for 200 lutes, and when Claude Denis died in 187 there were over 600 instruments in his workshop. Several dynasties of intrument makers were found in the latter part of the 16th century, including the Denis, Hardel, Hurel and Jacquet families. In 1599 letters-patent were granted to the corporation of 'faiseurs d'instruments', defining the conditions for practising their trade.



3. THE 17TH AND 18TH CENTURIES. The territorial unity sought by the kings of France was accompanied by a desire for political, administrative and cultural centralism in which music played an important part. Louis XIII and, after 1661, Louis XIV insisted on the presence of their leading subjects at court, where a whole ritual was designed to reinforce royal power. Over the decades an ever wider gap opened up between provincial centres and the court, particularly when musical genres such as opera and the *grand motet* became fashionable and required large numbers of performers. Versailles and Paris inevitably attracted the finest musical talents in the kingdom, who were summoned to participate in the development of national art. The artistic vitality of the provinces suffered in proportion: the *maîtrises* in particular had increasing difficulty in attracting qualified *maîtres de chapelle*, and by the beginning of the 18th century were in a state of decline. Composers who did not secure a post in the capital remained of marginal importance in French musical life.

The French church preserved a considerable degree of independence from the authority of Rome. The Council of Trent was not accepted in France until 1615, and even then not by the king or the Parlement but only by the assembly of clergy, after much resistance from the Gallican parties. A Gallican liturgy was introduced, and the Harlay breviary of 1680 even omitted the reference *ad usum romanum*; a neo-Latin form of poetry emerged, and was used by the composers of motets (*see also* NEO-GALLICAN CHANT).

The relatively isolated position of French music was partly mitigated by Italian influence. The Italian model is mentioned in the first privilege granted to the French opera, and while Louis XIV and Lully discouraged court musicians from going to Italy to study, Italian influence could be discerned in the work of most French composers, although some, like François Couperin, claimed to have adopted the style of the *goûts réunis*. There was constant comparison of the respective merits of Italian and French music in the successive *querelles* that marked musical life from the middle of the 17th century until the time of Gluck. Finally, when the most acute phase of absolutism ended around 1750, Paris became an increasingly cosmopolitan European centre, eventually succeeding Mannheim as the primary centre of symphonic music in the continent.

Versailles had already lost its dominant position under Louis XV, and Paris now became the best place in France to observe the rapid growth of ideas and the evolution of taste. Most of the philosophers of the Enlightenment incorporated music in their thinking, and Sauveur, Rameau, d'Alembert, Diderot and the Encyclopedists made original contributions to European musical theory and aesthetics of music.

(i) The musique du roi. Under Louis XIII, the *musique du roi* was divided into the *chapelle* (directed by two

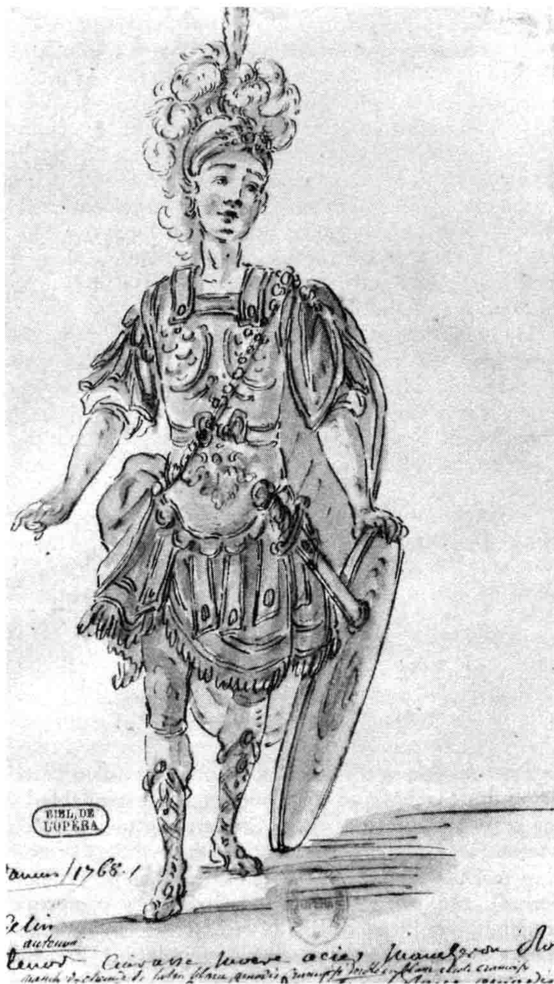
surintendants), the *chambre* and the *écurie*, but there was also a smaller independent ensemble, the *musique du cabinet*, consisting of 12 violins. The posts of these musicians were subject to purchase or reversion, or were in the gift of the king. Musicians were permitted to hold more than one office: around 1650 François Richard was lute master to the children of the *chapelle*, lutenist in the *chambre*, composer to the *chambre* and lutenist to the queen, while in 1714 Lalande held the posts of *sous-maître* of the *chapelle*, composer, *surintendant* and *sous-maître* of the *chambre*. Within the *chambre*, one ensemble acquired particular importance: the 24 Violons du Roi, founded in 1614. It later became the Grande Bande, and was disbanded in 1761. These separate ensembles within the *musique du roi* combined for performances on major religious occasions and a weddings and funerals.

The young Louis XIV was taught the lute, the harpsichord and the guitar from an early age, but his greatest interest was dancing (fig.8) and he created the Académie Royale de Danse in 1661, shortly before the inauguration of the Académie Royale de Musique. For the latter he held competitions to fill what he regarded as the most important posts. The first such competition, in 1663, enabled him to appoint two *sous-maîtres* to the *chapelle*, Henry Du Mont and Pierre Robert. Twice the king himself was the sole judge in the contest to appoint his organists: in 1678, when there was a competition for four organists' posts in the *chapelle*, and again in 1693, when he listened to seven organists before deciding to appoint Couperin. The most spectacular competition, for four *sous-maîtres* to the *chapelle*, occurred in 1683, when the king invited the bishops of France to summon the *maîtres de musique* of their cathedrals to Versailles to perform motets of their own composition. 35 candidates presented themselves, with the four appointments eventually going to Goupillet, Collasse, Minoret and Michel-Richard de Lalande, the last of whom was Louis's personal choice. In 1714, after the others had resigned, Lalande assumed all four posts.

In 1686 Mme de Maintenon founded the Maison Royale St-Louis for the education of girls of noble birth at Saint-Cyr. Nivers was organist and singing master there until his death in 1714 and he, Moreau and Louis-Nicolas Clérambault provided numerous motets for the school's repertory. Celebrations of the Office of the Assumption and Tenebrae services in Holy Week attracted an audience to Saint-Cyr, as well as to the Abbey of Longchamp and other monastic establishments.

Under the regency and the last two kings before the Revolution the *musique du roi* lost its dominant position in musical life. Louis XV preferred the pastoral simplicities of Rousseau's *Le devin du village* to motets, which were now performed at the Concert Spirituel, while his daughters were interested mainly in instrumental music. There was an atmosphere of chicanery in the *chapelle du roi* after the end of the regency (1723) until 1760, with much wrangling between the *surintendants* and *maîtres* of the *chambre*, particularly over the performance of



8. Third of the four entrées (Sabath) of the 'Ballet de la nuit', Salle du Petit Bourbon, Paris, 23 February 1653: drawing by the workshop of Henry de Gissey, wash and gouache (National Trust, Waddesdon Manor); at the approach of two spectators (one played by Louis XIV) the cave, in front of which is a flaming fire where dragons and witches sport, opens suddenly to reveal a banqueting hall

settings of the *Te Deum*. In 1761, for financial reasons, Louis XV once again amalgamated the musicians of the *chambre* and the *chapelle* into a single ensemble. The only subsequent innovation of note occurred in 1784, with the foundation of the Ecole de Chant des Menus Plaisirs, directed by Gossec, to train singers for the king's service. Earlier, in 1778, Mozart had assessed the situation accurately when, on being offered a post as organist at Versailles, he remarked: 'Anyone who enters the king's service is forgotten in Paris.'

(ii) Opera: an affair of state. French opera was created in a manner that would weigh heavily on the musical life of the country. After Mazarin's disastrous attempt to introduce Italian opera with Luigi Rossi's *Orfeo* (1647), the creation of a distinctive indigenous opera seems to have become a kind of national duty. Louis XIV put a ban on foreign musicians; in 1666 Cavalli returned to Italy and the Italian musicians in the *cabinet* were dismissed. In 1683 Henry Desmarets asked the king's permission to visit Italy and perfect his art; his request was initially granted, but Lully then persuaded the king to revoke his decision, arguing that the composer would lose his taste for French music. The poet and librettist Pierre Perrin had wished for the foundation of an Académie de Poésie et de Musique, and he suggested it to Colbert in 1667. Yet, according to Charles Perrault's *Mémoires*, Colbert himself would have preferred 'to leave everyone free to compose operas', but in 1669 Perrin obtained a privilege to set up academies 'in our good city of Paris, and other cities of our realm', the privilege to run for a period of 12 years. When Perrin found himself in difficulties, Lully bought the privilege from him in 1672; this time the wording of the document referred only to Paris, adding merely that Lully might found schools of music 'wherever he may judge it necessary'. The following year he also obtained an order preventing actors from using more than two voices and six violins in their plays. While the purpose of the other academies created by royal decree (the Académie Française and the academies of painting and architecture) was to formulate theories of their arts and serve as centres for debate the sole objective of the Académie Royale de Musique (and the Académie Royale de Danse) was to stage the works of Lully. In 1684 Louis XIV issued letters-patent making it clear that Lully's monopoly was valid 'throughout the whole extent of the realm', and not only for himself but for his heirs. Actors had already been forbidden to make use of 'outside' musicians. Lully defended his rights tenaciously, and even brought a lawsuit against the Les Bamboches marionnette company in 1677.

None of the stage entrepreneurs to whom Lully ceded his rights (for large sums of money) was able to exploit them for long. These licensees included Gautier's company in and around Marseilles after 1685 and companies in Lyons after 1688, in Rennes in 1689 and in Lille in 1695. Most such ventures ended in bankruptcy. Louis XIV's decision, which had no parallel in other countries, contributed to the crushing of all initiative in the French provinces.

In Paris, the company of Italian actors performing at the Palais Royal respected the rules imposed by Lully on the number of musicians permitted in vaudevilles and parodies of operas. When they were dismissed in 1697 their tradition was continued by the Foire St-Germain and the Foire St-Laurent, which encountered opposition

from the Comédie-Française in defence of its own monopoly. The Opéra-Comique, founded in 1715, was granted a royal privilege in 1721 and became very popular, even among the nobility. However, it experienced many financial and legal difficulties, and in 1762 it merged with the Comédie-Italienne; the members of the company had the title of *comédiens du roi*. Touring companies began travelling the provinces with a lighter repertory than that of the Opéra, but their existence was precarious. An ever-increasing gulf separated the court and the capital from other French cities, where only ritual performances of the *Te Deum* or grand funerals provided occasional reminders of royal power.

While the Concert Spirituel and other concert organizations were open to Italian and German repertory, the Académie Royale remained a French bastion devoted to the operas of Lully, Rameau and their successors. According to Bachaumont's *Mémoires*, written in the 1770s, during the period of Gluck's phenomenal success at the Opéra its directors showed 'little curiosity about foreign music, fearing it would be detrimental to their own'.

(iii) Concert life in Paris. The idea of concerts organized for the sole purpose of listening to music became

widespread in Paris in the first half of the 17th century. Mersenne mentioned concerts given by Maugars, Lazarin, Robert Ballard (ii) and Dubuisson, and for the period before 1650 the *concerts spirituels* of Pierre de La Barre (iii) which were attended by the nobility. The 'Assemblée des honnestes curieux' organised twice a week by Chambonnières seems to have existed from 1640 to 1655. In the next generation many musicians gave concerts in their own homes, including the lutenist Jacques Gallot, the guitarist Médard, the viol players Sainte-Colombe, father and son (and the daughter of the elder Sainte-Colombe), and Antoine Forqueray.

Many musical *fêtes* were also held in and around the capital. At the end of the 17th century lovers of Italian music could attend the church of St-André-des-Arts, where the priest, Nicolas Mathieu, introduced them to the trios of Corelli. Among those who attended was Charpentier, who was to direct the music of Mlle de Guise.

The most important concert organization in the 18th century was the Concert Spirituel, founded by Anne Danican Philidor, who obtained a privilege in 1725 allowing him to put on 'public concerts of sacred music', although only on days when the Académie Royale de Musique was closed, on condition that 'no French music nor extracts from operas be sung'. From late 1727 Philidor was allowed to add French music to his repertory. By the time of the Revolution the Concert Spirituel had given nearly 1300 concerts, including music by over 450 composers, first in the Salon des Suisses and then in the Salon des Machines in the Tuileries, made available by the king. The directors of the Concert Spirituel included Mouret, Dauvergne, Gaviniès and Leduc (whose directorship marked perhaps the organization's most brilliant period), and Joseph Legros. The repertory comprised contemporary French works as well as works by Pergolesi (whose *Stabat mater* was always popular), J.C. Bach, Haydn, Sacchini and Piccinni. Mozart composed his Paris Symphony for the Concert Spirituel in 1778, and many foreign virtuosos, particularly from Germany and Italy, performed there.

During the 18th century there were many other concert series, including those organized by the financier Crozat from 1713 to 1724, by the *fermier-général* Le Riche de La Pouplinière from 1731 to 1761 and directed for over 20 years by Rameau, and by the Société Académique des Enfants d'Apollon from 1741. Other concert organizations included the Ecole Gratuite de Dessin, founded by the painter Bachelier (1770); the concerts of Baron de Bagge, a composer and amateur violinist, who was said to pay to have pupils; Mme Filippo Ruge's Italian concerts (1756–7); and the Concert des Amateurs (1769–81), which commissioned a series of six symphonies from Haydn (1785–6). Among the members of the nobility who maintained sizable musical ensembles were the Prince de Carignan, the Prince de Rohan, the Comte de Clermont and the Prince de Conti, who took on some of La Pouplinière's musicians after 1762. This intensive musical activity also led to the publication of specialist journals – the *Journal de musique* (1770–77) and the *Almanach musical* (1775–83) – from which we know that at this period Paris had over 350 music teachers and over 100 organists.

(iv) Musical life in the provinces. Many *maîtres de chapelle* dreamed of a career that would eventually take them to Paris or the Chapelle Royale; one such was Julien Louin, an organist of Nantes, who was granted leave of absence by his chapter in 1685 to go to the capital and 'learn the new modes'. The king also reserved the right for his emissaries 'to take from churches, cathedrals and elsewhere, in those places through which they pass, the finest voices and the best singers they may find and make them part of their company' (Du Peyrat, 1645). The competitors in the *puy* of Caen in 1671 were urged to imitate 'the music books of the masters of the king's chapel as best they can'.

Among the public promoters of musical activities were the provincial *Etats* or local government bodies, who needed musicians to enhance the pomp of their meetings. They included the *Etats* of Brittany (Lully's *Atys* was performed at Rennes in 1689) and of Burgundy (the Prince de Condé invited Mozart to Dijon in 1766), but the grandest were the *Etats* of the Languedoc in the 17th century, when Etienne Moulinié was director of music. While the *puy* of Evreux continued in existence, the chapter of Saintes organised a composition prize in 1628; a *puy* was founded in celebration of St Cecilia at Le Mans, and in 1672 a prize was set up to continue the tradition of the Confrérie Sainte-Cécile. In some towns the citizens themselves founded musical organizations: at Toulouse, whose oboe bands were famous throughout the region, a Société des Lanternistes gave concerts from 1640 onwards, and Troyes had an 'académie' founded in 1647 at the Hôtel-Dieu St-Bernard. After the foundation of the Académie Royale de Musique, very few people were ready to license rights from Lully and his successors and venture into the production of opera, although the licence rights obtained in 1684 by the organist Pierre Gautier (ii) ran for six years at Marseilles and in Provence, and his company performed five operas by Lully at Marseilles, Aix, Toulon, Avignon and Montpellier. In 1688 a three-year concession was granted in Rouen, and several operas by Lully were also staged in following years. In Lyons, the companies of Joseph Dupuis and Jean-Pierre Leguay (1701) exploited their privilege in the region, but not without difficulty. However, most such ventures encountered problems with venues, recruiting and finance, and ended in bankruptcy.

Provincial institutions of greater stability appeared during the first years of the 18th century, mainly in the south of the country; these were the *académies*, founded with the permission and patronage of the regional governor or administrator, by groups of prominent citizens; their aim was the organization of regular concerts in which amateurs could also take part. The first *académies* were at Bordeaux (1707), Lyons (1713), Arles (1715), Marseilles (1717), Pau (1718), Aix-en-Provence (1719), Carpentras (1719), La Rochelle (1719) and Montpellier (1719). By 1738 some 30 such *académies* had been set up in the provinces, but there were frequent interruptions to their subsequent activities. A distinction must also be drawn between genuine *académies*, with statutes agreed by the authorities, and ordinary concerts, which required only simple permission. However, while the Duke de Richelieu declared at Montpellier in 1752 that the *académie* was 'a thing both useful and agreeable to society', a request to open an *académie* in Caen in 1759 was refused because it might 'distract the citizens from the care of their business'. In 1747, when the members of the Grenoble *académie* asked permission to use a public

building in the city for their concerts, the municipal authorities replied that they could not make 99% of the citizens support such an expense for the pleasure of a mere 1%.

However, the *académies*, which were suppressed by the Revolutionary government in 1793, played a considerable part in musical life, and some of their orchestras were conducted by talented composers, although attempts to involve amateur musicians usually failed. Consequently it was felt, for instance in Bordeaux in 1779 and Lille in 1785, that musical education should be provided, at least for the young. When the Mozart family stayed at Dijon in 1766, Leopold severely criticized the musicians he found there as 'detestable ... wretched ... *asini tutti*'. In 1776 a Parisian singing master called Vaudémont advertised his speciality as training 'pupils for dramatic performances and provincial companies'.

The programmes of the Concert Spirituel, particularly under the directorship of Antoine Dauvergne (1762–73), testify to the creative vitality that still existed in some provincial *maîtrises*: a dozen *maîtres* from Dijon, Auch, Reims, Orléans, Coutances and Nîmes performed motets, while performances were given of a symphony by Franz Beck of Bordeaux and organ pieces by Philippe Valois of Toulouse. After 1775, however, when the fashion for *grands motets* had passed, the provinces made almost no contribution to concert programmes. During the 17th century some 25% of the country's composers had come from *maîtrises*, but in the 18th century the figure fell to less than 10%.

(v) Music publishing. After 1607 Pierre Ballard described himself as 'seul imprimeur du roy pour la musique'. Having distributed the *air de cour* in all its forms early in the century, he and his successors then gave priority to collections of *chansons pour danser* and *chansons pour boire* (20 books, 1627–61), *chansonnettes* (20 books, 1675–94) and *airs à deux parties* (37 books, 1658–94). Sometimes the Ballards received an 'express command' from the king to publish motets for the *chapelle*, but they took advantage of their privileged position chiefly to publish the works of Lully, from *Bellérophon* (1679) until 1720. After the composer's death his heirs tried to dispense with their services and had several operas engraved by Henri de Baussen, but they eventually had to cede the whole body of Lully's work to the Ballards. From the middle of the 17th century there was increasing resentment of their privilege among musicians, and lawsuits were brought against them by Métru and Sanlecque. The Ballards now had to face strong competition from copyists who, like Henri Foucault, traded in manuscript scores, and from Estienne Roger of Amsterdam, who was distributing 'pirated' works throughout Europe. Above all, their monopoly was challenged after about 1660 by Parisian authors and printers who had given up the use of movable type in favour of the copperplate engraving process, particularly for the instrumental music (including major works by Marais, Gaultier, Chambonnières and Louis Couperin) neglected by the Ballards. Many composers deposited their works with music shops such as those of the Boivins and Leclercs. In 1738 Charles-Nicolas Leclerc became a music publisher himself, and after 1750 there was a considerable increase in the publication of engraved music. The new publishers were either musicians such as Bailleux, Imbault and Sieber, instrument makers such as Cousineau, Naderman and Pleyel, engravers such as Hue and Vendôme, or full-time music publishers (Boyer, La Chevardière, the Erard sisters). Paris became the main European centre of music publishing, and many foreign composers entrusted their works (particularly their instrumental music) to French publishers, attracted by the high quality of engraving and the publicity they were given by the concert organizations. There were over 150 engravers working in Paris during the 18th century. In a single year (1775), for instance, 250 musical works were published. Theoretical treatises and teaching manuals appeared increasingly after 1750, with high print runs, and this trend culminated in a corpus conceived by the Conservatoire in 1794 as the basis for music teaching. Outside Paris the only music publishing of any importance was in Lyons, where the outstanding figures were J.A. Castaud and C.G. Guera.

10. Title-page of Jean-François Dandrieu's 'Troisième livre de pièces de clavecin', a collection of 36 harpsichord pieces arranged in 8 suites published by the composer (Paris, 1734); engraving by Henri-Simon Thomassin after Nicolas Lancret

(vi) Instrument making. The development of instrument making can be traced from the statistics: Pierre (1893) gives the names of some 350 instrument makers in France for the 18th century alone, including 170 makers of string instruments. Although most of them lived in Paris, some worked in such large cities as Lyons, Strasbourg, Toulouse and Lille or, occasionally, in smaller towns such as La Couture Boussey (woodwind) and Mirecourt (violins).

The organ 'in the manner of Titelouze' was the standard instrument for a large part of France, and complementary Flemish influence was evident. After 1660 the French classical organ became predominant, in parallel with the flourishing contemporary school of organ composition, exemplified by the works of Couperin, Grigny, Louis

Marchand and others. Long before the Revolution, however, the instrument had lost its vitality. In the 17th century Flemish influence initially dominated harpsichord making, but French makers, including the Denis, Jacquet and Desruisseaux families, soon developed their own distinctive instruments. In the 18th century, when some 60 makers were working in Paris alone, many devoted themselves to the restoration of instruments made by the Flemish Ruckers family, obtaining a clearer and less sustained sound because of the light casework, particularly in double-manual harpsichords. Hüllmandel praised the 'extreme lightness' of the keyboards made by the Blanchets, and the harpsichords of Pascal Taskin, with their famous *jeu de buffle* and *genouillères* (knee-levers) operating the registers. Although the most prized lutes still came from Padua and Bologna, Parisians makers such as Jean Desmoulins, maker to the king about 1630, also excelled. In violin making Italian models retained supremacy, but the early Parisian school emerged in the 18th century with such makers as Claude Pierray, Jacques Boquay and above all Louis Guersan. English viols were the instruments most prized at the beginning of the 18th century, before Michel Collichon, Guillaume Barbey and Nicolas Bertrand began making slimmer instruments with the addition of a seventh string.

Woodwind instruments were a French speciality, thanks to a dynasty founded by Jean Hotteterre, a native of the Norman village of La Couture Boussey. He had settled in Paris by 1632, and was followed by his son Martin and nephew Nicolas who were also virtuoso performers; their oboes, bassoons, musettes and flutes were admired in England and other parts of Europe. Another famous dynasty was the Tourte family of bow-makers, founded by Louis and continued by his son François, who is said to have been advised by Viotti. The pianoforte made its first appearance in France at the Concert Spirituel in 1768. Sébastien Erard was granted a privilege in 1785 to exploit a kind of pianoforte which had 'been preferred to those made in England'. Throughout the 18th century the Académie des Sciences pronounced its verdict on new instruments and refinements to existing instruments.

4. THE 19TH CENTURY. In suppressing the *maîtrises*, *académies* and guilds, the Revolution caused more of an upheaval in traditional musical life than when it abjured the king and his court music. Far from giving priority to the musical education of the less privileged classes, it created a highly élitist and monopolistic institution in the Paris Conservatoire, while confirming strong support for the Opéra. With no sacred music worthy of the name, the provinces, apart from some large cities, experienced a long period of musical deprivation in the 19th century, for which military bands and Orphéon male-voice choral societies provided only limited compensation.

Talented composers competed for the Prix de Rome, awarded annually from 1803 onwards by the six members of the Académie des Beaux Arts, most of whom were Prix de Rome winners themselves, as were the professors of composition who had taught them at the Conservatoire. They were therefore well placed to have their works accepted by the Paris Opéra. While there was no official artistic policy, everything conspired to bar from the musical establishment any composers who had not followed this course. Gabriel Fauré, who had not won the Prix de Rome but who nonetheless became director of the Conservatoire, was a late exception who proved the rule.

The notion of 'decentralization', formed about 1829, was constantly invoked in the course of the century, but had no cultural, administrative or political support; all decisions had to pass through Paris. The state, which had concentrated all musical institutions in the capital for three centuries, was very slow to develop a sense of its educational responsibility for the rest of the country. After 1880 there was a movement to recognize art as a public service, but music remained the poor relation for a long time. When the Conseil Supérieur des Beaux-Arts was set up in 1875, it had 12 artists but only one musician. In 1883, when there were still only five subsidiaries of the Paris Conservatoire, and the state barely contributed to their budgets, Bourgault-Ducoudray was appointed to draw up a report on the reform of teaching in schools and

11. Scene from Act 3 (Marguerite's garden) of Gounod's 'Faust', Théâtre Lyrique, Paris, 1859: engraving by Lamy

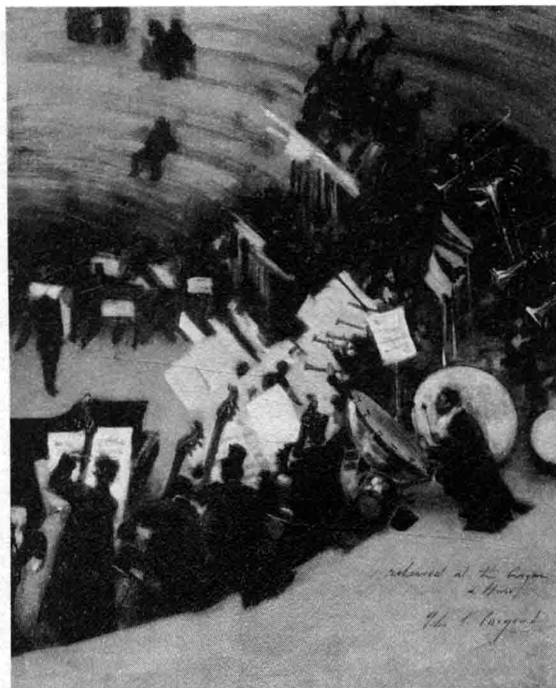
conservatories, which led to the foundation of new institutions in the provinces. In the name of 'artistic decentralization', the Chamber of Deputies voted for a modest amount of aid for popular provincial concerts and for some open-air productions of opera in the south of the country.

(i) Opera. Throughout the 19th century French governments allocated the main part of their musical budgets to the Paris opera houses: the Opéra and the Opéra-Comique, and also, for limited periods, the Théâtre Italien and the Théâtre Lyrique. Although their management methods (ranging from direct administration to licensing) and conditions of contract changed a good deal over the period, this bias towards Parisian opera remained constant throughout all political régimes, which also exercised strict control over the unsubsidized theatres of Paris and the provinces.

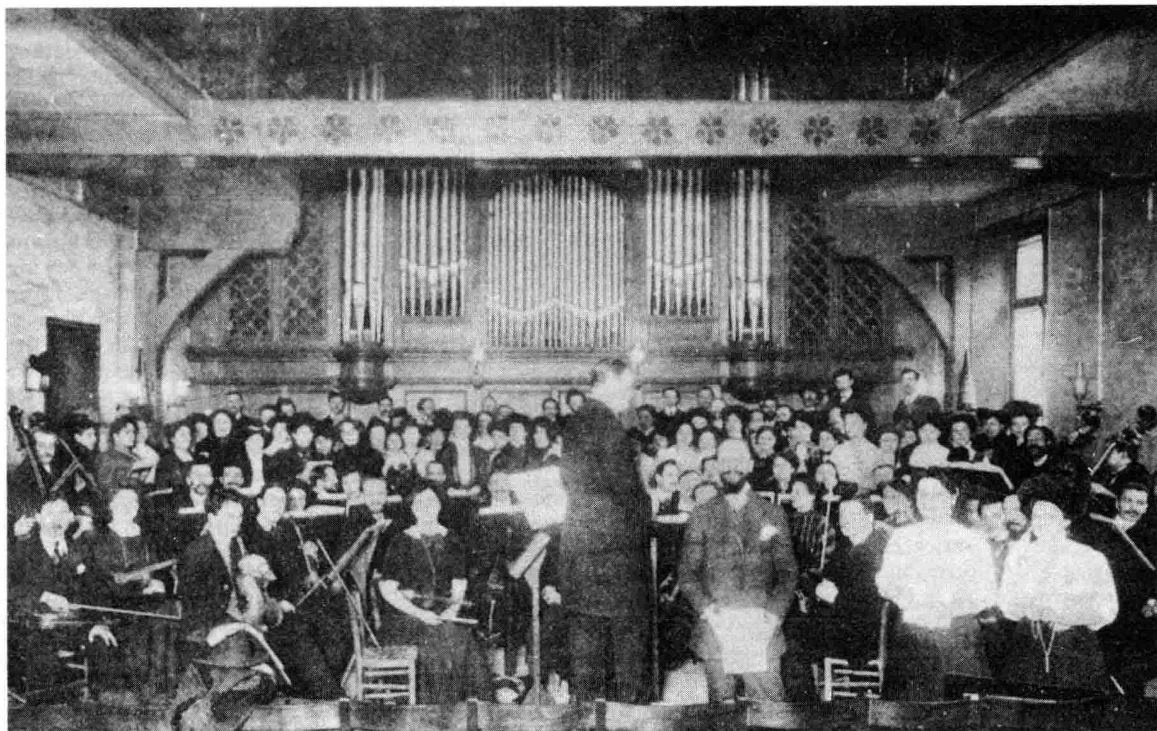


When the theatres were granted complete freedom by the Revolutionary assembly in 1791, the *droit des pauvres* and censorship were abolished; they were reintroduced in 1794 after a period notable for its anarchy and its bankruptcies. Napoleon affirmed his will 'to continue the unifying and national work of the academies and institutions of the *ancien régime*', and set up a hierarchical management system controlled by privileges. By a decree of 1806 provincial theatres were divided into two categories: resident theatres and touring companies. Large cities were authorized to have two theatres: a main theatre for grand opera and another to perform the so-called 'secondary' repertory. This system continued under the Bourbon Restoration, but a ruling of 1824 made it clear that each city must be responsible for the financing of its own theatre. Under Louis-Philippe (1830–48), when the railway was beginning to make travel easier, there were many bankruptcies, and municipalities were reluctant to build new theatres (numbers fell from 361 in 1849 to 357 in 1918). There was a general demand for freedom of the theatre, finally granted by Napoleon III in 1864 (although censorship was retained). A period of some disorder followed, and most of the established companies faced crisis, unable to compete with the touring companies which monopolized the best performers and most successful repertories. From 1852 Montelli's company toured the north of the country with Verdi's *Ernani*. The company of the American Ullman, with Caroline Carvalho and V. Capoul, toured 23 towns in 1873 and 25 in 1880. Under the Third Republic, municipalities usually granted the directors of permanent companies a concession and a subsidy on certain conditions. The frequently incompetent directors had to resort to agents, who became intermediaries between artists and theatres, and whose intervention often led to a generally low standard of production. In 1880 royalties in the provinces were a quarter of the amount in Paris, where the state supported all the national theatres. However, there were some exceptions: Rouen staged 34 first French performances between 1835 and 1912 (including the first performance in France of *Siegfried*), and Marseilles gave 14 operatic premières between 1869 and 1902. Most of the time, however, such productions were confined to one-act *opéras comiques*, with music by local composers, and they were never revived in Paris.

(ii) Concert life. While chamber music was played more or less everywhere in amateur circles and salons, for instance in Marseilles, Douai and Bagnères, Paris had a series of public chamber concerts, organized by Pierre

Baillot between 1814 and 1840, at which an élite audience heard quartets by Beethoven, Boccherini, Haydn and Mozart. This series was followed by other concerts, such as those put on by Alard and Franchomme (1837–1870), Dancla (1838–70), Maurin and Chevillard (1852–70) and Armingaud (1856–68). Such chamber music concerts were rarer in the provinces. In the symphonic field, François Habeneck founded the Société des Concerts du Conservatoire in 1828, by a decree of the minister for the arts, and the society was granted exclusive rights to the use of the Menus Plaisirs during the season.

The conditions imposed on concert performances were not favourable: while the obligation to pay a fee to the Académie Royale de Musique abolished in 1831, the 'droit des pauvres' tax was retained until the 20th century. The authorities did not want the number of concerts in Paris to increase, because they were felt to represent competition for the national theatres. Consequently, most of the concert societies were short-lived (the Athénée, 1829-35; the Société Libre des Beaux-Arts, 1830–33; the Société Philharmonique, 1822). Most of the provincial cities founded philharmonic societies, which consisted chiefly of amateurs and received varying amounts of support from the municipal authorities. They gave only a few concerts a year, mostly for charity. Throughout the century, however, these societies were the main source of performances of orchestral music in the provinces. The first of them were founded before the Parisian societies: at La Rochelle in 1815, Rennes in 1819 and Le Puy in 1820; local initiative led to the creation of the Grande Association Musicale de l'Ouest in 1835, uniting the musical resources of Niort, La Rochelle, Angoulême, Limoges and Poitiers, and to the founding in 1866 of the Association Musicale de l'Ouest, bringing Laval, Rennes and Le Mans together. However, towards the end of the century the philharmonic societies, now recruiting only professionals, had lost all their dynamism. In Paris, Jules Pasdeloup founded the Société des Jeunes Artistes (1853) and then the Concerts Populaires de Musique Classique (1861), at reduced prices (the first concert, in the Cirque Napoléon, had an audience of 6000), and with a new repertory. Following Pasdeloup's example many cities created their own societies for popular concerts, among them Toulouse (1861), Nantes (1866), Marseilles (1871) and Lyons (1874). The Angers society (founded in 1877) was distinctive for the quality of its orchestra as well as for a greater emphasis on modern repertory. In 1878 the state granted subsidies to Pasdeloup, and on a smaller scale to Edouard Colonne, who was continuing the custom of Sunday concerts, but not to any of the provincial societies. In Paris, Romain Bussine and Camille Saint-Saëns founded the Société Nationale de Musique in 1871. Under the banner of 'Ars Gallica' it was to contribute to the reinvigoration of the French school until, in its own turn, it became conservative, and the split caused by Maurice Ravel in 1909 led to the creation of the Société Musicale Indépendante.



(iii) Musical education. The Revolutionary authorities were asked to respond to a universally acknowledged education, as many people saw France as being behind the times by comparison with neighbouring countries. The musical school of the National Guard, which had been directed by Bernard Sarrette, was transformed into the Institut National de Musique in 1793 and later became the Conservatoire, which he continued to direct from

13. 'Rehearsal of the Pasdeloup Orchestra at the Cirque d'Hiver, Paris' by John Singer Sargent, 1876 (Museum of Fine Arts, Boston)

1796 to 1816. The institution nearly disappeared at the time of the Restoration because of its Revolutionary origins, but eventually found stability, despite frequent criticism that it did not provide enough good voices for the national opera houses. An institution specializing in choral singing was founded by Alexandre Choron in 1820, the Ecole Royale et Spéciale de Chant, which became the Institution Royale de Musique Religieuse, but it fell victim to the 1830 revolution. But the rest of the country was still without a system of musical education. A plan devised by Sarrette in 1798 for the creation of a three-tier hierarchy of music schools in the *départements* was never realized. Some cities had already founded free civic music schools, for instance Dijon, with its Institut de Musique from 1794 to 1797, Douai in 1806, and Roubaix and Marseilles in 1820. The music school in Lille asked the ministry several times to grant it the status of a subsidiary of the Paris Conservatoire, but it remained a municipal school until 1826, when it was promoted to the status of subsidiary ('succursales') Conservatoire at the same time as the school of Toulouse. Two new subsidiaries were created in 1841 at Metz and Marseilles. In granting the title of Conservatoire, the state imposed a model on the municipalities but did not provide financial means, and consequently the rise in the number of such subsidiaries nationwide was very slow. The central authority regarded them as a means of discovering fine voices and good instrumentalists who could then be encouraged to pursue their careers in Paris, often with the aid of bursaries granted by their own cities, so that what appeared to be decentralization was only an instrument tending to reinforce centralization.

The movement launched in Paris by G.L.B. Wilhem for musical teaching and practice on a popular level was a far cry from this more or less élitist current. With the support

14. Vincent d'Indy conducting a rehearsal at the Schola Cantorum, Paris, 1909

of the Baron de Gérando and his Société pour l'Instruction Elémentaire, Wilhem devoted himself to bringing music teaching into the primary schools of the Paris area, using a set of simplified signs and tables known as the Wilhem Method. At a time when the humanitarian ideas of Lammenais, Saint-Simon and Fourier were spreading, and had been taken up first by Franz Liszt and soon afterwards by Félicien David, the authorities saw this movement chiefly as a means of keeping the working classes out of bars and improving the 'coarseness' of their habits. The Orphéon male-voice choir movement began in 1833; many such societies were founded throughout the country, and soon went beyond the choral realm, venturing into instrumental music with brass bands. Many Orphéon competitions were organized after the first was held at Troyes in 1849; an inventory of 1867 enumerates 3243 Orphéon societies, representing nearly 150,000 members, the largest being in the north and the next largest in the Bouches-du-Rhône, Seine and Rhône areas. Teaching methods, however, deteriorated, with Pierre Galin and his 'méloplaste' and the numerical method of Emile Chevé and Aimé Paris, and were much criticized. The quality of supervision, of the repertory and of interpretation became very mediocre, with the result that the movement became far removed from its initial idealism.

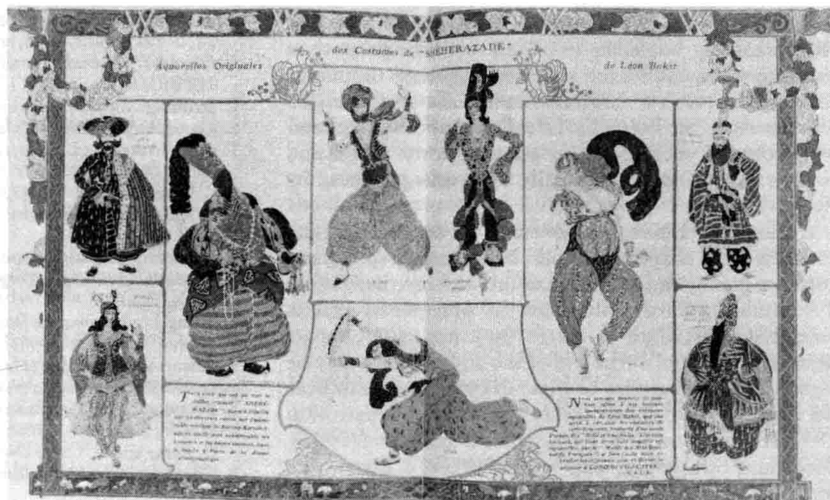
In the field of sacred music, the Ecole de Musique Classique et Religieuse was founded by imperial decree in 1853. It was directed by Louis de Niedermeyer, with state subsidies, and trained many organists and *maîtres de chapelle* who took up appointments in the provinces. After the separation of church and state, however, the subsidies ceased. In 1896 the opening of the Schola Cantorum by Charles Bordes, Alexandre Guilmant and Vincent d'Indy also marked a return to old traditions and the study of counterpoint, and the new institution was soon presenting itself as a rival to the Conservatoire.

(iv) Music publishing. It has been calculated that there were almost 1000 music publishers in France between 1820 and 1914, the great majority of which were based in Paris. However, most of them were small firms, specializing in music for café concerts and Orphéon societies, and issued few works. The most prosperous firms were those that published successful works whose popularity ensured that they would be arranged for amateurs, or would earn royalties, an aspect facilitated by the founding in 1850 of SACEM, the Société des Auteurs, Compositeurs et Editeurs de Musique. A long period of litigation preceded the signing in 1886 of the Berne Convention, which finally assured the international protection of copyright.

The main publishing houses were the firms of Janet and Cotelle (1810–37), Richault (1816–66), Schlesinger (1821–46), Troupenas (1825–50), Escudier (1840–81), famous as Verdi's publisher, and Brandus (1846–87), which acquired the lists of Schlesinger and Troupenas. The only relatively large provincial publisher was Benacci-Peschier in Lyons (1839–54). The first half of the century was the period of greatest prosperity in French music publishing; as the century progressed it confined itself almost exclusively to the national repertory, with such firms as those of Heugel (from 1839), Massenet's publisher; G. Hartmann (1848–91), publisher of César Franck and his disciples; Leduc (from 1842) and Durand (from 1870). Until 1860 French commercial policy was protectionist, with high import duties (up to 29%) charged on foreign publications. In 1830 exports of printed music were three times higher than imports. However, in 1867 export figures were lower than import figures for the first time,

and this trend continued, owing largely to German competition. This decline can be explained not only by the movement of excise policies towards free exchange but also by the modernization of printing techniques, bringing with it more competitive prices, and by the rise in importance of the Germanic repertory in French musical life. Between 1863 and 1896, French exports remained stationary, while German imports were on average 74% of the total. French publishers were never able to find an answer to this reversal of the previous trend, even during the First World War, when they tried in vain to come to a common agreement to replace the classic German editions.

(v) Instrument making. French instrument making occupied an important position in 19th-century Europe, if only because of the technical progress made by Erard (with the double-action harp in 1810 and the double-escapement piano in 1822), and because of Adolphe Sax's brass instruments. While France was chiefly exporting string instruments between 1800 and 1805, the piano soon became the major export: in 1827 Erard was employing 150 workers, and in 1830, when about 100 makers were working in Paris, pianos represented 61% of the instruments sold abroad. Patents and new inventions proliferated, mechanization was increased, and the government's protectionist policies allowed exports to be ten times greater than imports. The country's main customer at the time was the United States. The largest instrument makers even opened their own concert halls and sought the endorsement of famous artists (Liszt preferred Erard pianos, while Chopin favoured Pleyel instruments). After piano making, the greatest activity was in brass instruments and organ building.



The Second Empire was the golden age of French instrument making; organs and pianos were both manufactured on an industrial scale, while string instruments, woodwind and brass instruments continued to be made in small or medium-sized workshops. The five largest piano manufacturers were Erard, Pleyel, Pape, Herz and Kriegelstein, while makers of brass instruments (Gautrot, Thibouville, Buffet) benefited from the rise of military bands and Orphéon societies, which made Adolphe Sax's fortune. Outside Paris woodwind instruments were still made at La Couture Boussey, and inexpensive string instruments at Mirecourt. England became the French makers' principal customer at this period. World exhibitions acted as shop windows for local production, especially those of 1855 (with 243 exhibitors), 1878 (226 exhibitors), and of 1889 and 1900 in Paris. However, the trade agreements of the 1860s opened the way to foreign instruments; piano makers failed to modernize their equipment while the Germans and Americans were adopting new technology. The first workers' strikes came in 1882. The trend was now entirely reversed, and after 1875 the most sought-after French instruments were strings and wind. After 1890 imports, particularly of pianos, rose steadily, and just as in music publishing Germany became the chief supplier (75%), particularly of Bechstein and Blüthner instruments. French instruments were no longer popular abroad except at the very top of the range.

5. The 20th century. The importance of the state in cultural and musical life was undoubtedly maintained more strongly in France than in any other country, although greater awareness of the problem sparked a movement towards more professionalism and a decline in amateur music. The 20th century saw the slow demise of traditional institutions such as the Institut and the Prix de Rome, which was ended in 1969, as well as a genuine stagnation in musical education and industries linked to musical life. The two World Wars marked a distinct watershed for these various areas.

(i) To 1945. The Third Republic continued to provide a moderate amount of support in the form of subsidies to the Opéra, directed for a long period (1914–45) by Jacques Rouché, whose personal fortune, made in the perfumery business, helped to compensate for its chronic financial deficit. Under the Front Populaire, in 1936, the Opéra was nationalized and the Opéra-Comique, facing bankruptcy, was amalgamated with it under the title of 'Réunion des théâtres lyriques nationaux', under the direction of Rouché. In the provinces, the opera houses maintained with difficulty by the municipalities continued to suffer as a result of competition from touring companies, and favoured productions of operetta in the hope of attracting a largely indifferent public.

Between the wars the musical life of Paris was as brilliant as ever, with the Ballets Russes, Ballets Suédois, and various spectacles supported by such patrons as Princesse Edmond de Polignac and Marie-Laure de Noailles, who held salons devoted to the avant-garde of contemporary aesthetics. In the orchestral field the four concert organizations gave rather routine programmes every Sunday: the concert societies were those of Pasdeloup (under Albert Wolff), Colonne (Gabriel Pierné), Lamoureux (Paul Paray), and the Société des Concerts du Conservatoire (Philippe Gaubert and Piero Coppola). New works were played by other ensembles such as the Concerts Wiéner (1921–22), the Concerts Straram (1923–33), and the Orchestre Symphonique de Paris (under Pierre Monteux, 1929–38). Some radio stations such as Radio-Paris also maintained their own orchestras, but they were not permanent ensembles. In 1934 the Orchestre National de la Radiodiffusion Française was formed; it was the first orchestra of this type, and was conducted by D.-E. Inghelbrecht. In 1975 it became the Orchestre National de France. In the provinces, although some large cities such as Marseilles, Lyons and Bordeaux maintained high standards of their own, the main musical events were visits by touring Parisian virtuosos. Most military bands had now ceased to exist, and the Orphéons were very much in decline.

Musical education was the area that experienced the greatest paralysis at this time, beginning with the conservatories. In Paris the scandal of the 'Ravel Affair' – the composer's rejection by the Prix de Rome jury – brought the appointment of Fauré as director of the Conservatoire, and several decisions favouring a more open policy. In the provinces, several new subsidiary conservatories were founded (22 in 1930, as well as 21 Ecoles Nationales), but while the statutes initially provided for state funding of 33% that proportion was progressively reduced, becoming a merely nominal amount after 1930, despite protests. On the initiative of Edouard Herriot a 'Commission de rénovation et de développement des études musicales' was set up in 1928, but although a report ensued (written by Charles L'Hopital) there were no effective reforms. Almost the same thing happened when the Front Populaire came to power in 1936 and decided that singing should be taught in the first year at secondary

15. Costume designs by Léon Bakst for the ballet 'Shéhérazade' to Rimsky-Korsakov's symphonic suite (1888), choreographed by Mikhail Fokine for the Ballets Russes, Paris Opéra, 1910; from the supplement to 'Comoedia illustré' (15 June 1910)

school. Some works were commissioned from composers after 1938, but further measures to introduce music into primary and secondary school teaching, as envisaged by the minister Jean Zay, were deferred. On the eve of World War II the conservatories were in a situation of mediocrity: in obtaining state support the municipalities had thought they would acquire both extra financial means and a guarantee of quality, but neither was forthcoming. In Paris, on the other hand, new private institutions as well as the Schola Cantorum attracted many French and foreign pupils: the Ecole Normale de Musique was founded in 1918 by Alfred Cortot and André Mangeot, and Nadia Boulanger, already well known as a teacher, was one of its first members of staff.

Music publishing and instrument making saw further development of the trends of the end of the previous century. Publishing remained in the hands of family firms, content to exploit their existing lists rather than look for fresh additions to the repertory or turn their attention to the musical heritage of France, which was of increasing importance in musical life. While Durand concentrated on the music of Debussy and Ravel, a new firm, Salabert, built its success on popular songs. Instrument makers saw a fall in the sales of pianos and string instruments, but wind instruments (made by Couesnon, Selmer and Buffet) continued to be exported.

(ii) After 1945. The second half of the century saw both the deployment of the latent forces of 'centralizing Jacobinism' in France, and a more or less permanent (although mostly ineffectual) opposition. A national commission was set up in 1962 to study musical issues and reported three years later, but there were no practical results. André Malraux, as minister of culture, set up a music service within the Direction des Arts et Lettres in 1966, and in 1970 it became the Direction de la Musique, de l'Art Lyrique et de la Danse (still in existence today). The composer Marcel Landowski, who was appointed as its head, noted that since the time of Lully there had been no autonomous administrative and political body for music. The principal task of the new service was to address teaching problems in the conservatories, with the creation of national regional conservatories (formerly subsidiaries of the Paris Conservatoire: 16 were created in 1973 and 27 in 1980), of Ecoles Nationales (41 in 1973, 60 in 1980), and of approved Ecoles Municipales (39 in 1973, 72 in 1980). State aid, now inclusive, provided about 25% of the budget of the regional conservatories in 1980. In the provinces, the plan made provision for the appointment of 'regional delegates' to encourage and coordinate local musical life, while the virtues of decentralization were extolled. Finally, the state founded a Conservatoire National Supérieur in Lyons in 1979, to be on a par with the Paris Conservatoire. Conversely, despite successive announcements by ministers to the effect that music teaching in primary and secondary schools must be a priority, hardly any progress was made in that area.

Opera, however, remained a central preoccupation of government. After the creation of a Réunion des Théâtres Lyriques Municipaux, grouping 13 cities together, a plan for reform of the national opera houses, commissioned from Jean Vilar with the assistance of Pierre Boulez and Maurice Béjart, was brushed aside in 1967. The Opéra-Comique effectively closed down in 1972, but at the Opéra the administrator, Rolf Liebermann, succeeded in gaining public support, thanks to record budgets between 1973 and 1980. Subsidies were granted to the opera houses of some of the larger cities: the Opéra du Rhin at Strasbourg and the opera houses of Bordeaux, Toulouse, Lyons and Marseilles. At the same time, however, in 1974, Radiodiffusion Française was closing down its regional orchestras. In 1967 the old Société des Concerts du Conservatoire had become the Orchestre de Paris, which it was hoped would be a model of its kind.

In the years after the mid-century, research on contemporary music was concentrated in the Groupe de Recherches Musicales created at Radiodiffusion Française by Pierre Schaefer in 1958, and the Centre d'Etudes de Mathématique et Automatique Musicales (CEMAMu) founded by Iannis Xenakis in 1966. However, no organization of the time was more influential than the Domaine Musical founded in 1954 by Pierre Boulez. With the backing of private patronage, it gave performances of the repertory of the Second Viennese School and the international avant-garde of the day. Gilbert Amy succeeded Boulez at its head from 1967 to 1973. In 1974 President Pompidou and the minister Michel Guy appointed Boulez to carry out his project for an Institut de Recherche et de Coordination Acoustique-Musique (IRCAM), which three years later became the music

department of the new Pompidou Centre in Paris. It was reorganized by Boulez in 1980, still with the purpose of bringing composers and scientists together to pursue collective research. In 1976 Boulez had also instigated the foundation of the Ensemble InterContemporain, a chamber orchestra specializing in contemporary music and capable of performing especially the works produced by IRCAM.

During the 1960s a new form of musical activity emerged in the shape of festivals, held between spring and autumn, mainly in the provinces (apart from the Festival d'Automne in Paris). Although the open-air spectacles produced in the south of France (for instance, in Orange, Béziers, Arles, etc.) at the end of the 19th century may be regarded as forerunners of these events, the first to bear the name of Festival was the Aix-en-Provence Festival in 1947. It was followed by the festivals of Besançon (1948), Bordeaux, Strasbourg, and so on. In 1978 there were some 300 festivals, both large and small, throughout the country, over 100 of which were state-subsidized. Some were founded by great performers (for example, Pablo Casals at Prades, Sviatoslav Richter at Meslay); some cover specialist fields (e.g. early music at Saintes), and three have played an important part in the dissemination of contemporary music – Royan (1965–76), La Rochelle (1973–80), and Metz (first held in 1972) – giving premières of many French and foreign works, but reaching what is mainly an audience of professionals.

The state has also undertaken to preserve the French musical heritage. In 1988 the Centre de Musique Baroque de Versailles was founded, with the task of promoting French music of the 17th and 18th centuries in the fields of broadcasting, teaching and research.

On the other hand the state authorities, with their natural tendency to favour operations engendering prestige, have been unable to maintain much vitality in music publishing, despite mergers (Heugel and Leduc, Eschig and Durand), or in instrument making: in 1970 the German company of Schimmel bought the three French brand names of Erard, Pleyel and Gaveau, and ten years later imports of musical instruments were three times greater than exports. Finally, the leading record labels have now all become subsumed into multinational companies.

II. Traditional music

1. History of traditional music studies. 2. General characteristics. 3. Repertories. 4. Form and structure.

1. History of traditional music studies. In 1852 Louis Napoleon ordered the publication of a general compilation of French popular poetry on the suggestion of Hippolyte Fortoul, his Minister of Education. This effort was not, however, the first of its kind: a questionnaire issued in 1808 by J.A. Dulaure and M. Mangourit for the Académie Celtique, and a subsequent enquiry by Count Narcisse Achille de Salvandy in 1845 concerning a competition with prizes awarded by the grand master of the Royal Counsel of Public Instruction, were the first official attempts to identify folksong materials.

Napoleon's decree of 1852 did, however, lay the foundation for what would later be called 'French musical folklore'. The philology section of the Committee on the Language, History and Arts of France was charged with the responsibility for this publication, the purpose of which was the collection of songs. However, agreement was not easily reached on suitable materials for collection and publication. Committee members held repeated meetings, discussing religious, war and festival songs, ballads, historical narratives, legends, tales and satires. Medievalists claimed that this publication was the rightful place for *chansons de geste*, poetry of the trouvères and troubadours, and epics. Others felt that all French dialects should be represented. Unable to reach a consensus, a commission was established, with Jean-Jacques Ampère as chair, charged with establishing 'the true nature of folksongs, distinguishing between their various forms, and preparing instructions for our corresponding members accompanied by examples' (*Bulletin du Comité de la Langue*, 1853, i, p.26). Ampère's *Instructions* were issued in 1853 (ed. Cheyronnaud, 1997) and were immediately sent to all corresponding members who acted as the committee's deputies in the provinces.

112 deputies were involved in the Fortoul project. Songs transcribed and translated in the field acquired the status of monuments, and were sent to the committee which classified them with reference to an exegetical commentary that set out criteria for their appraisal. 13 song classifications were envisaged, distinguishing between religious poetry and folk poetry of peasant origin, didactic and moral poetry and historical poetry, romantic poetry and occasional songs, and so on. 3250 manuscripts reached the committee and were classified under the 13 headings, intended to be printed in the same number of volumes. The death of Fortoul in 1856, however, ended the publication project, and the documents were deposited in the manuscripts department of the Bibliothèque Nationale in 1876.

The results of this collecting, modelled on Herzat de la Villemarqué's *Barzaz-Breiz* (1839), were widely distributed. Coussemaker published *Chants populaires des flamands de France* in 1856, and Damase Arbaud published *Chants populaires de la Provence* in 1862–4; these were followed by the collections of Max Buchon (1863), Prosper Tarbé (1863), Achille Durieux and Adolphe Bruyelle (1864), Théodore de Puymaigre (1865), François-Marie Luzel (1868–90) and Jérôme Bujeaud (1895) among others.

In 1881 Paul Sébillot began publishing his series *Les littératures populaires de toutes les nations*, each of which included a number of songs, indicating that a market had indeed been created. Publishers were encouraged to increase the number of titles as folklorists contributed to such journals as *Mélusine* and the *Revue des traditions populaires*. The Schola Cantorum established in 1896, with the encouragement of Charles Bordes, Félix Alexandre Guilmant and Vincent d'Indy, quickly became a meeting place for discussing traditional and art musics.

There was also an educational element to the domestication of traditional musics. Writing in 1845 and referring to the precepts of J.M. de Gérando (1819) and G.L.B. Wilhem (1821), Salvandy stated that the principal reason for teaching singing in schools was 'to contribute to the moral and intellectual improvement of the young' (see Moreau, 1845). In 1895 Julien Tiersot collaborated with the poet Maurice Bouchor in the selection of a book of *chants populaires pour les écoles* that was intended as a model of musical practice for schools. The Heugel publishing firm published an *Anthologie du chant scolaire et post-scolaire* in 1925, which contained works by specialists in the subject: Tiersot, d'Indy, Dalcroze, Emmanuel,

Ducasse, Brun, Bouchor, Expert and others. There were other similar ventures. The Vichy government played to the efficacy of song in a programme of moral edification, and since that time it has been a constant feature of education.

Parallel to the development of printed materials, the advent of sound recording led to the formation of sound archives in Europe in response to the pioneering work of Dr L. Azoulay, who produced the first phonographic recordings at the time of the 1900 Paris World Exposition. Following the example of Vienna (1900) and Berlin (1902), the University of Paris opened a laboratory in 1911, the Archives de la Parole under the direction of Ferdinand Brunot. The Archives provided a structure to organize systematic collecting in the field. The first sound recording expedition set off for the Ardennes in 1912, a second went to Limousin in 1913 and a third to Berry. Organized collecting was interrupted in 1914, but resumed after World War I. Thus a musical folklore of France was in the process of formation along the lines of the museum system, just as the institutional face of ethnology was beginning to change.

In 1925 Paul Rivet, Lucien Lévi-Bruhl and Marcel Mauss established an Institute of Ethnology within the University of Paris. Ethnology had by this time become an academic subject. In 1928 Georges-Henri Rivière was asked to restore the Musée d'Ethnographie du Trocadéro, a temple of colonial education created during the period of the Third Republic in 1878. He in turn asked André Schaeffner to organize a department of musical organology in 1929, and this department acquired a library of recordings in 1932. Schaeffner published *Origine des instruments de musique* in 1936. Meanwhile, the Musée de la Parole again organized collecting expeditions, and in 1929 the Society of French Folklore began publishing a journal, the *Revue du folklore français*. This publication became the *Revue du folklore français et de folklore colonial* in 1932 and *Ethnologie française* in 1971.

At the time of the 1937 World Exposition, four museums shared the recently built Palais de Chaillot, including the Musée des Arts et Traditions Populaires, devoted to the ethnography of folklore; it was the first official institution of its kind in France. The new museum became a centre of folklore documentation, assembling an archive of instruments inherited from the Musée d'Ethnographie du Trocadéro and commercial recordings of traditional French music.

After the creation of the Phonothèque Nationale in 1938, its director Roger Devigne sent *missions sonores* to the Alps and Provence, while the Musée du Trocadéro organized a collecting expedition in lower Brittany. World War II interrupted these new collecting programmes. Cultivating a sense of regional pride was a dominant theme of the cultural programme under the Vichy regime, and song and dance were among its most important features. In 1930 the Fédération des Associations Régionales spearheaded the creation of a national committee for disseminating propaganda by means of folklore. It became the Comité Nationale du Folklore in 1941 and was in charge of cultural strategies for Pétain's government. Folklore groups were established throughout France, particularly in the free zone. The *Revue du folklore français et de folklore colonial* offered advice on the formation of such groups; this was the beginning of cooperation between research and cultural institutions.

Separate from the Vichy government, Patrice Coirault, who had already published *Recherches sur notre ancienne chanson populaire traditionelle* in 1933, published the monumental *Notre chanson folklorique* with Picard in Paris in 1941, which set out the main principles that would become standard after the war. In 1945 the Musée des Arts et Traditions Populaires officially abandoned the use of the term 'French musical folklore', as it had pejorative connotations left over from the Vichy period. Thus, musical activities were undertaken in the name of musical ethnography, which from 1954 was known as ethnomusicology.

From that time, the museum and laboratory system served as a framework for the development of traditional music studies. Under Claudie Marcel-Dubois and Maguy Andral, French ethnomusicology reached out in many directions. Collecting expeditions proliferated, providing materials for the study of 'music of archaic structure'. Studies of formulae, modes of musical expression and technical mechanisms shed new light on the newly recognized field. Comparative analysis became an important area, and it was soon enriched by input from acoustic analysis, initiating studies of traditional instruments with the study of organology.

The extensive collecting activity set in motion by the Musée National des Arts et Traditions Populaires (particularly after it moved in 1971 to its present site in the Bois de Boulogne) was greatly stimulated by the decentralization law of 1982. By reinforcing the powers of local government, this law paved the way for a great extension of collecting activities in the regions. After the foundation of the Conservatoire Occitan in Toulouse, other associations were established: Dastum in Brittany, the Agence des Musiques Traditionelles d'Auvergne at Riom, the Centre Culturel de Flandre at Hazebrouck, the Centre Lapios in the Gironde and others. With subsidies from regional and local government councils, they undertook ambitious collecting campaigns, which led to the establishment of archives and sound recording libraries. Grouped together within the Fédération des Associations de Musique Traditionelle, they produce the journal *Modal* and are currently developing major recording projects.

2. General characteristics. While composers such as Canteloube (1947) aimed to define a single body of traditional French music, contemporary collectors, on the other hand, emphasize regional identities. Their programmes, organized around the urgency of collecting, lead in the direction of conservation, the construction of archives and the consultation of archival documents, developing along the lines of the museum model in three ways: systematic collecting, field research and international exchange. Marcel Maget, for example, worked with the Arts et Traditions Populaires framework to liberate traditional music from its marginal position by encouraging comparative studies dealing with subjects such as *aksak* rhythms and issues of transcription and improvisation. The search for lost origins and the fascination with traditional musical creativity have yielded significant field research, which in its turn lends authority to transcription and comparative analysis. In the work of Maguy Andral, older methods have been superseded by the study of variants (beginning with such archaic forms as shepherds' calls and chanted formulae); Denis Laborde has studied the improvisations by Basque *bertsulari* of rhymed, metrical verse on existing melodic structures.

New areas of study have also emerged: Lothaire Mabru's work focusses on body postures during instrumental performance; Jacques Cheyronnaud studies formal functions of musical utterances in places of worship.

As repertories have been analysed and compared, there has been a temptation (which Constantin Brăiloiu did not escape) to trace variants of the same song or instrumental piece and to focus on the differences between them, depending on whether they were recorded in Brest or Morlaix, Corte or Ajaccio, Vendôme or Blois. There should be no objection to regarding variation as a recurrent principle in traditional musical forms; this probably has less to do with the intrinsic quality of traditional music than with the ways in which we perceive these repertories. In three variants of a song recorded and transcribed by Claudie Marcel-Dubois in different parts of Haute-Loire (ex.1), a notable feature is the importance of speech in the rhythmic structure of a syllabic song in which the melismatic rate is always one to one.

Local skills and manufacturing methods have produced instruments with unique sonorities, and thus despite organological relationships, the Provençal *tambourin* is not the same as the drum of the Vendée, the *galoubet* is not the Basque *txistu*, the Provençal *musette* bagpipe is not the same as the *cornemuse* of the Borbonnais, Berry or Morvan, the Béarnais zither is not identical with the Basque *ttun-ttun*. However, certain families of instruments are dispersed over particular geographic and cultural areas. Examples of such families include the strident sound of flutes in the south, the drone of bagpipes in the centre and west, the clatter of cog-rattles (fig.16*b*) and grinding timbre of hurdy-gurdies in the Massif Central (fig.16*c*), the nasal tone of Pyrenean oboes, the powerful dull thud of the Provençal *tambourin*, the noisy strains of village wind bands, the blare of signalling horns on rocky coasts or in mountainous regions, the hunting horns of Sologne, the roar of musical copper cauldrons on Midsummer's Eve in the west, the twanging of Corsican jew's harps and the famous carillons of bells in the north. Similarities in vocal performance could be enumerated, such as the regular rhythm of children's counting games,

16. French folk instruments: (a) diatonic accordion from Landes; (b) crécelle (cog rattle) from Hautes-Alpes (both Musée National des Arts et Traditions Populaires, Paris); (c) vielle à roue (hurdy-gurdy) player, Cantal; (d) bombarde (shawm) and biniou (bagpipe), Finistère, Brittany, 1910; (e) cobla ensemble of shawms, cornets and bass, eastern Pyrenees

songs bordering on speech, cries bordering on song, shepherds' calls, the whooping of frenzied dancers, sobs in funeral keening, harvesters' calls, ploughmen's injunctions to beasts in the Massif Central, the vibrato of Nivernais drovers, the humming of Bugey *charamelleurs* and imitations of instrumental sounds, either emphatic guttural effects or monotonous, uniform intonations.

The majority of traditional songs are monodic and performed as solos. However, performance by two singers in a responsorial pattern is widespread in Brittany and the Vendée. In the interior of Brittany this kind of sung dialogue is called *Kan ha diskan*; two singers take turns singing stanzas, but overlap at the end of each stanza. These responsorial pieces are often dance-songs. In the Basque country, *bertsulari* poets improvise rhymed stanzas of verse which they sing to a *timbre*, a tune everyone knows. The practice of sung improvisation, linked with strong regional identities, is expanding today. Apart from organized choirs, such as those found widely in Alsace, vocal polyphony is rare, found in very different regions, such as in Corsica (the *paghiella*) and the Basque country (the *oxote*).

It is possible to trace a similar distribution of types of instrumental music. For example, there are repertories for two parts on a single instrument. One playing technique is referred to as *picotage* ('pecking'): the instrumentalist constantly returns to a bass note while playing a melody. This (ex.2) is a feature of music for the *cabrette* (droneless bagpipe) of the Massif Central. The drone may take the form of a rhythmic ostinato, as with the *tambourin à cordes* ('string drum') found in the south and the *ttun-ttun* of the Basque province of Soule. The manner of playing is the same as that of the one-man fife-and-drum player: the cords of the *tambourin* are struck with a wooden stick held in one hand while the musician plays the fife, *galoubet*, or in Soule the *txirula*, with the other hand. There are also ensembles built around the polyphonic principle: bagpipes and accordions (often diatonic; fig.16*a*), ensembles consisting of hurdy-gurdies and bagpipes, the Breton bands of *bombardes* (shawms) and *binious* (small bagpipes; fig.16*d*) and village wind bands in Alsace, and Catalan *coblas*, ensembles of hurdy-gurdies, shawms, cornets and bass which play an important role in dances and processions (fig.16*e*).

3. Repertories. The *Cantilène de Saint-Faron*, a ballad dating from the year 622 that was sung by a chorus of women accompanying themselves with hand-clapping,

Ex.2 *A dix-huit ans je sortais de l'église*, regret played on *cabrette* (bagpipe), Saint-Simon, Cantal

+ = main notes of melody.

and recorded in a 9th-century manuscript, is commonly taken to be the first transcription of dance. Manuscript sources from the 9th century to the 12th mention tropes, refrains, trouvère songs, airs for games, dance music and *danseries*, and noëls. The heyday of the *trobar*, poetry of the troubadours of the *langue d'Oc* area, occurred in the 13th century. In the 14th century, the tenor parts of polyphonic art music borrowed popular melodies, and *Le Roman de Fauvel* (completed *c*1317) includes many *sottes chansons*, lays, rondeaux and *charivari* songs, making it a symbol of the hybrid origins of the Ars Nova. The movement was extended in the following centuries to include drinking songs of the Compagnie du Vau-de-vire, Gautier Garguille's *chansons folastres*, and many transcriptions of popular songs in the Bayeux manuscript, to which may be added polyphonic works by Du Fay, Josquin and others. Throughout the 17th century, Pont-Neuf songs and *mazarinades* (mocking Mazarin and those in political power) encouraged the creation and distribution of a repertory using well-known tunes in which new words were composed to existing airs. This repertory was often distributed in print. Melodic accompaniments were frequently exchanged between church and theatre, tavern and procession. The Parisian publisher Ballard published a number of *chansonniers* in the 18th century containing medleys of popular songs and airs from operas. This publishing enterprise was extended at the time of the French Revolution to include revolutionary and military songs. Numerous sentimental ballads were published during the Restoration period, and most were to be sung to tunes taken from *La clé du caveau*, published by Ballard in 1811.

It was amid this publishing activity, coinciding with the beginning of song collection, that the concept of regional song emerged. In the four volumes of *Essai sur la musique ancienne et moderne* (1780), J.B. de Laborde mentioned the origins of the songs he transcribed: Auvergne, Périgord and Brittany. From that time on, musicians imbued regional character to their musics, either in form (the Breton *gwerz* and *sonn*, the *ébaudes* and *kiriolées* of Bresse, or the Corsican *voceri*), or in regional dance music (bourrées, *montagnardes*, the Catalan *sardane*, the Breton gavotte, the Provençal *farandole*), or in songs that are symbolic of cultures (e.g. *Se canto* in Languedoc, *Les esclops* in the Massif Central, *La mère des Huguenots* in Angoulême), or finally in terms of rhythm (e.g. the Basque *zortziko*).

Traditional repertories were adopted once again by musicians and groups in the 1970s, confirming that variation ensures the existence of such repertories. A number of festivals have been created to host traditional music, and the so-called revival of French traditional music is particularly lively and inventive in Brittany. Encouraged by the decentralization law of 1982, the movement now has the benefit of local subsidies and is growing and flourishing.

Parallel to this revival movement, there was renewed interest in the masquerades and ritual music associated with Carnival. Old songs and rounds have been revived in reinvented rituals, such as in Soule, and instruments like the friction drum are now used again in the singing of Christmas carols; the raucous sound of cog-rattles enlivens *tintamarres* and *charivaris*, and the cracking of whips accompanies Passiontide songs.

Work songs comprise a repertory extensively analysed by students of folklore; they include reapers' songs, blacksmiths' or woodcutters' songs, sea shanties, songs for vintage time, and *chansons de toile* sung by women spinning. Lullabies have also received much attention, and new interest in children's singing games and nursery rhymes has encouraged enthusiastic field research.

4. Form and structure. Apart from the sound of rattles or the blowing of horns in *charivaris*, where the aim is to produce an unpleasant sound, most traditional instruments are used in dance music. Ex.3 illustrates the basic structure of a quadrille transcribed from a recording made in the Vendée. It was performed on the violin and makes much use of open strings as variable drones, used as percussion to complement a rhythmic ostinato of tapping feet, interrupted by vocal instructions from the instrumentalist to the dancers. Other forms of dances or marches are also accompanied by vocal comments (e.g. the Corsican *currente*).

The form of most vocal music is strophic. Non-strophic song forms exist, either with a central refrain, refrains without text, or refrains consisting of meaningless phonemes. For instance, in Basque country, particularly in the province of Soule, there is an entire repertory of wordless songs. Single strophes are rare in the sung repertory. On the other hand, enumerative songs are common (*Alouette*, *La Perdriolle*), and a decreasing enumeration (generally from eight down to one) is often associated with dance-songs. The lines are usually brief, comprising six or eight syllables, but some songs are organized in decasyllabic metre with individual lines divided into unequal half-lines (6/4 or 4/6), or, less frequently, equal half-lines (5/5). These enumerative forms are governed by the principle of assonance.

Themes of traditional songs draw on historical events, tales, legends, miracles and drama. A number of songs in traditional repertories deal with the state of mind of a bashful or rejected lover, or a fiancé(e) still ecstatically happy or already disappointed. These themes often mingle with local anecdotes, praise of nature, humorous or dramatic situations, and religious subjects. The melodies are very often constructed on *timbres*, existing tunes not linked to a single text but used to accompany a number of songs. Catholic hymnbooks and Protestant psalters include melodies of popular songs among their tunes, sometimes melodies that are associated with bawdy songs.

The musical structure of songs is generally simple; a single melody is repeated for each stanza, and the refrain is sung to the same musical phrase; it is unusual for the refrain to be sung to a different musical phrase from that of the couplets. Parlando-like sections may also be introduced into songs. Sometimes the melodies even contain imitations of animal noises or of the sounds of certain instruments.

Apart from recitatives in free rhythm, song rhythms are usually the same as the metre of the texts, and the rhythms of dance-songs match the steps of the dance. Most songs are usually syllabic. Melismatic settings have most often been reserved for sacred performance. In all cases, rhythms or styles of utterance are linked to the context of performance, so that the same tune can be used to accompany a lament or a bourrée.

Melodic ranges are variable. A lullaby is usually sung in a narrow range, a *romance* in a wider range. The most common range is somewhere between a 5th and an

FEET
etc
Chain' des dam's,
Al-lez, ga-lop,
Ba-lan-cez

octave. Melodic motifs are often built from a succession of small intervals and are of variable length. Most characteristic are dance-songs which are made up of a succession of short phrases.

Formally, ternary structures (e.g. *ABA*) were most common, perhaps with an element repeated (e.g. *AABA*). Less frequently there were binary forms or more complex structures (e.g. *ABCD*). The identification of modal scales has been the subject of debate. While major and minor modes are the most frequent, songs sung in 'older' modes, such as the pentatonic, are sometimes found, particularly in the west (Brittany and the Vendée) and in Basque country.

FRANÇOIS LESURE (I), CLAUDIE MARCEL-DUBOIS/DENIS LABORDE (II)

Francescatti, Zino [René-Charles] (*b* Marseilles, 9 Aug 1902; *d* La Ciotat, 17 Sept 1991). French violinist. He was taught by his parents, both professional violinists (his father's teacher, Camillo Sivori, was a protégé of Paganini), and made his début in Marseilles in 1918. In 1924 he went to Paris and, after concert appearances there, made the acquaintance of Ravel, with whom he formed a duo and toured Britain in 1926. He taught at the Ecole Normale de Musique from 1927 to 1929 and steadily developed a solo career in Europe and the USA. In 1939 he settled in New York, though after the war he continued to teach in France and he retired there in 1976. He established a violin competition in Aix-en-Provence in 1987, funded in part by the sale (to Salvatore Accardo) of his 1727 'Hart' Stradivari.

Francescatti's repertory extended beyond the conventional to include music by Bernstein, Milhaud, Respighi and Szymanowski, whose work he vigorously championed; he also maintained throughout his career a fondness for the music of Paganini, whose First Concerto he had played at his débuts in Paris (1925) and New York (1939). In Classical concertos his performances were characterized by a relaxed, lyrical manner and a romantic eloquence of feeling. He played with exceptional sweetness of tone, and often sustained a warmth of legato phrasing that he could nevertheless be reluctant to abandon when the music demanded more incisive attack. Later in his career he occasionally toured with Robert Casadesus, with whom he gave outstanding performances of sonatas by Debussy, Franck and Fauré. His many recordings include concertos by Beethoven (with Bruno Walter), Bruch and Sibelius (with Bernstein) and Walton (with Ormandy). He made a few transcriptions and composed a small number of pieces, mainly for the violin.

NOËL GOODWIN

Franceschi [de' Franceschi]. Italian family of printers. The best known is Francesco Franceschi (*d* in or before 1599). He signed his volumes 'Francesco dei Franceschi Senese', which implies that he came from Siena. Between 1562 and 1599 he printed a great many volumes at Venice, including the works of Zarlino. His only other musical titles were also theoretical – the writings of Maurolyco and of Aurelio Paolini. His music printing is as elegant as any of the period, and he used his own fount of type. Giovanni Antonio de' Franceschi was probably his relative (there were several other contemporary printers with this name, but they did not print music); he worked at Palermo from 1592 to 1599, and produced four titles: a reprint of Arcadelt's works, the first volume of Antonio Il Verso and two volumes of music by Raval. He printed another edition of Zarlino's works in Venice with Giacomo Franceschi in 1602. Another Franceschi printed a single musical treatise at Verona in 1615.

STANLEY BOORMAN

Franceschini, Petronio (*b* Bologna, 9 Jan 1651; *d* Venice, 4 Dec 1680). Italian composer and cellist. He was a brother of the painter M.A. Franceschini. He studied with Lorenzo Perti in Bologna and with Giuseppe Corsi in Narni. One of the first members of the Bolognese Accademia Filarmonica, he served as its *principe* in 1673. From 6 March 1675 until October 1680 he was a cellist at S Petronio, Bologna; his name appears among the additional musicians for the St Petronius feast on 4 October from as early as 1666. Already known for his operas, he was called to Venice by Vincenzo Grimani to compose a work for the Teatro di SS Giovanni e Paolo but died soon after having completed the first act. He was buried in the church of SS Giovanni e Paolo, with funeral music directed by Legrenzi; memorial services were also held at the Arciconfraternita di S Maria della Morte, Bologna, where in 1679–80 he was *maestro di cappella*, and at Genoa. G.A. Perti and Domenico Gabrielli were among his pupils. Primarily a composer of sacred music, Franceschini was, after G.P. Colonna, the most productive composer at S Petronio in the last quarter of the 17th century. His psalms, *Magnificat* settings and masses are written in the rich Bolognese contrapuntal style, well suited to the reverberant acoustics of the basilica. His operas have great rhythmic energy and make much use of the trumpet in dialogue with the voice. Two sonatas, one with trumpets, are cast in the four-movement pattern common in the late 17th century.

WORKS

OPERAS

Le gare di Sdegno, d'Amore e di Gelosia (F.M. Bordocchi), prol and 2 intermedi for Caligula delirante, Bologna, Formagliari, 1674, music lost

L'Oronte di Menfi (T. Stanzani), Bologna, Formagliari, lib ded. 10 Jan 1676, *I-Vnm*

Arsinoe (Stanzani), Bologna, Formagliari, lib ded. 26 Dec 1676, *Vnm* (2 versions)

Prologo ed Intermedi dell' Arsinoe (Stanzani), Bologna, Formagliari, 1677

Apollo in Tessaglia (Stanzani), Bologna, Formagliari, 27 May 1679, music lost

Dionisio, overo La virtù trionfante del vitio (M. Noris), Venice, SS Giovanni e Paolo, lib ded. 12 Jan 1681, *Vc*, *Vqs* (arias); only Act 1 by Franceschini, work completed by G.D. Partenio

SACRED

La vittima generosa (orat, B.G. Balbi), Bologna, Palazzo Azzolini, 6 March 1679, music lost

Gefte (orat), Ferrara, Confraternita della Morte, 1679, music lost

8 masses, motets, *c*30 psalms, lits, hymns, Mag, 2–8vv, many with insts, some with 1–2 tpt, most 1673–80, *I-Bc*, *Bsp*

OTHER WORKS

4 cantatas, *I-MOe*

Sonata, 2 vn, bc, 1680[7]

Sonata, 2 vn, bc, *GB-Lbl*, probably identical with sonata in 1680[7]

Sonata a 7, 2 tpt, str, trbn, org, theorbo, *I-Bsp*; ed. E.H. Tarr (London, 1968)

THOMAS WALKER/MARC VANSCHEEUWIJCK

Francesco da Barberino (*b* Barberino di Val d'Elsa, 1264; *d* Florence, 1348). Italian poet. He studied law in Bologna and in Florence, where he later practised as a notary, and also lived in Venice and in France. He wrote two didactic poems in Italian: *Documenti d'amore* (for which he provided an extensive Latin commentary; ed. F. Egidi, Rome, 1902–27), and *Reggimento e costumi di donna* (ed. C. Baudi di Vesme, Bologna, 1875). In these works information is given on the place of music in early 14th-century scholarship, education and individual and social life. There are also descriptions of the principal poetic and musical forms as well as references to dance, instruments and performing practice.

F. ALBERTO GALLO

Francesco da Lucca. *See* GUAMI family, (2).

Francesco (Canova) da Milano [da Parigi, Milanese, Monzino] (*b* ?Monza, 18 Aug 1497; *d* 2 Jan 1543). Italian composer and lutenist. He was a member of a family of musicians, including his father, Benedetto (*d* before 1 Sept 1555) and his elder brother Bernardino (*d* after 1562). The date of his birth is given in three horoscopes, the earliest in a marginal note by Girolamo Aleandro (dated 1525), the others published by Girolamo Cardano (*Libelli duo . . . item Geniturae LXVII. insignes casibus et fortuna*, Nuremberg, 1543) and Luca Gaurico (*Tractatus astrologicus*, Venice, 1552). Gaurico also wrote that Francesco was taught by Giovanni Angelo Testagrossa, though this cannot be confirmed; if it is true, the instruction must have occurred in Milan between about 1505 and 1510. Francesco spent most of his career in the orbit of the papal court. The earliest indication of his presence in

Rome is a listing as 'Franciscus mediolanensis' or 'de Millan' among the 'esquires' in the roll of the papal household prepared in May 1514. He and his father were among the private musicians of Pope Leo X between October 1516 and December 1518, succeeded by Francesco alone until March 1521. In a letter of 14 March 1524 the Ferrarese ambassador to Rome mentioned Francesco's participation in a banquet attended by, among others, Baldessare Castiglione and Paolo Giovio. In the same year there is a record of a 'Barbero che sona di liuto con Francesco'; it is not clear whether a North-African Berber or a barber (like the 15th-century lutenist Pietrobono) was meant.

It is not known when Francesco left Rome during this period; the last reference to him is as performing together with another lutenist and a viol player before Pope Clement VII and Isabella d'Este on 16 January 1526. In 1528 he obtained a canonry in S Nazaro Maggiore, Milan, which he ceded to his brother Bernardino in 1536. In early June 1528 his friend Francesco Berni addressed to him in Piacenza a *capitolo*, which shows him to have been in contact with the circle of Gian Matteo Giberti, papal datary and bishop of Verona, an important patron of music and of ecclesiastical reform. By this time Francesco's music had begun to circulate widely: an inaccurate version of one of his ricercares was printed in Paris by Attaingnant in 1529. Francesco may have been in Murano together with his brother in January 1530 (see Carlone), but there is no evidence that he was organist of Milan Cathedral in that year, as has been suggested. He served Cardinal Ippolito de' Medici, nephew of Clement VII, between 1531 and 1535; in the latter year he is recorded in Rome as lute teacher to Ottavio Farnese, grandson of Pope Paul III. In 1536 no fewer than five volumes wholly or largely devoted to Francesco's ricercares and intabulations appeared in Milan, Naples and Venice. A letter of Francesco della Torre shows that he was still in Rome on 4 August 1537. In that year Perino Fiorentino degli Organi, called Francesco's 'creato' (possibly meaning 'pupil', 'servant' or even 'deputy'), became a private musician to Paul III. Francesco is listed as a member of the household of Cardinal Alessandro Farnese on 1 January 1538. In June he took part as a papal musician in the historic meeting at Nice between Paul III, Charles V and François I of France; the latter rewarded him richly 'for playing the lute and other services'. It is not known when he may have earned the sobriquet 'da Parigi' (of Paris) that appears in the ascriptions to him in the Siena Lutebook (*NL-DHgm* 28 B 39), but a period in French royal service cannot be ruled out.

In July 1538 Francesco married the Milanese noblewoman Clara Tizzoni, who brought him a sizeable dowry. They lived in Milan at least until September 1538, and their son Lelio Donato, who did not pursue a musical profession, was born in April 1540. The final years of Francesco's life and the cause of his death are obscure, although he and his father are again recorded in papal service in early 1539. The date of his death is recorded only in Gaurico's horoscope, which states, 'He died in 1543, in the 47th year of his age, the 4th month, the 15th day'; this has usually been read as indicating 15 April, but it is actually a precise statement of his age, indicating 2 January. In any case Francesco was dead by 21 September 1543, when his father made a will; the date of 1544, reported as being on the tombstone his father erected in S Maria della Scala, Milan, must be a mistranscription. His death is not recorded in the *Registri dei morti* of Milan for 1543, so it probably occurred somewhere else. A portrait of 'Francesco del Liuto' in the Pinacoteca Ambrosiana, Milan (illus. in Slim, 1964), probably depicts Francesco da Milano, but other images that might portray him are doubtful.

Francesco's fame as a performer was great in his lifetime and long afterwards; he became an emblem of the musician who ravishes the souls of his hearers, and his name attained an almost proverbial status like those of Pietrobono and Bakfark. Some of his ricercares and fantasias, now his most highly regarded works, are probably written-down equivalents of his celebrated improvisations; but as a composer he was chiefly prized in the 16th century for his intabulations of vocal works, as Vincenzo Galilei attested in his *Fronimo* (1568, 1584). More of his music is preserved than of any other lutenist of his time, in sources originating in all parts of Europe and dating from 1529 to 1615, and his printed music was still for sale as late as 1662 (*MischiatiI*); but it is unlikely that he was directly associated with any of the sources of his music except perhaps the earliest printed collection devoted to him, the undated *Intabolatura da leuto* (see Pavan, forthcoming). The high regard in which he was held by his contemporaries is shown by the number of works by later lutenists that are based in one way or another on his; an unprecedented phenomenon in the genre.

Francesco's style, transitional between the idiomatic, rhapsodic looseness of his predecessors and the strictly imitative formalism of many successors, had a powerful influence on instrumental composition in the mid-16th century. It is especially characterized by the manipulation and development of short melodic motifs within a 'narrative' formal outline of great flexibility and balance. Many formal techniques were adopted from vocal music of Josquin's generation, such as contrast between high and low duos (sometimes extending to pair-imitation), parallel 10ths between outer parts and fauxbourdon texture before cadences. Although he never pursued the exclusively imitative style typical of the vocal music of his own time, he occasionally concentrated on a single subject throughout a whole piece, creating some of the earliest examples of the monothematic ricercare (see especially the pair nos.33–4 in Ness's edn). Ness (1986) has very plausibly suggested that some of Francesco's works were first composed in parts in mensural notation. The eloquence of Francesco's music makes as powerful an impression now as it did in his own time, and he must be ranked among the finest composers of the 16th century.

WORKS

for 1 lute or vihuela unless otherwise stated

Editions: *The Lute Music of Francesco Canova da Milano (1497–1543)*, ed. A.J. Ness, HPM, iii–iv (1970) [N]
Francesco da Milano: Opere complete per liuto, ed. R. Chiesa (Milan, 1971) [C]

91 ricercares or fantasias, N nos.1–36, 38–91, 95 (inc.); nos.1–17, 19, 26, 42, 67, 87a, 88–91, 95 (complete; C i, 155); also in *Intavolatura de viola o vero lauto . . . libro primo [secondo] della Fortuna* (Naples, 1536/*R*), several with alternative versions (see C i for variants); nos.33–4 also in *GB-HAdolmetsch* II.C 23, *I-COc* 1.1.20, Berlin, Preussische Staatsbibliothek, Mus.ms.40032 [now in *PL-Kj*]; no.36 also in *Des chansons . . . reduictz en tablature de lut . . . livre cinquiesme* (Leuven, 1547), *Carminum pro testudine . . . liber quintus* (Leuven, 1547) [both now in *Kj*]; no.38 also in *GB-HAdolmetsch* II.C 23

7 ricercares or fantasias, *HAdolmetsch* II.C 23, *I-CFVd* s.s., *COc* 1.1.20, Berlin, Preussische Staatsbibliothek, Mus.ms.40032 [now in *PL-Kj*]
Fantasia, 2 lutes, *I-CFVd* s.s.
Tirate per fare la mano molto legiadre, *CFVd* s.s.
Tochata, N no.92
Canon, 2 lutes, N no.93
Spagna, 2 lutes, N no.94; also in *I-Ra* 1608 (inc.), Berlin, Preussische Staatsbibliothek, Mus.ms.40591 [now in *PL-Kj*]
Intabulations of 3 motets, 24 chansons, 2 madrigals, N nos.96–124; nos. 97–102, 104–9, 111 also in *Intavolatura de viola o vero lauto . . . libro primo della Fortuna* (Naples, 1536/*R*)
Intabulations of Crainte et sospir (P. Guerrero or J. Baston), O envieulx qui de mon infortune (Maistre Jhan or De Latre; inc.), attrib. Francesco in text of V. Galilei, *Fronimo dialogo* (Venice, 1568, 2/1584[15])

DOUBTFUL AND MISATTRIBUTED WORKS

9 ricercares, fantasias or preludes, N appx nos.22–9, 31
Intabulation of Benedicta es (Josquin), N appx no.30 (anon. in source, associated with fantasia, N no.87b)
Intabulation of Ultimi miei sospiri (Verdelot) in Galilei, *Fronimo*, ?= the one attrib. Francesco in text
Fantasia, N no.37, is by Perino Fiorentino

FRANCO PAVAN

Francesco degli organi. *See* LANDINI, FRANCESCO.

Francesco Fiamengo. *See* FIAMENGO, FRANCESCO.

Francesco Milanese. *See* FRANCESCO DA MILANO.

Francesconi, Luca (*b* Milan, 17 March 1956). Italian composer. He studied composition with Corghi at the Milan Conservatory; he later attended Stockhausen's composition courses in Rome and Berio's at Tanglewood, and then collaborated with Berio between 1981 and 1984. His works have received prizes at many international competitions including Gaudeamus (1984), Martin Codax (1985), Guido d'Arezzo (1985) and the New Music Composers' Competition (1987). Additionally, he was awarded the Stipendienpreis (1988) and the Kranichsteiner Musikpreis (1990) at Darmstadt. In 1994 he was awarded the Siemens Prize for his work as a composer as a whole, and in the same year he won the Prix Italia for his *Ballata del rovescio del mondo* (1994), a radio opera on a text by Umberto Fiori. In 1990 he founded 'AGON acustica informatica musica', a centre for electronic music. He has taught as a visiting professor in composition at the Rotterdam Conservatory (1990–91) and at the Strasbourg Conservatory and IRCAM (1995). He was guest composer at Akyh oshiday (Tokyo, 1996), Young Nordic Music (1997), Centro reina Sofia (Madrid, 1998) and the University of Montreal (1997). In addition to being active as a conductor of contemporary music, he teaches composition at Milan Conservatory. His output is marked by a sense of experimental tension and by an awareness of the aesthetic significance of activity. His experience and knowledge of various types of music (including jazz, rock and ethnic music in addition to art music) and his acknowledgement of the expressive and communicative possibilities inherent in the widest range of music has deeply affected the development of his work. His attempts to reconcile influences of different traditions, past and present, is one part of a careful rethinking of the legacy of compositional techniques. He has re-examined the procedures explored by the avant-garde of the 1950s and 60s and has obtained a new musical syntax by synthesizing their various aspects with his broader musical concerns. His *Suite 1984* for orchestra, jazz quartet and percussion ensemble from Guinea is the most striking example of this tendency to create a polyphony of mixed

idioms, ranging from Machaut to Stravinsky, orchestral writing to jazz or Italian folklore to African percussion. Amidst these stylistic contexts, the function of memory – understood not only as the remains of past experiences but also as a source of creative energy – seeks to create a picture of the complex ways in which reality is perceived. His cycle of *Quattro studi sulla memoria*, which includes *Richiami II* for amplified ensemble (1989–91), *Memoria* for orchestra (1990), *Riti neurali* for violin and eight instruments (1991) and *A fuoco* for guitar and ensemble (1995), is an imaginary reconstruction of the workings of memory. Formally, these works follow labyrinthine routes in developing material on multiple levels, material which undergoes a process that organically encapsulates diverse elements within a texture of structural rigour, richness of timbre and instrumental virtuosity. His attention to formal coherence is particularly evident in such works as *Plot in fiction* (1986) and *Terzo Quartetto (Mirrors)* (1993), and results in the creation of complex but clearly delineated textures which give the listener unmistakable points of reference. Awareness of the possibilities of sound manipulation offered by information technology gave rise not only to a series of large-scale electroacoustic works such as *Etymo* (1994) and *Sirene/Gespenster* (1996–97) but also to works written especially for radio, in which Francesconi attempts to realize his ideal of a 'theatre of the imagination' created exclusively by musical means.

WORKS

SUSANNA PASTICCI

Francesco Varoter. *See* ANA, FRANCESCO D'.

Francés de Iribarren, Juan (*b* Sangüesa, bap. 24 March 1699; *d* Málaga, 2 Sept 1767). Spanish composer and organist. He spent some years as a choirboy at the Colegio de Cantorcicos, Madrid. He was taught by Joseph de Torres, who in 1717 recommended him to succeed Francisco Navarro as organist of Salamanca Cathedral. Francés de Iribarren held the post for 16 years, composing works for the consecration of the new cathedral building in August 1733. On 1 October 1733 he became *maestro de capilla* of Málaga Cathedral, where he remained until his retirement due to illness on 16 April 1766, despite the offer of a post at Valladolid Cathedral in 1741.

The style of his music is characterized by an infrequent use of the polychoral technique. His figured basses are unusual for Spanish Baroque music in that they are so detailed, and in some cases they are written out, providing an insight into contemporaneous realization. Instruments that had not enjoyed a long tradition in Spanish cathedrals, such as the violin and oboe, are used idiomatically, exploiting their full potential. Two pieces that include instrumental sections are the villancico *Querubines bajad* (*E-SA*) and the cantata *Prosigue acorde lira* (1740, *MA*). Francés de Iribarren was probably the most prolific Spanish villancico composer of the 18th century; since his entire collection is dated (1722–66), it represents an indispensable case-study of the evolution of the genre. Most of his music is in the Málaga Cathedral archive, which he set up in 1737. Its first inventory, dated 1770, lists more than 800 pieces by him.

WORKS

385 Lat. vocal pieces, 1–9 vv, with and without insts, 360 of which in *E-MA*, some in *Bc*, *C*, *GRc*, *GRcr*, *GU*, *LPA*, *Mp*, *SA*, *SI*, Convento de la Encarnación, Osuna: 120 motets (1 ed. in MME, xxxv (1973)), 69 pss, 39 ants, 27 masses, 26 lamentations, 25 hymns (1 partially ed. R. Mitjana y Gordón, 'La musique en Espagne', *EMDC*, I/iv (1920), 1913–2351, esp. 2136), 21 misereres, 19 Mag settings, 14 seqs, 6 res, 5 invitatories, 5 Nunc, 4 Offices of the dead, 3 lessons, 1 Stabat mater, 1 lit

Other Lat. vocal pieces, uncatalogued, *Mn*

521 Sp. vocal pieces (incl. texts by J. Guerra, A. Ferrer, A. Pablo Fernández), mainly 1–8 vv, almost always with insts, 510 of which in *MA*, some in *GCA-Gc*, *E-SA*: 390 villancicos (5 ed. in Sánchez), 109 cants. (3 ed. in MME, xxxv (1973)), 22 arias

Piece, org, *Zac*

Francesina. *See* DUPARC, ELISABETH.

Franchetti, Baron **Alberto** (*b* Turin, 18 Sept 1860; *d* Viareggio, 4 Aug 1942). Italian composer. He studied first with his mother, who may have been a pupil of Chopin, and then with Fortunato Magi in Venice. His

first works date from this period, and were published under the pseudonym 'Tito'. He completed his studies in Munich with Rheinberger (1881–4), and in Dresden with Draeseke and Kretschmer (1884–5). His family's enormous wealth (his father was an important Jewish banker and his mother a Rothschild) meant that he could devote himself entirely to music, and could ensure his works were performed in the best possible circumstances. On several occasions his father, Raimondo, personally financed the premières of his son's compositions. His first international success was with his E minor symphony, first performed in Dresden in 1884. Together with works by Sgambati and Martucci, this symphony is one of the first pieces of the so-called Italian 'symphonic renaissance'. The only official position Franchetti held in musical life was that of director of the Florence Conservatory (1926–8). His earlier operas were highly acclaimed in their time, and the success of *Asrael* at La Scala (1889) led Verdi to recommend him for the task of composing the commemorative opera for the 400th anniversary of Columbus's arrival in America, *Cristoforo Colombo*, which was commissioned by the city of Genoa.

Franchetti's operas represent an original solution to several aesthetic problems of fin-de-siècle opera composition, although his attempt to blend the tradition of late Italian grand opera on historical subjects with the German influences which he assimilated during his studies now seems somewhat outdated. The eclectic libretto for *Asrael* (1888) by Ferdinando Fontana continued a tradition of Italian operas based on northern fairy-tales begun by Catalani, but its plot appears as a mixture of *Mefistofele* and *Lohengrin*. Nevertheless, the extended crowd scenes in hell (Act 1) and heaven (Acts 1 and 4) succeeded in impressing the public and showed Franchetti's skill in writing effective large-scale scenes. Martucci considered *Asrael* 'quite extraordinary for a young man's first opera'. However, after the success of the first performances the opera never entered the repertory. Arguably his finest achievement is *Cristoforo Colombo*, on one of Illica's earliest librettos (1892, Genoa). Although the libretto clearly reveals its models, especially Meyerbeer's *L'Africaine*, it represents a marked progress towards a new view of musical theatre. The music demonstrates Franchetti's predilection for what was known in contemporary Italian aesthetics as 'sinfonismo'; large symphonic interludes and the complete integration of the soloists' voices into the orchestral texture bear witness to his skill in unifying entire acts through a continuous musical discourse in the orchestra. The second act, with its two ships on stage, presented the moment of discovery, visually through new techniques of staging – under the influence of the Bayreuth *Parsifal*, a revolving backdrop was used – and musically through masterly use of the orchestra; it constitutes what was probably the culmination of Illica and Franchetti's collaboration.

After a dispute with Ricordi over the libretto of *Tosca*, Franchetti won his greatest success with *Germania*. The opera received its première at La Scala under Toscanini in 1902, with Caruso in the principal role. Two years previously orchestral extracts from *Germania* (the intermezzo 'In the Black Forest') had been performed at La Scala and in Baden-Baden. This practice of presenting a 'preview' of new operas to the concert audience became standard with composers from Alfano to Zandonai. Though much acclaimed by the Italian public of the time, the work suffers from Franchetti's occasional difficulties with individual characterization, but more especially from his naive attempt to create German local colour through the use of folksongs. Although there had been several attempts, by Puccini and others, to write an opera in collaboration with Gabriele D'Annunzio, it was Franchetti who wrote the first based on a play by him, *La figlia di Iorio* (1906, La Scala). He failed to grasp the irrational cruelty of the Abruzzese pagan society depicted in D'Annunzio's drama. At this point Franchetti's style became rather anachronistic, as he was well aware. His words in 1911 reveal how far his operatic ideas were rooted in 19th-century assumptions: 'To make something *new* and yet *remain within the old*. This is my plan. By old I mean form, melody, harmony and colour all combined. In a word, *music*, and not the cacophony which is created now.' His words seem to anticipate a much more violent debate 20 years later, between the modernist Casella and the traditionalist Mascagni. Franchetti began a long series of experiments which show a marked decline in musical style and underlying dramatic vision. These works range from the operetta *Giove a Pompei*, written in collaboration with Giordano on a posthumous libretto by Illica (1921, Rome), which Giordano described as a 'satirodia', to the pre-Fascist opera *Glauco* (1922, Naples), containing some ingredients typical of later propaganda operas on subjects connected with the glory of ancient Rome.

WORKS

OPERAS

first performed at Milan, La Scala, unless otherwise stated; all printed works published in Milan

Asrael (leggenda, 4, F. Fontana), Reggio nell'Emilia, Municipale, 11 Feb 1888 (1888)
Cristoforo Colombo (dramma lirico, 4, epilogue, L. Illica), Genoa, Carlo Felice, 6 Oct 1892 (1893); rev. version (3, epilogue), 17 Jan 1923, *I-Mr**
Fior d'Alpe (os, 3, L. di Castelnuovo), 15 March 1894 (1894)
Il signor di Pourceaugnac (op comica, 3, Fontana, after Molière), 10 April 1897 (1898)
Germania (dramma lirico, prol., 2, epilogue, Illica), 11 March 1902 (1902)
La figlia di Iorio (tragedia pastorale, 3, G. D'Annunzio), 19 March 1906 (1906)
Notte di leggenda (tragedia lirica, 1, G. Forzano), 14 Jan 1915 (1915)
Giove a Pompei (operetta, 3, Illica and E. Romagnoli), Rome, Pariola, 5 July 1921, unpubd, collab. Giordano
Glauco (os, 3, Forzano), Naples, S Carlo, 8 April 1922 (1922)
Fiori del Brabante (azione coreografica), Turin, 10 Feb 1930

Unperf.: Zoroastro (Fontana), *c*1890; Il finto paggio (commedia musicale, Forzano), 1924; Il gonfaloniere (Forzano), 1927; Don Bonaparte, opera comica, 1941, vs (ed. A. Ferraresi, forthcoming); Moabita (idillio biblico)

JÜRGEN MAEHDER/ANTONIO ROSTAGNO

Franchetti, Arnold (*b* Lucca, Italy, 1905; *d* Middletown, CT, 7 March 1993). American composer, son of Alberto Franchetti. Following studies in physics at the University of Florence, he enrolled at the Salzburg Mozarteum where he was awarded its top distinction, the Lilli Lehmann prize, for his opera *Bauci*. Between 1937 and 1939 he lived in Munich where he came under the influence of Richard Strauss. After the war, during which he spent time in Sweden and the Italian Alps helping to rescue Allied airmen, he emigrated to the USA (1947). He taught at the Hartt School of Music, Hartford, Connecticut (1948–79), serving as chair of the theory and composition department until his retirement. His honours include awards from the Fromm, Guggenheim and Koussevitsky foundations and Columbia University's Ditson award.

After exploring late-Romantic and neo-classical styles, Franchetti developed a non-serial, 12-note compositional language featuring primarily diatonic motivic material. With the appearance of Lendvai's *Bartók, Weg und Werk* (Budapest, 1957), he adapted features of Lendvai's axis system to what he referred to as 'pandiatonicism', a style prominent thereafter in both his music and his composition teaching. His highly idiosyncratic approach to form derived from the manipulation of melodic and rhythmic cells through repetition, intervallic expansion, transposition, or contrapuntal combination with contrasting fragments. This technique resulted in imaginative improvisatory writing (*Canti*, 1969; Saxophone Sonata, 1970) and pointillist, miniaturist textures (*Concerto dell'autunno*, 1983). Striving for a synthesis of musical sophistication and accessibility, Franchetti also drew on Italianate folksong flourishes (*Il Giglio Rosso*), *commedia dell'arte* characters (*Three Italian Masques*) and literary texts by the black American revolutionary Eldridge Cleaver (*Lazarus*).

IMANUEL WILLHEIM

Franchi [de Franchi, de Franchis, de Franco], **Carlo** (*b* ?1743; *d* ?after 1779). Italian composer. He is described as Neapolitan in printed librettos and his music certainly belongs to the Neapolitan school. His operas had their first performances in principal Italian cities (Rome, Venice, Turin and Naples) and in provincial cities with a strong operatic tradition (Perugia and Mantua). The intermezzo *Il barone di Rocca Antica*, first performed at the Teatro Valle, Rome, was later revived in Florence, Terni, Foligno, Lisbon, Ancona, Passavia, Venice and Dresden. This work marks a fundamental change in the development of Italian *opera buffa* before Rossini. Although it is subtitled 'intermezzi per musica', the work is far removed from the spirit of Pergolesi's intermezzos: the sinfonia is in three parts, the arias are polished and elegant, and secco recitatives are shorter and propelled by lighter, more fluent rhythms.

WORKS

DRAMATIC

at least 2 arias in G. Insanguine, La vedova capricciosa (commedia, G. Palomba), Naples, Nuovo, carn. 1765
Ifigenia in Aulide (V.A. Cigna-Santi), Rome, Argentina, 3 Feb 1766, *F-Pn*, *I-Rvat* (ov. and arias)
Arias in La clemenza di Tito, Rome, Argentina, 1766, aria *Rc* and *Rrostirolla*
Arsace (dramma, ? A. Salvi), Venice, S Benedetto, Jan 1768, *P-La*
La pittrice (int, F. Cerlone), Rome, Pace, carn. 1768
Il gran cidde Rodrigo (dramma, 3, G. Pizzi), Turin, Regio, 26 Dec 1768, *I-Tf*, *P-La*
La contadina fedele (int, 2), Rome, Valle, carn. 1769, *I-Rdp*
Il trionfo della costanza (opera semiseria, D'Oregno), Turin, Carignano, spr. 1769, aria *Tf*
Le astuzie di Rosina e Burlotto (dg), Perugia, Leon d'Oro, carn. 1770
Siroe re di Persia (dramma per musica, 3, P. Metastasio), Rome, Argentina, 13 Feb 1770, *Rdp*, *Rvat*, *P-La*
La pastorella incognita (commedia, P. Mililotti), Naples, Fiorentini, spr. 1770
Il barone di Rocca Antica [Act 1] (int, 2, G. Petrosellini), Rome, Valle, 4 Feb 1771, *D-Dl*, *Rtt*, *F-Pn*, *I-Fc* [Act 2 by P. Anfossi]; rev. Dresden, 1772 [some sources suggest the Rome version was entirely by Franchi]
La semplice (int, 2), Rome, Valle, 7 Jan 1772, *F-Pn*, *I-Fc*
Farnace (dramma, ? A.M. Lucchini), Rome, Dame, 15 Feb 1772, *F-Pn*, *I-Mc* (ov.), *PAc* (ov. and aria), *PS* (ov.), *Rc* (2 arias)
La finta zingara [cingara] per amore (farsa, 2), Rome, Tordinona, carn. 1774 [probably rev. of Il barone di Rocca Antica]
I tre amanti ridicoli, Mantua, Ducale, carn. 1779

GALLIANO CILIBERTI

Franchi, Giovanni Pietro (*b* Pistoia; *d* Loreto, 2 Dec 1731). Italian composer. After entering the priesthood he became a musician at Pistoia Cathedral. In 1685 he was *maestro di cappella* to the Prince of Maletto and Venetico. After moving to Rome he was appointed director of music at the court of the Dukes Rospigliosi of nearby Zagarolo. He was also *maestro di cappella* of the Madonna dei Monti, Rome, from 1697 to 1711, when, on 25 July, he was appointed *maestro di cappella* of the Santa Casa, Loreto, in place of Giuseppe de Rossi, who took over his post in Rome. He stayed at Loreto until his death with an interruption from 1727 to 1730 because of the dishonest interference of a priest, a certain Francesco Caldara from Naples, who, by making it seem that Franchi had died, succeeded in extorting from Pope Benedict XIII his own appointment as *maestro di cappella*. On discovering the deceit Franchi turned to the prefect of the Congregazione Lauretana for protection and was reinstated. Caldara nevertheless succeeded in getting himself appointed his assistant, but, because of his obvious incapacity and because he continued to denigrate Franchi, the governor of the Santa Casa ordered that proceedings be instituted against him. As a result Caldara was dismissed on 30 August 1730, after which Franchi could be seen to be undisputedly in charge of the music at the Santa Casa. He was a versatile composer who produced instrumental and both sacred and secular vocal chamber music, in addition to some larger-scale psalms and one or two works that contributed in a minor way to the repertory of Roman oratorios.

WORKS

La cetra sonora (sonatas), a 3, bc, op.1 (Rome, 1685)
Duetti da camera, op.2 (Bologna, 1689)
Motetti a 2, 3, op.3 (Florence, 1690)
Salmi pieni per tutto l'anno da cantarsi, 4vv, org ad lib, op.4 (Bologna, 1697)
Jephte (orat), Rome, 1688; lost, text in Alaleona
S Monica nella conversione di S Agostino (orat), Florence, 1693, pubd lib Brompton Oratory, London
La fermezza trionfante nel martirio di Santa Ferma, Rome, 1706, lost

ARGIA BERTINI

Franchi, Saverio (*b* Teramo, 7 Nov 1942). Italian musicologist. He studied privately the piano, the harpsichord and composition, and also studied at the University of Rome, graduating in humanities (1972) and sociology (1983). He was the founder and director of the Accademia Barocca di Roma (1965–79) and was responsible for the realization of performances of early operas and concertos; works receiving their first modern performances using his editions include operas by Stradella, Jacopo Melani and Caldara. He has also provided, for their first Italian performance, translations of opera librettos and other vocal works by composers from Purcell to Bernstein. In 1973 he was appointed to the chair of music history at the Perugia Conservatory. He has also undertaken artistic and educational work for the Discoteca di Stato in Rome, the Accademia Musicale Chigiana in Siena, the RAI, the University of Urbino and the Italian University for Foreigners in Perugia. He is on the advisory committee for the Centro Studi Musicali in Umbria and the editorial board of the journal *Esercizi: musica e spettacolo*.

TERESA M. GIALDRONI

Franchini, Francesco [Franco] (*b* Siena, late 17th century; *d* Siena, 1757). Italian composer. He studied first with his uncle Domenico (1658–1706); nothing more is known of his music education. He became *maestro di cappella* to Prince Violante of Bavaria, then at S Maria di Provenzano, Siena (as compositions dated 1728 and 1731 testify), and by 1736 also at the Collegio Tolomei there. According to Romagnoli his setting of the psalm *In te Domino* was specially praised. His oratorio *La vergine sagge* was performed in Radicondoli (in the province of Siena) in 1736. A cantata was performed in 1742 by students of the Collegio Tolomei to celebrate the birth of Joseph II, which might suggest, as would his friendship with Metastasio, that Franchini also had some connection with Vienna. His only known theatrical work, the comic intermezzo *Don Chisciotte e Nerina* (not *Werina*), was written for the Siena seminary in 1752; on the score Franchini is described as a priest.

Franchini's sacred music includes both simple four-part homophonic settings and elaborate works for solo voice; in the latter difficult and long *fioriture*, often in dotted rhythms, are demanded of all voice ranges. His *Don Chisciotte* calls for the typical characters of the post-Pergolesi intermezzo: bass (Don Quixote) and soprano

(Nerina), with a non-singing part (Sancio); they are provided with da capo arias, duets and rapid *buffo* recitative. Franchini's simple, early Classical style is applied here with good effect, producing a bright, lively sound, with dynamic contrasts apt to the comic subject. (R. Morrocchi: *La musica in Siena*, Siena, 1886/*R*)

CAROLYN GIANTURCO

Franchois de Gemblaco, Johannes (*fl* *c*1415–30). Franco-Flemish composer. All his music first appears in sources copied in the years 1425 to 1435 and none of it suggests a style any earlier than 1415; so he must surely be the 'Joh. Franciscus de Gemblaco' documented as a succentor at the collegiate church of St Martin, Liège, by September 1417 and in 1419–20 (as carefully argued in Quitin, later fully supported by Igoe and Strohm). The widely held view that he was the Burgundian court singer Johannes Franchois, documented from 1378 to 1415 (see Wright) and born no later than 1355, must be considered thoroughly implausible; since that man was a canon of Evreux from 1394 he cannot be the humble succentor of 1417–20.

The name 'de Gemblaco' is extremely common in Liège, and the composer may therefore have been born there rather than at Gembloux (which is in the diocese of Liège, though nearer to Brussels). Many details in his music suggest the influence of other composers from Liège, particulary Hugo de Lantins and Johannes Ciconia. Given the wide distribution of his music in Italian sources, it is likely that he later moved south, as is implied, in fact, in the text of his *Sans oublyer*.

The name 'Jo franchois de gemblaco' appears only twice in the musical sources, in *I-Bc* Q15 for two Gloria settings; otherwise his works are ascribed 'Jo Franchois' or 'Jo Gemblaco', but their stylistic consistency makes it fairly certain that all the music is by a single composer. That style is moreover clear enough to make it easy to agree with Feininger that the anonymous Gloria–Credo pair is indeed by the same man. More than any other composer of his generation he explored systematic imitation, often using several different pitches for successive entries; in this he seems to have followed and expanded on the lead of Hugo de Lantins. He made considerable use of motivic and sequential treatment as well as of detailed expressivity in text setting, both perhaps expanding on the initiatives of Johannes Ciconia.

His five-voice motet *Ave virgo lux Maria* is notable for its famous textless introit with two canonic voices over a wide-range 'trumpetta', for having its cantus firmus (the antiphon *Sancta Maria succurre miseris*; see *LU*, 1255) not in the tenor but in the contratenor, and for its extensive unison imitation between the upper voices; in this last respect it seems again to expand techniques pioneered by Ciconia.

WORKS

MASS PAIRS

Gloria and Credo, 3vv, ed. C. van den Borren, *Polyphonia sacra* (Burnham, Bucks., 1932, 2/1963), 93 (paired in *I-Bc* Q15 and by implication in *AO*; the jaunty 'Amen' section of the Credo presented there as an appendix appears in all full sources apart from *GB-Ob* 213)
Gloria and Credo, 3vv, ed. in Igoe, 21 (paired in *I-AO* and *Bc* Q15, though there is some dispute as to whether they really belong together: they have the same tonality and style, but the Gloria is considerably more condensed – called 'brevior' in the index to *AO* – and the Credo tenor carries the melody *Alma redemptoris mater*, though the Gloria tenor has a similar manner)
Gloria and Credo, 3vv (anon. but plausibly attrib. to Franchois de Gemblaco and ed. in Feininger, *Bc* Q15, ff. 103*v*–106)

MOTETS

Ave virgo lux Maria/Sancta Maria, 5vv with alternative 4vv version, ed. in Igoe, 32, and DTÖ, lxxvi, Jg. xl/19

RONDEAUX

all edited in van den Borren, 1950

Mon seul voloir mon souverain retour, 3vv
Par ung regart des deux biaulx yeux riant, 3vv
Sans oublyer sans faire departye, 3vv (also in the Buxheim Keyboard Manuscript, ed. B. Wallner in EDM, 1st ser., xxxviii, 1958, 160)

DAVID FALLOWS

Franchois le Bertoul. *See* LEBERTOUL, FRANCHOIS.

Franchomme, Auguste (Joseph) (*b* Lille, 10 April 1808; *d* Paris, 21 Jan 1884). French cellist and composer. According to Fétis, he began his study of the cello at the age of 12, with Mas, at the Lille Conservatoire. He received his first prize in 1821, and continued his studies with Pierre Baumann. He then went to the Paris Conservatoire, studying with Norblin for one year before gaining a *premier prix* in December 1825. He played for the Théâtre de l'Ambigu-Comique in 1825–6, the Opéra in 1827, and was solo cello at the Théâtre Italien and the royal chapel the following year. He was also active as a soloist and chamber musician. His increasing prominence allowed him to retire from orchestral work altogether in 1833, although he was a member of Napoleon III's court orchestra in 1853. Franchomme continued his association with the Conservatoire as founding member of the Société des Concerts du Conservatoire and successor to Norblin as cello instructor (1846–84). Together with the violinist Delphin Alard, he founded the Concerts du Cercle Musical in 1834 and Matinées Annuelles de Quatuors in 1847. As a member of Alard's string quartet, he also developed associations with Mendelssohn, Charles Hallé, Ignaz Moscheles, Liszt and Chopin. His rare trips abroad included two visits to England to see Moscheles in 1837 and 1856; on the second occasion he participated in three performances at Ella's Musical Union. At a dinner with Ferdinand Hiller he was introduced to Chopin, who then

frequented the Franchomme family home and, as extant letters demonstrate, requested his friend's assistance with business transactions when away from Paris. The two collaborated on the Grand Duo (1833) and Franchomme performed Chopin's Cello Sonata op.65 at its première in 1847. In addition to his own compositions for cello, Franchomme wrote works in collaboration with Henri Bertini and George Osborne.

Contemporaries considered him 'the King of the French school'; he purchased J.-L. Duport's Stradivari in 1843, and was also the legatee of Duport's technical methodology. He perpetuated traditional French bowing technique by maintaining a bow hold above the frog, and combined varied bow strokes and beautiful sound with an adept left-hand technique founded upon Duport's sequential fingerings, portamento being one of the few modern additions to his own performance style. Commentaries in the *Revue musicale* laud his perfect intonation and the musicality of his phrasing. The Englishman Niecks was likewise effusive, stating 'the secret of Franchomme's success is to be sought largely in the vitality of his art – in its warmth, animation and fire'.

VALERIE WALDEN

Franci, Benvenuto (*b* Pienza, Siena, 1 July 1891; *d* Rome, 27 Feb 1985). Italian baritone. He studied in Rome at the S Cecilia Conservatory with Cotogni and Rosati, and made his début there in 1918 at the Teatro Costanzi in Mascagni's *Lodoletta*. In 1919 he appeared at the S Carlo, as Renato, then at leading Italian theatres, including La Scala (1923–36) and the Rome Opera (1928–49). He created roles in operas by Giordano, Zandonai and Boito (Fanuèl in *Nerone*); his German roles included Hans Sachs and Barak. He also sang in Madrid, Barcelona, Buenos Aires and at Covent Garden (1925, 1931 and 1946). He retired in 1953. He had a large and penetrating voice, especially in the middle register, and was remarkable for his vehement singing in many dramatic Verdi roles, particularly Count di Luna, Rigoletto, Don Carlo (*La forza del destino*) and Amonasro, as well as Barnaba in *La Gioconda*, Gérard in *Andrea Chénier* and Scarpia, as can be heard in his recordings of arias from most of his roles. (*GV* (R. Celletti; R. Vegeto))

RODOLFO CELLETTI

Franciolini, Leopoldo (*b* Florence, 1 March 1844; *d* Florence, 10 March 1920). Italian dealer in and forger of antique musical instruments. His importance lies in the fact that he was active at the time when many of the world's large public and private collections were being formed and when several major reference works on instrument makers were being compiled. Consequently, examples of his outright fakes and heavily reworked antiques are found in many museums and pictured in many books, and the names and dates of the purported makers of instruments he sold (many of them apparently fictitious) have been included in standard reference works in the field. By no means all of the instruments that passed through Franciolini's hands were fakes, but a substantial proportion of them appear to have been much altered or equipped with false inscriptions or new, more elaborate decoration. Moreover, there is no doubt that he made or commissioned large numbers of entirely bogus instruments constructed from all sorts of old materials as well as from such modern substitutes as celluloid, to simulate the ivory inlays found on original examples.

The covers of a number of Franciolini's printed catalogues state that his firm was founded in 1879, although this cannot be verified since the relevant city records were lost in the disastrous Florence flood of 1966; however, his earliest printed catalogue is dated 1890 and is an unpretentious two-page listing of only 104 instruments. In 1910 Franciolini was tried and found guilty of commercial fraud. He was fined instead of serving a four-month prison sentence, and his business seems to have been carried on by two of his sons until some time in the late 1920s.

EDWIN M. RIPIN

Francis I. *See* FRANÇOIS I.

Francis, Alun (*b* Kidderminster, 1943). English conductor. He studied at the RMCM between 1960 and 1963 and for some years worked as a horn player with the Hallé Orchestra and the Bournemouth SO. His career as a conductor became established in 1966 with his appointment as chief conductor and artistic director of the Ulster Orchestra, a post he held for a year. Subsequently he became artistic director of the Northern Ireland Opera Trust (1974–84), director of the Northwest Chamber Orchestra in Seattle (1980–85) and director and artistic adviser of the Overijssels PO in the Netherlands (1985–7). In 1989 Francis was appointed principal conductor of the Berlin SO as well as chief conductor of the North-West German PO. His favoured repertory includes bel canto opera, as well as 20th-century music, especially such composers as Berio and Stockhausen. Among his recordings are Donizetti's *Maria Padilla* and *Ugo, conte di Parigi*, Offenbach's *Christopher Columbus* and *Robinson Crusoé*, and orchestral works by Milhaud and Pettersson.

JESSICA DUCHEN

Francis, Connie [Franconero, Constance] (*b* Newark, NJ, 12 Dec 1938). American singer and actress. She began her career at the age of 12, appearing on the television programme 'Startime'. She won her first gold record in 1958 with a revival of the 1923 ballad *Who's Sorry Now*,

and had further successes with a series of such songs, including *My Happiness* (1958), *Among My Souvenirs* (1959), *Mama* (1960), and *Together* (1961). She also appeared in a number of films, beginning with *Where the Boys Are* (1960). Francis was one of the most popular performers in the USA during the late 1950s and early 1960s, appealing particularly to teenagers with rock songs such as *Stupid Cupid* (1958).

ARNOLD SHAW

Francis, Day & Hunter. English firm of music publishers. It was founded by William and James Francis and David Day in 1877 (as W. & J. Francis and Day, then Francis Brothers & Day); Day had experience in music publishing, and the Francis brothers needed a publisher for the songs they wrote and performed (from 1873) with the Mohawk Minstrels. They were joined by Harry Hunter, songwriter and leader of the Manhattan Minstrels, who sold his interest in 1900. Their first offices were in Oxford Street; in 1897 they moved to Charing Cross Road, becoming the first popular music publishers in the area that became London's 'Tin Pan Alley'. They issued music-hall songs, and in 1882 published their first *Comic Annual and Dance Album*. About 1900 Day formed the Musical Copyright Association to protect the interests of song-writers and their publishers against pirate firms. Members brought the issue of music piracy to national attention; a new Copyright Act resulted (1911), and in 1914 Day helped found the Performing Rights Society.

Francis, Day & Hunter were among the first to publish inexpensive mass-produced editions of songs in sheet form, with at least 25,000 first-print copies at a much lower price than had been possible hitherto. Its most successful publication, however, was William Smallwood's piano tutor, first published in 1881, which had sold three million copies by the 1950s. The firm opened an office in New York in 1905 (it soon joined with T.B. Harms & Co. and in 1920 with Leo Feist Co.); a Paris office was opened in about 1920, a Berlin office in 1928. After World War I Francis, Day & Hunter became one of the most important publishers of educational, classical and popular music in Great Britain; it had exclusive publishing arrangements with various artists, including Harry Lauder and Leslie Stuart, and its retail department sold music, records and instruments. In 1953 the firm took over B. Feldman & Co., and in 1972 became a subsidiary of EMI Music Publishing Ltd.

DEANE L. ROOT/PETER WARD JONES

Francis, Sarah (Janet) (*b* London, 11 Jan 1938). English oboist. She studied at the RCM with Terence MacDonagh, who decisively influenced her style of playing, and continued her studies in Paris with Pierre Pierlot. From 1961 to 1963 she was principal oboe with the BBC Welsh Orchestra, but has subsequently built her reputation on her refined interpretations of chamber music, particularly 20th-century works and works by lesser-known early 19th-century composers such as Reicha and Kreutzer. Francis made the first commercial recording of Britten's *Six Metamorphoses after Ovid* and has given numerous British premières, including Koechlin's Oboe Sonata (1974, London) and Barber's Canzonetta for oboe and strings (1982, London). Among numerous works dedicated to her are Gordon Jacob's Seven Bagatelles for solo oboe (1971), Gordon Crosse's concerto *Ariadne* (of which she gave the première at the Cheltenham Festival in 1972), William Mathias's Oboe Concerto (1989) and an oboe quartet by Stephen Dodgson (1994). In 1981 she took over the direction of the London Harpsichord Ensemble from her parents John Francis and Millicent Silver. With this group she has made highly acclaimed recordings of Telemann's complete concertos for oboe and oboe d'amore. In 1974 Francis became a professor of oboe at the RCM and in 1996 was appointed chairman of the British Double Reed Society.

GEOFFREY BURGESS

Franciscan friars. The Order of Friars Minor, or Greyfriars, began as a small band of enthusiasts led by the Little Poor Man of Assisi, the humble but gifted Francesco Bernadone. In 1209 he and his first companions accepted the challenge of literal and uncompromising obedience to the Gospel precepts. Pope Innocent III gave verbal assent to the first Rule (now lost) presented to him by St Francis. The earliest known Rule is that of 1221, confirmed in its final form in 1223 by a Bull of Honorius III. The Franciscan Rule is characterized by obedience to the Holy See and insistence on complete poverty. The friars could accept neither property nor money but were to live by the work of their hands or by begging. In course of time this total poverty caused practical difficulties, giving rise to two schools: those who still wished to adhere to the strict letter of the Gospel (Spiritualists) and the others who sought a compromise solution. Ensuing disputes over this, followed by such calamities as the Black Death (1348–52) and the Great Schism (1378–1417), led to a general weakening of the order. Laxity of discipline increased in proportion to the growth of material prosperity. Successive attempts at conciliation and reform resulted in the development of various branches: the Observants (officially recognized in 1415) were finally separated from the Conventuals in 1517; the reformed Capuchins were established in 1529, to be followed by the Reformati, the Recollects and the Discalced in the 17th and 18th centuries. In the 19th century there was a move towards reuniting the different branches. This was confirmed in 1897 by Leo XIII and was the starting-point of a great renewal of vigour.

The first English houses of Greyfriars were established in 1224 in Oxford, London and Canterbury. Henry VII introduced the Observants in the last decade of the 15th century. After being scattered at the Dissolution, the friars returned to England in the 19th century.

The order has produced many saints, including Anthony of Padua, Bernardine of Siena and John of Capistrano, and not a few scholars, among them Bonaventura, Duns Scotus, Roger Bacon and William of Ockham. It has sent missionaries to every part of the world. The Franciscans have for many centuries been the official guardians of the traditional sites of Christianity in the Holy Land.

The earliest Franciscans followed the liturgy of the local churches wherever they happened to find themselves.

After 1223 they adopted the Use of the papal court. In the mid-13th century Haymo of Faversham reformed the liturgy, composing an ordinal for the breviary, for grace at meals and for the missal. This ordinal was used for the correction of the liturgical books of the order and it was to influence the course of the Roman rite throughout the West. The gradual was issued in 1251 and the antiphoner some three years later. Careful instructions were appended for scribes. From this time onwards the Franciscans used square notation.

Numerous chant treatises are the work of Franciscans, from the simple 'Cantorinus' type of concise instructions on intoning psalms and antiphons to the more developed prefaces of François de Bruges in his editions of the Roman Antiphoner (1505) and the Roman Psalter (1507). François commented in a practical way on the use of *musica ficta* in plainchant. The little handbook for novices and others by Bonaventura of Brescia, entitled *Regula musice plane* (1497), gives instructions on how to sing different categories of chant. An important medieval musical treatise describing both plainchant and mensural music is the *Quatuor principalia*, also the work of a Franciscan, the Friar of Bristol.

Franciscans figured among the many sequence writers of the Middle Ages, but the order has chiefly influenced the course of European music and poetry in ways not directly connected with the liturgy. The friars were closely associated with the composition and propagation of *laude spirituali* – simple religious songs in the vernacular that gained enormous popularity and were sung by numerous confraternities of lay folk in town and village. The *Fioretti* recount that St Francis himself went about 'cantando e laudando magnificamente Iddio'. The texts, though not the music, of several of his songs survive. He sent out his friars to preach and sing the praises of God as if they were 'joculatores Domini', with the instruction to claim as largesse after their efforts not money but conversion of heart: 'volumus in hoc remunerati a vobis, videlicet ut stetis in vera poenitentia'. This injunction was echoed in many of the *laude*, for example:

> A voi gente facciam prego
> ke stiate in penitentia ...

The models used by the composers of *laude* were the wordly and amorous songs of the people. Often the melodies were taken over just as they stood and the words parodied. The Franciscans Jacopone da Todi and Bianco da Siena composed exquisite *laude*, and Jacopone made frequent use of dance forms. Many *laude* stressed penitential themes; numerous others were written in honour of the Blessed Virgin.

This popular Franciscan vernacular tradition was to prove an important influence in shaping the medieval lyric north of the Alps. Friar Jehan Tisserand is the first known composer of a French noël. In England Franciscans were directly associated with the development of the English carol. They produced translations, macaronic poems, parodies and original compositions. The Kildare collection (*c*1300) of Anglo-Irish poems (*GB-Lbl* Harl.913), which includes an early lullaby, was the work of Franciscans. Later in the 14th century Friar Johan de Grimestone wrote many religious lyrics, including carols, and towards the end of the 15th century Friar James Ryman of Canterbury composed no fewer than 119 carols and some 40 other poems, in a homely, simple style. He often used some well-worn Latin snippet, such a 'O clemens, O pia, O dulcis Maria', as a burden (Greene, 1935). Ryman also made English homespun translations of Latin hymns which were probably sung to their plainchant tunes. Either he or his scribe was familiar with the musical technique of faburden.

Franciscans have not confined their talents and interest to popular lyrics in the vernacular. When Salimbene de Adam described the multiple musical activities of his time in Italy in *c*1284 he made special mention of more technically complex music, in particular the polyphonic works of Philip the Chancellor. In later times the most celebrated of all Franciscan musicians was the scholar, composer and teacher Padre Martini (G.B. Martini, 1706–84), who was known and revered throughout Europe.

Francischello [Franciscello]. *See* ALBOREA, FRANCESCO.

Francisci, Jan (*b* Banská Bystrica, 14 June 1691; *d* Banská Bystrica, 27 April 1758). Slovak organist and composer. He was the son of Juraj Francisci, choirmaster at the evangelical church in Banská Bystrica from 1692, under whom he first studied music; in theory and composition he was self-taught. On his father's death in 1709 he succeeded him as choirmaster. He met J.J. Fux and Georg Reutter in Vienna in 1722, and at Leipzig in 1725 he heard J.S. Bach play. From October 1733 to March 1735 he was choirmaster and organist at the evangelical church in Pressburg, but after disputes with his superiors he returned to his native town, where on 12 June 1737 he resumed the post of choirmaster and organist, holding it until his death except for a period from 1743 to 1748. He was succeeded by his son Juraj Francisci (1716–71).

Francisci is known as a composer of arias and cantatas from his autobiography in Johann Mattheson's *Grundlage einer Ehren-Pforte* (Hamburg, 1740). A work called *Das musicalische Neu-Jahrs Praesent* is mentioned in the archives of the evangelical church in Banská Bystrica. All his music was thought lost until the manuscript collection

of the Bratislava organist J.A. Schandroch (1710–80) was discovered in 1962, in Štítnik evangelical rectory; it includes one harpsichord dance ('Polonicus') and five organ preludes, short pieces designed to meet the practical needs of organists. Francisci also left an *Introductio in generalem bassum*, known only in a manuscript copy in a volume *Fundamenta musicae* (in the Tranovský Library, Liptovský Mikuláš).

MARIA JANA TERRAYOVÁ

Francisco de Novo Portu. *See* MERGOT, FRANCISCUS.

Franciscus, Magister (*fl* 1370–80). French composer. He may be the F. Andrieu who, according to two texts by Eustache Deschamps, composed the four-part ballade *Armes, amours/O flour des flours* mourning the death of Machaut in 1377 (facs. in Gennrich, pl.16; ed. in Ludwig, 1926, Apel, 1970, and Greene, 1982). It is also possible that he was the Franciscus de Goano who was chaplain of the papal choir at Avignon under Gregory XI and Clement VII but died in 1404; alternatively he could be the Johannes Franchois or Franciscus, documented from 1378 to 1415, who was a singer in the chapels of Pope Clement VII, Dukes Philip the bold and John the Fearless of Burgundy and Dauphin Louis of Guienne (who in his turn has been wrongly identified as the composer Johannes Franchois de Gemblaco, see Wright). Two three-voice ballades are ascribed 'Magister Franciscus' in *F-CH* 564; both are reminiscent of Machaut's mature style. *De Narcissus* (ed. in Apel, 1950 and 1970, and in Greene, 1981), composed before 1376, was widely diffused at the time, and occurs in versions with different contratenors. *Phiton, Phiton, beste tres venimeuse* (facs. in Gennrich, pl.10, and *MGG1*, iv, pl.28; ed. in Wilkins, 1966, Apel, 1970, and Greene, 1981) dedicated to Gaston Fébus, Count of Foix, quotes the opening of Machaut's ballade 38, *Phyton, le mervilleus serpent*, written after 1369.

URSULA GÜNTHER

Franciscus Venetus. *See* ANA, FRANCESCO D'.

Francisque, Anthoine [Antoine] (*b* St Quentin, *c*1575; *d* Paris, bur. 5 Oct 1605). French composer and lutenist. At first he lived at Cambrai, where he married in 1596. Shortly afterwards he moved to Paris. He seems to have practised his art in the circle of the Prince of Condé, to whom he dedicated *Le trésor d'Orphée*, and soon won great renown.

Francisque's only known music is the 70 pieces constituting *Le trésor d'Orphée: livre de tablature de luth* (Paris, 1600/*R*; transcr. for piano, 1906). It consists mainly of dances: passamezzos, pavans, galliards, courantes, branles, voltes and gavottes, the last-named among the earliest known ones. There are also a few preludes and fantasias. Some pieces are arrangements of then current popular tunes: they include *La Cassandre* (already found in Arbeau's *Orchésographie*, 1588), a galliard 'faicte sur une volte de feu Perrichon' and Lassus's *Susanne ung jour*. Most of these pieces use the normal lute tuning *G–c–f–a–d′–g′*, but a few branles require a nine-course lute with a lower tuning (*à cordes avalées*). The collection ends with instructions for converting all types of lute tablature into staff notation and vice versa.

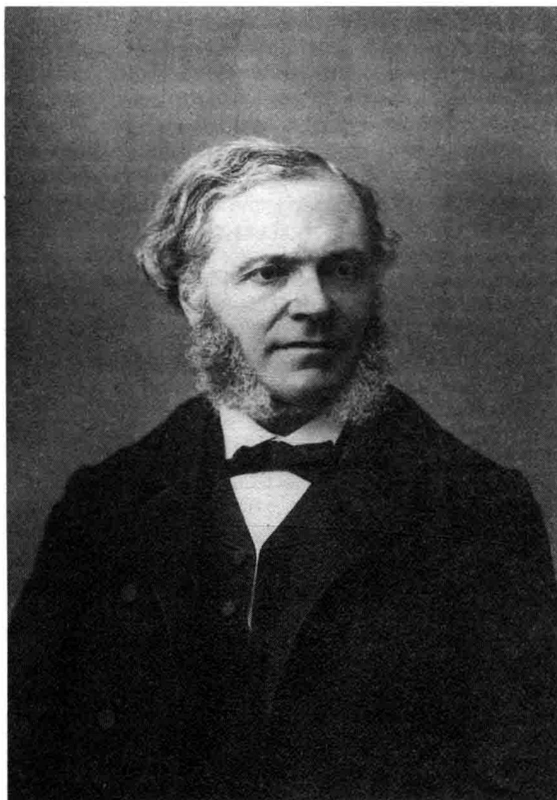
JOËL DUGOT



Franck, César(-Auguste-Jean-Guillaume-Hubert) (*b* Liège, 10 Dec 1822; *d* Paris, 8 Nov 1890). French composer, teacher and organist of Belgian birth. He was one of the leading figures of French musical life during the second half of the 19th century.

1. LIFE. Franck's cultural origins have been the subject of some dispute. Before 1830 Liège was officially part of the French-dominated Walloon district of what later became Belgium. His mother's ancestry was wholly German; the family of his father Nicholas-Joseph, a minor clerk who was unemployed at the time of his elder son's birth, came from Gemmenich near the German border. The combination of early precocity, an irresponsible and ambitious parent and an age which fêted prodigies less discriminately than a previous one resulted inevitably in a childhood and adolescence scarred by exploitation, and perhaps contributed to the late maturing of Franck's full creative powers. In October 1830 his father enrolled him at the Liège Conservatoire where he rapidly gained *premiers prix* for solfège in 1832 and piano (Jalheau's class) in 1834. From 1833 to 1835 he studied harmony with the director, Daussoigne, a nephew of Méhul who had taught at the Paris Conservatoire. Encouraged by these academic successes his father organized a series of

concerts in Liège, Brussels and Aachen in spring 1835. Franck's earliest surviving compositions, trivial show-pieces and operatic fantasies *à la mode*, were written in connection with these and subsequent exhibitions. In May 1835 the Franck family moved to Paris. An assault on the Parisian audiences was by then almost a pre-ordained step, and fortunately the plan of campaign included piano lessons with Zimmerman and a course in harmony and counterpoint with the renowned Reicha, teacher of Berlioz, Liszt and Gounod, though predictably Franck's much publicized début passed without mention. Having been refused entry to the Paris Conservatoire on grounds of nationality, he then waited a year while his father secured naturalization papers. He was finally enrolled on 4 October 1837, with Zimmerman again for piano and Leborne for counterpoint, quickly repeating his provincial achievements with *premiers prix* in 1838 (piano) and 1840 (counterpoint). He then studied with Berton, and prepared for the Prix de Rome, although he did not actually enter the competition. A year in Benoist's organ class failed to produce anything more than a *second prix* (1841) and he was finally withdrawn by his father from study in April 1842 in order to concentrate on a career as a virtuoso making a concert tour in Belgium in 1843.

What might have proved a serious setback to a career in composition was mitigated in part by the encouraging subscription to Franck's Trios op.1, written over the previous three years, which appeared in spring 1843; the purchasers included Meyerbeer, Liszt, Donizetti, Halévy, Chopin, Thomas and Auber. On Liszt's advice, Franck transferred the finale of his trio op.1 no.3 to his trio op.2 no.4. Although probably conceived in the summer of 1843, his first large-scale work, the biblical oratorio *Ruth* was not completed until 1845 for during this time the pressure of engagements had resulted in a serious illness. His career as a virtuoso was already markedly declining and this, added to the poor reception accorded the first performance of *Ruth* on 4 January 1846 (even though the recent success of David's *Le désert*, with which *Ruth* was unfavourably compared, augured well for a work of oriental character), undoubtedly led to a worsening of his already strained relations with his disappointed father. During the summer of 1846 he formally quitted his parents' house. To support himself, in addition to taking on private pupils, he taught at various public schools and religious institutions in the city and further supplemented his income by obtaining the post of organist at the church of Notre Dame de Lorette in 1847.

Thereafter much of Franck's time was spent at the house of his fiancée, Félicité Saillot Desmousseaux, whose parents were actors at the Comédie-Française. His tyrannical father was opposed to the engagement, though he and Franck's mother grudgingly appeared at the marriage service which took place at Notre Dame de Lorette amid the preliminary fusillades of the 1848 June days. During the idyllic period of his betrothal Franck had written a symphonic poem entitled *Ce qu'on entend sur la montagne*. Another large-scale unpublished composition, the opera *Le valet de ferme*, dates from the early years of his marriage; however, no more works of any consequence appeared for ten years. In 1851 he was appointed organist of St Jean-St François in the Marais, which possessed an early organ by the brilliant builder Cavaillé-Coll, to whose firm Franck was then attached as an 'artistic representative'. Having been inspired by the

César Franck: photograph by Pierre Petit

playing of the Belgian Lemmens he was probably determined during this period to extend his technique, particularly at the pedal-board, and to develop his already prodigious improvisatory skill.

The start of a new phase of Franck's career has rightly been attributed to his appointment, early in 1858, as organist of the newly completed basilica of Ste Clotilde where, assisted by the aging Lefébure-Wély, he inaugurated one of Cavaillé-Coll's finest instruments on 19 December 1859. Although at first he may have been chiefly concerned to provide suitable service music, including the mass for three voices to which he later added the famous setting of *Panis angelicus*, it was his after-service extemporizations that quickly became a public attraction; they appeared in tangible form as his first major work, the *Six pièces*, completed over the following two years. Considered in comparison with contemporary French organ music the *Six pièces* indeed represent a remarkable achievement. Liszt, Franck's friend and champion, proclaimed them worthy of a 'place beside the masterpieces of Bach'. Their accomplishment was not followed up, however, and the ensuing decade proved no

Ex.1 *Rédemption* (first version), symphonic interlude

more productive than the previous one, apart from a number of short organ pieces (published posthumously) and several motets, together with three curious cantatas, the *Cantique de Moïse*, the *Plainte des israélites* and *La tour de Babel*, and the oratorio *Les sept paroles du Christ*, which all remained in manuscript. It was during this creatively fallow period that he was unwittingly laying the foundations of a remarkable phenomenon of 19th-century French culture: the cluster of pupil-disciples known as the *bande à Franck*. One of his part-time teaching posts was at the Jesuit college in the rue Vaurigard, where his pupils included Henri Duparc and Arthur Coquard. Although the latter received instruction in harmony from 1865 to 1866 he was then intent on a career in law and did not resume contact with the group until after the Franco-Prussian War. Meanwhile Duparc had established himself as the leader of the embryonic brotherhood (augmented by Albert Cahen) and in 1868 took the decisive step of introducing Franck, their beloved 'Pater seraphicus', to Alexis de Castillon, who was later to become the first secretary of the Société Nationale de Musique. The society loyally included Franck's *Trio de salon* op.1 no.2 in the programme of its first concert on 25 November 1871, and subsequently gave first performances of many of his important works. But belated recognition had already begun a month earlier with a favourably received performance of the revised version of *Ruth*, and the end of Franck's obscurity was signalled by his nomination to succeed Benoist as professor of organ at the Conservatoire. For this appointment he found it necessary to apply for French citizenship.

In October 1872 Vincent d'Indy became a student in Franck's organ class, which was by then assuming the status of an unofficial composition seminar, and in the following month the first version of a new oratorio, *Rédemption*, was completed. According to d'Indy this was the first work in which Franck applied his principles of 'tonal architecture'; there are passages in the first symphonic interlude (later discarded) which suggest his mature harmonic idiom (ex.1). The first performance took place on 10 April 1873; unfortunately, owing less to its own obvious defects than to badly copied parts and unusually inept conducting on the part of Colonne, the work, given without the interlude, was a miserable failure. Franck's disappointment was bitter, and his initial reaffirmation of confidence in his score only gradually gave way to persuasion by Duparc and d'Indy of the need to remodel it. (The revised work eventually achieved a real success with the public and critics, but not until six years after the composer's death.) In November 1874 he heard the prelude to Act 1 of *Tristan und Isolde*, the direct influence of which is reflected in his subsequent organ and orchestral music, especially in the opening of the fifth *Béatitude*, completed in 1875, and most strikingly of all in *Les Eolides*, completed in the following year (ex.2).

Franck was entering upon a creative phase of tremendous intensity which lasted unabated until his death, although most of his composition had to be fitted into the summer holidays. Except for writing the *Trois pièces* for the inauguration of the Cavaillé-Coll organ at the Palais du Trocadéro (1878), he worked on almost nothing else but the monumental oratorio *Les béatitudes* (begun in 1869) from 1875 until its completion in July 1879. By then he had already begun the Piano Quintet and soon after its successful première, he began another oratorio, *Rébecca*, and later the ill-fated *Hulda*. Two more symphonic poems soon followed, *Le chasseur maudit* and *Les Djinns*; the latter, along with the Quintet, signalled the reawakening of his interest in the piano, which found further expression in the *Prélude, choral et fugue* and the *Variations symphoniques*. On 6 August 1885 he was awarded the cross of the Légion d'Honneur; a year later his election as president of the Société Nationale set off an odious confrontation between the majority party of his own lieutenants (recently joined by Chausson) and the disillusioned, reactionary Saint-Saëns. But these conflicts were not reflected in his important compositions of that summer of 1886: the sunny Violin Sonata and the sensual, at times frankly erotic, symphonic poem *Psyché*.

The year 1887 opened with an ambitious Franck festival concert in the Cirque d'Hiver, conducted jointly by the composer and the unsympathetic Pasdeloup. Characteristically, the disastrous performances embarrassed all but the undaunted Franck himself, who, in addition to writing a second triptych for piano, was making the first sketches for the Symphony. One more abortive operatic scheme occupied him for a further year, but soon after abandoning the orchestration of *Ghiselle* to his pupils he began the String Quartet, a masterly distillation of his harmonic-contrapuntal idiom, whose hyper-intensity he passed on to his last pupil, Guillaume Lekeu. His final works written during summer 1890 were the complex *Trois chorals* and a collection of pieces (for harmonium) of which only 59 of a projected 91 (seven pieces for each of the 13 chromatic keys from C to C) were finished. He was working on them when he died on 8 November, a chill which he had contracted a few weeks earlier having developed into pleurisy. Among those present at his funeral service two days later were Fauré, Bruneau, Widor, Lalo and, delivering the oration, Chabrier. The Conservatoire was represented by Delibes; the Ministry of Fine Arts neglected to send a delegate.

(a) *5th Béatitude*

(b) *Les Eolides*

2. WORKS. Many features of Franck's style were established during the early years at Ste Clotilde; Grace (1948) confidently compared the themes of the *Grande pièce symphonique* (1863) and the Symphony (1886–8); there are also melodic resemblances between the B major Andante of the early *Grande pièce* and the slow movement of the String Quartet (1889). The basis of Franck's

Ex.3 *Prélude, choral et fugue*: chorale

thematic material is the symphonic phrase, a paradoxical compound of rhetorical and passive elements which is paralleled linguistically by Jean-Aubry's (1916) description 'serene anxiety'. Often Franck developed complex phrase structures using a kind of mosaic of variants of one or two germinal motifs, a technique which again underlines his indebtedness to Liszt; two late piano works, the *Prélude, choral et fugue* and the *Prélude, aria et final* illustrate this procedure in its most developed and refined state (ex.3).

If one admits d'Indy's proposition of a major stylistic gap between *Rédemption* (1871–2) and *Les Eolides* (1875–6), one must concur with his biassed assumption that Franck's later compositions are principally identifiable by their preoccupation with harmonic techniques deriving from *Tristan und Isolde*. A very rich strain of chromaticism is indeed a consistent feature of his mature works, and still more of the works of a number of his pupils, where it often appears as a complex undercurrent to a less involved surface, with relatively diatonic melodies harmonized in the style of *Tristan*. However, many non-harmonic features of Franck's 'late' manner were present at an earlier date than that suggested by d'Indy, and, as previously noted, his earliest flirtations with Tristanesque harmony began at least with the fifth *Béatitude*, written some time before 1875. The bowdlerized version of the opening of the *Tristan* prelude found in *Les Eolides* was only a step towards the high chromaticism of the final works, which he had to some extent used even before his acquaintance with Wagner's opera. The foundation of his chromatic procedures, like Wagner's in *Tristan*, is the juxtaposition of tonally unrelated chords by means of logical part movement; in this they had a common source (ex.4), although Wagner was to explore the association of much more distantly related harmonies.

Ex.4 Beethoven: Sonata in F op.54, 2nd movt, bars 37–43: harmonic scheme

An outstanding feature of Franck's harmonic language is his use of the 'chord pair' (as in bars 1 and 2 of *Les Eolides*) where the second chord carries with it the impression of a *sforzando*. A classical formulation of this device appears in the ninth bar of the first movement of the Violin Sonata, but it also occurs in much earlier pieces, as in the first symphonic interlude from *Rédemption* (quoted above). It is often associated with Franck's characteristic iambic rhythm in the attendant melody (see ex.5), as in the Violin Sonata. He often applied his method of thematic development to a harmonic context; a chord pair, for instance, may be repeated with a slight alteration to the second chord, resulting in a stronger implied *sforzando* (Violin Sonata, third movement, bars 17–18). The technique may also be applied to whole phrases, with more than one element being subjected to variation: again, the *Six pièces* furnish a prototype (*Fantaisie*, bars 9–12). Franck was particularly fond of incorporating these motifs into a bar-form (*AAB*) phrase structure; a good example is the second subject of the first movement of the Quintet. Much of the slow movement of this work is organized on the same principle; thus, bars 1–4 may be analysed as *Stollen* (bar 1), *Stollen* (bar 2; chord on third beat varied) and *Abgesang* (bars 3 and 4; cadential figure derived from the preceding two bars). Franck's early explorations in the juxtaposition of chords had repercussions in the music of a later generation, notably that of Debussy, for whom the concept of contrasting harmonic colours was fundamental: his *Les sons et les parfums* (1910) begins with the varied repetition of a chord pair.

Ex.5

Franck's formal procedures ranged from the simplistic dovetailing of ternary and sonata forms in the first movement of the Quartet to the complex synthesis of the *Variations symphoniques*. The architectural principle with which his name is linked, cyclic form, sprang originally from two distinct sources: Beethoven's dramatic recall of previously heard themes, and the monothematic procedure whereby a number of movements employ variants or 'transformations' of the same material, as in Schubert's Wanderer Fantasy and E major Quartet op.125. Both these models have been suggested as the inspiration behind Franck's remarkable Trio in F♯ minor, but a more likely blueprint is to be found in the early piano sonatas of Mendelssohn and the Scherzo of his early Piano Quartet in B minor, which is distinctly echoed in the corresponding movement of Franck's Trio. It was Liszt's achievement to have welded the two principles of thematic recall and monothematicism into a monumental formal process which could unify a multi-movement cycle or even, in *Les préludes* and the Piano Sonata, encompass them all in a continuous sonata first movement plan. Apart from the Trio, where the use of the cyclic technique savours of something of an intellectual exercise, Franck's first important attempt at this kind of unification was the *Grande pièce symphonique*, which shows clearly his immeasurable debt to the music of Liszt's Weimar years. Yet another large-scale single-movement composition is the *Prélude, choral et fugue*, whose chromatic generating motif (later becoming the fugue subject) further emphasizes his underlying relationship to Liszt, irrespective of the inroads the music of Wagner had made on his sensibilities. Despite its lack of conventional breaks between movements, the work basically conforms to the three-movement plan which Franck found most congenial. He had already experimented with the triptych form of Beethoven's *Les adieux* sonata in some of his early piano works and later in a number of the *Six pièces*. Of the other instrumental music, only the Violin Sonata and the Quartet deviate from this tripartite layout, to which all the important instrumental works of his pupils also conform.

No appraisal of Franck's total output can ignore the wide qualitative gulf separating the broad categories of vocal and instrumental music. Surprisingly for a skilled contrapuntist his choral writing too often suffers from

unrelieved homophony; the discrepancy may be seen in a hybrid work like *Psyché* in which the choral sections simply disfigure the remainder. Except in one or two instances he was unable to make much of the contemporary *mélodie* (his grasp of prosody was notoriously weak), and the prevailing sentimental style of church music in mid-19th-century France was hardly fertile soil in which his gifts might flourish. Nevertheless, one or two of his sacred pieces, notably the festal offertory *Quae est ista* (1871), were distinguished additions to the liturgical repertory. Franck's cardinal weaknesses included his lack of literary discernment and corresponding readiness to rely on the literary tastes of others, and the limited spectrum of experience he could convincingly express in music. The failure of the operas cannot be blamed entirely on their absurd and anachronistic librettos, and in spite of many magnificent pages, the choral works are unlikely to find admirers, fundamentally because Franck was unable to realize their essentially dramatic schemes. This stricture is particularly applicable to *Rédemption* where, as has often been remarked, he was lamentably unable to delineate the darker aspects of human nature described in the text, the characterization of Lucifer being utterly ineffectual. *Les béatitudes*, Franck's magnum opus by which both he and his disciples set so much store, suffers initially from too rigid a formal plan: each of the eight sections begins with an exposition of a particular evil, proceeds to a celestial prophecy and concludes with the voice of Christ intoning words from the Sermon on the Mount. A certain pedestrianism in melody and rhythm is exposed by the obsessively chromatic harmony. Yet the monolithic design of the total work, in 'tonal architectural' terms implemented by an identification of psychological states with specific keys (as with Messiaen a kind of cosmic joy is attributed to F♯ major), is very impressive and ought to preclude anything but a complete performance. Parts three and four and much of parts five and six represent his outstanding accomplishments on a large canvas.

Franck's finest compositional achievement is represented by the symphonic, chamber and keyboard works, one of the most distinguished contributions to the field by any French musician – especially the last three chamber works, in which Franck found a balance between his inherent emotionalism and his preoccupation with counterpoint and Classical forms. They constitute his legacy to his disciples, and the intense interest in chamber music shown by Castillon, from the moment of his becoming a student of Franck, is perhaps symbolic of the importance of formalistic works for the Franckist school as a whole. There were few precedents in France for such an involvement; those that did exist, such as the genuinely neo-classical symphonies of Gounod and Bizet of 1855 and the early piano quintet and piano trio by the eclectic Saint-Saëns, were isolated attempts and give little hint of what was to follow. To his pupils, Franck communicated both the Beethovenian idealism inherent in the cultivation of the strict genres of symphony, quartet and sonata and the harmonic innovations of late Romanticism. This double allegiance to the Viennese tradition on the one hand, and to Liszt and Wagner on the other, was undoubtedly responsible for the self-indulgent massiveness which characterizes many Franckist works and which sometimes proved to be a source of stylistic confusion, as Cooper (1951) has observed about the Piano Trio by Lekeu. The finest products of the movement, however, such as the chamber music and the Symphony of Chausson, in whose Piano Trio may be observed the most direct workings of Franck's influence, align this monumentality with a sweeping lyricism.

Franck's pupils were attracted to his teaching technique, his innate receptiveness to new ideas and his seriousness, a quality which stood in marked contrast to the superficiality of the Opéra-dominated establishment. After 1872 only a few, including Augusta Holmès and Lekeu, were taught privately; the majority, often at the instigation of Coquard, attended the organ class where most of Franck's composition teaching took place. Although he would naturally assess individual compositions by members of his closest circle, his main medium of communication seems to have been the improvisation sessions which took up most of the class's time; through these he reached a wider audience, including such peripheral members of the school as Fumet and Lazzari. He was not primarily concerned with keyboard technique, as Vierne and Tournemire found to their dismay when later confronted with Widor. His sphere of influence was wide: in addition to those pupils already mentioned, Charles Bordes, Guy Ropartz, Dukas, Bréville, Pierné, Guilmant and Magnard passed at some stage through his hands. Few other teachers can be credited with such an achievement.

WORKS

all published and first performed in Paris, unless otherwise stated; autograph MSS of unpublished works in F-Pc and Pn. Opus numbers in italics refer to Franck's first series, those in roman to his second series and Messe à 3 voix; no works composed after 1863 bear opus numbers. Thematic catalogue of published works in Mohr [M].

JOHN TREVITT/JOËL-MARIE FAUQUET

Franck, Eduard (*b* Breslau, 5 Oct 1817; *d* Berlin, 1 Dec 1893). German pianist, composer and teacher. After private study with Mendelssohn in Düsseldorf and Leipzig (1834–8), whose style as pianist and composer he followed, he travelled to Paris, London and Rome (1842–5). He then resided in Berlin (1845–51) and taught music in Cologne (1851–9) and Berne (1859–67), moving to Berlin in 1867 to teach first at the Stern Conservatory (1867–78) and then at Emil Breslaur's conservatory (1878–92). Much loved as a teacher, he was also admired as a pianist with a particularly fine touch; his music, largely instrumental, was praised by his contemporaries, including his friend Schumann. He married the pianist Tony Thiedemann; their son Richard (*b* Cologne, 3 Jan 1858; *d* Heidelberg, 22 Jan 1938) was a composer and pianist who studied with his father in Berlin and with Reinecke, Wenzel, Jadassohn and Richter in Leipzig. He taught in Basle (1880–83, 1887–1900), with a period also in Berlin and Magdeburg, and conducted choirs in Kassel (1900–9) and Heidelberg (1910–38). Known chiefly as a performer of Beethoven, he also wrote a number of pieces in late Romantic vein for piano. His autobiography was published in 1928.

JOHN WARRACK

Franck [Frank, Franke], **Johann** (*b* Guben, 1 June 1618; *d* Guben, 18 June 1677). German poet, lawyer and public official. He attended school at Cottbus, Stettin and Thorn and later studied jurisprudence at Königsberg, where he met his poetic mentor, Simon Dach. On his return to Guben he embarked on a distinguished civic career as attorney, city councillor (1648) and mayor (1661) and as

county elder in the margravate of Lower Lusatia (1670). He wrote both secular and religious poetry and published his first work, *Hundertönige Vaterunsersharfe*, at Guben in 1646. Almost his entire output is brought together in the two-volume *Teutsche Gedichte*. The first part, *Geistliches Sion* (Guben, 1672), contains 110 religious songs, provided with some 80 melodies, of which 40 are by the Guben Kantor Christoph Peter. Other composers include Schein, Gesius and Crüger, who eventually composed 14 melodies for Franck. Almost half of his hymn texts are paraphrases of psalms; they are reminiscent of Paul Gerhardt in their prayer-like diction and their untormented faith, which may account for both their general popularity and their particular attraction for Crüger. A few are still found in Protestant hymnals today. Bach composed 14 settings of seven of his texts (to melodies by Crüger, Albert and Peter), the most famous being the motet *Jesu, meine Freude* BWV227. The second part of Franck's *Teutsche Gedichte*, the *Irdischer Helicon* (Guben, 1674), contains his secular poetry. Influenced by Opitz, it is of average quality and is now forgotten; it includes a panegyric to Crüger.

TRAUTE MAASS MARSHALL

Franck, Johannes. German publisher, perhaps an elder brother of MELCHIOR FRANCK.

Franck, Johann Wolfgang (*b* Unterschwaningen, Middle Franconia, bap. 17 June 1644; *d* ?*c*1710). German composer. Since his father, who died in 1645, had held an important administrative post at the court of the Margrave of Brandenburg-Ansbach, and his mother's family were natives of Ansbach, it is likely that Franck had a superior education at a Latin school there. This is substantiated by his matriculation at Wittenberg University in 1663. From 1665, at the latest, to 1668 he served the Ansbach court as a secretary (*Kammerregistratur Adjunct*) in its musical establishment, and as a tutor of the ruling family's children. In spring 1668 Franck was granted leave of absence, possibly to travel and study in Italy. With the establishment of the new government of Margrave Johann Friedrich in 1672, Franck was again in Ansbach and was appointed director of the court music and the theatre. His new appointment enabled him to reorganize and expand the court orchestra, thereby re-establishing the fame of the Hofkapelle, and to develop the importance of opera in court entertainments. In addition to incidental music for plays and ballets, he composed his first operas, *Die errettete Unschuld, oder Andromeda und Perseus* (1675) and *Der verliebte Föbus* (1678). He composed a considerable body of sacred music for the court chapel, and in 1677 was made court chaplain. In January 1679 he fled Ansbach after having murdered another court musician. He found asylum in Hamburg, where his music was to dominate the opera for the next six years.

In 1678 Hamburg became the first city outside Venice to establish a public opera house, the Theater am Gänsemarkt. In 1679 Franck produced four operas (as well as a revival of *Andromeda*), and between then and 1686 he introduced many operas. At this time he was not only opera Kapellmeister but also the director of music at the Protestant cathedral, and he composed many sacred lieder, mostly to verses by the Hamburg clergyman Heinrich Elmenhorst. Franck published collections of arias from four operas, *Aeneae* (1680), *Vespasian* (1681), *Diocletianus* (1682) and the two-part *Cara Mustapha* (1686). Extant examples of music from his operas exist only in these four collections and his only surviving opera with recitatives as well as arias, *Die drey Töchter des Cecrops*. This was once thought to have been a revival in Hamburg in 1680 of an Ansbach production of 1679. The origins of the Ansbach score and the Hamburg performance remain unclear, although Braun (1983) argues that the Ansbach performance took place when Franck made a return visit there in 1686, and that a shorter revision of the work was heard shortly afterwards in Hamburg. Franck moved to London in 1690, where he reportedly gave similar operatic performances. In subsequent years he joined in consort performances with Robert King, a composer, violinist and concert promoter. Franck composed a number of English songs that appeared in London journals. The exact date and place of his death are unknown, but a report in Moller's *Cimbria litterata* (Copenhagen, 1744) makes the intriguing suggestion that he may have been murdered in Spain.

Franck's operas were a major factor in developing an identity for German opera in the later 17th century. What survives indicates that his operas emphasized a popular style combining elements of Venetian opera and French music. The recitatives, in *Drey Töchter*, are highly expressive, with active harmonic support anticipating the arioso style, and are clearly separated from the arias, which are of contrasting types. There are strophic songs based on dance rhythms clearly of popular or folksong character. Others, often strophic, are stylistically German as they reflect the spirit, and probably at times the actual melodies, of chorales. A third kind of aria, usually much longer and with a tempo indication of 'Adagio', employs strong affective dissonances and dramatic melodic gestures, with rhetorical outbursts to express tragic or other sad affections. As with Venetian opera arias, Franck often rounded off his arias with brief instrumental postludes repeating the final vocal phrase(s). He was apparently the first Hamburg opera composer to use the orchestra to accompany some of the arias and to interject short, concerted instrumental passages to highlight a particularly expressive vocal phrase. The several instances of trumpet obbligatos are also noteworthy.

While the melodic writing generally has a light, popular tone, many examples occur of a more complex vocal style, with long melismatic passages that seem more instrumental than vocal in character. The harmonic language, evident from a profusion of continuo figures, displays an effective use of expressive, unprepared dissonances and frequent sudden shifts from major to minor chords for rhetorical impact.

WORKS

music lost unless otherwise stated

OPERAS

first performed at Hamburg, Theater am Gänsemarkt, unless otherwise stated

Die errettete Unschuld, oder Andromeda und Perseus (after P. Corneille: *Andromède*), Ansbach, 1675, revived Hamburg, 1679
Der verliebte Föbus, Ansbach, 1678

Don Pedro, oder Die abgestraffte Eyffersucht (H. Elmenhorst, after Molière), 1679
Die macchabaeische Mutter mit ihren sieben Söhnen (after Gryphius), 1679
Pastorelle, Lustschloss, Triesdorff, nr Ansbach, 1679
Die wohl- und beständig-liebende Michal, oder Der siegende und fliehende David (Elmenhorst), 1679
Aeneae, des trojanischen Fürsten Ankunft in Italien, 1680, arias (Hamburg, 1680)
Alceste (Franck, after P. Quinault), 1680
Sein selbst Gefangener [Jodelet] (Matsen, after Scarron), 1680
Charitine, oder Göttlich-Geliebte (Elmenhorst), 1681
Hannibal (H. Hinsch, after N. Beregan), 1681
Semele (J.D. Förtsch), 1681
Vespasian (P. Marci after G.C. Corradi), ?1681, 1683, arias (Hamburg, 1681)
Attila (after M. Noris), 1682
Diocletianus (?Franck, after Noris), 1682
Der glückliche Gross-Vezier Cara Mustapha, erster Theil, nebenst der grausahmen Belagerung und Bestürmung der Kayserlichen Residentz-Stadt Wien; Der unglückliche Cara Mustapha, anderer Theil, nebenst dem erfreulichen Entsatze der Käyserlichen Residentz-Stadt Wien (L. von Bostel), 1686, arias from both pts (Hamburg, 1686)
Die drey Töchter des Cecrops (prol, 5, A. von Königsmark), Ansbach, ?1686, *D-AN*; ed. in DTB, xxxviii, Jg.xxxvii and xxxviii (1938), and EDM, 2nd ser., *Bayern*, ii (1938)

OTHER STAGE

Incidental music to C. Cibber: *Love's Last Shift*, London, 1696, 1 duet in 1696[6]
The Judgment of Paris (? W. Congreve), London, 11 Feb 1702, reported in *London Gazette* (2 Feb 1702)
Undated incidental music to 3 dramatic works perf. at Ansbach, lost, listed in Ansbach inventory of 1686, *D-Nst*

CANTATAS

5 undated cants. from the Ansbach period, *D-Bsb*: Te Deum laudamus; Weil Jesus ich in meinem Sinn, ed. W. Haacke (Berlin and Darmstadt, 1949); Ich habe Lust abzuschneiden; Conturbatae sunt gentes; Durum cor ferreum pectus
6 undated cants. from the Hamburg period, *W*: Exaudi o misercors et benignissime Deus; Domine ne in furore; Herr Jesus Christ, du höchstes Gut; In allen meinen Taten; Willkommen, liebstes Jesulein; Jesu, vir colorum
57 lost cants., 12 lost Tafelstücke, listed in Ansbach inventory, 1686, *Nst*, 1002–08; 4 lost cants. listed in Lüneburg inventory, *Lr*

SACRED AND SECULAR SONGS

Passionsgedanken (H. Elmenhorst), 2vv, opt. bc (n.p., before 1681), ?lost, repr. in following item
Geistliche Lieder (Elmenhorst), 2vv, opt. bc (Hamburg, 1681), repr. in Geistliches Gesangbuch
M. Heinrich Elmenhorsts besungene Vorfallungen, 1v, bc (Hamburg, 1682), repr. in Geistliches Gesangbuch
Geistliches Gesangbuch (Elmenhorst), 1v, bc (Hamburg, 1685), repr. with works by G. Böhm and P.L. Wockenfuss in M. Heinrich Elmenhorsts . . . geistreiche Lieder, ed. J.C. Jauch (Lüneburg, 1700), ed. in DDT, xiv (1911)
Erster Theil musicalischer Andachten, 1v, bc (Hamburg, 1687)
Remedium melancholiae, or The Remedy of Melancholy, 1v, bc (hpd/theorbo/b viol), bk 1 (London, *c*1690)
A New Song on K[ing] W[illia]m (London, *c*1690)
15 Songs in the Gentleman's Journal (1692–4), 1 ed. in Squire, 1 song in Songs Compleat, Pleasant and Divertive (London, 1719–20); 2 single songs (London, n.d.)

INSTRUMENTAL

6 sonatas, 2 vn, 2 b, lost, reported in *The Post Man* (18 Aug 1702)

GEORGE J. BUELOW

Franck, Melchior (*b* Zittau, *c*1579; *d* Coburg, 1 June 1639). German composer. He was not born in 1573, as is often stated, but about six years later (see Peters-Marquardt). His father Hans was a painter; his mother died in 1603, an event the composer commemorated with a motet. Johannes Franck, who published a set of *Cantiones sacrarum melodiarum* in Augsburg in 1600, may have been an older brother. Little is known of Melchior's early life. He may have studied music in Zittau under Christoph Demantius, Kantor there from 1597 to 1604, and may have been a pupil of Adam Gumpelzhaimer (as well as Christian Erbach, Bernhard Klingenstein and Hassler) in Augsburg. In any case he was in the choir of the St Anna, Augsburg, about 1600.

In 1601 Franck moved to Nuremberg, where he taught at the Egidienkirche. The year he spent there was decisive for his career. His concern with music education resulted then and in later years in numerous collections of pedagogic vocal and instrumental music. Also in Nuremberg he was strongly influenced by Hassler, who had returned there from Augsburg also in 1601. Hassler had inherited from Lechner, his probable teacher in Nuremberg, Lassus's Netherlandish style of motet composition and had absorbed the Venetian antiphonal style from both Andrea and Giovanni Gabrieli while studying with them in Venice. He passed these on to Franck. Furthermore, the contact at one remove with Lechner is reflected in Franck's many psalm settings.

At the end of 1602 or beginning of 1603 Franck became Kapellmeister to Duke Johann Casimir of Saxe-Coburg, an enlightened nobleman who took a great interest in his musical establishment; no doubt he worked warmly with Franck, for whom life in Coburg was at first ideal. He published a great deal, and in 1607 he married.

The Thirty Years War affected Coburg in the early 1630s, when the city and the countryside nearby were ravaged by Wallenstein's and then Lamboy's armies. The economy was ruined; moreover, Duke Johann Casimir

died in 1633. Franck personally suffered the loss of his wife and two children. Casimir's successor, Duke Johann Ernst, was forced to economize and, lacking his predecessor's love of music, he quickly reduced the size and his support of the Kapelle. Franck kept his position, though his pay dwindled steadily in the following years, and Johann Ernst also appointed him to the lesser post of inspector of the choir of the city church. Franck complained about the severe times in the prefaces to his printed works, but despite receiving an offer to return to Nuremberg in 1636 he decided to remain with the duke, who invited him to reorganize his court Kapelle in Eisenach. With the failure of that Kapelle Franck returned to Coburg, where he was pensioned.

Franck was one of the best composers of German Protestant music in the first half of the 17th century. He wrote both sacred and secular music for various instrumental and vocal forces: his output is vast, and a comprehensive, detailed study of his works has yet to be undertaken. Most of his music is conservative in comparison with that of Schütz or his Italian contemporaries, and he experimented with the new basso continuo only from 1627. Of 1466 known compositions, his principal works are his purely vocal motets and his dances for instrumental ensemble. He also wrote German polyphonic songs and quodlibets, German *Magnificat* settings, a Mass, sacred concertos, simple chorale settings and incidental music to a play.

Franck published more than 40 collections of motets, more than one a year, between 1601 and 1636. Of the over 560 compositions in them, most use German translations of psalms and prophetic writings. The motets with Latin texts, all but seven of which appear in five collections published from 1601 to 1613, are also provided with German translations. The settings vary in size and style. Nearly all are performable by *a cappella* choir or with instruments doubling the parts; four collections include a basso continuo organ part: *Rosetulum musicum*, *Dulces mundani exilii deliciae* and the two volumes of *Paradisus musicus*. The motets without continuo are for three to 12 voices, most being for between four and eight; the motets with continuo are for one to eight voices, though very few are solos.

In the preface to his *Contrapuncti* (1602), Franck explained his style of writing. He recalled that Catholic polyphony was composed in an elaborate way for the glory of God and the appreciation of the educated and that Protestant psalmody was developed for laymen and young people. The Protestant reaction to elaborate Catholic music early in the 16th century was understandable, but by 1602 the simple psalmody was well known to the layman and was well represented in print. Franck's aim was to take the simple chorale tunes and as in the older Catholic music to ornament them for the glory of God. The 22 motets in this collection are typical of his motets in general. All the pieces are in the *prima pratica*: there are no unusual dissonances, and those that are used are carefully prepared and resolved. The voices move by step for the most part; the bigger leaps usually stem from the movement of the borrowed chorales. Nonetheless Franck was very expressive in his text-setting; for example, in *Aus tiefer Not schrei ich zu dir* when the three lower voices sing 'Herr Gott, erhör mein Rufen' ('Lord God, hear my call') in a generally low tessitura the soprano enters more than an octave higher with the same words: the cry to God soars above all else. There is some word-painting, for example a long melisma on 'klagen' ('to cry out in grief') in the motet *Ich ruf zu dir, Herr Jesu Christ*, but this is not consistent. These motets reflect the influence of Hassler in the use of expressive devices and that of Lassus and Lechner in the carefully worked-out counterpoint. The unusual feature of the *Contrapuncti* motets is that all are fugues for four voices or instruments: on the title-page Franck clearly states that they are to be performed in a fugal way not only by voices but also by instruments. The fugal expositions always have real answers; in a few cases the entries are in stretto, and they sometimes vary slightly in rhythm. The subject is based on the first phrase of the chorale; subsequent points of imitation use the later phrases.

The *Gemmulae evangeliorum musicae* (1623) contains very short, mostly homophonic settings of important German proverbs, less elaborate than the *Contrapuncti*. One piece is strophic, and many have some scheme of internal repetition (*AAB*, *AABB*, *ABB*, *ABBC*, *AABCC* and *AABBC*). In the preface Franck makes clear that he had composed these very easy pieces so that even the smallest, least expert choir could sing them.

The various motets of the *Melodiae sacrae* (1607) strongly evince a characteristic of Franck's music not met with in the above-mentioned collections: the antiphonal juxtaposition of groups of voices (though there are never two distinct choirs). The music is predominantly homophonic within the *prima pratica*, and there is some specially noteworthy word-painting, for example the effective melismas on such words as 'fountain' and 'south wind blowing' in *Meine Schwester, liebe Braut*. Elsewhere Franck did write antiphony for two choirs. His contribution to the wedding collection *Epithalamia* (1614[17]) is a motet for two four-part choirs, and his Christmas motet *Dank sagen wir alle Gotte*, found in an undated manuscript, is for seven voices arranged in two choirs. Both works are essentially homophonic and contrast duple- and triple-time sections. Franck wrote many sacred occasional pieces such as these. The funeral songs among them are appropriately much more subdued. That for his friend Wolffgang Beyling (1624) is almost strictly homophonic, syllabic and scored for four voices *a cappella*. Each verse is set off by rests as in Lobwasser's German psalms based on Goudimel's homophonic French psalms. Like most of Franck's motets, those in *Dulces mundani exilii deliciae* (1631) are devotional songs based on biblical texts that were performed privately for Duke Casimir and not in ordinary churches. The texture is basically homophonic, whether for one voice with continuo or for two four-part choirs with continuo. A few motets for three to eight voices, however, are more contrapuntal.

Of the secular vocal pieces the most unusual are the 11 quodlibets. Composed for students, they reflect the student humour of the time. The borrowed music and texts succeed one another; sometimes only the texts are borrowed, sometimes only the music. The sources range from important works by Hassler and German art song to popular German folksongs, and sometimes Latin and German are mixed.

Most of the 13 secular vocal collections also contain many purely instrumental dances, and the latter strongly influenced the former. Even when secular songs appear apart from dances, as in *Musicalischer Bergkreyen* (1602)

and *Opusculum ... Reuterliedlein* (1603), they are homophonic and have regularly recurring rhythmic patterns. They are strophic, syllabic, except for a few melismas on the penultimate syllables of verses, and in most cases are in bar form. Instruments can replace the voices. *Musicalischer Bergkreyen* is unusual in that the tenor introduces each piece.

The dances, which in addition to appearing in song collections are to be found in four individual dance collections, are all homophonic. Like most dances of the time they are in the form *AABBCC*, with the tonality moving from tonic (*A*) to dominant (*B*) and back to tonic (*C*) or from tonic minor (*A*) to subdominant (*B*) and back to tonic minor (*C*). They are scored for four to six unspecified instruments, though viols are called for in *Newe musicalische Intraden*. In the *Deliciae convivales* (1627) a basso continuo is added. In *Lilia musicalia* the dances are presented in suites; elsewhere they are grouped by type.

On 14 June 1630 the pastoral play *Von der Zerstörung Jerusalems* was performed by students in Coburg with eight *intermedi* with music by Franck.

Though conservative, Franck's music is consistently expressive. He did not follow the reforms of Martin Opitz, though he knew him, but he was always careful to observe proper German diction. His works were extremely popular, no doubt on account of both their simplicity and their beauty: they reappeared many times in his lifetime in various cities and in collections. The most prolific German composer of his generation, he is perhaps the most important after Schütz, Schein and Scheidt.

WORKS

SACRED

Sacrarum melodiarum ... tomus primus, 4–8vv (Augsburg, 1601)
Contrapuncti compositi deutscher Psalmen und anderer geistlichen Kirchengesäng, 4vv (Nuremberg, 1602); ed. H. Nitsche and H. Stern (Stuttgart, 1963)
Sacrae melodiae, ii, 4–12vv (Coburg, 1604)
Tomus tertius melodiarum sacrarum, 3–4vv (Coburg, 1604)
Melodiae sacrae, iv, 5–12vv (Coburg, 1607)
Geistliche Gesäng und Melodeyen, 5–6, 8vv (Coburg, 1608); ed. W.J. Weinert (Madison, WI, 1993); 5 songs ed. in Cw, xxiv (1933)
Opusculum etlicher neuer geistlicher Gesäng, 4–6, 8vv (Coburg, 1611)
Viridarium musicum, 5–10vv (Nuremberg, 1613); 8 ed. K. Gramss, *Acht lateinische Motetten* (Wolfenbüttel, 1993)
Threnodiae Davidicae, 6vv (Nuremberg, 1615)
Geistlichen musicalischen Lustgartens erster Theil, 4–9vv (Nuremberg, 1616)
Laudes Dei vespertinae: i, 4vv; ii, 5vv; iii, 6vv; iv, 8vv (Coburg, 1622)
Gemmulae evangeliorum musicae, 4vv (Coburg, 1623); ed. K. Ameln, *Deutsche Evangeliensprüche für das Kirchenjahr 1623* (Kassel, 1960)
Rosetulum musicum, 4–8vv, bc (Coburg, 1627–8)
Cythera ecclesiastica et scholastica, 4vv (Nuremberg, 1628)
Sacri convivii musica sacra, 4–6vv (Coburg, 1628)
Prophetia evangelica, 4vv (Coburg, 1629)
Votiva columbae sionea suspiria, 4–8vv (Coburg, 1629)
Dulces mundani exilii deliciae, 1–8vv, bc (Nuremberg, 1631); 15 songs ed. in Sheets, ii
Psalmodia sacra, 4–5vv (Nuremberg, 1631)
Paradisus musicus, 2 vols., 2–4vv, bc (Coburg and Nuremberg, 1636); ed. K. Gramss (Wolfenbüttel, 1989)

More than 40 occasional sacred vocal works for weddings, funerals, installations, birthdays, journeys and new years pubd individually up to 1628; several isolated sacred songs pubd 1608, 1630 and 1632; others included in anthologies, e.g. E. Bodenschatz: Florilegium Portense, i (Leipzig, 2/1618); 6 ed. in *Sechs Motetten über neutestamentliche Texte ... um 1631* (Göttingen, 1976); others survive in various MSS (for fuller list see *MGG1*)

SECULAR

Musicalischer Bergkreyen, 4vv (Nuremberg, 1602); ed. in Cw, xxxviii (1936)
Opusculum etlicher newer und alter Reuterliedlein, 4vv (Nuremberg, 1603)

JOHN H. BARON

Franck, [Frank], Michael (*b* Schleusingen, Franconia, 16 March 1609; *d* Coburg, 26 July 1677). German poet and composer. After his father's death in 1622 Franck was apprenticed to a baker at Coburg. In 1628 he settled in Schleusingen and married. Repeated looting in the Thirty Years' War forced him to relocate in Coburg in 1640. He

expressed his religious conviction in devotional songs and poetry, which also contain autobiographical elements. With the recognition of his talents, he was appointed teacher at the school in Coburg. He published several collections of German Baroque songs there between 1649 and 1662, the most important being the *Geistliches Harpffen-Spiel* (1657). This contains 30 songs of his own composition in a four-part setting with thoroughbass accompaniment. His *Ach wie flüchtig, ach wie nichtig* has enjoyed enduring popularity; it forms the basis of J.S. Bach's cantata (BWV 26) of the same name, and is Franck's only song in the modern German Protestant hymnal. His dedicatory verse in Johann Rist's collection *Neues musikalisches Seelenparadis* (1660–62) attests to his close connection with that poet, who in 1659 admitted Franck into his literary academy, the Elbschwanenorden, and crowned him poet. Franck also had contact with the poets Simon Dach, Johann Michael Moscherosch and Georg Neumark. For New Year 1659 Franck published Johann Scheffler's *Innigliches Seelen-Verlangen . . . Das ist: Ein auserlesenes Christliches Gesänglein* at Coburg.

Two composers who resided in Coburg at this time both used the monogram 'MFS', and Michael Franck Silusianus (that is, from Schleusingen) should not be confused with the musician Melchior Franck Silesius (from Zittau). For this reason, the authorship of the composition *Jersulam, du hochgebaute Stadt* (text by Johann Matthäus Meyfart) cannot be definitively determined. Michael Franck appears to have been the author of a 1500-line poem commemorating the Coburg peace celebrations in 1650.

M.R. WADE

Franck [Francke, Frank], **Salomo** [Salomon] (*b* [?bap.] Weimar, 6 March 1659; *d* Weimar, ?10 June [bur. 14 June] 1725). German poet, cantata librettist and court official. After studying in his native town he enrolled in the faculty of law at Jena University in 1677. In 1682 he went to Leipzig to pursue further studies; within a year, however, he had evidently moved to Arnstadt, and by 1685, when he published his first volume of poetry, he had returned to Jena. In 1689 he received a position as administrative secretary to the court of Arnstadt, probably after working in a similar role at Zwickau; two years later he became consistorial secretary. In 1697 an appointment as administrative and consistorial secretary at the court of Jena took him to that city for a third time. In 1701 he became consistorial secretary at the court of Weimar; he rose before long to the rank of chief consistorial secretary and also supervised the ducal library and coin collection.

In addition to his administrative duties at Weimar, Franck served as the court's poet in residence, turning out verses – many of them meant for musical setting – on state occasions and providing texts for the music performed at services in the ducal chapel. He had in fact written for the Weimar court as early as 1683, and in 1694 he dedicated a manuscript cycle of cantata texts for the entire liturgical year to Duke Wilhelm Ernst (*Evangelische Seelen-Lust über die Sonn- und Festtage durchs gantze Jahr*, published in *Geist- und weltliche Poesie*, Jena, 1711). Several of his poems were set by J.S. Bach – indeed he wrote the librettos for most of Bach's Weimar cantatas. Perhaps as early as 1713, while still court organist, Bach composed the secular cantata BWV208 to a text subsequently published in Franck's *Geist- und weltliche Poesien zweiter Theil* (Jena, 1716); a year later he began the monthly series of church cantatas stipulated by his new contract as Konzertmeister with several works on librettos presumably by Franck (BWV182, 12 and 172). Between December 1714 and January 1716 Bach set at least eight texts (BWV152, 80*a*, 31, 165, 185, 161, 162, 163, 132 and 155) from Franck's *Evangelisches Andachts-Opffer* (Weimar, 1715), and his last three Weimar cantatas, BWV70*a*, 186*a* and 147*a*, all written in December 1716, have texts from another cycle by Franck, *Evangelische Sonn- und Fest-Tages-Andachten* (Weimar and Jena, 1717). Bach set the texts as part of his composing contract; the remaining cantata texts that Franck wrote for court services were probably set by the Kapellmeister Johann Samuel Drese. In addition, Franck probably wrote the text of Bach's wedding cantata BWV202. Bach made further use of Franck's works in Leipzig; the librettos of cantatas BWV168 (1725), 164 (1725) and 72 (1726) all come from the *Evangelisches Andachts-Opffer*, and other librettists of Bach's, possibly at his urging, reworked poems by Franck in their own texts.

Franck's reputation extended well beyond his own circle; a number of his devotional lyrics, for instance, made their way into contemporary hymnbooks. At his best, particularly in his sacred works, Franck achieved a synthesis of technical fluency and expressive fervour that placed him among the most notable German poets of his day.

JOSHUA RIFKIN/KONRAD KÜSTER

Franck, Theodor. *See* THEODOR OF WÜRZBURG.

Francke, August Hermann (*b* Lübeck, 12 March 1663; *d* Halle, 8 June 1727). German theologian and educator. A

major figure in the development of Pietism, he was a leader in the reform of education in German Protestant schools, and founded the celebrated Orphans' School and so-called Franckeschen Foundation in Glaucha, outside Halle. Francke attended the gymnasium in Gotha, 1673–9, and became a theology student at the Erfurt Hochschule in 1679. He then studied for three years at Kiel, and spent a brief period in Hamburg studying Hebrew with the scholar Esdras Edzardus. He completed his university training in Leipzig, received the master's degree in 1685, and stayed in that city to lecture in philosophy. For two years from 1687 he lived in Lüneburg, where he continued his religious studies and also experienced a reawakening of religious commitment. His Pietistic convictions were largely developed through contact with Philipp Jakob Spener in Dresden, with whom he spent two months in 1688. In February 1689 he returned to Leipzig where he lectured to a large number of students in the Collegium Philobiblicum, which he had helped found in 1686. In 1690 Francke's lectures were banned; in March of that year he received a deaconry at the Augustinian church in Erfurt, but critics of Pietism forced him to leave that city in September 1691. Finally, after a brief visit to his home in Gotha, he went to Halle on 7 January 1692 as professor of Eastern languages at the newly formed university, and at the same time became preacher at the Georgenkirche in Glaucha.

Francke's singular accomplishment was the founding of the Orphans' School (Waisenhaus) in Glaucha in 1695, which quickly gained wide influence throughout Prussia. By 1711 1500 students were registered in the Franckeschen Foundation, a system of schools in Glaucha including, besides the Orphans' School, the Deutsche Schule (similar to the later Volksschule), the Gymnasium or Pädagogium, and a Lateinschule. In 1698 he became professor of theology at Halle University and minister at the Ulrichskirche there.

Among the leading figures of German Pietism, including P.J. Spener and N.L. Graf von Zinzendorf, Francke was most important for his efforts to retain music within the Pietistic philosophy of education. Supported especially by King Friedrich Wilhelm, his school system became a model of educational design for much of Prussian Germany well into the 19th century. Music was made part of the curriculum to bring children to God and to develop upright Christianity. His views on music within the school organization (see Serauky) were developed in three major pronouncements: *Ordnung und Lehr-Art, wie selbige in denen zum Waisen-Hausse gehörige Schulen eingeführet ist* (1702; an enlarged version of *Schulordnung für die Waisen- und übrige Schul Kinder*, 1697); *Ordnung und Lehr-Art, wie selbige in dem Paedagogio zu Glaucha an Halle eingeführet ist* (1702); and *Verbesserte Methode des Paedagogii Regii zu Glaucha vor Halle* (1721; by Hieronymus Freyer, inspector of the Pädagogiums and Francke's collaborator). Students were allowed two hours of vocal music weekly. Girls received instruction only in the singing of chorales, while boys were also introduced to the principles of contrapuntal music. The goal of teaching students to sing from musical notation became, after 1717, a rule for all Prussian elementary schools. In addition to this regular instruction, which in fact was a reduction by two hours weekly over that found in most earlier school regulations, Francke introduced to the Pädagogium the concept of *Recreations-Übungen*, one hour daily each morning during the so-called 'free hour' when talented students were permitted to study instruments such as the flute, keyboard, lute, viola da gamba, etc., with a 'Maitre'. Finally, an hour was set aside for those capable of performing in a collegium musicum. Francke's concern for music as an important adjunct to the sacred service influenced his assistant at the Ulrichskirche and later son-in-law, J.A. Freylinghausen, to publish the important collection of Pietistic chorales, *Geistreiches Gesang-Buch: den Kern alter und neuer, wie auch die Noten der unbekannten Melodeyen ... in sich haltend* (Halle, 1704), and part ii as *Neues geistreiches Gesang-Buch* (Halle, 1714).

GEORGE J. BUELOW

Franckenstein, Clemens (Erwein Heinrich Karl Bonaventura), Freiherr von und zu (*b* Wiesentheid, nr Kitzingen, 14 July 1875; *d* Hechendorf, nr Munich, 19 Aug 1942). German composer and conductor. He studied composition in Vienna with the Bruckner pupil Victor Bause (until 1894), with Ludwig Thuille at the Bayerische Akademie der Tonkunst, Munich (1894–6) and with Iwan Knorr at the Hoch Conservatory, Frankfurt (1896–8). While in Vienna Franckenstein established important connections with major literary and artistic personalities of his day, including Hugo von Hofmannsthal, through whom he was admitted to the Stefan George Kreis.

From Frankfurt, Franckenstein embarked upon a successful career as a conductor, administrator and composer of opera. His conducting career, which began in the USA (1900–01), took him to London, where he was staff conductor with the Moody Manners Opera Company (1902–7). Thereafter he served as a principal staff conductor at the Wiesbaden Hoftheater, and at Richard Strauss's behest, at the Royal Prussian Opera in Berlin. In 1912 he became the last Hofintendant at the Munich Opera, where he introduced Bruno Walter as Generalmusikdirektor and arranged for first performances of operas by von Klenau, Korngold, Braunfels, Courvoisier, Graener and Pfitzner. Rendered inactive during the Räterrepublik, Franckenstein resumed his responsibilities, now as Bayerischer Staatsintendant, in 1924; he was compulsorily pensioned in 1934 as a result of his disapproval of Nazi cultural policy and propaganda.

As an opera composer Franckenstein gained increasing recognition. His first opera, *Griseldis* (1896–7) was followed by *Fortunatus* (1901–3), *Rahab* (Budapest, 1909) and *Des Kaisers Dichter Li-Tai-Pe* (Hamburg, 1920). While *Griseldis* (subtitled 'Mysterium') and *Fortunatus* perpetuate the ideals and compositional practices of the post-Wagnerian music drama, *Rahab*, on a biblical theme, is an example of the large-scale *Jugendstil* symphonic drama, often exhibiting the kind of exotic and opulent harmonic and orchestral usage encountered in works by Strauss (*Salome*), Schreker and Zemlinsky. *Li-Tai-Pe* (1920) is a *Künstlerdrama* in the tradition of *Die Meistersinger* with the famous Chinese poet Li Bai as its central figure. Cast in three acts, the work combines

motivic development with an extended and recurrent use of closed forms.

Franckenstein's compositions in other genres include programmatic works inspired by Heinrik Ibsen, J.P. Jacobsen and E.T.A. Hoffmann, more abstract works, which after 1925 pay tribute to neo-classicism, and other smaller-scale compositions. It is within the solo piano and orchestral works that his fleeting lyricism, use of leitmotifs and occasional references to modality are particularly effective. Among his song cycles, his setting of Hans Bethge's *Die chinesische Flöte* is especially significant.

WORKS
(*selective list*)

Stage: Griseldis (Mysterium) (op, 3, O.F. Mayer, after E. Silvestre and B. Morand), op.6, Troppau, 2 Feb 1898; Fortunatus (op, 3, C. Arbogast, after J. Wassermann), op.16, 1901–3, unperf.; Rahab (op, 1, Mayer), op.32, Budapest, 4 Dec 1909; Die Biene (ballet-pantomine, G. Wiesenthal, after H. von Hofmannsthal), op.37, 1914; Des Kaisers Dichter Li-Tai-Pe (op, 3, R. Lothar), op.43, Hamburg, 2 Nov 1920

Orch: Ov. 'Kaiser und Galiläer', 1894 [based on H. Ibsen]; Suite no.1, op.10, 1898 [based on J.P. Jacobsen: *Frau Maria Grubbe*]; Fantasia Nachtstimmung, 1899; Rhapsodie, 1924; Serenade 'Salome', op.20, small orch, 1930–31; Suite 'Das alte Lied', op.51, 1935; 4 Tänze, op.52, 1937; Schattenbilder, 1938–9

Lieder: settings for 1v, pf of texts by R. Dehmel, G. Falke, S. George, O.E. Hartleben, G. Hauptmann, J.P. Jacobsen, N. Lenau, C. Morgenstern and others; settings for 1v, orch of texts by H. Bethge (incl. Die chinesische Flöte), E. Dowson, George, von Hofmannsthal, A. Wildgans, P. Verlaine

Chbr: Sextet, op.7, hn, str qt, pf, n.d.; Str Qt, c, op.13, n.d.; Arabesques (Russian Dance), op.36, pf trio, 1913; Fantasia, op.45a, fl, pf qt, 1922

ANDREW D. McCREDIE

Franco [Makiadi, Franco Luambo] (*b* Sona Bata, Bas-Zaïre region, Belgian Congo [now the Democratic Republic of the Congo], 6 June 1938; *d* Belgium, 12 Oct 1989). Congolese guitarist, singer and composer. Known as the 'Sorcerer of the Guitar', Franco made his first professional recording at the age of 14. When only 18 he formed the studio band Orchestre Kinois Jazz, a group which would later became known as the OK Jazz. Franco and the OK Jazz were fortunate to land European recording contracts in the 1960s, and their efforts introduced a more indigenized version of the African-Cuban rumba that was overwhelmingly popular at that time, drawing on Congolese musical materials. These efforts were in part a response to President Mobutu's *authenticité* movement. Franco recorded approximately 150 albums and composed roughly 1000 songs. The OK Jazz recording and performing ensemble was large, with up to 40 performers at any one time on the band's payroll. OK Jazz became one of the most important and most frequently recording bands in Africa.

The music of the OK Jazz is primarily social dance music, although Franco often used his songs to project commentary and criticism of contemporary Zaïrean society. This tradition continued in one of his last recordings, with Sam Mangwana, the song *Attention na Sida* ('Beware of AIDS'), released in 1987, that used traditional Central African rhythms to communicate AIDS awareness. Franco was presented with his country's Grand Order of the Leopard, and later was awarded the title Grand Maître.

GREGORY F. BARZ

Franco, Enrique (*b* Madrid, 2 March 1920). Spanish critic, pianist and composer. At the Madrid Conservatory he studied the piano with Luis Galve and composition with Rogelio del Villar and Conrado del Campo. In 1952 he took over the music section of the Madrid daily *Arriba* and was appointed head of music programmes of the Spanish National Radio, where he has been particularly successful. He founded the National RO (1953–5), the precursor of the present Spanish Radio and Television SO, which he was instrumental in founding in 1965; he also established the National Radio Choir (later the Spanish Radio and Television Choir), the Cuarteto Clásico of Spanish Broadcasting (1952) and the Barcelona City Orchestra (1967). In 1976 he became director of the music section of the Madrid daily *El pais*.

Although he began his career as a composer, writing many songs and some film music, Franco has achieved most recognition as a highly sensitive piano accompanist, and is considered the leading critic of his generation in Spain. He is noted for his support of new Spanish composers: in 1957 he was one of the promoters of the New Music Group of Madrid. His radio series such as 'Spanish Music Weeks' have had considerable influence, and he initiated a system of musical commissions from outstanding composers in various styles. In 1971 he became vice-president of the Albéniz Foundation.

TOMÁS MARCO

Franco, Hernando [Fernando] (*b* Garrovillas, nr Alcántara in Extremadura, 1532; *d* Mexico City, 28 Nov 1585). Spanish composer, active in Guatemala and Mexico. At the age of ten he became a choirboy in Segovia Cathedral, and by the age of 14 was receiving a salary in recognition of his superior musicianship. Among his teachers was *maestro de capilla* Gerónimo de Espinar, who later taught Victoria as a choirboy in Avila. During his seven years at Segovia (1542–9), Franco spent his vacations in Espinar with the family of Hierónimo and Lázaro del Alamo, fellow choristers. There he also met Matheo de Arévalo Sedeña, a wealthy nobleman and later provisor of Mexico City Cathedral, who was responsible for taking Lázaro del Alamo to Mexico City in 1556 as the cathedral's *maestro de capilla*.

There are indications that Franco accompanied Arévalo Sedeño to Nueva España in 1554, but his name does not appear there until 1573 – in the records of Guatemala Cathedral where he is listed as *maestro de capilla*; his friend Hierónimo del Alamo and his cousin Padre Alonso de Trujillo are recorded as singers in the choir. The extensive salary cuts documented in the Guatemala archives may have motivated Franco and his two companions to seek employment elsewhere: by the end of 1574 Arévalo Sedeño had taken the three musicians to Mexico City. On 20 May 1575 Franco was appointed *maestro de capilla* of the cathedral in succession to Juan de Victoria (himself the successor to Lázaro del Alamo in 1570). He received a stipend of 600 gold pesos; his cousin, as precentor, received 200 gold pesos.

During Franco's tenure in Mexico City the musical establishment reached a level of accomplishment unparalleled anywhere in the colonies. It received generous financial support, even though extensive funds were needed for the construction of the new cathedral, begun in 1573. Salaries were raised and new singers and instrumentalists hired, and care was given to the music in the archive. Franco himself was accorded unusual respect and esteem, despite the fact that the cathedral *cabildo* had felt obliged in 1579 to defray part of the huge debt accumulated by him, possibly through gambling. His service was of such quality that Archbishop Moya y Contreras requested a prebend for him, granted on 1 September 1581; in his recommendation to the king, the archbishop stated that Franco was a priest living a good and exemplary life, that his musicianship and skills in composition assured a musical tradition equal to anything in Spain, and that he had brought order to the chapel choir.

Circumstances changed, however, and in 1582 the chapter reduced salaries so drastically that Franco resigned, and the cathedral singers and instrumentalists refused to perform. Pressures from musicians and public finally forced a reconsideration; the choir returned, but financial negotiations continued for some time. In April 1584, perhaps because of poor health, Franco was relieved of the obligation of teaching counterpoint to the choirboys. The third Mexican Provincial Council in 1585 strengthened the former regulations, giving to the *maestro de capilla* absolute musical control over singers, instrumentalists and clergy. Franco died in that year, however, and was buried in the main chapel of the cathedral behind the seat of the viceroy.

His successor, a leading singer in his choir from 1568, was Juan Hernández (17 January 1586–1618). In 1611 Hernández proved his admiration for his predecessor by presenting to the cathedral chapter a handsome choirbook copy of Franco's 16 *Magnificat* settings (two in each of the eight tones); it was considered so important an addition that the Archbishop Fray García Guerra willingly reimbursed the cost. Now known as the 'Franco Codex', it is the largest collection of the composer's works, and is preserved in the Mexico City Cathedral archive.

Franco did not leave a large number of compositions, but their existence in many sources testifies to their wide popularity during his lifetime. His music shares with other 16th-century works designed for Spanish churches such characteristics as a fluent but rather austere polyphony, a conservative treatment of dissonance and chromaticism and an implied doubling of voice parts by such instruments as flutes, shawms and bassoons or sackbuts, although no instruments are specified in surviving parts. The enclosed centrally placed Spanish choirs also exerted an important influence; members of the polyphonic choir led by the *maestro de capilla*, and of the plainchant choir led by the precentor, together with numerous other clergymen and dignitaries, sat on opposite sides of the enclosure. This arrangement inevitably heightened the effect of the antiphonal performance normally given to *Magnificat* and *Salve regina* settings, psalms and Lamentations by the alternation of polyphony and plainchant (or organ) on successive verses. This style is typical of early neo-Hispanic polyphony.

Franco's *Magnificat* settings, one of odd-numbered and one of even-numbered verses in all but one of the eight tones (the third-tone settings are lost), demonstrate his familiarity with those of Morales. Each plainchant tone is freely paraphrased to generate a cantus firmus in a single voice, subjects for successive imitations, or motifs used throughout the texture. Occasionally the composer marked the two natural segments of the verse structure, but more frequently he joined them in a continuous flow of overlapping entries and imitations. In these polyphonic settings he rarely used contrasting passages in homophonic style, which he favoured for his rather simple but expressive psalms.

His sober style is characterized by close part-writing for four voices in rather limited ranges; the soprano usually lies below and very rarely rises above *d*″, and the

sonority is therefore not a brilliant one. Trio settings of individual verses vary the texture, and the climactic 12th verse of the *Magnificat* settings is often in six parts with a canon between the two extra parts. He showed a high degree of technical competence, using the various contrapuntal devices with skill, balancing the rhythmic motion between voices and avoiding the monotony inherent in successive cadences on the same chord with a variety of approaches. He usually closed his final cadences with a somewhat archaic incomplete triad, but he also employed such sonorities as Phrygian and plagal cadences and long-held 7th chords.

For several years two hymns in the Valdés Codex, with texts in the Náhuatl language, have been regarded as Franco's work. It has been suggested, however, that the 'Hernando don Franco' on the music refers to an Amerindian composer who may have taken his sponsor's name at baptism as was the custom.

WORKS

MAGNIFICAT SETTINGS AND LAMENTATIONS

14 Magnificat (on 6 of the 8 tones; 2 settings on 3rd tone lost), 3, 4, 6vv, Tepotzótlan, Viceregal Museum; ed. in Barwick (1965)
Lamentations, 4vv, Mexico City, Cathedral Archive; ed. in Stanford (1965)

ALICE RAY CATALYNE/MARK BRILL

Franco, Johan (Henri Gustave) (*b* Zaandam, 12 July 1908; *d* Virginia Beach, VA, 14 April 1988). American composer of Dutch birth. He studied law at Amsterdam University and was a composition pupil of Willem Pijper. In 1934, after the successful première of his First Symphony in Rotterdam, he emigrated to the USA. On 15 March 1938 he gave a concert of his own works at Town Hall, New York. He became an American citizen in 1942. Franco is a prolific composer. Like many of his large works the Fifth Symphony is cyclical in structure; his harmonies tend towards polymodality. He has written much music for solo instruments, notably the carillon, which has had his special attention since 1952. For vocal and choral works he frequently uses texts by his wife, Eloise Bauder Lavrischeff. In 1974 he was awarded the Delius Prize for *Ode*, a work for male chorus and symphonic band.

WORKS
(*selective list*)

Orch: 5 syms., 1933, 1939, 1940, 1950, 1958; Conc. lirico, vn, chbr orch/pf, 1937; Fantasy, vc, orch, 1951; 5 other conc. lirici; other works for orch/str
Inst: 6 str qts, 1931–60; 6 partitas, pf, 1940–52; Diptych, fl, tape, 1972; Trittico capriccioso, sax, tape, 1975; 12 pf preludes; didactic pf pieces, kbd works, other str/wind ens pieces
Carillon: *c*100 works, incl. 7 Biblical Sketches, nar, carillon; Wake Forest Suite, 1980; California Suite, 1981; *c*50 toccatas, 3 other suites
Vocal: The Virgin Queen's Dream (monologue, E.B. Lavrischeff), S, orch, 1947–52; As the Prophets Foretold (cant., Lavrischeff), solo vv, double chorus, brass, carillon, 1955; Ode (Lavrischeff), male vv, sym. band, 1968; other acc./unacc. choral works, solo songs
Incid music for several plays

ROBERT STEVENSON

Franco-American Musical Society. *See under* PRO-MUSICA.

Francoeur. French family of string players and composers in the service of the Musique de la Chambre du Roi and the Paris Opéra throughout the 18th century.

(1) **Joseph Francoeur** [Francoeur *père*] (*b c*1662; *d* Paris, 1741). Bass violinist. On 7 September 1687 he married Charlotte Converset, daughter of the violinist Jean Converset. He joined the 24 Violons du Roi in 1706 and the Opéra orchestra in 1713.

(2) **Louis Francoeur** [*l'aîné*] (*b* Paris, *c*1692; *d* Paris, before 18 Sept 1745). Composer and violinist, son of (1) Joseph Francoeur. He began his career in the Opéra orchestra in 1704. On 26 May 1710 he took possession of J.-B. Anet's seat in the 24 Violons du Roi and in 1717 was promoted to leader of the group. There he met Jean-Fery Rebel, whose son François Rebel was to become the

lifelong associate and friend of (3) François Francoeur. On 9 May 1715 Louis was granted a privilege valid for 15 years, covering the publication of his two sets of violin sonatas. Throughout the 1730s, and until his death, he (with his brother) was a frequent performer in concerts at the royal residences: in 1739, for example, he participated in 80 such functions. On 6 May 1737 he married Anne-Madeleine Briscollier, who bore him two children of whom only (4) Louis-Joseph Francoeur survived infancy. A royal edict of 18 September 1745 granted Louis-Joseph the succession to the seat in the 24 Violons made vacant 'by the death of Louis Francoeur, his father'.

Louis Francoeur published two books of violin sonatas: the *Premier livre de sonates* (Paris, 1715) and the *IIe livre de sonates* (Paris, ?1726). They are generally in five movements of contrasting character, ranging from fast contrapuntal allegros, showing the influence of Corelli, to slow movements with highly ornamented melodic lines and a rich harmonic language. The technical demands, especially the frequent arpeggiation, testify to his skill as a violinist.

(3) **François Francoeur** [*le cadet*] (*b* Paris, 21 Sept 1698; *d* Paris, 5 Aug 1787). Composer and violinist, son of (1) Joseph Francoeur. A violin pupil of his father, he began his long association with the Paris Opéra at the age of 12 as a *dessus de violon* in the Grand Choeur; shortly afterwards he became a member of the Musique de la Chambre du Roi. The privilege he acquired on 22 August 1720 preceded the publication of his first set of violin sonatas in the same year. Also in that year, he took part in Lalande's ballet *Les folies de Cardenio*. In 1723 Francoeur and François Rebel left France in the retinue of General Bonneval, travelling to Vienna and Prague. Marpurg commented on the importance of his exposure to the operatic music of those two centres to the composer's later development: 'The arias of his composition clearly indicate that their composer had ventured beyond the borders of France' (*Historisch-kritische Beyträge*, i/3, p.237).

In 1726 the professional collaboration between Francoeur and Rebel (*see* REBEL family, (4)), to last about 45 years, began in earnest with the production of *Pyrame et Thisbé*, the first of many such joint creations. So close was their association that it is virtually impossible to differentiate the two men's contributions; it is no wonder that the public regarded them as one dual personality. They remained inseparable until Rebel's death in 1775, an event that greatly saddened Francoeur's last years.

In 1727 Francoeur acquired the succession to the position of *compositeur de la chambre du roi* from Jean-François de la Porte, and in 1729 was admitted to the royal military orders of Our Lady of Mount Carmel and St Lazare of Jerusalem, honours rarely granted to a musician. In 1730 he replaced Senaillé in the 24 Violons du Roi, joining his father and brother. Among these successes two incidents occurred that were later to cause him problems: his ill-fated marriage to Elisabeth Adrienne le Roy (daughter of the playwright Adrienne Lecouvreur), which ended in an ugly legal struggle in 1746, and the Francoeur-Pélissier-du Lys scandal (discussed with zest by La Laurencie), which raised public resentment against Francoeur and may have accounted for the failure of *Scanderberg* in 1735. In February 1739 Francoeur was promoted to *maître de musique* at the Opéra, and on 15 August 1743 he became *inspecteur général* (musical director) with Rebel. On 27 February 1744 he was granted the succession to the seat of Collin de Blamont as *surintendant de la musique de la chambre*.

A new stage in Francoeur's career began in the mid-1750s. In 1753 he retired from the Opéra on a pension and in 1756 freed himself from the duties of the Chambre du Roi. This left him free to tackle a far larger project with Rebel, the direction of the Opéra. On 13 March 1757 they were engaged with a 30-year contract, beginning 1 April 1757. From the beginning they were plagued with difficulties: a large deficit, personnel problems, lack of discipline, the controversy surrounding the Querelle des Bouffons, culminating in the destruction by fire of the Opéra on 6 April 1763. Public opinion rose against them and they were forced to resign as from 1 April 1767. But in May 1764, at the height of these problems, Louis XV raised Francoeur to the nobility in recognition of his loyal service. After leaving the Opéra in 1753 Francoeur retained his position as *surintendant de la musique de la chambre* until his retirement in 1776. Antoine Dauvergne, his successor, had described Francoeur in his *Etat des personnes qui composent le comité de l'Opéra* (1770) as 'Homme honnête, plein d'intelligence, de zèle et d'activité'.

Misconceptions surrounding the sources of the Francoeur-Rebel operas have given rise to persistent misattributions. Scores copied by professional scribes have been erroneously identified in the Paris Conservatoire catalogue (now in *F-Pn*) as autographs of François Francoeur, while François's own revisions are attributed to his nephew (4) Louis-Joseph Francoeur. Louis-Joseph, whose handwriting is easily distinguished from François's, did not revise his uncle's scores, though he did stamp his signature in them. Between 1777 and 1783 (i.e. after Rebel's death) François revised seven of their works, although there were no plans for further performances. With the help of professional scribes who wrote in the text, and other verbal material, he made changes in some existing manuscripts and produced several new manuscript 'final editions'. All manuscripts involved in this process bear an autograph statement that 'the score found here conforms to the intentions of the authors', but do not represent versions of the operas that were actually performed.

In the lyrical field Francoeur and Rebel remained devoted to the tradition of Lullian opera, even in their arrangements for revivals. Francoeur's style is more modern in his chamber music, however, which bears comparison with contemporary Italian sonatas.

WORKS

VOCAL

all published in Paris in year of composition

Pyrame et Thisbé (tragédie en musique, prol, 5, J.-L.-I. de La Serre, after Ovid), Paris, Opéra, 17 Oct 1726, collab. F. Rebel, *F-Pn*, *Po**

Tarsis et Zélie (tragédie en musique, prol, 5, La Serre), Paris, Opéra, 15 Oct 1728, collab. F. Rebel, *Pn**, *Po* (printed score with perf. annotations by Francoeur)

Scanderberg (tragédie en musique, prol, 5, A.H. de Lamotte and La Serre), Paris, Opéra, 27 Oct 1735, collab. F. Rebel, *Pc* (pts for Act 1 excerpt), *Pn* (1 autograph; 1 copy with annotations by Francoeur), *Po* (incl. autograph passages by Francoeur)

Le ballet de la Paix (ballet-héroïque, prol, 3, P.-C. Roy), Paris, Opéra, 29 May 1738, collab. F. Rebel, *Pn**, *Po* (ov., prol; 2 sets of pts), pubd with 2 addl entrées (*c*1739)

Le retour du Roi à Paris, dialogue chanté devant Sa Majesté (divertissement, 1, Roy), Paris, Hôtel de Ville, 15 Nov 1744, collab. F. Rebel, *Pc*; rev. Versailles, 8 Sept 1745

Les Augustales (divertissement, 1, Roy), Paris, Opéra, 15 Nov 1744, collab. F. Rebel

Zélindor, roi des Sylphes (divertissement, 1, F.-A. P. de Moncrif), Versailles, 17 March 1745; with Le trophée (prol, Moncrif), Paris,

Opéra, 10 Aug 1745, collab. F. Rebel, *Pn* (autograph with later revs.), *Po*
La Félicité (ballet-héroïque, prol, 3, Roy), Versailles, 17 March 1746, collab. F. Rebel, lib *Po*
Ismène (pastorale-héroïque, 1, Moncrif), Versailles, Petits Cabinets, 20 Dec 1747, Paris, 28 Aug 1750, collab. F. Rebel, *Pc* (pts), *Pn* (autograph with later revs.; printed score with perf. annotations), *Po* (1 score with autograph passages and revs. by Francoeur; 1 with pts)
Le Prince de Noisy (ballet-héroïque, 3, C.-A. LeClerc de la Bruère), Versailles, Petits Cabinets, 13 March 1749, Paris, 16 Sept 1760, collab. F. Rebel, *Pn**, *Po* (incl. autograph passages by Francoeur)
Les génies tutélaires (divertissement, 1, Moncrif), Paris, Opéra, 21 Sept 1751, collab. F. Rebel, *Po* (pts)
Le temple de Mémoire (prol, M. Nonant), music lost
De profundis (motet), March 1752, ? music lost
Prol and intermèdes for Les fées (comédie, 3, F. Dancourt), Fontainebleau, 23 Oct 1753
2 intermèdes for Le magnifique (comédie, prol, 2, Lamotte), Fontainebleau, 15 Nov 1753
Rev. versions of Lully's Thésée, 1754; Proserpine, 1758, *Pn* (excerpts), *Po*; Amadis de Gaule, 1759, *Po* (printed score of 1684 with autograph perf. annotations by Rebel); Armide, 1761, *Pn**, *Po* (pts); Persée, 1770, collab. B. de Bury and A. Dauvergne
Iphis et Iante (ballet-héroïque, 1, Roy), Fontainebleau, 26 Oct 1769 [music from Act 2 of Le ballet de la Paix]
Final duo to scene 7 of Dauvergne, La Tour enchantée (ballet-figuré, after N.-R. Joliveau), Versailles, 20 June 1770, music lost; scene 3 taken from Rameau
Les mélanges lyriques (ballet-héroïque), Paris, Opéra, 1773 [music arr. from Ismène and Zélindor]
Addns to Marais' Alcyone, and Rameau's Dardanus, Hippolyte et Aricie, Zaïs, Zoroastre, *Pc*, *Po*
Pièces arrangées par M. Francoeur, transcrs., *Po*

INSTRUMENTAL

[10] Sonates, vn, bc, livre 1er (Paris, 1720)
[12] Sonates, vn, bc, 2e livre (Paris, after 1720), no.12 also with vc/viol
Symphonies du Festin Royal de Mgr le Comte d'Artois, fanfares (Paris, 1773)
Recueil de différents airs de symphonies de M. Francoeur, *F-Pc*
Recueil de symphonies composées soit pour les opéras de ces auteurs [Francoeur and Rebel], soit pour les opéras d'autres auteurs, *Pc*
Airs propres, dulcimer, *Pc*
Pièces de trompettes copiées par Philidor, *Pc*

(4) Louis-Joseph Francoeur [Francoeur *neveu*] (*b* Paris, 3 Oct 1738; *d* Paris, 10 March 1804). Violinist, composer, editor and opera administrator, son of (2) Louis Francoeur. After his father's death he was brought up by his uncle (3) François Francoeur. In September 1745 a royal edict granted him succession to his father's seat in the 24 Violons du Roi. Between 1746 and 1752 he served as page of the Musique de la Chambre, leaving that post to join the Opéra orchestra. In 1754 he bought Luc Marchand's succession to the position of *joueur de luth de la chambre*, which does not necessarily imply that he played this instrument.

Francoeur's career at the Opéra was more illustrious than that in the royal chamber. In 1764 he was raised to assistant *maître de musique* of the Opéra orchestra, second to Berton, and when the latter succeeded François Francoeur and Rebel as director in 1767 Louis-Joseph replaced him as first *maître de musique*, a post he retained until 1779, when he became director of the orchestra. La Borde praised Francoeur highly for his reorganization of the Opéra administration and the high standards of performance under his leadership. In 1781 he retired from the Opéra but was re-engaged by 1787 when he was again mentioned as assistant director of the governing committee. The disorders of the French Revolution dealt a heavy blow to Francoeur's career. In 1790 the Opéra became a public utility free of royal ties; Francoeur promptly resigned and tried to organize a new company supported by the king. The Francoeur-Cellerier company, founded in 1792, was short-lived and financially disastrous to Francoeur. On 16 September 1793 he was imprisoned by the revolutionary forces and, though freed less than a year later, found himself without pension and deeply in debt. He was re-engaged at the Opéra, remaining an administrator there until 1799. His few original compositions are of less importance than his revisions of the music of others. He was thought to have made late revisions to works of his uncle's, but although he did stamp his signature on revised scores, the difference in their hands makes it clear that the autograph amendments are not by Louis-Joseph. His grasp of compositional technique is evident both in his arrangements and in his theoretical works *Diapason* and *Tachygraphie*.

WORKS

in F-Pc unless otherwise stated

STAGE

Les Rémois ou Les brouilleries villageoises (intermède, 1), 1757
L'Aurore et Céphale (ballet-héroïque, 1), Paris, Magasin de Musique de l'Académie, 7 May 1766
Lindor et Ismène (ballet-héroïque, 1), Paris, Opéra, 29 Aug 1766 [1st entrée in Les fêtes lyriques (ballet-héroïque, M. de Bonseval), other 2 entrées by Rameau and P.-M. Berton]
Palémon et Sylvie (pastorale-héroïque, 1, Brunet)
Chloé et Sylvandre (op, 2)
Brouillon des changements qu'on m'a fait faire dans l'opéra d'Ajax [by Bertin de la Doué] lorsqu'on remis cet ouvrage au théâtre en 1768 ou 1769

MICHELLE FILLION/CATHERINE CESSAC (1–2, 4); MICHELLE FILLION/CATHERINE CESSAC, LOIS ROSOW (3)

François I [François de Valois; Francis I], King of France (*b* Cognac, 12 Sept 1494; reigned 1515–47; *d* Rambouillet, 31 March 1547). French ruler, poet and patron. He was the son of Charles de Valois, Duke of Angoulême, and Louise of Savoy, and succeeded his cousin Louis XII, whose daughter Claude de France he had married in 1514. Dubbed 'père et restaurateur des lettres', François encouraged Renaissance ideas, patronizing Italian and French artists, poets and musicians in his new châteaux (notably Chambord and Fontainebleau), protecting humanist scholars such as Erasmus, Budé and Dolet against the censure of the Paris Parlement and University, granting printing privileges (to Attaingnant, among others), establishing regius professorships in Latin, Greek, Hebrew and mathematics, and founding the Collège de France and the royal library (the nucleus of the Bibliothèque Nationale).

François recognized the political and diplomatic value of a large musical establishment; as well as employing instrumentalists in his domestic service he had a lavish chapel (*see also* VALOIS). Inheriting most of the singers and instrumentalists in the chapels and households of Louis XII and Anne of Brittany, including some important composers such as Mouton, Longueval and Sermisy, the young king expanded the polyphonic chapel from 23 to 32 singers by 1518 and to 35 by 1532; there is also evidence of his personal intervention to ensure high musical standards, not only for the itinerant royal chapel and for the Ste Chapelle, but also for provincial cathedrals and collegiate churches. The simple and elegant polyphony of the sacred music published by Attaingnant after 1528 reflects the king's personal musical taste. Many of his chapel singers were rewarded with ecclesiastical benefices; the musicians of the Maison du Roy also received generous remuneration as valets: these included such figures as Antonius Divitis, Jean de Bouchefort, Alberto da Ripa and Rogier Pathie.

A considerable amount of verse, both epistolary and lyrical, is ascribed to François in a number of contemporary manuscripts. Poetic exchanges with his sister Margaret of Navarre, his proximity to his valet Clément Marot and to his librarian Mellin de Saint-Gelais, who copied some of his verse, may indicate some collaboration. As Etienne Pasquier remarked, the king 'composa quelques chansons non mal faictes qui furent mises en musique'; indeed, some 30 of his texts were printed in polyphonic settings, mostly by composers in the royal service, including Sermisy, Janequin and Sandrin (the list in Dobbins should be supplemented by *Chascun t'oyant ou voyant ta grace*, Millot, 1556[21]; *Dictes ouy, madame et ma maistresse*, Buus, 1543, Vulfran, 1546[12–13], Waelrant, 1558; *Je ne me plains de toy*, Buus, 1543; *La grant doulceur de ma loyaulté*, Lasson, 1534[14]).

Although Attaingnant ascribed the chanson *Puisque donc ma maistresse* to 'Françoys' (RISM 1530[5]), it is unlikely that François composed. He probably wrote no more than the literary texts for the lost volume *Chansons françoyses a troys e. 4. e. 5. voses* catalogued in the library of Fernando Colón as 'In[cipit]. las je me plains . . . et est regie francie' (see C.W. Chapman, *JAMS*, xxi, 1968, 34–84, esp. 80), or for the piece entitled *Si la fortune, Künigs von Frankreichs Lied* in Wolff Heckel's lutebook (1562[24]), which is an intabulation of an anonymous four-voice setting published by Attaingnant (*c*1528[8]) of a poem that the king had written during his imprisonment in Madrid.

FRANK DOBBINS

François, M. *See* BAWR, SOPHIE DE.

François, Samson (*b* Frankfurt, 18 May 1924; *d* Paris, 22 Oct 1970). French pianist and composer. He studied in Paris with Cortot, Marguerite Long and Yvonne Lefebure, and won the inaugural Long-Thibaud Competition in 1943 before commencing an international career, specializing in the French and Romantic repertories. He performed with the world's leading orchestras and conductors and was revered, notably in France, for his performances of Chopin, Schumann and Liszt, Debussy, Fauré and Ravel. In London he gave inimitably stylish and personal performances of these composers during the 1960s. Although much praised in France, his recordings can be oddly eccentric, only intermittently revealing his fluidity and finesse. Capable of the most teasing idiosyncrasy in concert (including a slow Chopin *Tarantelle*), he nevertheless left indelible memories of his erratic but mesmeric gifts. He recorded his own piano concerto (1950) and wrote music for the jazz singer Peggy Lee. His life is remembered in Jérôme Spycket's biography *Scarbo*, (Lausanne, 1985).

BRYCE MORRISON

Franco of Cologne (*fl* mid- to late 13th century). German theorist and ?composer. His *Ars cantus mensurabilis* contained the first major statement of an idea that has been fundamental to Western notation ever since: that different durations should be expressed by different note shapes, and not merely by different contexts. On a more specific level, the actual notational system he advocated held good for the next 200 years, with some refinements and modifications. The treatise also provides many valuable (if sometimes apparently imprecise) descriptions of 13th-century polyphony.

1. Biographical details. 2. Authenticity and date of the 'Ars cantus mensurabilis'. 3. Content of the 'Ars cantus mensurabilis'. 4. Manuscript sources.

1. BIOGRAPHICAL DETAILS. Of the eight surviving manuscripts of Franco's treatise, two include biographical information. A Milan manuscript printed by Gerbert describes the treatise as 'edita' by *magister* Franco of Paris. The reference to Paris dates from the 15th century and is unique: Franco of Paris must be an alias for Franco of Cologne, whose importance and influence was firmly associated with the Parisian motet of the 13th century. The 14th-century St Dié manuscript printed by Coussemaker and the (related) Tremezzo manuscript (*I-TRE*) are more informative; they describe *dominus* Franco as a papal chaplain and preceptor of the Knights Hospitaller of St John of Jerusalem at Cologne, although these assertions are not verifiable (see below). Other treatises in the St Dié manuscript were by *frater* Jordanus de

Blankenborch, who must have been of north German origin; hence the manuscript as a whole may well be from the Cologne area. Jacobus of Liège, in his *Speculum musice* dating from the early 14th century, confirmed the German origin of 'Franco teutonicus' (*CoussemakerS*, ii, p.384; also ed. in CSM, iii, 1955–73).

Relations between Cologne and Paris were close in the 13th century and it is not unlikely that Franco became *magister*, and perhaps worked for some time, at the University of Paris. His status as *magister* and *vir reverendus*, and possibly as a papal chaplain and *preceptor* of an order of knights, must have given him considerable authority in both church and university circles. His central role in the development of Parisian polyphonic notation is made clear not only by the music in contemporary manuscripts, which begins to follow the rhythmic procedures advocated by Franco, but also by a number of contemporary writers on music.

The writer known as Anonymus 4 referred to Franco twice. First, his name appears with that of a Franco *primus* (about whom there is no other information): 'The book or books of *magister* Perotinus were in use until . . . the time of *magister* Franco *primus* and of the second *magister* Franco of Cologne, who began to notate somewhat differently in his books' ('in suis libris aliter pro parte notare') (Reckow, i, p.46). Later, with no reference to Franco *primus*, this writer stated: 'The above-mentioned Johannes . . . kept to the procedures of all the above-mentioned men until the time of *magister* Franco and some other *magistri*' (Reckow, i, p.50). Jacobus of Liège, besides the remark cited earlier, stated that Franco's rhythmic principles were followed by Petrus de Cruce (*CoussemakerS*, ii, p.401).

Jacobus's treatise suggests that Franco was also a composer; he stated: 'I think I heard at Paris a *triplum* [i.e. three-voice composition] composed, it was said, by *magister* Franco, in which more semibreves than three equalled one perfection' (*CoussemakerS*, ii, p.402). No surviving composition, however, is attributed to Franco, and Coussemaker's suggestions in *L'art harmonique* (Paris, 1865, monuments 16–18) are not supported by reliable evidence. Indeed, stylistic evidence suggests that one of these, the motet *Homo luge/Homo miserabilis/ Brumans est mors* (*D-BAs* lit.115, f.20*v*), was quite probably written by a German in Paris, even though Birkner considered the motet an outstanding work by a 'central master' in the French repertory. In two manuscripts of German origin (*D-DS* 3317, *E-BUlh*) its tenor is a setting of the words 'Brumans ist tod' in a lyrical and strophic melodic style that Besseler ('Franco von Köln', *MGG1*) considered uncharacteristic of French compositions and more suggestive of a later German repertory. The work is not cited as an example in the *Ars cantus mensurabilis*.

2. Authenticity and date of the 'Ars cantus mensurabilis'. The *Ars cantus mensurabilis* is the only treatise that can with reasonable certainty be attributed to Franco (for the authorship of another short treatise, the *Compendium discantus*, see below). Even the *Ars cantus mensurabilis*, however, is denied to Franco by Hieronymus de Moravia: the version transmitted in *F-Pn* lat.16663, a collection of tracts compiled by Hieronymus, is described as by 'Johannes . . . of Burgundy, as we have heard from his own lips, or according to the common opinion ('secundum vulgarem opinionem') Franco of Cologne' (Cserba, pp.229–30). Moreover, a different treatise in the manuscript *I-Rv* B83 is described as 'The sayings of *magister* Franco of Cologne and *magister* Johannes of Burgundy' ('Dicta magistri Franconis de colonia: Et magistri iohannis de bulgundia' [sic]), even though only a single work is in question (Reckow, i, p.95). Reckow also referred to a coincidental appearance of the same two names in a cathedral record of 15th-century cantors. Johannes de Burgundia may be the same as the *magister de Burgundia* mentioned by Anonymous 4 as one of the 'other *magistri* ' in his statement quoted earlier; but the precise relationship between Franco and Johannes remains uncertain (a further possibility is that Johannes was a teacher who followed the teachings of Franco). There seems at present, therefore, to be no strong reason for questioning Franco's authorship of *Ars cantus*. The treatise was widely diffused throughout Europe at least until the late 15th century. A number of commentaries and abbreviations 'according to Franco' survive, among them works by Jacobus of Liège, Marchetto da Padova, Johannes de Muris and Simon Tunstede.

The date of Franco's activity and the writing of *Ars cantus* is quite uncertain. Neither the registers of the papal court nor the records of the order of Hospitallers contain his name. However, among the latter are documents that indicate that by the middle of the century (1261 at the latest) the Cologne Commandery had replaced the title *preceptor* with *commendator*. This fact led Besseler and later Rieckenberg to conclude respectively that Franco occupied the position of *preceptor* before 1260 or even before 1251. Furthermore, Rieckenberg identified Franco as the *scholaster* Franco of St Kunibert in Cologne up to about 1239 who later, according to Rieckenberg, became the *Domscholaster magister* Franco (*d* 1247). His evidence appears to be strong, but has been called untenable by Torsy (and it must be noted that the manuscripts containing these biographical details were compiled some time after the treatise was written). These dates would place the authorship of *Ars cantus* very early in the century, although Reaney considers that a date of 1240 'would not be very much earlier than the usual date given to the treatise'.

A number of erroneous attempts have been made to suggest a date for the treatise; and others lack sufficient evidence on which to make conclusions. For some time the treatise was thought to date from about 1280, but since it deals with rhythmic principles that probably appeared in manuscripts several decades earlier, Besseler accepted 1260 as a more likely date; this was also preferred by Huglo. 1240 would seem to be somewhat early. Frobenius revived the possibility of a date around 1280 on the grounds that Franco must have written after Lambertus and the anonymous St Emmeram theorist (published by Sowa), both of whom wrote about 1279. Certain of Franco's comments regarding other theorists seem to refer to their writings.

However if this date were accepted, several of Franco's innovations would have to be credited elsewhere, since they appear in Lambertus and the Anonymus. Reckow's terminal date of about 1280 for the treatise of Anonymus 4, if correct, would necessitate an earlier authorship of *Ars cantus*. Opinion in more recent scholarship has remained divided: Huglo preferred a date of 1260–65, whereas Reaney and Gilles and Arlt and Haas settled on the later date of 1280.

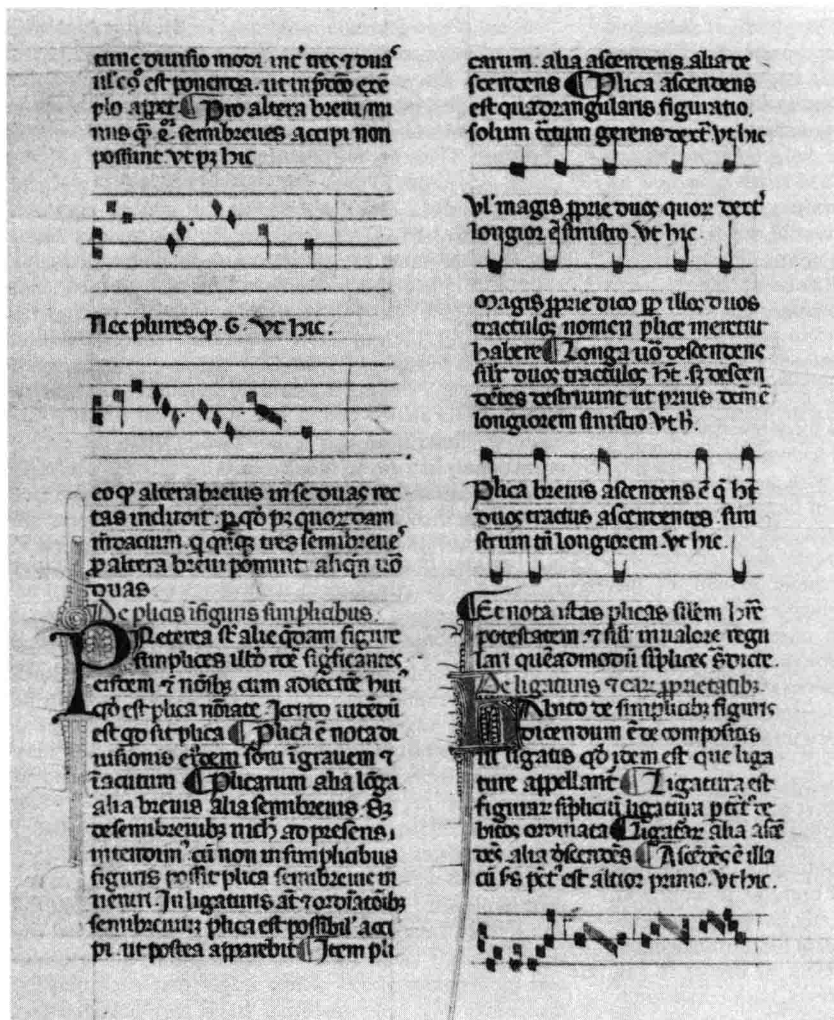
Another short treatise entitled *Compendium discantus* in a 14th-century English manuscript, printed by Coussemaker (*CoussemakerS*, i, pp.154–6), begins 'Ego Franco de Colonia'. Listing the consonances and dissonances, it describes rules for two-'chord' progressions in two voices for discant style. Although Rieckenberg tentatively suggested that it dates from about 1231, its reference to contrary motion, to the three note values, long, breve and semibreve, and to *falsa musica*, would suggest a later date. Although it has been said to contradict statements in *Ars cantus mensurabilis*, and has consequently been denied to Franco, there appears to be no firm reason for an opinion either way.

3. Content of the 'Ars cantus mensurabilis'. Franco began with the rhythmic modes, not used in plainchant (chap.1), stating that the six or seven advocated by other writers could be reduced to five (chap.3). Thus the 1st mode consists of longs, with a sub-species of long–breve groups; the 2nd mode of breve–long groups; the 3rd of long–breve–breve groups; the 4th of breve–breve–long groups; the 5th of breves and semibreves. Accepting this older modal rhythmic system as his foundation, Franco replaced its principle of the grouping of notes with one in which the note shapes signify duration. Instead of determining the duration of a note by its numerical position within a series of ligatures or of single notes, Franco determined duration by the shape of note symbols within a perfection, or a unit of three breves akin to the modern bar.

There remain some ambiguities, resolved by the position of notes within the perfection (chap.5), but basically each symbol can represent only two durations (chap.4). Thus the long is perfect or imperfect, containing three or two breves depending on the absence or presence of a breve in the same perfection. Depending on its position with respect to longs, the breve may be *recta* (of normal length) or *altera* (doubled). Semibreves relate to breves in the same way, as minor or major semibreves, with a maximum of three minor semibreves to the breve. The categories of rhythmic relationships which have characterized notation since then are clearly established. Ligatures, with or without tails to give a wider choice of shapes, are standardized and are thus assigned definite rhythmic meanings, and the terms 'proprietas' and 'perfectio' describe the typical forms (chap.7).

Plicae and *conjuncturae* give some additional rhythmic flexibility (chap.8), although Franco's definition of the former (chap.6) does not state its rhythmic meaning: 'a *plica* is a sign of the division of the same sound into a low [note] and a high [note]' ('plica est nota divisionis ejusdem soni in grave et acutum'; see illustration). The rest, called 'vox omissa' or 'pausa(tio)', is of central importance since each rest symbol represents a unique duration. It has a 'miraculous power': that of changing one mode into another. For example, if the rest proper to the 2nd mode (the imperfect long) is placed after the breve of the 1st mode, the 2nd mode is obtained (ex.1). Apart from the

Ex.1



presence or absence of an anacrusis, the rhythm does not seem to be different in these modes, and this probably contributed to the demise of the modes in favour of Franco's system of perfections.

Franco categorized numerous kinds of polyphony. Some is 'mensurabilis simpliciter', measured in all parts, and called 'discantus'; some, called 'organum', is 'partim mensurabilis', measured only in certain sections. Unmeasured sections of the latter are known as *organum duplum* or *purum*. These are the distinctions of typical early Notre Dame polyphony; Franco emphasized discant styles and devoted only a short passage at the end to organum proper (chap.13). This style occurs only over a tenor whose 'sola nota est in unisono', a phrase possibly representing in a complicated way a long sustained note; where the tenor has several notes at once ('accipit plures notas simul'), then the style is discant. Whatever is long (presumably in the upper voice) must be consonant with the tenor; if a dissonance arises the tenor must rest or feign a consonance ('se in concordantiam fingat'): the example illustrating this is not clear. Whatever comes immediately before the end of a section ('finis punctorum') is long. With a possible reference to performance in free rhythm, Franco stated that whenever several notes are sounded over one pitch in the tenor only the first is struck, the remainder being held 'in floratura' (for further discussion see Atkinson).

Discant style comprises several genres, but is characterized by measured rhythm in all sections, and in it all modes can occur, since all can be reduced to perfections. The 5th rhythmic mode (breves and semibreves) can be taken most easily with the others (chap.9). After a classification of consonances and dissonances that may differ from that in the *Compendium discantus*, and in which 3rds are not regarded as dissonances ('non discordant'), Franco showed how polyphony is regulated by consonances 'in principiis perfectionis', at the beginnings of the perfections ('bars'), with dissonances in the proper places. Contrary motion is preferred. Giving the name 'discantus' to the voice immediately above the tenor, Franco listed rules for the triplum, quadruplum and quintuplum voices which imply that each may be discordant with only one other voice, and he stated that all imperfect dissonances sound well immediately before consonances (chap.11).

The words are of great consequence in musical compositions. Cantilenas, rondelli, and certain liturgical pieces (probably clausulas) have the same text in all voices throughout; conductus and some liturgical pieces improperly called 'organum' have texts in some sections, melismas in others (chap.11). The presence of a text affects the ligature patterns that may be used (chap.10), and the addition of texts was undoubtedly another reason why the modal system, dependent as it was on ligatures, had to be replaced. All discant genres are constructed in the same way, over a *cantus prius factus* called the tenor, except the conductus, in which the composer ought first to contrive as beautiful a melody (cantus) as he can, then to proceed as if it were normal discant. This is a clear statement that conductus do not use pre-existing melodies.

In chapter 12 there is a reference to 'copula', which is 'velox discantus ad invicem copulatus'. The exact nature of copula is not clear from this, although its faster speed is emphasized, especially towards the end. It is said to differ from passages in modal rhythm in notation and in movement ('in proferendo'). Hocket is defined clearly in chapter 13, with the additional comment that it may be taken 'supra cantus prius factum' in Latin or the vernacular. Franco's treatise thus deals in a very practical

Franco of Cologne's discussion of the brevis altera, his definition of plica, and the beginning of his discussion of ligatures, from a 15th-century Italian source of the 'Ars cantus mensurabilis' (I-Ma D.5.inf., f.113)

way with the major issues and genres of 13th-century part-music, making only the briefest of gestures to the great authorities of speculative music. In general its meaning is clear, and the numerous examples, many drawn from the contemporary repertory, usually illustrate the text well.

4. MANUSCRIPT SOURCES. The eight surviving sources of the *Ars cantus mensurabilis* are as follows:

F-Pn lat.11267, ff.1–7*v* (13th-century French MS); *Pn* lat.16663, ff.152–65 (13th-century Parisian MS); *Pn* lat.16667, ff.152–65; *SDI* 42, ff.43–53*v* (14th-century German MS)

GB-Ob 842, ff.49–59 (14th-century English MS)

I-Ma D.5.inf., ff.110–18 (15th-century Italian MS); *TRE* [MS without no.], ff.3–14 (MS written by Gaffurius)

S-Uu C 55, ff.20–43 (15th-century Swedish MS)

ANDREW HUGHES

Franco of Paris. Name used by Gerbert for the author of the *Ars cantus mensurabilis*, FRANCO OF COLOGNE.

Franco primus. Theorist known only through a reference of Anonymus 4, in which his name is mentioned with that of FRANCO OF COLOGNE.

Franculus. *See* VIRGA STRATA.

Francus [Franconian], **Theodorus.** *See* THEODOR OF WÜRZBURG.

Francus de Insula (*b* Lille; *fl* 1420–25). ?South Netherlandish composer. He is known for a ballade, a rondeau and two supplementary voices to other works, which appear in the older fascicles of the Veneto manuscript *GB-Ob* Can.misc.213. *L'autre jour* is in a note-against-note style with simple rhythm and is an exceptionally early example of the narrative pastoral ballade; its complete text, found in *I-Bc* Q15, may contain a biographical detail ('Quant je revenoy de flandre, la je me suy combatus'). The rondeau displays imitation and is partly texted; a very lively triplum by Francus to *Je ne vis pas* by Gallo also introduces imitation.

MARGARET BENT

Frank, Claude (*b* Nuremberg, 24 Dec 1925). American pianist of German birth. His family moved to Paris in 1937, then in 1940 he escaped by way of a hideout in the Pyrenees, and Lisbon, to the USA. There, in the 1940s, he studied with Artur Schnabel, the association being interrupted by military service (he became an American citizen in 1944). He studied theory and composition with Paul Dessau and Normand Lockwood, also studying at Columbia University. He made his recital début in Times Hall, New York, in 1947, and played with the NBC SO a year later. For a while he was active as a choral conductor, but from the early 1950s his career as a pianist involved him in major festivals in Europe, Africa, Asia and the Americas. He is much in demand as a teacher and has worked at music schools and universities throughout North America, including Bennington College (1948–55) and the Mannes College. In 1972 he was one of the first Samuel Simons Sanford Fellows at Yale University. He is highly regarded as an ensemble pianist: in 1964 he joined the newly formed Boston Symphony Chamber Players and from 1971 he appeared often with the Juilliard Quartet. He plays the two-piano repertory with Lilian Kallir, whom he married in 1959, and violin and piano sonatas with their daughter, Pamela Frank. In 1981 he was featured in a memorial concert for Schnabel at Alice Tully Hall. He is much sought after as a competition juror, including for the Leeds International Piano Competition in the UK, and has contributed to journals including *Piano Quarterly* and *Keynote*. He was presented with the Beethoven Society Award in 1979.

With a few exceptions, for example the Sonata no.2 of Sessions, Frank's repertory is conservative. His playing of Mozart, Beethoven (during the bicentenary in 1970 he recorded the 32 sonatas and played them in recital in New York), Schubert and Brahms is outstanding for its warmth, its intellectual and musical strength, and for a penetrating structural intelligence.

MICHAEL STEINBERG/R

Frank, Ernst (*b* Munich, 7 Feb 1847; *d* Oberdöbling, nr Vienna, 17 Aug 1889). German conductor and composer. He attended the Gymnasium at Metten, Lower Bavaria, where he was instructed in music by Emmeran Kreuttner, and later studied in Munich with Franz Lachner (composition) and H.L.S. Mortier de Fontaine (piano). In 1866 he became court organist in Munich and répétiteur and second conductor of the Akademischer Gesangverein. On the recommendation of Vinzenz Lachner he went to Würzburg in 1868, taking up a post of theatre Kapellmeister, and in 1869 he went to the Vienna Opera as second chorus master. In 1870–71 he was chorus master of the Gesellschaft der Musikfreunde in Vienna. Between 1872 and 1878 he was court Kapellmeister in Mannheim and gave a fresh impetus to the town's musical life; the first performances that he directed there included *Der Widerspenstigen Zähmung* (1874) and his own completion of *Francesca von Rimini* (1877), operas by his friend Hermann Goetz.

In the autumn of 1878 Frank accepted an invitation to work at the Frankfurt Stadttheater, but he resigned in February 1879 and afterwards worked as a private music teacher and collaborator with Clara Schumann on the complete edition of Robert Schumann's works. He also edited the posthumous works of Goetz (opp.14–22) for publication between 1878 and 1880. In December 1879 he became Bülow's successor as court Kapellmeister in Hanover and there promoted works by younger composers, including Stanford, of whose first opera, *The Veiled Prophet of Khorassan*, Frank gave the première in 1881 (as *Der verschleierte Prophet*). His own first opera, *Adam de la Halle*, was given its first performance in Karlsruhe in April 1880, and in November 1884 his opera *Hero* was

given its first performance in Berlin. His musical fairy tale, *Der Sturm*, was performed in October 1887 in Hanover; however a mental illness which had overtaken Frank and necessitated his being committed to a sanatorium in April of that year prevented him from hearing it.

Frank was one of the most gifted German conductors of his time, full of imagination and vitality, and with wide-ranging interests. From 1876 he was a close friend of Brahms, whose influence can be felt in some of Frank's piano music, but he possessed too little creative independence to achieve success as a composer. His unsentimental lyric gift is most evident in his more than 200 songs and vocal duets, and in his opera *Hero*.

WORKS
(*selective list*)

Frank [Franke], **Johann.** *See* FRANCK, JOHANN.

Frank, Michael. *See* FRANCK, MICHAEL.

Frank, Salomon. *See* FRANCK, SALOMO.

Franke, Bernd (*b* Weissenfels, Saxony-Anhalt, 14 Jan 1959). German composer. He studied at the Musikhochschule in Leipzig (1975–81) with Thiele, among others, at the DDR Akademie der Künste (1981–5), where he attended Matthus's masterclasses, and at Tanglewood (1989), where he was a student of Lukas Foss. In 1981 he was appointed to a post at the University of Leipzig. He has made concert tours of the USA (1993, 1996) and served as a jury member at the Munich Biennale (1994). His honours include the Hanns-Eisler Prize of Radio DDR (1981), the Kucyna International Composition Prize, Boston (1987), a prize from the Künstlerhaus, Boswil (1987) and the Leonard Bernstein Tanglewood Fellowship (1989).

Franke's music is rooted in the tonal and formal practices of the central European tradition. His approach to composition, however, is one of analysis and subversion. His music does not negate the past, but becomes a game played with remnants of the Classic-Romantic style. The work of Lutosławski, Varèse, Stockhausen and Morton Feldman have had a formative influence on his compositional development, as have the paintings of Marc Chagall, Wolfgang Schulze (WOLS) and Richard Pousette-Darten. Joseph Beuys's idea of 'social sculpture' has been particularly influential to his compositional aesthetic (from 1988). *Solo x-fach*, an ensemble score divisible into individual parts that can be performed simultaneously, thematicizes the isolation of the soloist; movement, colour, light and video art make the social implications of this clear. *Music for Trumpet ...* problematizes the hierarchical nature of the orchestra, while *For WOLS* for solo piano becomes an endgame incapable of development. The opera *Mottke* gives expression to the shattering of the individual in his social milieu. Franke's critical realism provides a glimmer of hope nonetheless, showing communication to be present in illusion and vision.

WORKS
(*selective list*)

Op: Mottke (2, J. Moore, after S. Asch: *Mottke der Dieb*), 1995–7

Orch: 3 Orchesterstücke, 1980–83; Chagall-Musik, 1985–6; Music, tpt, vn, hp, orch, 1990–93; Seasons of Light, bn, orch, 1994

Vocal: Redners Missgeschick, 3 lieder, Bar, pf, 1982; Jodok lässt grüssen (Etüde über O) (P. Bichsel), mixed speaking chorus, 1990

GISELA NAUCK

Frankel, Benjamin (*b* London, 31 Jan 1906; *d* London, 12 Feb 1973). English composer. The son of a synagogue beadle, he learnt the piano and the violin in his youth and taught himself the musical literature by avid reading of everything held by the Hammersmith Public Library. He was for a short time apprenticed to the watchmaking trade, and managed during 1922 to spend six months in Germany as a piano student of Victor Benham, contemporary and friend of Moriz Rosenthal. Returning to London he was a jazz violinist in night clubs while studying piano and composition under Orlando Morgan at the Guildhall School of Music where he was awarded the Worshipful Company of Musicians' Scholarship. From 1931 he was much in demand as an orchestrator

and conductor of West End musical comedies and revues. These included Noël Coward's *Operette*, Beverley Nichols's *Floodlight* and many C.B. Cochran shows. In 1934 he wrote his first film score; during his career as an outstanding composer of film music, he produced more than 100 scores for the cinema. He was able to find distinctive ideas and appropriate musical styles for a remarkable range of films. Many of his best scores were written for films directed by Anthony Asquith, who was receptive and sympathetic to the virtuosity and precision of Frankel's technique.

Alongside his theatre and film work he continued composing concert music, and his reputation increased suddenly after World War II, when his works began to be more widely performed, broadcast and published. His Second String Quartet was performed at the Copenhagen ISCM festival in 1947; the orchestral prelude *Mayday* was given at a 1950 Prom; the Violin Concerto, commissioned by Max Rostal, was given at one of the joint London Contemporary Music Centre-BBC Festival of Britain Concerts in 1951; and the First Sonata for solo violin was issued on disc. The first four string quartets, the Piano Quartet, the Clarinet Quintet and the Violin Concerto are the principal works of this period.

A general impression was formed that the production of so much immediately effective music for films caused Frankel to react in his concert music by concentrating exclusively on an inward-looking, even melancholy expression, making this music in some way 'difficult' and unrewarding to the listener. An informed familiarity with his output lends little support to such a view, though there is a possible explanation for it: whatever had gone before, the endings of his works tended to be either slow or contemplative in character, or, if quick-moving, to be *pianissimo*. The Violin Concerto, a serious and deeply felt work written 'in memory of "the six million"' (a reference to the Jews killed in World War II), provides an example in the last of its four widely varied movements, a final Grazioso, quasi allegretto. This movement at first puzzles, for all its gentle beauty, and the final delicately scored pages are scarcely designed to bring an audience to its feet. Yet understanding of the work as a whole and on the composer's own terms seems demanded by its total psychological integrity. The deceptive urbanity, even the gentle humour of such a conclusion is seen to be an expression of the deepest acceptance in human terms of the work's tragic content.

Frankel's musical style was by this time fully formed, though to label it was not easy. The shadows of Shostakovich and Bartók in the quartets, and of Sibelius (and perhaps Walton) in the Violin Concerto, give passing stylistic orientation, but the technical absorption of such influences was soon complete and the musical personality became quite unmistakably his own. It was gradually, during the 1950s, that his thought turned in the direction of 12-note serialism and to a burst of creativity which continued to his death.

In this last period Frankel's major creative production was in a remarkable output of symphonies, a form which he unfashionably held to remain 'a wholly viable vehicle for the expression of the most compelling musical thought'. Eight symphonies appeared between 1958 and 1971, all concerned in a variety of ways with serial techniques. A single 12-note series is employed in all movements of both the Second and the Sixth; in the other symphonies individual movements tend to have their own series, to be freely diatonic or to apply serial techniques to other than 12-note material. The second movement of the Fifth uses two distinct series and, most originally, in the one-movement Third, diatonically presented material becomes gradually transformed into consistently 12-note serial music. Nor is it only in technique that the symphonies show variety, for each has its own atmosphere and design, varying from the broad, often ominous, canvas of the Second, through the relaxed geniality of the Fifth to the hard brilliance of much of the Seventh.

The special feature of Frankel's approach to serialism was his strong belief in tonality as a continuingly vital principle in musical thought, and his striking demonstration that strictly serial deployment of the total chromatic is compatible with both expressive and structural uses of tonality. He viewed the series as a pervasively thematic melodic line of almost infinite versatility, out of which it was possible to derive harmonies often of a startlingly bold diatonicism.

For a time most of his works were first performed by the BBC or abroad (he was principally resident in Switzerland from 1957) but public performances of his works in England became more frequent after the LSO commissioned his Seventh Symphony in 1970, continuing principally under the sympathetic advocacy of Sir Charles Groves. Just before his death, Frankel spoke of having completed in his mind a ninth, choral, symphony, but nothing had been written down, except for the customary prolific sketches. The opera *Marching Song* was left in vocal score, but with sufficient indications for the preparation of a full score; a projected performance by ENO, scored by Buxton Orr, was cancelled but eventually broadcast on BBC Radio 3 on 3 October 1983.

Frankenburger, Paul. *See* BEN-HAIM, PAUL.

Frankfurt (am Main). City in Germany. Founded by the Carolingians in the 8th century, the imperial palace on the River Main developed into the centre of the East Frankish kingdom in the 9th century. From 1147 the king was usually elected there, a privilege which was made law by Karl IV in 1356, and from 1562 to 1792 Frankfurt was also the setting for the coronation. Moreover from the 14th century, as a free imperial city, it developed into the chief trading centre in central Germany, deriving its wealth mainly from the annual spring and autumn fairs. Despite these favourable conditions Frankfurt's musical life was insignificant until the 17th and 18th centuries because of rivalry between the town council and the clergy, which was attempting to increase its already considerable land tenure. Later there were strong social and religious tensions among the citizens which prevented a full and varied development of musical activities before the middle of the 17th century. Civic interest in cultural matters developed fully only after the French Revolution. Even then Frankfurt remained a city where creative talents rarely developed: J.A. Herbst, Telemann, Pfitzner and Hindemith were notable exceptions.

The few surviving documents of medieval music in Frankfurt include an 11th-century missal with neumes and the Rorbach Missale (*c*1460) in Gothic choral notation. The treatise *Sermones* by J. Floess (1418–19) derives from Reichenau. Performances of Passion plays are recorded from the mid-14th century. In the 16th century the townspeople and guilds also performed plays with music. The Frankfurt fair was a strong attraction for minstrels. The ceremony of the Piper's Court, continued until 1802, became famous through Goethe's description (*Dichtung und Wahrheit*, i, 1): in order to gain customs exemption, deputies from Nuremberg, Worms and Bamberg brought symbolic gifts to the autumn fair every year and were led in procession by their respective town pipers. In Goethe's time they still played the melody supposed to date from about 1500. Several famous organ builders worked in Frankfurt before the 15th century, including the Franciscan friar L. Mertz, who also worked in Barcelona, Nuremberg, Aschaffenburg, Worms and elsewhere.

Until well into the 17th century the high cost of becoming a citizen and the mercantile orientation of the city prevented musicians of more than regional importance from coming to Frankfurt. Among the few exceptions in the years before the Reformation were the city physician Johannes von Soest (*d* Frankfurt, 1506) and the polymath and music theorist Johannes Cochlaeus, dean of the Liebfrauenstift from 1520 to 1524. In 1520 the council founded a grammar school which provided musical education. In 1530 the printer Christian Egenolff settled in Frankfurt and two years later published the first music printed there, Petrus Tritonius's setting of some Horatian odes. The subsequent music publications of Sigmund Feyerabend, Georg Rab, Johann Wolff and Nikolaus Stein enlarged the scope of music publishing in Frankfurt, and the printed music trade came to rank with the book trade as a main attraction of the Frankfurt fair.

According to Luther (1546) the musical arrangement of the church service was simple. The elaboration with florid counterpoint, carried out by teachers and pupils of the grammar school, was emphasized as being an innovation in 1573. In the same year Jacob Meiland came to Frankfurt, but he left in 1575, after a series of his compositions had appeared in print. It was characteristic of the council's lack of interest in music and the citizens' lack of initiative that no attempt was made to keep this excellent composer in Frankfurt. There was some improvement after the rising of the citizens against the oligarchic rule of the council (1612). In 1623 Herbst was appointed first civic director of music and director of church music at the main Protestant church, the Barfüsserkirche. He trained a competent choir and an orchestra, had the organ renovated and ordered a second, smaller organ, other instruments and printed music, thus creating the basis for the performance of polychoral compositions. He remained in Frankfurt until his death (1666) except for eight years (1636–44) spent in Nuremberg. His main achievements were in church music and music theory, but he also greatly stimulated the development of instrumental music. A *Musik-Kränzlein* first mentioned in 1608 developed into a collegium musicum, recorded in 1672 in the dedication of Wolfgang Carl Briegel's *Musicalisches Tafel-Confect*. It was maintained by the Gesellschaft Frauenstein, a society of wealthy merchants ruling the town's council. Of Herbst's successors, Telemann in particular made the collegium musicum part of civic musical life. During his term of office (1712–21) he organized regular concerts, thus inaugurating the city's public concert life; under him church music reached its zenith (he was Kapellmeister at the Barfüsserkirche and the Katharinenkirche). His talent as an organizer and his close connections with the Gesellschaft Frauenstein made him more influential than any other musician in Frankfurt.

The many concerts given in the 18th century by travelling virtuosos included those of the Mozart family (1763); Mozart's second stay in Frankfurt on the occasion of Leopold II's coronation (1790) was financially disappointing. From 1700 German, French and Italian opera companies often gave guest performances in Frankfurt, but there was no permanent theatre until 1792, when the Nationalbühne was formed as a joint-stock company by a group of citizens. In the repertory there was a slight predominance of opera over drama; Mozart's operas in particular became established in Frankfurt at an early date. A German version of *La finta giadiniera* given in 1782 was the first Mozart production in the whole of central and northern Germany, and was followed by productions of *Die Entführung* (1783) and all Mozart's subsequent operas, again in German, before the end of the century. The orchestra of the Nationaltheater was directed from 1792 by F.L.A. Kunzen and later by Ferdinand Fränzel and Carl Cannabich, both well experienced in the traditions of the Mannheim orchestra. With regard to the teaching of composition, Mannheim influence arrived with Johann Georg Vollweiler, the teacher of Anton André and Ferdinand Hiller.

The city gained a new cultural centre with the founding in 1808 of the Museum, a society for the cultivation of literature, art and music which gradually came to

concentrate its activities entirely on music. Its orchestral and chamber music concerts continue to be an important part of Frankfurt musical life. The same is true of the Cäcilienverein, a choral society founded by J.N. Schelble in 1818. Among the first conductors of the opera and the Museum was Spohr (1817–19), who introduced Beethoven's symphonies to the Frankfurt public. In 1819 Spohr conducted the première of his opera *Zemire und Azor*. His successor Carl Guhr (1821–48) promoted the contemporary French repertory, and there were also early performances of new German (Conradin Kreutzer, Marschner, Lortzing) and Italian opera (Rossini, Bellini, Donizetti), though Verdi's arrival was slower. The first Wagner opera performed was *Tannhäuser* (1853), followed the next year by *Lohengrin* and *Der fliegende Holländer*. In 1862 Wagner conducted two performances of *Lohengrin* (from a score preserved in *D-F*).

The Museum and the Cäcilienverein were maintained by the wealthy upper class, but during the 19th century numerous choral societies were also founded by the middle and lower classes. In 1838 a choral festival was held; its initiators, Schnyder von Wartensee and Wilhelm Speyer, used the occasion to campaign for the forming of the Mozartstiftung, which was to help talented musicians to learn composition. The recipients of grants from the foundation included Bruch, Humperdinck and Toch. Music education was furthered by the founding of the Frankfurt Musikschule by H. Henkel and J.C. Hauff in 1860 and of the Hoch Conservatory in 1878. This was endowed by the Frankfurt merchant J. Hoch, who bequeathed his complete estate (900,000 gold marks) to establish it. The directors of the conservatory included J.J. Raff (until 1882), Bernhard Scholz (1883–1908), Iwan Knorr (1909–16), W. von Bausznern (1916–23) and Bernhard Sekles (1923–33). Its excellent staff (Clara Schumann, Julius Stockhausen, Humperdinck, James Kwast, Hugo Heermann, Bernhard Cossmann and others) quickly gave it an international reputation; the students included Cyril Scott, Grainger, Pfitzner, Walter Braunfels, Clemens Franckenstein, Toch, Hindemith, Klemperer and Hans Rosbaud. In 1937 it was divided into a Staatliche Hochschule für Musik (directed by Hermann Reutter until 1945, Walter Davisson 1950–54, Philipp Mohler 1958–75 and Hans Dieter Resch 1975–95) and a conservatory, which has trained amateur musicians and latterly music teachers.

In 1880 the opera house (now the Alte Oper) was opened: early productions included Wagner's *Ring* (1882–3), *Die Meistersinger* and *Tristan* (1884), all conducted by Otto Dessoff. Humperdinck was opera critic of the *Frankfurter Zeitung* from 1890 to 1897 and composed *Hansel und Gretel* in the city. Under Ludwig Rottenberg's conductorship (1893–1924) there were early performances of *Falstaff* and of works by Humperdinck, Pfitzner and Strauss, as well as Schreker premières and the first production of *Pelléas* in German (1907). The conservatism of Frankfurt musical life in the 19th century was beginning to give way to more interest in new music.

The 1920s were a climax in Frankfurt's music history: Furtwängler (1920–22), Scherchen (1922–4), Krauss (1924–9) and Rosbaud (1928–37) worked as conductors, and Hindemith was Konzertmeister of the opera house and Museum orchestras from 1915 to 1922. He remained in Frankfurt until 1927, living in an old tower where he wrote *Cardillac* and other works. At the university (founded in 1914) a department of music was formed in 1921 under Moritz Bauer. The musical material in the Rothschild Library and the Manskopf Collection (now in the Stadt- und Universtätsbibliothek) and the music library of Paul Hirsch (now in *GB-Lbl*) provided valuable material for study. Bauer's successors included Helmuth Osthoff (1937–67) and Ludwig Finscher (1968–81).

Frankfurt's concert activities were inhibited by the lack of suitable halls (the concert hall built in 1861 was destroyed by bombing in World War II) until the ruined opera house was rebuilt as a concert hall in 1981. Productions at the Frankfurt Opera and the Museum concerts reached a high standard under the direction of Georg Solti (1952–61); Christoph von Dohnányi was civic director of music from 1968 to 1975. The more traditional programmes of the Museum Concerts were balanced by the concerts of the Frankfurt RSO under Winfried Zillig, Otto Matzerath, Dean Dixon and Eliahu Inbal. This orchestra took part in the Darmstadt summer courses. The most important choirs, apart from the Cäcilienverein, are the Frankfurt Singakademie (Ljubomir Romansky) and the Frankfurt Kantorei (Kurt Thomas, Helmuth Rilling, Wolfgang Schaefer).

When Michael Gielen was conductor of both the opera and the Museum, between 1977 and 1987, there was greater emphasis on new works, adventurous programming and novel stage productions. Among the last were a *Les broyens* directed by Ruth Berghaus and the first German stagings of Nono's *Al gran sole carico d'amore* and *Prometeo*. Gielen inaugurated the Alte Oper concert hall with a performance of Mahler's Eighth Symphony in 1981, and during this period the Frankfurt Festival became one of the most important in Germany; the festival was discontinued in 1994 on economic grounds. Meanwhile Gielen had been succeeded by Gary Bertini (1987–90) and Sylvain Cambreling (intendant of the opera from 1993).

The organist Helmut Walcha (1907–91) achieved particular distinction with his playing of J.S. Bach. Of composers resident in Frankfurt, Kurt Hessenberg (1908–94) was the best-known. As regards music criticism, Frankfurt became important through the work of Paul Bekker and Karl Holl on the *Frankfurter Zeitung* (1911–25); the influence of the teaching and writing of T.W. Adorno (1903–69) went far beyond the city.

PETER CAHN

Frankfurt an der Oder. City in Germany, located on the border with Poland. Only a short time after its foundation in 1253 by Franconian merchants the town had acquired great wealth, in particular through its position as a chief port of reshipment for Hanseatic merchandise in the east German interior and as the site of an important bridge across the middle reaches of the Oder. The town's musical life was primarily the responsibility of the town council and several churches, including St Marien, St Nikolaus (since 1929 the Friedenskirche) and the Franciscan church. The archives with details of early musical practice were largely destroyed during World War II.

From the early 16th century Frankfurt was one of Germany's largest printing and publishing centres and the chief port of reshipment for German prints and musical publications destined for northern and eastern Europe. With the foundation in 1506 of its university, the Viadrina, Frankfurt began to develop as a great centre of humanist learning; there was also a prominent law school, and the liberal arts flourished. (The Viadrina was moved to Breslau, now Wrocław, in 1811.) In 1991 the Europa-Universittät Viadrina was founded. Jodocus Willich, a Renaissance humanist, taught music theory at the Viadrina (1522–39) and founded a collegium musicum (*c*1530); his circle of musical scholars and citizens numbered up to 12. The Frankfurt group of lutenists, notably Benedict de Drusina, Matthäus Waissel and Gregor Krengel, became widely known outside the town. The most influential Kantors included Gregor Lange (1574–9), Friedrich Pittan (1591–3) and, especially, Bartholomäus Gesius (1593–1613). Well-known town pipers and organists who were employed by the municipality and at St Marien included the civic director of music Paul Lütkeman and the organists Johann Horneburg and Michael Praetorius. The latter came to Frankfurt on account of his brothers Johann and Andreas, who were professors at the Viadrina; after studying there (from 1585) he became organist at St Marien (1587 to 1589–90). Musical culture did not extend to the townspeople until after the Thirty Years War.

C.P.E. Bach studied in Frankfurt from 1734 to 1738, receiving his first formative stimuli there. He founded an academic music society during that time and also conducted and composed for public ceremonies.

In 1815 a choral society was formed by a group of amateur mixed choirs with the aim of bringing music to the townspeople through concerts. The Frankfurt Stadttheater opened in 1842 with Lortzing's *Zar und Zimmermann*. The organ building firm of Sauer was established in Frankfurt in 1857; a Philharmonic Society gave three subscription concerts each year during the period 1871–95. Among influential musicians in the 19th century were the conductors and organists Leichsenring, G. Vierling and F. Wrede. From 1870 the noteworthy composer-performer Paul Blumenthal was organist at both of the main churches. In 1929 a music centre was established in association with the Charlottenburg academy. It offered courses for both amateurs and professionals, and was a centre of the youth music movement until 1943.

New musical activities began to establish themselves soon after World War II. Several concert series (such as the Konzerte auf Historischen Instrumenten in the Viadrina Museum and the Hausmusik bei Kleist) became part of musical life, and the Kantor, organist and composer Hans Stein played a decisive role. The former Franciscan church (dating from the 13th century) has been the centre of Frankfurt's concert life since 1967. As the Konzerthalle 'Carl Philipp Emanuel Bach' it mounts a great variety of symphonic, chamber, choral and organ concerts. An annual festival has been held there since 1966. The great concert organ from the Sauer workshop was installed in 1975, and is at the same time the home of the Singakademie and the Frankfurt an der Oder PO (since 1995 the Brandenburgisches Staatsorchester). The hall is a centre of research into the music of C.P.E. Bach, and houses a permanent exhibition devoted to his life and works. Since 1975 the Viadrina Museum has held a valuable collection of historical instruments. After the political turning point of 1989, far-reaching changes took place in Frankfurt's musical life, which began reaching out increasingly towards Poland.

HANS-GÜNTER OTTENBERG

Frankl, Peter (*b* Budapest, 2 Oct 1935). British pianist of Hungarian birth. As a child he studied the piano at the Franz Liszt Academy, with Ernö Szegedi and Lajos Hernadi, later joining the classes of Leo Weiner, Kodály,

Szabolcsi and Antal Molnár; in 1950 he made his Budapest concert début. Immediately he completed his studies he won the 1957 Marguerite Long-Jacques Thibaud competition in Paris, winning also (with the violinist György Pauk, a partner since boyhood) the Munich Sonata competition in September that year. A third important success, the Rio de Janeiro Prize (1959), initiated an international career; his London début (6 May 1962) was at the Wigmore Hall and he made London his home the same year. A musician of wide tastes, generous technique and powerful concentration, he is also a celebrated chamber music performer. In 1972 he formed a trio with Pauk and the cellist Ralph Kirshbaum, a group whose performances are notable for their spirit and spontaneity; their 25th anniversary in 1997 was celebrated with concert series in several countries. As well as chamber music, Frankl has made acclaimed recordings of the complete piano works of Schumann and Debussy.

JESSICA DUCHEN

Franklin, Aretha (*b* Memphis, 25 March 1942). American soul singer, pianist and songwriter. She was the daughter of one of the most prominent Baptist preachers in the USA, Cecil L. Franklin. Moving first to Buffalo and then in 1948 to Detroit, the family was regularly visited by a number of important African-American gospel performers, including Mahalia Jackson, Sam Cooke, Clara Ward and the Ward Sisters (including Marion Williams) and James Cleveland, from whom Franklin learnt to sing and play the piano. Her father recorded over 60 albums of his impassioned sermons for JVB and Chess and at the age of 14 Franklin recorded her first album, a collection of gospel songs, for Chess. Four years later she moved to New York where she recorded seven albums for Columbia on which she sang jazz, blues, popular standards and the occasional contemporary soul tune. Although she achieved moderate success with this material, including three top ten hits in the rhythm and blues chart – *Today I Sing the Blues* (1960), *Won't Be Long* and *Operation Heartbreak* (both 1961) – her Columbia recordings were mostly overproduced and consequently her vocal performances were constricted.

In 1967 Franklin signed with the important soul label Atlantic, who initially offered to record her at Stax records in Memphis. However, Jim Stewart, the owner of Stax, was unwilling to provide the $25,000 offered to Franklin for the original signing, and Atlantic's Jerry Wexler took her to record in Muscle Shoals, Alabama. In contrast with Columbia's policies, Wexler encouraged Franklin to bring in her own material and to play the piano on her sessions. The results were the most powerful recordings by a female soul singer in the genre's history. Her vocal skills allowed her to change timbre, range and dynamic level dramatically from one note to another while her gospel phrasing and improvisational tendencies were routinely deployed to cathartic effect. Franklin wrote or co-wrote such enduring material as *Since You've Been Gone (Sweet Sweet Baby)*, *Think* (both Atl., 1968), *Call Me*, *Spirit in the Dark* (both Atl., 1970), *Rock Steady* (Atl., 1971), and *Day Dreaming* (Atl., 1972) and arranged and recorded definitive rhythm and blues versions of Ronald Shannon's *I never loved a man (the way I love you)*, Redding's *Respect*, Carole King's *(You make me feel like) a natural woman*, Don Covay's *Chain of Fools* (all Atl., 1967), Bacharach and David's *I say a little prayer* (Atl., 1968), Robbie Robertson's *The Weight*, Lennon and McCartney's *Eleanor Rigby* (both Atl., 1969), Elton John's *Border Song (Holy Moses)* (Atl., 1970), Paul Simon's *Bridge over Troubled Water* and Jerry Leiber and Phil Spector's *Spanish Harlem* (both Atl., 1971).

Franklin's version of *Respect* was viewed by many African-Americans as a social/political clarion call. In the late 1960s and early 70s her strength as a performer, many of her lyrics and the fact that she wrote and played on her sessions and concerts caused many to view Franklin as an important symbol of the emergent women's movement.

The quality of her recordings for Atlantic declined after 1973 but her career was rejuvenated when she moved to Arista Records in 1980 and was paired with more contemporary producers, such as Luther Vandross (*Jump to It*, 1982; *Get It Right*, 1983) and Narada Michael Walden (*Freeway of Love* and *Who's Zoomin' Who*, both 1985). In the late 1980s and early 90s she recorded a series of duets with pop artists, such as the Eurythmics, George Michael, Elton John, Whitney Houston and Michael McDonald. It is impossible to overestimate Franklin's importance. In 1987 she became the first woman inducted into the Rock and Roll Hall of Fame and in 1990 she won the Grammy's Living Legends Award.

ROB BOWMAN

Franklin, Benjamin (*b* Boston, 17 Jan 1706; *d* Philadelphia, 17 April 1790). American statesman, scientist and amateur musician. He was apprenticed to his brother James, a printer, at the age of 12. He left the apprenticeship and worked in New York and Philadelphia, spent two years in London as a printer, then returned to Philadelphia where he established his own print shop. Before withdrawing from this trade to follow a diplomatic career, he printed for the Ephrata Community in Pennsylvania three hymnbooks, *Göttliche Liebes und Lobes Gethöne* (1730), *Vorspiel der Neuen Welt* (1732) and *Jacobs Kampff und Ritter-Platz* (1736), as well as a number of reprints of Isaac Watts's *Psalms and Hymns* containing no music.

Franklin played the harp, the guitar and the glass dulcimer, and invented an improved form of the musical glasses which he called the armonica. (For illustration *see* MUSICAL GLASSES, fig.2.) On a visit to England in 1761, he heard Edmund Delaval, a Fellow of Pembroke Hall, Cambridge, play on the glasses. Franklin was so impressed with the instrument that he decided to improve it. He took the bowls of the glasses and fitted them concentrically (the largest on the left) on a horizontal rod, which was actuated by a crank attached to a pedal. Careful gradation of size ensured a more consistently accurate scale than was possible with water tuning, while the close proximity of the rims (which would be well moistened before use) enabled the player to produce chords and runs with far greater ease than had been possible when each glass stood separate on its base. The invention achieved a certain popularity in America, but exercised far more influence in Europe.

Franklin also wrote a short treatise on music aesthetics. A letter (dated 2 June 1765) to his friend Lord Kames of Edinburgh sets forth Franklin's ideas about the nature of melody and harmony. Another letter from about the same time addressed to his brother Peter Franklin expresses his preference for clarity and simplicity in vocal music over newly composed Italian opera, and cites examples of 'defects and improprieties' in an aria from Handel's *Judas Maccabaeus*.

A string quartet in manuscript bearing his name as the composer is in the Bibliothèque Nationale, Paris. This quartet is the second of two composed for three violins and cello, all employing scordatura and performed on open strings only. Arguments supporting (Grenander) and doubting (Marrocco) Franklin's authorship have been presented.

W. THOMAS MARROCCO/R

Frank Music Corp. American music publishing firm. It was founded in New York in 1949 by the composer and lyricist Frank Loesser and specializes in the publication of musical plays and popular songs; some rock and folk material was added to the catalogue in the early 1970s. In the past the firm also published choral, band, orchestral, solo, ensemble and piano music, as well as textbooks and methods; most are no longer in print since, in common with most music publishers, Frank's recent activities have focussed as much on the licensing of music for media use as on the production of sheet music and folios. Catalogues acquired by the firm include those of Carmichael Music Publications, Empress Music Inc. and the Walter Reade Music Corp.

Since January 1979 Frank Music Corp. has been one of several affiliated music publishing companies owned by MPL Communications, Inc., New York. New songs are no longer added to the firm's catalogue and so its character has changed little since the late 1970s. A former division of Frank Music Corp., MUSIC THEATRE INTERNATIONAL is among the world's largest and most active leasing agents for musical plays.

W. THOMAS MARROCCO, MARK JACOBS/R

Franko, Sam (*b* New Orleans, 20 Jan 1857; *d* New York, 6 May 1937). American violinist and conductor. In 1862 his family fled from the Civil War to Germany and Franko began violin lessons in Breslau; he later studied in Berlin (with Joachim among others) and Paris (with Hubert Léonard and Vieuxtemps). In 1880 he was in New York, where he played in orchestras under Theodore Thomas and Walter Damrosch, and in 1881 founded the New York String Quartet. Between 1883 and 1885 he toured as first violinist with the Mendelssohn Quintette Club and played with the Boston SO; he then played viola in the New York Philharmonic Society (1891–7).

Franko began his conducting career in 1891. In 1894 he founded the American SO, with the aim of demonstrating that non-Europeans could be good musicians. Between 1900 and 1909 he conducted 'Orchestral Concerts of Old Music' in New York, performing his own editions of Baroque works. He took the concerts to Germany with the Berlin Blüthner orchestra from 1910 to 1914, and while he was there taught at the Stern Conservatory in Berlin. On his return to the USA in 1915, he taught the violin, was leader for the touring Ballets Russes and briefly resumed the 'Old Music' concerts (1916–17). He donated his music collection and scrapbooks to the New York Public Library. Besides making numerous arrangements of orchestral works, he composed works for piano and for violin and piano.

JEFFREY R. REHBACH

Franquin, Merri(-Jean-Baptiste) (*b* Lançon, Bouches-du-Rhône, 19 Oct 1848; *d* ?Paris, 1934). French trumpeter and teacher. He studied the cornet at the Paris Conservatoire with Arban and Maury, winning a *premier prix* in 1877. From 1894 to 1925 he was professor of trumpet at the Conservatoire; during his tenure and against fierce initial resistance he introduced the C trumpet in place of the low F trumpet and also persuaded composers to write for this instrument. After experiments with Millereau in 1888, he developed with Thibouville-Lamy in 1912 a trumpet in C with a whole-tone ascending fourth valve, activated by the left index finger. It was adopted by some players, notably Roger Voisin of the Boston SO. This was followed in 1916 by a five-valve one, the fifth valve, activated by the left thumb, lowering by a major or minor 3rd.

Franquin's comprehensive *Méthode complète de trompette moderne, de cornet à pistons et de bugle* (Paris, *c*1910) is valuable because unlike preceding methods by Arban, Petit and others, which were for cornet, it is a true trumpet method, placing great emphasis on tone production. Franquin also wrote 'La trompette et le cornet' (printed in *EMDC*, II/iii, 1927, pp.1597–648).

EDWARD H. TARR

Franssens, Joep (*b* Groningen, 1955). Dutch composer. He studied piano in Groningen, and composition in the Hague and Rotterdam with Louis Andriessen and Klaas de Vries respectively. He is representative of the post-serial generation of Dutch composers who use tonal means and an accessible idiom without neo-Romantic features, even if the pathos-laden, highly emotional nature of his music appears to contradict this endeavour. In his works, which consist of chamber music and choral and orchestral works, Franssens aims at a synthesis of monumentality and euphony and is initially guided by J.S. Bach and the Ligeti of *Lontano* and *Atmosphères*. Later a trend towards radical austerity becomes apparent under the influence of American minimalist music, East European mysticism (e.g. Pärt) and the symphonic pop music of the 1970s, culminating in the static diatonicism of the ensemble work *Dwaallicht* (1989) and the serene counterpoint of *Sanctus* for orchestra (1996, rev. 1999). The instrumentation increasingly shows a preference for warm, luxuriant colours.

BAS VAN PUTTEN

Frantz, Ferdinand (*b* Kassel, 8 Feb 1906; *d* Munich, 26 May 1959). German bass-baritone. He studied privately and made his début in 1927 at Kassel as Ortel (*Die Meistersinger*); after engagements in Halle, Chemnitz and Hamburg, in 1943 he was engaged by the Staatsoper in Munich, of which he remained a member until his death. He established himself as a leading Heldenbariton, singing Wotan, Hans Sachs, Kurwenal and the Dutchman; such was the range of his voice that he also sang King Mark, Daland, the Landgrave, King Henry (*Lohengrin*), Méphistophélès and Galitsky (*Prince Igor*). He made guest appearances in Vienna, Milan, Paris and London where he sang Jupiter in the first performance in England of *Die Liebe der Danae* in 1953 (with the Bayerische Staatsoper), and Wotan in 1954. He made his Metropolitan début in 1949 as Wotan, and also appeared there as Pizarro. Frantz's beautifully schooled voice, significant use of the text and sympathetic personality are well represented in his recording of Wotan in Furtwängler's *Ring* with the Rome RAI SO (1953) and as Hans Sachs in Kempe's notable recording of *Die Meistersinger* (1956). He was married to the soprano Helena Braun.

HAROLD ROSENTHAL/ALAN BLYTH

Frantz, Justus (*b* Hohensalza, 18 May 1944). German pianist. He studied with Eliza Hansen at the Hamburg Hochschule für Musik und Theater and later with Wilhelm Kempff, an important musical influence, in Positano. His career received an important boost in 1969 when he performed a series of Mozart piano concertos with the Berlin PO under Karajan. He made his American début in 1975, playing Dvořák's Piano Concerto with the New York PO under Bernstein, and he has also worked with conductors including Kempe, Giulini and Haitink. Frantz played frequently in duo recitals with Christoph Eschenbach, with whom he toured the USA, Japan and Europe and recorded Mozart and Schubert duets as well as Mozart's concertos for two and three pianos. His other recordings include Bach concertos and (with Bernstein) the concertos of Dvořák and Schumann. Frantz's reputation rests mainly on the Viennese classics, in which his sober, lucid pianism and sense of balance and proportion sometimes recall Kempff. He was made a professor at the Hamburg Hochschule für Musik und Theater in 1985 and a year later founded the Schleswig-Holstein Music Festival, a series of concerts and courses held in various venues which has become one of Germany's best-known festivals.

JESSICA DUCHEN

Franz, Carl (*b* Langenbielau, Silesia [now Bielawa, Poland], 1738; *d* Munich, 1802). German horn and baryton player. After studying the horn from the age of nine, he was in the Hofkapelle of the Prince-Archbishop of Olmütz from 1758 and spent nearly 14 years as Joseph Haydn's principal horn player at the court of Prince Nicolaus Esterházy (1763–76), where he also learnt to play the baryton. He then played the horn in the orchestra of Cardinal Batthiany at Pressburg until it was disbanded (*c*1784). He made several concert tours as a baryton player, performing in Vienna and in England, Russia and elsewhere, before returning to orchestral playing in Vienna and finally in the Munich Hofkapelle led by Franz Danzi (1787).

As a horn player Franz perfected the use of the hand to sound semitones and anticipated modern horn technique by cultivating both the high and low registers until his range spanned five Cs. His abilities inspired Haydn to write the horn parts in his symphonies nos.13, 72, 31 and 51 and in the octets with baryton. However, he was most famous as one of the few virtuosos on the baryton, which he used with seven gut strings (bowed) and 16 wire strings (plucked). Haydn apparently intended some of his baryton works for Franz to play; it seems significant that he wrote no more after Franz's departure in 1776. A review of 1786 praises Franz's expressive baryton playing, and others describe his remarkable playing and singing of *Er ist nicht mehr! Tön' trauernd, Baryton!* (HXXVI*b*:1), a cantata on the death of Frederick the Great which Haydn supposedly composed for Franz.

HORACE FITZPATRICK/PAUL R. BRYAN

Franz, J.H. *See* HOCHBERG, HANS HEINRICH.

Franz, Paul, [Gautier, François] (*b* Paris, 30 Nov 1876; *d* Paris, 20 April 1950). French tenor. He studied with Louis Delaquerrière in Paris and joined the Opéra in

1909, making his début as Lohengrin, and singing there until his retirement in 1938. He was the first Paris Parsifal in 1914, and his many roles included Aeneas (*Les Troyens*), John the Baptist (*Hérodiade*), Rodrigue (*Le Cid*), Raoul (*Les Huguenots*), Reyer's Sigurd, and Siegmund, Siegfried and Tristan. Franz made his Covent Garden début in 1910 as Samson, returning regularly until 1914. His London roles included Julien (*Louise*), Radames and Otello. In 1937 he joined the teaching staff of the Paris Conservatoire. Franz had a large, rich voice and a particularly aristocratic style of declamation. He made distinguished recordings of French repertory, most notably as Sigurd and Samson, and of Wagner.

HAROLD ROSENTHAL/ALAN BLYTH

Franz [Knauth], **Robert** (*b* Halle, 28 June 1815; *d* Halle, 24 Oct 1892). German composer. He was born into a simple burgher family. His father, Christoph Franz Knauth, changed the family name to Franz in 1847. He studied with several teachers in Halle, and was then taught at the Gymnasium by Kantor Abela, who introduced him to cantatas and oratorios by Bach, Handel, Haydn and Mozart. After breaking down his father's strong disapproval, Franz embraced music as a profession and left the Gymnasium for a strict course in theory from J.C.F. Schneider in Dessau (1835–7). Returning to Halle, he undertook a programme of musical self-education, temporarily setting composition aside, and steeping himself first in the works of Bach and Handel, and later in those of Schubert, Schumann and Mendelssohn. He also acquired a general education, principally from his friends Wilhelm Osterwald, the poet, and the philosophers Rudolf Haym and Friedrich Hinrichs.

Franz obtained his first post, as organist of the Ulrichskirche, in 1841. In the following year he became conductor of the Singakademie, at a time when the choir's rehearsals were poorly attended and the Halle public was indifferent to music. Nevertheless, through his effort, Franz gradually moulded the choir into a first-rate ensemble, and his successful choral festivals helped Halle regain its reputation as a musical city. He was also composing again and sent Schumann his first set of songs. In 1843 they appeared in print: 'Without my knowledge and without my request', Franz exclaimed, 'he has given my songs to a publisher and they have been printed'. In 1851 the University of Halle invited him to teach and ten years later conferred upon him an honorary doctorate. He had a great admirer in Liszt, who remained his lifelong supporter and who in 1872 published a book about him. But these benefits and the satisfaction of his growing reputation were eclipsed by the gradual loss of his hearing over a period of some 20 years. By 1867 he had become almost completely deaf and was forced to resign his official positions. Plagued by emotional disorders, he retreated into isolation, though he continued to compose until 1886, writing his last set of songs (op.52) in 1884. Even these difficult years were occasionally brightened by recognition: in 1873 he received from some of his admirers an honorarium of 30,000 thalers, and in 1878 King Ludwig II of Bavaria appointed him a Knight of the Order of Maximilian. His 70th birthday was celebrated throughout Germany and Austria; from the German Kaiser he received the Order of the Crown, and from the city of Halle the bestowal of honorary citizenship. In 1907 the Halle Singakademie renamed itself after him.

Franz assimilated several different influences in creating his highly individual style, most significantly from Schubert and Schumann, who opened for him the entire Romantic world of the lied; nearly all of his many works, with the chief exception of some choral music, are songs. Another influence, Protestant chorales, acquainted him with the church modes which colour certain phrases in such songs as *Es klingt in der Luft*, op.13 no.2. From Bach he learnt the value of symmetry and of motivic construction, and his accompaniments are often of contrapuntal texture. His study of earlier composers also stimulated his prolific work as an editor, but his arrangements of the sacred and secular vocal music of Bach and Handel, though eminently musical, provoked severe criticism from historians because of his avowed disregard for Baroque performing practice. Old German folksongs, which he studied zealously, exerted still another influence upon his style; he set six of them as his op.23 and turned to Burns and Osterwald for their folklike lyrics. In his best songs, e.g. *Mutter, o sing' mich zur Ruh'*, op.10 no.3, he succeeded in capturing the atmosphere of the *Volkslied*: its restricted emotional range, structural simplicity and characteristic lyricism. Among individual poets, he showed a preference for Heine, whose poems are the basis of about a quarter of his settings.

There is no clear line of stylistic development in Franz's musical language, despite its distinctive personality. 'I can give no accurate account of the chronology of my compositions ... I was never so vain as to add date and year to my songs. Some of my very last publications really date from between 1840 and 1845'. He set himself the task of translating the emotional content of his chosen poems into music. To this end he occasionally employed rich harmonic language, including tertial relationships, as in *Frühling und Liebe*, op.3 no.3, and pungent dissonances and a fluid sense of tonality, as in *Wasserfahrt*, op.48 no.3. His choice of keys was a point of crucial importance: 'Expression in my songs depends entirely upon the keys I have selected for them'. The formal structure of his settings, usually strophic, he derived from the poetry itself, and these simple forms strengthen the folklike impression of many of his songs. Although he drew broad musical lines in the interest of emphasizing general poetic moods, he occasionally shaded in tiny touches of pictorialism as with the bird songs in *Im wunderschönen Monat Mai*, op.25 no.5. He objected, however, to any stressing of individual words in his songs. 'I compose feelings, not words ... In Schumann', Franz argued, 'the declamation is too much in the foreground'. On the contrary, he wished for his own music 'nothing more than the deepening of a poetic substratum'. He was happy to be recognized as a pure lyricist, who restricted himself almost entirely to a single genre. Yet even within the realm of the lied, his sense of expression is restricted. The characteristic feeling is one of delicacy, often tinged with melancholy, even in such outwardly lighthearted songs as *Schilflieder*, op.2. Not surprisingly he turned repeatedly to the mezzo-soprano voice and to the piano's lower register to imbue his songs with a plaintive quality. Because Franz sustained the ideal of simplicity in his lieder, while contemporaries saluted the music of the future, he can be regarded as a miniaturist of exacting individuality.

WORKS

published in Leipzig unless otherwise stated

CHORAL

op.	
15	Kyrie, solo vv, chorus (*c*1860)

19	Psalm cxvii: Lobet den Herrn alle Heiden, double chorus (*c*1860)
24	Sechs Lieder, mixed chorus (1861)
29	Liturgie zum Gebrauch beim evangelische Gottesdienst, mixed chorus (*c*1860)
32	Sechs Lieder, 4 male vv (1859)
45	Sechs Lieder, mixed chorus (1872)
46	Drei Lieder, mixed chorus (1874)
49	Sechs Lieder, mixed chorus (1879)
53	Drei Lieder [from op.27], mixed chorus (*c*1885)
—	Drei Lieder, mixed chorus (n.d.)
—	Trinkspruch, 4 male vv (1886)

SONGS

op.	
1	Zwölf Gesänge (1843), i: Ihr Auge (R. Burns); Nachtlied (Countess I. Hahn-Hahn); Die Lotosblume (E. Geibel); Nun holt mir eine Kanne Wein (Burns); O säh'ich auf der Heide (Burns); Tanzlied im Mai (A. Hoffmann von Fallersleben); ii: Sonntag (J. Eichendorff); Für Einen (Burns); Jagdlied (Eichendorff); Schlummerlied (L. Tieck); Vöglein, wohin so schnell (Geibel); In meinem Garten (Geibel)
2	Schilflieder (N. Lenau) (1844): Auf geheimem Waldespfade; Drüben geht die Sonne scheiden; Trübe wird's, die Wolken jagen; Sonnenuntergang; Auf dem Teich, dem regungslosen
3	Sechs Gesänge (1844): Der Schalk (Eichendorff); Die Farben Helgolands (Hoffmann von Fallersleben); Frühling und Liebe (Hoffmann von Fallersleben); Frühlingsliebe (Hoffmann von Fallersleben); Der Sommer ist so schön (Burns); Ach, wenn ich doch ein Immchen wär (W. Osterwald)
4	Zwölf Gesänge (1845), i (Burns): Mein Hochlandskind; Die süsse Dirn' von Inverness; Liebliche Maid; Ihr Hügel dort am schönen Doon; Montgomery Gretchen; Du hast mich verlassen; ii: Er ist gekommen (F. Rückert); Kurzes Wiedersehen (Osterwald); Durch säuselnde Bäume (Osterwald); Herbstsorge (Osterwald); Wanderlied (Osterwald); Ach, dass du kamst (Osterwald)
5	Zwölf Gesänge (1846), i: Aus meinen grossen Schmerzen (H. Heine); Liebchen ist da (J. Schröer); Auf dem Meere (Heine); Will über Nacht wohl übers Tal (Osterwald); Mädchen mit dem roten Mündchen (Heine); Ich hab' in deinem Auge (Rückert); ii: Gute Nacht (Eichendorff); Ich lobe mir die Vögelein (Osterwald); Stiller Abend (Schröer); Erinnerung (Osterwald); Hör ich das Liedchen klingen (Heine); Genesung (Schröer)
6	Sechs Gesänge (1846): Wasserfahrt (Hoffmann von Fallersleben); Wie des Mondes Abbild (Heine); Auf dem Meere (Heine); Die Liebe hat gelogen (Osterwald); Der Schnee ist zergangen (Osterwald); Tränen (A. von Chamisso)
7	Sechs Gesänge (1846): Der junge Tag erwacht (Osterwald); Ständchen (Rückert); Da die Stunde kam (Osterwald); In meinen Armen wieg ich dich (Natorp); Frühlingskinder im bunten Gedränge (Lenau); Ja, du bist elend (Heine)
8	Sechs Gesänge (1846): Der Bote (Eichendorff); Meeresstille (Eichendorff); Durch den Wald im Mondenscheine (Heine); Das ist ein Brausen (Heine); Treibt der Sommer seinen Rosen (Osterwald); Gewitternacht (Osterwald)
9	Sechs Gesänge (*c*1860): Was pocht mein Herz so sehr (Burns); Wasserfahrt (Geibel); Bitte (Lenau); Allnächtlich im Traume (Heine); Vom Berge (Osterwald); Auf dem Meere (Heine)
10	Sechs Gesänge (1860): Für Musik (Geibel); Stille Sicherheit (Lenau); Mutter, o sing' mich zur Ruh' (F. Hemans); Der vielschönen Fraue (Eichendorff); Und die Rosen, sie prangen (Osterwald); Umsonst (Osterwald)
11	Sechs Lieder (?1865); Abschied (folksong); Am leuchtenden Sommermorgen (Heine); Im Mai (Osterwald); Im Sommer (Osterwald); Auf dem Meere (Heine); Abends (anon.)
12	Sechs Gesänge (Offenbach, *c*1860): Und welche Rose Blüten treibt (Osterwald); Zu Strassburg an der Schanz (folksong); Im Walde (W. Müller); Aus meiner Erinnnerung (Heine); Gute Nacht, mein Herz (Geibel); Und wüssten's die Blumen, die kleinen (Heine)
13	Sechs Dichtungen (M. Waldau) (?1865): Zwei welke Rosen; Es klingt in der Luft; Ein Friedhof; Rosmarin; Wenn drüben die Glocken klingen; Da sind die bleichen Geister wieder
14	Sechs Gesänge (*c*1860): Widmung (Müller); Lenz (Lenau); Waldfahrt (F. Körner); Hatte Liebchen zwei (Hungarian folksong); Liebesfrühling (anon.); Frage (Lenau)
16	Sechs Gesänge (1856): Du liebes Auge (O. Roquette); Im Sommer (J.W. von Goethe); Der Fichtenbaum (Heine); Abends (Eichendorff); Weisst du noch (Roquette); Um Mitternacht (Osterwald)
17	Sechs Gesänge (*c*1860): Ave Maria (Geibel); Ständchen (Osterwald); Lieb' Liebchen (Heine); Die Trauernde (folksong); Im Frühling (Osterwald); Im Herbst (Müller)
18	Sechs Gesänge (*c*1860): Marie (R. Gottschall); Im Rhein (Heine); Nun hat das Lied ein Ende (Osterwald); Meerfahrt (Heine); Möcht wissen, was sie schlagen (Eichendorff); Mit schwarzen Segeln (Heine)
20	Sechs Gesänge (*c*1865): Die blauen Frühlingsaugen (Heine); Die letzte Rose (Gottschall); Verfehlte Liebe (Heine); Abends (Osterwald); Das macht das dunkelgrüne Land (Roquette); Im Herbst (Geibel)
21	Sechs Gesänge (*c*1865): Willkommen, mein Wald (Roquette); Denk ich dein (M. Jäger); O. Mond, lösch' dein goldnes Licht (Jäger); Liebesfeier (Lenau); Winternacht (Lenau); Verlass mich nicht (Osterwald)
22	Sechs Gesänge (?1870): Gleich und gleich (Goethe); Vorüber der Mai (Jäger); Im Frühling (J. Arndt); Frühe Klage (Osterwald); Im Mai (Osterwald); So weit von hier (Burns)
23	Sechs Gesänge nach Texten deutscher Volkslieder (?1870): Wird er wohl noch meiner gedenken?; Frühlingswonne; Ach, wär es nie geschehen; Das traurige Mädchen; Frühlings Ankunft; Rote Äuglein
25	Sechs Lieder (Heine) (*c*1870): Die Lotosblume; O lüge nicht; Ich hab' im Traum geweinet; Kommt fein's Liebchen heut?; Im wunderschönen Monat Mai; Auf dem Meere
26	Sechs Gesänge (?1870): Wenn ich's nur wüsste (Osterwald); Lieber Schatz, sei wieder gut (Osterwald); Vergissmeinnicht (Osterwald); Des Müden Abendlied (Geibel); Vom Auge zum Herzen (Rückert); An den Wind (Lenau)
27	Sechs Lieder (E. Mörike) (?1870): Volker spielt auf; Er ist's; Herz, ich habe schwer an dir zu tragen; In Leid versunken; Rosenzeit; Ein Tännlein grünet wo
28	Sechs Gesänge (?1870): Ich lieb' eine Blume (Heine); Ein Stündlein wohl vor Tag (Mörike); Nachtlied (Geibel); Nebel (Lenau); Verborgenheit (Mörike); Um Mitternacht (Mörike)
30	Sechs Gesänge (?1870): Sterne mit den goldnen Füsschen (Heine); Blätter lässt die Blume fallen (S. Petőfi); Am Strom (Eichendorff); Schöner Mai, bist über Nacht (Osterwald); Dies und das (Scottish folksong); An die Wolke (Lenau)
31	Sechs Gesänge (?1870): Dort unterm Lindenbaume (Osterwald); Ade denn, du Stolze (Osterwald); Mein Lieb ist eine rote Ros' (Burns); Sie liebten sich beide (Heine); Abschied (Heine); Mein Herz ist im Hochland (Burns)
33	Sechs Lieder (Goethe) (1864): Wonne der Wehmut; Gegenwart; Mailied; Cupido, loser Knabe; Schweizerlied; Rastlose Lied
34	Sechs Lieder (Heine) (1861): Was will die einsame Träne; Deine weissen Lilienfinger; Traumlied; Es treibt mich; Die Rose, die Lilie; Gekommen ist der Maie
35	Sechs Gesänge (1862): Die Harrende (Osterwald); Ich wandre durch die stille Nacht (Eichendorff); Die Sonn' ist hin (Roquette); Romanze (Eichendorff); Wenn sich zwei Herzen scheiden (Geibel); Aufbruch (Osterwald)
36	Sechs Gesänge (1862): Auf dem Meere (Heine); Erster Verlust (Osterwald); Habt ihr sie schon geseh'n (folksong); Bei der Linde (Osterwald); Gute Nacht (B. Paoli); Nun hat mein Stecken gute Rast (Osterwald)
37	Sechs Gesänge (1866): Du bist so schön und rein (Heine); Zu spät (Osterwald); Am fernen Horizonte (Heine); Der schwere Abend (Lenau); Sonnenwende (Osterwald); Wenn ich auf dem Lager liege (Heine)

38 Sechs Lieder (Heine) (1867): Frühling; Der Schmetterling ist in die Rose verliebt; Childe Harold; Sag' mir; Güldne Sternlein schauen nieder; In der Fremde
39 Sechs Lieder (Heine) (1867): Frühlingsfeier; Es ragt ins Meer der Runenstein; Das Meer erstrahlt im Sonnenschein; Wandl' ich in den Wald des Abends; Mir fehlt das Beste; Altes Lied
40 Sechs Gesänge (1867): Mein Schatz ist auf der Wanderschaft (Osterwald); Es ziehn die brausenden Wellen (Heine); Unter'm weissen Baume sitzend (Heine); Als trüg' man die Liebe zu Grab (O. Röser); Die Verlassene (folksong); Sie floh vor mir (Heine)
41 Sechs Gesänge (1867): Leise zieht durch mein Gemüt (Heine); Ach, wie komm' ich da hinüber (Heine); Wohl waren es Tage der Sonne (Geibel); Liebe (Röser); Lehre (Heine); Du grüne Rast im Haine (Osterwald)
42 Aus Osten, sechs Gesänge (*c*1870): Wozu? (folksong); Die helle Sonne leuchtet (Mirza-Schaffy); Selige Nacht (Petőfi); Weisst du noch (S. Hafis); Es hat die Rose sich beklagt (Mirza-Schaffy); Wenn der Frühling auf die Berge steigt (Mirza-Schaffy)
43 Sechs Gesänge (*c*1870): Träume (Osterwald); Gleich, wie der Mond (Osterwald); Entschluss (Osterwald); Ich will meine Seele tauchen (Heine); Es ragt der alte Elborus (Mirza-Schaffy); In Blüten (Osterwald)
44 Sechs Gesänge (*c*1870): O nimm dich in Acht (H. Silesius); Aprillaunen (Osterwald); Doppelwandlung (Hoffmann von Fallersleben); Es fällt ein Stern herunter (Heine); Wenn ich in deine Augen seh' (Heine); Am Rheinfall (Hahn-Hahn)
48 Sechs Gesänge (1878): Wenn zwei voneinander scheiden (Heine); Das Grab der Liebe (anon.); Wasserfahrt: Ich stand gelehnet (Heine); Die Perle (Rückert); Ich bin bis zum Tode betrübet (Hahn-Hahn); Norwegische Frühlingsnacht (J. Welhaven)
50 Sechs Gesänge (1879): Herzig's Schätzle du (folksong); Frühlingsklage (Lebret); Der Stern ist die Liebe (anon.); Ein Gruss von ihr (W.Viol); Tränen (Chamisso); Liebesfrühling (Rückert)
51 Zehn Gesänge (1879), i: Eichwald (Lenau); Tränen (Chamisso); Dornröschen (Osterwald); O Herz in meiner Brust (K. Mayer); Die schönen Augen der Frühlingsnacht (Heine); ii: Ach, ich denke (C. Reinhold); Die schlanke Wasserlilie (Heine); Wiedersehen (Rückert); Romanze (anon.); Erinnerung (Osterwald)
52 Sechs Gesänge (1884): Wohl viele tausend Vögelein (R. Prutz); Mitten ins Herz (Chamisso); Wolle keiner mich fragen (Geibel); Tränen (Chamisso); Ich wollte, ich könnte noch träumen (Waldau); Frühlingsblick (Lenau)

EDWARD F. KRAVITT

Fränzl. German family of musicians.

(1) Ferdinand Rudolph Fränzl (*b* Innsbruck, 12 Aug 1710; *d* Mannheim, 5 Sept 1782). Trumpeter and viola player. His family was taken with the court of the Elector Carl Philipp from Innsbruck to Mannheim between 1717 and 1720. He was established as a trumpeter in the Palatinate orchestra in 1744, and became the leading trumpeter after some years of service. From 1747 he also played the viola in the orchestra.

(2) Ignaz (Franz Joseph) Fränzl (*b* Mannheim, bap. 4 June 1736; *d* Mannheim, 3 Sept 1811). Violinist and composer, son of (1) Ferdinand Rudolph Fränzl. He grew up under the influence of Johann Stamitz and in 1754 became a violinist in the Palatinate orchestra. At the age of 23 he was one of the highest-paid musicians in the orchestra, receiving an annual salary of 500 florins. He was applauded at the Concert Spirituel in Paris in 1768, and won enthusiastic praise from the *Mercure de France*. Mozart also paid his violin playing a great compliment in a letter dated 22 November 1777. Fränzl and his orchestra partner Giovanni Battista Toeschi were promoted to the joint leadership of the orchestra in 1773. After the court moved to Munich in 1778 Fränzl became musical director of the newly founded Nationaltheater in Mannheim. That autumn he assembled the remaining members of the court orchestra, together with some amateurs, to form the Akademie-Konzerte (which remains the centre of musical life in Mannheim); for it Mozart began composing, though never completed, his Concerto for Piano and Violin KAnh.*56/315f*. Fränzl may therefore be credited with the reorganization of the town's musical life on a civic basis. As musical director of the Nationaltheater during its most flourishing period, under Dalberg, he was obliged to suspend his activities as a soloist and composer. He was, according to Lipowsky, one of the finest violinists of his day and through his pupils, who included Friedrich Wilhelm Pixis (i), exerted an influence on the style and technique of Rode and Kreutzer.

Most of Fränzl's works were published in Paris and London. He wrote a mass, about six symphonies, nine ballets, seven violin concertos, four string quartets, duets for two violins, and six sonatas for two violins and cello. The surviving works are in the style of the second generation of the Mannheim school, and show a personal idiom only in Fränzl's preference for the relative minor in slow movements and modulation sections.

(3) **Ferdinand Fränzl** (*b* Schwetzingen, 24 May 1767; *d* Mannheim, 27 Oct 1833). Violinist and composer, son of (2) Ignaz Fränzl. He studied with his father, and when he was ten his violin playing aroused interest at an academy in Mannheim. He first won recognition as a virtuoso during numerous European tours; he played in Vienna, Paris, and cities in Switzerland and Italy. He took lessons in composition with Franz Xaver Richter and Ignace Pleyel in Strasbourg, and with Stanislao Mattei in Bologna. In 1789 he was appointed leader of the Munich court orchestra. In 1792 he became orchestral leader in Frankfurt and also leader of the private orchestra of a merchant named Bernard in Offenbach, where he made friendly contacts with the publishing firm of André. In 1802 he resumed concert tours to Vienna, Poland and (until 1806) Russia, where he enjoyed the favour of the tsar. After the death of Carl Cannabich (1 May 1806) he took over the post of music director at the Munich court, and from December 1823 that of Kapellmeister. He retired in 1826 and spent a year in Geneva before returning to Mannheim in April 1827.

Ferdinand Fränzl was the most important German violinist of Spohr's generation. Although his technique was French in style, he exerted an indirect influence even on Spohr's playing through his own pupil, Franz Eck. As a conductor he won the friendship of Weber, whose works he championed in Munich. Among Fränzl's compositions the violin concertos and a few overtures were especially popular.

WORKS

STAGE

Die Luftbälle, oder Der Liebhaber à la Montgolfier (Spl, 2, C. Bretzner), Mannheim, 15 April 1787
Macbeth (incid music, W. Shakespeare), Mannheim, 1788
Adolf und Clara (operetta, 1, after B.-J. Marsollier des Vivetières), Frankfurt, 1800
Die beiden Gefangenen, Mannheim, 1802, lib (Frankfurt, 1800)
Carlo Fioras, oder Der Stumme in der Sierra Morena (op, 3, W. Vogel), Munich, Hof, 16 Oct 1810
Hadrian Barbarossa (op, 3, G. Wohlbrück), Munich, Hof, March 1815
Die Weihe (Festspiel, A. Klebe), Munich, Hof, 12 Oct 1818
Der Fassbinder (Spl, 1), Munich, Hof, 21 Dec 1824
Der Bandit (Spl, 2, after K. Ritter), Mannheim, National, Dec 1835
Der Einsiedler (Spl, 3), unperf.

ROLAND WÜRTZ

Franzoni, Amante (*b* Mantua; *fl* 1605–30). Italian composer. He is known to have been in the service of the Gonzagas at Mantua before 1605 and to have held the post of *maestro di cappella* of Forlì Cathedral in 1611. By October 1612 he had returned to Mantua to become *maestro di cappella* of the ducal chapel of S Barbara. He retained this post until October 1630 except for a brief period between November 1627 and April 1628, during which he was replaced by G.F. Anerio. Franzoni was a Servite father and a member of the Accademia Olimpica of Vicenza.

The influence of Mantuan colleagues, especially Monteverdi, is discernible in Franzoni's three books of *Fioretti musicali*. The handling of instrumental ritornellos and the rhythmic vivacity of much of the vocal writing in the third book seem to have been directly inspired by Monteverdi's *Scherzi musicali*, and the use of *falsobordone* passages in *Si rid'amor* and *Ecco l'alba rugiadosa* (both in the second book) is reminiscent of Viadana's work. Among his church music the vesper psalms (1619) display particularly striking Monteverdian influences. Written for eight voices disposed in two choirs, many of these also make extensive use of *falsobordone* passages (indeed, some consist of little else). The collection is dedicated to Anna Giulia Gonzaga, Archduchess of Austria, and ends with two *Magnificat* settings.

IAIN FENLON

Frappé (Fr.). *See* DOWNBEAT. *See also* ANALYSIS, §II, 2.

Fraschini, Gaetano (*b* Pavia, 16 Feb 1816; *d* Naples, 23 May 1887). Italian tenor. He studied in Pavia with Moretti and made his début there in 1837 as Tamas in Donizetti's *Gemma di Vergy*. In 1839 he sang in *Torquato Tasso* at Bergamo and in 1840 in *Marino Faliero* at La Scala. Engaged at the S Carlo, Naples, from 1840 to 1853 he sang in the first performances of Pacini's *Saffo*, *La fidanzata corsa*, *La stella di Napoli*, *La regina di Cipro*, *Merope* and *Romilda di Provenza*. He created Gerardo in *Caterina Cornaro* (1844); other Donizetti operas in which he sang included *Linda di Chamounix*, *Maria di Rohan*,

La favorite, *Poliuto* and *Lucia di Lammermoor*. He was dubbed the 'tenore della maledizione' because of the force with which he delivered Edgardo's curse in *Lucia*, and was noted above all as an early *tenore di forza*.

He was chosen by Verdi to create Zamoro in *Alzira* (1845, Naples), Corrado in *Il corsaro* (1848, Trieste), Arrigo in *La battaglia di Legnano* (1849, Rome) and the title role of *Stiffelio* (1850, Trieste). He also appeared in *Oberto*, *Ernani*, *I Lombardi*, *I masnadieri*, *Luisa Miller* and *Il trovatore*. In 1856 he sang Henri in *Les vêpres siciliennes* at Rome, in 1858 Gabriele Adorno in *Simon Boccanegra* at Naples, and he created Riccardo in *Un ballo in maschera* (1859, Rome). It is a commentary on his technique and taste that, after so many forceful roles, he could still be expected to sing with the refinement and elegance necessary for Riccardo's music. He sang in the first London performance of *I due Foscari* at Her Majesty's Theatre (1847), in *La forza del destino* at Madrid (1863), and *La traviata* and *Rigoletto* at the Théâtre Italien, Paris (1864). He made his last appearance as Gennaro in *Lucrezia Borgia* at Rome in 1873 when, though in his late fifties, he still retained the firmness and security of his voice.

ELIZABETH FORBES

Fraser-Simson, Harold (*b* London, 15 Aug 1872; *d* Inverness, 19 Jan 1944). English composer. After an early career in shipping, he became known as a songwriter. Such songs as *Good Night* (C. Devenish) offer fluent melody but little enterprise in accompaniment; their style, however, was well suited to musical comedy. Starting with *Bonita* (1911) he composed a series of stage shows, the most successful of which was *The Maid of the Mountains*. Written in collaboration with James Tate for Tate's stepdaughter José Collins, it ran at Daly's Theatre from 10 February 1917 for 1352 performances. Fraser-Simson went on to write *A Southern Maid* (1917) and *Our Peg* (1919), but neither had the success of *The Maid*. Nor did his collaboration with Ivor Novello in *Our Nell* (1924) fare any better as American syncopated styles began to dominate the scene.

Fraser-Simson wrote the ballets *A Venetian Wedding* (1926) and *The Nightingale and the Rose* (1927), and was subsequently to set texts written for children. His tuneful incidental music for Kenneth Grahame's *Toad of Toad Hall* has merit, although it is not of the same stature as those works of childhood reminiscence by his contemporaries Elgar and Debussy. Other such works include a group of settings from *Alice in Wonderland* and six volumes of songs from A.A. Milne's *When We were Very Young*, the most popular of which have been *Christopher Robin is saying his Prayers* and *Christopher Robin at Buckingham Palace*.

WORKS
(*selective list*)

unless otherwise stated, all stage works first performed in London

Stage: Bonita (comic op, prol, 2, W. Peacock), Queen's, 22 Sept 1911; A Southern Maid (musical play, 3, D.C. Calthrop, H. Graham and H. Miller), Manchester, Prince's, 24 Dec 1917 [addl. songs I. Novello]; Our Peg (musical play, 3, E. Knoblock and Graham), Manchester, Prince's, 24 Dec 1919 [see also Our Nell]; Missy Jo (musical play, 3, J. Clive and Graham), Folkestone, Pleasure Gardens, 4 July 1921; Head over Heels (musical comedy, 2, S. Hicks, A. Ross and Graham), Adelphi, 8 Sept 1923; The Street Singer (musical play, 3, F. Lonsdale and P. Greenbank), Birmingham, Prince of Wales, 11 Feb 1924 [addl. nos. I. St Hellier]; Betty in Mayfair (musical play, 3, J.H. Turner and Graham), Sunderland, Empire, 26 Oct 1925; A Venetian Wedding (ballet) (1926); The Nightingale and the Rose (ballet, O. Wilde) (1927)

Collabs.: with J. Tate: The Maid of the Mountains (musical play, 3, Lonsdale and Graham), Manchester, Prince's, 23 Dec 1916; with I. Novello: Our Nell (musical play, 3, L.N. Parker, R. Arkell and Graham), 1924 [from Our Peg, 1919]

Contribs. to Vaudeville Vanities (revue, 3, Parker), Vaudeville, 16 Dec 1926 [later entitled 2nd Vaudeville Vanities]

Incid music, incl. Toad of Toad Hall (K. Grahame) (1929)

Many songs, incl. 14 songs from When We were Very Young (A.A. Milne) (1924); Songs from Alice in Wonderland (L. Carroll) (1932)

Full score MSS of his major works are in *GB-Lbl*

GEOFFREY SELF

Frasi [Frassi], **Giulia** (*b* Milan; *fl* 1742–72). Italian soprano. She studied under G.F. Brivio and later with Burney in London. Engaged for the King's Theatre in 1742, she made her début in the pasticcio *Gianguir* and continued to sing there in opera for many years, appearing in works by Galuppi, Porpora, Lampugnani, Veracini, Terradellas, Paradies, Hasse, Pergolesi, Cocchi and many others. She sometimes played male parts, for example Taxiles (1743) and Cleon (1747–8), both in Handel's *Rossane* (*Alessandro*), and the giant Briareus in the première of Gluck's *La caduta de' giganti* (1746). She sang in the Handel pasticcio *Lucio Vero* in 1747 and his *Admeto* in 1754. She appeared occasionally at other theatres, notably in works by Arne: *Alfred* (New Haymarket, 1753), *Eliza* (Drury Lane, 1756), *Alfred* (Covent Garden, 1759) and *Artaxerxes* (King's, 1769). She also took part regularly in the annual Musicians Fund (and other) benefits, and sang at the Castle and Swan concerts, at Ranelagh and elsewhere.

Handel engaged Frasi for his oratorio season of 1749, when she made her début in the title role of *Susanna*, and she continued as prima donna in all his later seasons and under his successors until about 1768. She sang in every one of his English oratorios except *Semele*, and regularly in provincial festivals at Oxford, Salisbury and for nine consecutive years at the Three Choirs. She was the highest paid singer at Handel's Foundling Hospital performances of *Messiah*. She lived extravagantly and died destitute.

Frasi was a great favourite with the public. In her early years, according to Burney, she had 'a sweet and clear voice, and a smooth and chaste style of singing, which, though cold and unimpassioned, pleased natural ears, and escaped the censure of critics'. She benefited greatly from Handel's tuition. The wonderful series of oratorio parts he composed for her, including the two Queens in *Solomon* (1749), the title roles in *Susanna* (1749) and *Theodora* (1750), and Iphis in *Jephtha* (1752), are an indication of his regard for her expressive powers, though they are not technically arduous; their extreme compass is *b* to *a''*.

WINTON DEAN

Frasnau, Jehan. *See* FRESNEAU, JEHAN.

Frassonio [Frassoni], **Vito** [Guido, Giulio, Vido]. Family name of Vito TRASUNTINO.

Frauenholtz [Frauenholz], **Johann Christoph** (*b* Ahorn, nr Coburg, bap. 19 Oct 1684; *d* Strasbourg, 9 Nov 1754). Alsatian composer and poet. Nothing is known about the

circumstances which led Frauenholtz to Strasbourg, where he matriculated at the university as a law student on 6 October 1710. In 1713 he directed a cycle of his cantatas at the Aurelian-Kirche and the following year he assumed the most important musical positions in Strasbourg, director of music for the city and Kapellmeister of the Neue Kirche. As Kapellmeister he oversaw the music at all seven Protestant churches in the city. He also held the posts, as was the custom, of *maître de chapelle* at the Temple Neuf and director of municipal concerts from 1727 until his death. On 18 February 1722 he married Maria Elizabeth Emmerich of Strasbourg. Frauenholtz undoubtedly had contact with Andreas, Gottfried and J.A. Silbermann and he may even have served as consultant to their work. He directed the music for the dedication of the Silbermann organ at St Thomas in 1740 and at the Neue Kirche on 16 November 1749, when his *Himmel-steigendes Halleluja* was performed. On 8 February 1751 he directed the music, which included his cantata *Trauer-Musik* for the funeral of Marshal Moritz of Saxony. To mark his death a poem by Heinrich Heitz, *Davids dankbares Harfen-Spiel* (Strasbourg, 1754), was published in his honour; he was buried at St Helena's cemetry.

Frauenholtz wrote at least five cycles of cantatas and arias, of which only one is extant in complete form. It consists of brief and unpretentious works comprising an aria, arioso or recitative flanked by choruses. These cantatas, reminiscent of the French *cantatille*, owe much to the rhythms of French dance forms; the influence of secular forms is in marked contrast to the excessively Pietistic texts, most of which are by Frauenholtz himself. His collection of sacred texts *Zions geistliche Blumenlust*, whose music has been lost, frequently reveals Frauenholtz's leaning towards mysticism; it contains more extended cantata texts, hymns, Passions and devotional texts.

WORKS

Zions geistliche Blumenlust, Kantaten, Arien- und Liedertexte (Strasbourg, 2/1727), music lost

Schrecklich ist des Herrn Gesetze (Catechismus-Stück), 4vv, 3 insts, bc, *F-Ssp*

FRANCIS MULLER/DIANNE M. McMULLEN

Frauenlob [Heinrich von Meissen] (*b* ?*c*1260; *d* Mainz, 29 Nov 1318). German Minnesinger. Little is known of his life beyond what can be conjectured from his songs. His lament on the death of Konrad von Würzburg (*d* 1287) locates him in time, his Central German dialect in place. According to the Würzburg songbook (compiled *c*1350) he came from Meissen, and he may have received a musical training at the chapel of Margrave Heinrich of Meissen (*d* 1288), himself a Minnesinger. Frauenlob praised nobles from principalities as far apart as Denmark and Carinthia (Kärnten, Austria), though he may not have visited the territories of all those he praised. He appears to have had close links with the Přemysl court at Prague, where he met his (presumed) patron Peter von Aspelt, who was to become bishop of Mainz in 1306. At Frauenlob's funeral his coffin was accompanied by women lamenting, allegedly in recognition of his many songs in praise of womanhood. His tombstone in Mainz Cathedral was destroyed in 1774, but its inscription has been preserved.

Later generations of Meistersinger claimed Frauenlob as a founding father, attributing to him more than three times as many *Töne* (*see* TON, (i)) as the ten he is known to have composed; for centuries they also wrote new texts to his melodies. A major but controversial task of the edition by Stackmann and Bertau (1981) was to exclude the 'pseudo-Frauenlob' material, some of which remains unedited (for a full listing of *Spruch* texts and melodies ascribed to Frauenlob see Brunner and Wachinger).

Frauenlob's huge influence on his contemporaries was due to his musical prowess as much as to the extravagantly recondite texture of his poetry. He is the only singer to have the distinction of being portrayed twice by the illustrator of the Manessische Liederhandschrift (*D-HEu* Pal.germ.848), once as director of a group of nine instrumentalists (f.399; for illustration *see* MINNESANG, fig.2) and once as the instructor of a younger singer, Regenbogen (f.381). However, while the texts have been subjected to intense literary scrutiny in recent years, the melodies have not received corresponding attention, and discussion of the relationship between the two has largely been absent.

Frauenlob composed in the three genres of 13th-century German singers: Minnelied, *Leich* and *Spruch*. The melodies to the love songs have been lost, but reliable 14th-century transcriptions in Messine notation survive for his three *Leichs* and for five of the ten *Spruchtöne*; the Kolmarer Liederhandschrift (*D-Mbs* Cgm 4997) contains three more, but in unreliable versions. As each *Spruch* melody could be re-used indefinitely for new religious and political contexts, these melodies had the widest influence and distribution. Stackmann's critical edition identifies 122 'genuine' Frauenlob stanzas in the *Langer Ton*, his most important melody (ex.1); but it was also used for about 200 other surviving stanzas.

The *Spruch* melodies (all in canzone form) follow the late 13th-century fashion for composing long stanzas. In Frauenlob's case this length gives rise to phrases of considerable scope and complexity, since he did not rely on the repetition of melodic sections (for example the addition of a third *Stollen* at the end of the stanza) as much as his contemporaries did. Instead, Frauenlob shaped each *Ton* dynamically by using a delayed, systematic rise (*steig*/*ascensus*) towards and descent (*val*/*descensus*) from the highest note in the ambitus. The point in the *Abgesang* at which the highest note is reached defines the individual character of each *Ton*. It also constitutes the point of greatest emotional emphasis in the text, which the singer/author usually reserved for the statements that he wanted to stress. This technique was used by earlier singers (notably Stolle and Wernher) and by contemporaries (Rumelant), but with Frauenlob,

Ex.1 Frauenlob's *Langer Ton* in the version of *D-Mbs* Cgm 716, ff.185*r* –189*r* (15th century)

(m.) and (w.) denote masculine and feminine verse cadences and a/d and f, etc. denote rhyme scheme

whose use of a *gradualis ascensus* in the *Langer Ton* was admired by Johann von Neumarkt (?1364), it is more consistent and deliberate (ex.1). In one *Ton*, which is entitled *Würgendrüssel*, the rise and fall covers a range of almost two octaves.

The three *Leichs* push the formal possibilities of the genre to new limits. Like earlier *Leichs*, Frauenlob's *Marienleich* (in which the singer first praises the Virgin Mary, then adopts her persona himself) is organized in paired stanzas (versicles) of which two groups (versicles 5–7 and 13–15; 8 and 16) use recurring melodies that divide the work up into two main sections, a *doppelter Cursus*. But the listener is distracted from the higher structure by individual versicles of unprecedented length (up to 40 lines, compared with the norm of eight lines) and strophic intricacy. Their cyclical arrangement according to the eight modes (2½ cycles) helps convey an overall structure and gives the *Leich* a liturgical feel that sets it apart from the others. This is a fitting medium for Frauenlob's strange ideas – the distractingly sensual depiction of Mary's erotic encounters with God is legitimized by their concealed higher meanings – and the work, undoubtedly Frauenlob's masterpiece, has been compared to a gothic cathedral.

The structure of the other two *Leichs* has yet to be satisfactorily explained; both use shorter versicles and correspondingly simpler melodies, some of these recurring at wide intervals in a way that suggests there was originally some kind of overall sectioning (Bertau, 1980–81, suspects hidden polyphony). Compared with the 'visionary' melodies of the *Marienleich*, those of the devotional *Kreuzleich* seem to rely heavily (and innovatively) on exclamatory expression, even word-painting. The discursive *Minneleich* (treating themes of love, alchemy and the male imagination) favours a terser melodic style reminiscent of Meister Alexander's *Minneleich*, which is echoed in versicles 20–21.

MICHAEL SHIELDS

Frazzi, Vito (*b* S Secondo Parmense, 1 Aug 1888; *d* Florence, 7 July 1975). Italian composer, theorist and musicologist. He studied in Parma and taught at the Florence Conservatory (1912–58), where for a time he was acting director, and where his pupils included Dallapiccola and Bucchi. From 1932 to 1963 he also taught at the Accademia Musicale Chigiana, Siena. His most characteristic earlier works reflect his association around 1920 with Pizzetti, whose influence is evident in many smaller pieces and in the general approach to music drama revealed in *Re Lear* (a somewhat eccentric adaptation of Shakespeare in which Cordelia appears only as a corpse and an offstage voice). Frazzi was seldom, however, a slavish imitator of Pizzetti: his style shows many individual traits, notably a fondness for patterns derived from the octatonic scale of alternating tones and semitones, which was also the main subject of his stimulating theoretical writings. His rhythms, too, show independent thinking in their sometimes extreme fluidity; for example, the evocative piano piece *Madrigale* (1921) begins with 11/16 in the right hand and 9/16 in the left. Among his published compositions (many remain in manuscript), the songs merit special attention: they range from Pizzettian miniature dramas like *Catarí, Catarí* (1918), with its refined harmony and deliberately obsessive melodic figuration, to such compelling smaller items as *La preghiera di un clefta* (1921) and the ballad-like *Il cavaliere* (1932). Of the orchestral pieces, the *Preludio magico*, with its disembodied, modal arabesques and static repeated triads, may show Frazzi being influenced by his most gifted pupil. The most important of his stage works is *Don Chisciotte*, in which he broke away from the rather uniform, declamatory style of *Re Lear* towards a far less Pizzettian manner, rich in harmonic subtleties and lively, skilfully woven vocal ensembles.

WORKS
(*selective list*)

Stage: Re Lear (op, 3, G. Papini, after W. Shakespeare), 1922–8, Florence, ?Comunale, 29 April 1939; L'ottava moglie di barbablù (D. Cincelli), Florence, 1940, destroyed; Don Chisciotte (op, 6 scenes, Frazzi, after M. de Cervantes and M. de Unamuno), 1940–50, Florence, Comunale, 28 April 1952 [scenes can also be perf. separately]; Le nozze di Camaccio (1, Frazzi and E. Riccioli, after Cervantes), 1953, unperf. ballet; much incid music

JOHN C.G. WATERHOUSE

Freddi, Amadio [Amedeo] (*b* Padua; *fl* 1594–1634). Italian composer. A pupil of Asola, he was a singer at the basilica of S Antonio, Padua, from January 1592, and *maestro di cappella* of Treviso Cathedral, 1615–26, Vicenza Cathedral, 1626–32, and S Antonio, Padua, from 1632. While at Treviso his choir is known to have sung at establishments other than the cathedral, including the convent of S Teonisto: on one occasion, in 1624, *maestri di cappella* and singers from Venice and G.F. Anerio from Rome also performed with the Treviso choir, suggesting that Freddi had wide connections.

All Freddi's secular music dates from his earlier years, most of his sacred music from his later years. The latter is in the modern concertato style. His *Messa, Vespro e Compieta* is a particularly interesting collection, for it affords one of the earliest examples of mixed vocal and instrumental scoring (violin and cornett are added to the five voices) for psalm and mass music by a provincial composer in Italy. It foreshadows what became the norm in modest church music two decades later: it does not require large resources yet is varied in colour. The mass displays the instruments by opening with solos and a duet for them – a hint of the instrumental introduction to later orchestral masses – while the psalm *Nisi Dominus* is craftsmanlike in its use of counterpoint and recurring harmonic and melodic material. Indeed Freddi was careful not to let his psalm music degenerate into plain and characterless chordal writing: the *Magnificat* from the psalms of 1626 is largely contrapuntal, with robust and interesting melodic lines and some pronounced word-painting at the only point that the text affords the opportunity – 'dispersit superbos'. In his solo motets

(1623) Freddi adopted the expressive manner of several composers in and near Venice.

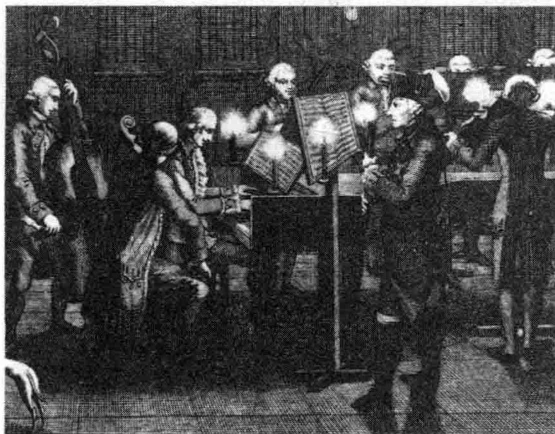
JEROME ROCHE

Frederick II, King of Prussia [Friedrich II; Frederick the Great] (*b* Berlin, 24 Jan 1712; *d* Potsdam, 17 Aug 1786). German monarch, patron of the arts, flautist and composer. His father, Friedrich Wilhelm I, was alarmed at his son's early preference for intellectual and artistic pursuits over the military and religious. In spite of being supervised day and night and in the face of his father's rages and corporal punishments, Frederick managed, partly through the complicity of his mother and his older sister Wilhelmina, to read forbidden books, to affect French dress and manners and to play flute duets with his servant. As a seven-year-old he was permitted to study thoroughbass and four-part composition with the cathedral organist Gottlieb Hayne. Wilhelmina, also musically talented, joined him in impromptu concerts. On a visit to Dresden in 1728 the prince was overwhelmed at hearing his first opera, Hasse's *Cleofide*; there he also first heard the playing of the flautist J.J. Quantz, who soon thereafter Frederick IIbegan making occasional visits to Berlin to give Frederick flute lessons. The king tolerated such amusements for a while, but by 1730 his disapproval had hardened to prohibition.

On 4 August 1730, in his 18th year, Frederick attempted to escape to England. The result was his imprisonment and the beheading of one of his 'accomplices' in his presence. Instead of breaking, the prince became more sober and orthodox. In 1733 he reluctantly married the bride chosen for him, Elisabeth Christina of Brunswick. He took command of a regiment and immersed himself so thoroughly in statecraft that he eventually won the confidence of even his father. But he had no intention of giving up his interests: at his residence in Ruppin he maintained a small group of instrumentalists; the occasional lessons with Quantz continued; he appointed C.H. Graun as general court musician in 1735; and in 1736, when he moved to Rheinsberg, 17 musicians moved with him, including C.H. and J.G. Graun, Franz and Johann Benda, Christoph Schaffrath and J.G. Janitsch. Among his visitors were Algarotti, Maupertius, Fontenelle, Lord Baltimore, Gravesande and Voltaire.

When Frederick finally acceded to the throne on 31 May 1740 he plunged into social and political reforms, military conquest and the rehabilitation of Prussian arts and letters, all at once. Hardly two months after his accession he took the first steps towards establishing the Berlin Opera: C.H. Graun, now in the official capacity of Kapellmeister at the handsome salary of 2000 thalers a year, was dispatched to Italy to employ singers for the Prussian court, and the royal architect G.W. von Knobelsdorf, having been unofficially commissioned during the Rheinsberg years, was commanded to begin work on a monumental opera house. In the meantime opera flourished in a temporary theatre. Other agents, such as Voltaire and Algarotti (both of whom were Frederick's established confidants and correspondents), were commissioned to engage actors and dancers in Paris and more singers from Italy, along with machinists, costumiers and librettists. Amid this ferment, when the Emperor Charles of Austria died on 20 October, Frederick immediately began plans which culminated in his invasion of Silesia, the first of the many military campaigns through which he transformed Prussia into a great modern state. When Graun returned to Berlin with his Italian troupe of singers in March 1741, Frederick was on the battlefield. Indeed, in the first years of his reign Frederick enlarged both Prussia's geographical and cultural boundaries, with equal verve.

C.P.E. Bach, having already performed regularly at Rheinsberg, joined the court orchestra officially in 1740 as first cembalist; Quantz, released from his position in Dresden, was appointed in 1741 at the remarkable salary (for an instrumental musician) of 2000 thalers yearly (his Dresden salary had been 250 thalers). Christoph Nichelmann was retained in 1744 as second cembalist. In 1754 some 50 musicians, excluding singers for court intermezzos and members of the opera chorus, were in Frederick's employ: about 40 instrumentalists and eight solo singers, in addition to C.H. Graun as Kapellmeister and chief composer for the opera, and J.F. Agricola as court composer. Quantz was flautist, chamber composer and director of the instrumental soirées. Three of the solo singers in 1754 were castratos: Giovanni Carestini, Antonio Uberi (Porporino) and Paolo Bedeschi (Paulino). Benedetta Molteni, later Agricola's wife, had been prima donna until 1748, when her position was usurped by Giovanna Astrua. (Astrua's salary was 6000 thalers, higher than that of a cabinet minister; C.P.E. Bach, the most important musician that Frederick ever employed, drew a salary of 300 thalers during the same period.)



The new opera house on the avenue Unter den Linden, whose replica still stands in Berlin, was opened on 7 December 1742. From that date to the outbreak of the Seven Years War in 1756, the standard season featured two new operas by Graun and an occasional work by Hasse, composers who were the foremost representatives of Italian opera in Germany. Most of the rest of the year was filled with intermezzos, *Schäferspiele*, pastorales or serenatas, all usually composed as pasticcios; throughout the year instrumental music was performed in the king's chambers, usually by no more than eight or nine musicians. The soloist at these soirées was either Frederick or Quantz; the music consisted almost always of some

concertos or sonatas for flute, with Frederick and Quantz again as favoured composers.

In the successful but bitter Seven Years War (1756–63) Frederick gradually became 'der alte Fritz', inflexible and reactionary. Instrumental music at the court stagnated: Nichelmann left in 1756, C.P.E. Bach – whose true importance Frederick never perceived – in 1767. From March 1756 to December 1764 no operas were produced at the Berlin Opera House; and from the end of the war to Frederick's death in 1786 almost all the opera productions there were revivals of pre-war works. C.H. Graun died in 1759; his place was taken after the war by Agricola, but without the title of Kapellmeister. Agricola mounted three operas of his own, but these were mere imitations of Graun's and were held in open contempt by Frederick. When Agricola died in 1774 the direction of the opera passed to the unwilling C.F.C. Fasch, again without the title of Kapellmeister; and in 1776 until Frederick's death Fasch was replaced by J.F. Reichardt, the first person to receive the title of Kapellmeister since Graun's death. The atmosphere of decay and rigidity was relieved briefly by the arrival in 1771 of Gertrud Elisabeth Mara as prima donna; it was she who broke down Frederick's prejudice against German singers.

The quality and scope of Frederick's patronage was fundamentally coloured by his own accomplishments as flautist, composer and librettist. A consideration of all extant criticism of his playing and a study of the music he played leads to the conclusion that he was far above average as a performer, especially in adagios. All his compositions date from before the Seven Years War; in some of the orchestral works he left the inner parts to be filled in by others. His model in flute sonatas and concertos was Quantz, and through him the sonatas of Tartini and solo concertos of Vivaldi. In his dramatic music Frederick followed the style of Graun. Frederick's works are likely to surprise the listener with their assurance and charm. The exact number of his compositions is difficult to determine, owing to the difficulty of separating his work from that of the artists he employed. Though he intended his works to be performed only before himself, there have been many editions of them since his death.

Not surprisingly, Frederick also wrote, sketched and suggested librettos. He probably took part, at least as an adviser, in the preparation of most librettos which Graun set while in his service. His *Montezuma* (1755), written in French prose and translated into Italian verse by the court poet Giampietro Tagliazucchi, is probably the best libretto ever set by Graun. Frederick also wrote for Graun his *Silla* (1753) and parts of *I fratelli nemici* (1756) and *Merope* (1756), all of which Tagliazucchi translated, and he sketched the plots of Leopoldo de Villati's *Coriolano* (Graun, 1749) and Tagliazucchi's *Il tempio d'amore* (Agricola, 1755).

Concert with Frederick II as flute soloist

The most lasting musical accomplishments of Frederick's court were those of the composers employed or influenced by him. In addition to the figures already mentioned, F.W. Marpurg and J.P. Kirnberger, Berlin musicians and theorists not directly in Frederick's employ but certainly under his influence, might be considered musical spokesmen of Frederick's rationalist philosophy. Frederick gave his views on music in his *Lettres au public* (Berlin, 1753). To Frederick is also owed the origin and stimulus of Bach's sublime *Musical Offering*, based on a theme of the king's invention on which Bach improvised while on a visit to Potsdam in 1747.

WORKS

E. EUGENE HELM/DEREK McCULLOCH

Frederick, Cassandra (*b* c1741; *d* after 1779). ?English mezzo-soprano and harpsichordist. She may have been the daughter of a Mrs Frederica who sang in the pasticcio opera *L'incostanza delusa* at the New Theatre in the Haymarket early in 1745. Cassandra was an infant prodigy as a harpsichordist; she played Handel keyboard concertos for her own benefit at the New Haymarket on 10 April 1749 at the reputed age of five and a half, and at Hickford's Room on 29 April 1750. She and her mother gave two concerts at Amsterdam in July 1750. She studied singing under Paradies, and was engaged by Handel for his oratorio season of 1758, when she appeared in revivals of *The Triumph of Time and Truth* (Deceit), *Belshazzar* (Daniel), *Jephtha* (Storgè), *Judas Maccabaeus* (Israelite Man) and *Messiah*. On the last day of 1757 Lord Shaftesbury wrote that Handel 'has just finished the composing of several new songs for Frederica his new singer, from whom he has great expectations'. These were the five additional songs (adapted from opera arias) first sung in *The Triumph of Time and Truth* on 10 February 1758; their compass is from *b*♭ to *f*♯″. She sang in Arne's *Alfred* at Covent Garden and Drury Lane early in 1759, and in the following year in *Judas Maccabaeus* and Jommelli's *L'isola disabitata* at the Great Room, Dean Street, where she appeared also as a harpsichordist and on 14 January 1760 played an organ concerto. In July 1768 she gave a concert at Marylebone Gardens. She had a benefit in Arne's pasticcio *Love in a Village* at the New Haymarket on 3 October 1775. Burney mentioned her as still living in 1779. She married Thomas Wynne, a landowner in south Wales, and is said to have greatly influenced the musical education of her nephew Joseph Mazzinghi.

WINTON DEAN

Fredrici, Gustaf. A fictitious Swedish composer of the late 18th century invented by the director of music at Uppsala University, Sven-Erik Svensson (1899–1960), who claimed to have 'rediscovered' Fredrici, allegedly a pupil of Mozart and Haydn, in a memoir by a heretofore unknown Viennese music master with the generic name Josef Müller. Svensson not only published Fredrici's 'biography', he also 'found' and 'edited' Kreisler concertos for violoncello and piano, a symphony, a rondo for piano forte, and a clarinet quintet. While the deception was quickly discovered, the music demonstrates Svensson's skilful sense of 18th-century style.

Fredutii, Massimiliano. Italian musician. *See under* ACCADEMICO BIZZARRO CAPRICCIOSO.

Free counterpoint (Ger. *freier Satz*). Contrasted with STRICT COUNTERPOINT, the free application of the principles of consonance and dissonance and of part-writing in the general working out of contrapuntal ideas.

See also COUNTERPOINT.

Freed, Isadore (*b* Brest-Litovsk [now Brest], 26 March 1900; *d* New York, 10 Nov 1960). American composer of Belarusian birth. Taken to Philadelphia at the age of three, he graduated in music from the University of Pennsylvania (1918); among his early teachers were Bloch and Josef Hoffman. He taught at the Curtis Institute (1924–5), then went to Europe to continue his composition studies with d'Indy and Vierne. Returning to the USA in 1933, he became active in promoting new music (both secular and for the Jewish liturgy) and founded the first American Composers' Laboratory (Philadelphia, 1934). He taught at Temple University (1937–46) and was chairman of composition at the Hartt School of Music (1944–60). In 1943 he received the Society for the Publication of American Music award. Freed's music is pandiatonic and neo-classical; his most important contribution was as a composer of Jewish sacred music. He was the author of *Harmonizing the Jewish Modes* (1958). (E. Steinhauer: *A Jewish Composer by Choice: Isadore Freed*, New York, 1961)

RUTH C. FRIEDBERG

Freed, Richard (Donald) (*b* Chicago, 27 Dec 1928). American critic and music administrator. He studied at the University of Chicago (Bachelor of Philosophy 1947). After working as an assistant to Irving Kolodin at the *Saturday Review* (1962–3) and as a staff critic for the *New York Times* (1965–6), he was assistant to the director of the Eastman School (1966–70) and director of public relations for the St Louis SO (1971–2). He was executive director of the Music Critics Association, 1974–90, and served as a contributing editor of *Stereo Review* (from 1973), record critic for the *Washington Star* (1972–5) and the *Washington Post* (1976–84) and consultant to the music director of the National SO (from 1981). Freed is the author of numerous articles and reviews for newspapers in New York, Washington, Chicago, Minneapolis and St Louis, and has written for such journals as *Gramophone* and *Musical America*. His other writings include liner and programme notes for the Philadelphia, St Louis, Houston, Baltimore and National symphony orchestras, and for RCA Victor and Vox Records; he has also developed and annotated a series of historical recordings for the Smithsonian Institution from 1985. He has received ASCAP-Deems Taylor and Grammy awards for his concert and record notes.

PAULA MORGAN

Freedman, Harry [Frydmann, Henryk] (*b* Łódź, 5 April 1922). Canadian composer of Polish birth. As a teenager he was an avid listener to big band jazz, though he focussed his creative attention on painting, which he

studied at the Winnipeg School of Art (1935–40). His burgeoning interest in music, however, eventually led him to discontinue his studies in the visual arts in favour of lessons in the clarinet, harmony and counterpoint. Following a period of service in the Royal Canadian Air Force he enrolled in the Toronto Conservatory to study the oboe with Perry Bauman and composition with John Weinzweig. Through extensive score study the young Freedman gained an understanding of a variety of compositional styles and techniques, including serialism. He undertook very little other formal study in composition, although he worked briefly with Messiaen and Copland (Tanglewood, 1949) and Krenek (Toronto, 1953). From 1946 to 1969 he played the english horn in the Toronto SO, but he resigned this position in order to devote his energies to composition full-time. In 1970 he became the orchestra's first composer-in-residence.

Freedman's most important early work, *Tableau* (1952), is a rather self-conscious exploration of the 12-note technique inspired, like many subsequent compositions, by a painting. The remaining years of that decade, however, are characterized by a rejection of serialism and a quest for a unique musical language. During this period he experimented with various styles, some of which suggest the influence of composers such as Bartók, Prokofiev, Stravinsky and Copland. *Fantasia and Dance* (1955, rev. 1959) has been described by Freedman himself as 'impressionistic, with overtones of Hindemith and Stravinsky'. His large orchestral work, *Images* (1958), evokes the line, colour and mood of three paintings, but enhances the visual experience through vivid orchestration and dramatic textural changes. The experiments of the decade culminate in the Symphony no.1 (1960), which both pays homage to its illustrious predecessors by adhering to many time-honoured symphonic traditions and strikes out in new directions suggested by his study of Bartók's *Contrasts*, Divertimento for Strings and Concerto for Orchestra.

During the 1960s Freedman began to incorporate jazz, aleatory techniques and electro-acoustic sounds into his compositions. At the same time, he returned to the serial technique he had rejected earlier, now exploring its compatibility with his own musical aesthetic. The Japanese-influenced work *Tokaido* (1964) employs serialism with unprecedented strictness. Later in the decade he retreated to the more flexible use of serialism that would characterize his later compositions. Canada's centennial year, 1967, provided the impetus for a wealth of new works, the ballet *Rose Latulippe* notable among them. The score is extraordinarily effective in capturing the diversity of moods and events in the colourful plot. Another centennial work, *Tangents*, is a collection of symphonic variations based on two sets: the first, a 12-note pitch class set; the second, a ten-digit numerical set applied to metre, duration and articulation.

From the first tentative glimpses of jazz elements in *Two Vocalises* (1954), Freedman progressed through the use of jazz instruments and idioms in the 1960s (*Armana*, 1967; *Scenario*, 1970), to the thoroughly eclectic *Pan* (1972). This work features an exotic mixture of jazz, blues, samba, flamenco, rock, Amerindian text and comic theatre. Performers are asked to move about on the stage, gesture and interact with each other. The use of aleatory techniques increased sharply during this period as well. *Scenario* relied heavily upon the improvisational skills of jazz musicians, but with *Klee Wyck* (also 1970) improvisation takes its place in the symphonic idiom as a vital and integral component. *Graphic I* (1971) is arguably Freedman's first avant-garde composition, exploring the relationships between electronic and acoustic sounds, and between composed and aleatory music. Freedman's output is remarkably eclectic. He writes convincingly in widely disparate styles, such as those influenced by traditional formal models (Third Symphony, 1983), jazz (*Another Monday Gig*, 1991), ethnic musics (*A Dance on the Earth*, 1988) and musical theatre (*The Explainer*, 1976). His solid craftsmanship, versatility and integrity have earned him a place as one of Canada's most respected composers.

GAIL DIXON

Free jazz. A term applied to the avant-garde jazz of the 1960s, particularly the work of Ornette Coleman, Cecil Taylor and Albert Ayler, and the late work of John Coltrane. The name derives from the title of Coleman's album *Free Jazz* (1960), an extended, free-form group improvisation for two pianoless jazz quartets, which exercised enormous influence on the jazz vanguard both in the USA and elsewhere. Another term for this music was 'the New Thing'.

Free jazz is a collective term applied to a very wide range of highly personal, individual styles. It is probably best defined by its negative characteristics: the absence of tonality and predetermined chord sequences; the abandonment of the jazz chorus structure for loose designs with predefined clues and signposts; an avoidance of 'cool' instrumental timbres in favour of more voice-like sounds; and often the suspension of jazz pulse for a free rubato. New timbres were sought either by distorting the sound of traditional jazz instruments (e.g. the 'shrieking' saxophone styles of John Gilmore and Pharoah Sanders) or by adopting or inventing unusual instruments (Roland Kirk and the Art Ensemble of Chicago); electronic instruments or manipulation, on the other hand, were generally avoided. Free-jazz drummers explored 'multidirectional' rhythms implying various metres at once, and interacted with other musicians by supplying percussion colour or textures rather than a uniform pulse. The shape of the performance was often determined by the performers' powers of endurance, the piece coming to an end when energy sagged.

Melody became much more varied and fragmented as long, sustained notes alternated with rapid flurries or timbral effects; many players concentrated on producing textures rather than melody, while others created internal 'dialogues' or call-and-response patterns in different registers. Special emphasis was placed on collective improvisation, although at any given time one performer usually functioned as soloist. Some groups revealed a pronounced theatrical element, whether the naive exoticism of Sun Ra's Arkestra or the sophisticated parodistic skits of the Art Ensemble of Chicago.

By casting aside most features of the bop style, free-jazz players harked back in many respects to simpler forms of jazz and earlier music in which elements derived from African music predominated. This in turn permitted an unusual influx of ethnic musics into jazz, examples being the 'world music' of Don Cherry, the West African 'talking drums' approach cultivated by Ed Blackwell and the pygmy yodelling techniques adopted by the singer Leon Thomas. Several free-jazz musicians such as Roswell Rudd and Steve Lacy bypassed bop entirely, entering the avant garde directly from dixieland jazz; others such as the tenor saxophonist Albert Ayler emerged from the gospel and folk traditions. The style was loosely linked to the Black Power movement in the USA, partly because of the radical political outlook of some of its practitioners and advocates (e.g. Archie Shepp and LeRoi Jones) and partly owing to the explosive, expressionistic nature of the music itself.

Although highly regarded by the critics, free jazz was not commercially viable in the USA and many of its important players resided at least temporarily in Europe. There an indigenous school of free jazz developed, particularly in West Germany, where it was linked with the aleatory art music of the time (e.g. in the works of Bernd Alois Zimmermann). In the early 1970s, as jazz-rock became a more popular genre, the free-jazz movement seemed spent, but it underwent a resurgence later in the decade. Older groups, such as Old and New Dreams (consisting of former sidemen of Coleman) were able to re-form, while others, including Sun Ra's Arkestra and the Art Ensemble of Chicago, reached a wider public than before. Specialist labels were established to enable free-jazz musicians to record. New players added fresh dimensions to the style: for example, Anthony Braxton and Anthony Davis obliterated the boundaries between free jazz and contemporary European art music; the World Saxophone Quartet created a successful blend of free jazz and the swing style; and the Ganelin Trio introduced a wild theatricality, as well as elements of its native Russian musical traditions, into the genre. Musicians not directly associated with free jazz, such as Pat Metheny (who performed and recorded with Coleman in 1985–6), made use of its stylistic devices; others experimented with new hybrids, an example being the 'free funk' of James 'Blood' Ulmer.

Whereas in the 1960s the terms avant-garde jazz and free jazz were synonymous, in the 1970s and 1980s many musicians preferred the label 'avant-garde', since the word 'free' was misleading: in many instances their music was highly organized. As free jazz became more familiar and was absorbed into the standard repertory, however, the term avant-garde ceased to describe the genre accurately; moreover, the use of an alternative term obscured the many streams linking the free-jazz musicians of the 1980s with the pioneers Coleman, Taylor, Ayler and Coltrane. By then free jazz was firmly established not only as a completed phase of jazz history but also as a continuing and developing style with a great many avenues still open for creative exploration.

J. BRADFORD ROBINSON

Freeman, Bud [Lawrence] (*b* Chicago, 13 April 1906; *d* Chicago, 15 March 1991). American jazz tenor saxophonist and leader. He took up the C-melody saxophone to participate in activities of the Austin High School Gang and began playing professionally in the summer of 1924. In December 1927 he participated in the definitive Chicago-jazz sessions recorded by McKenzie and Condon's Chicagoans, including *China Boy* (OKeh). He toured with Ben Pollack (1928) and worked freelance with Red Nichols and others in Chicago and New York. By 1930 he had formed an original, unmannered style, free of 'novelty' effects and with a distinctive jazz timbre. From the mid-1930s Freeman performed and recorded frequently with well-known popular and jazz orchestras, including those of Tommy Dorsey (1936–8) and Benny Goodman (1938). Thereafter he toured and recorded with small groups combining dixieland and swing styles, initially with his own Summa cum Laude Orchestra (1939–40) and then travelling the world, working freelance for several decades. He made the first of many trips to England in 1962, and toured Australia, New Zealand and Japan with Eddie Condon in 1964. After playing in the World's Greatest Jazz Band (1968–74), he resumed his itinerant career until shortly before his death. Inspired by Coleman Hawkins, to whose conception of timbre he was deeply indebted, Freeman flourished in dixieland ensembles, his instrument serving to replace or supplement the trombone in coordination with the trumpet and clarinet in the front line. For much of his career his melodic conception was coarse, and indeed some of his early Chicago-jazz solos could be imagined as fitting into a rhythm and blues setting years later. In his last decades Freeman altered this approach, striving for a smooth tunefulness with less rhythmic bite, as is heard in an album with the guitarist Bucky Pizzarelli, *Buck and Bud* (*c*1975). He was the author of two booklets of amusing anecdotes, and an engaging autobiography with R. Wolf: *Crazeology: the Autobiography of a Chicago Jazzman* (Urbana, IL, 1989).

JAMES DAPOGNY/R

Freeman, David (*b* Sydney, 1 May 1952). Australian director. After study at Sydney University (1971–4) he founded Opera Factory in Sydney (1973), Zürich (1976) and London (1981–98). Developing rigorous methods of preparation and rehearsal, Opera Factory emphasized the elements of manufacture and creativity in productions assembled under specific conditions. Freeman's highly physical productions for Opera Factory required great virtuosity of acting. Those of the classics generally involved a search for the points at which the dynamics of the work could directly engage a contemporary audience. Many plumbed new depths of emotion while creating humour that bordered on the farcical. An impressive roster of innovatory stagings in London included Cavalli's *Calisto*, a conflation of Gluck's two *Iphigénie* operas and the Mozart-Da Ponte trilogy, of which *Così fan tutte* received a striking contemporary interpretation. In association with the London Sinfonietta (1984–91), a number of 20th-century works were given, notably Nigel Osborne's *Hell's Angels*, Birtwistle's *Yan Tan Tethera* and *Punch and Judy*, Tippett's *The Knot Garden*, Ligeti's *Aventures* and *Nouvelles aventures* and Maxwell Davies's *Eight Songs for a Mad King*.

Freeman's productions for the ENO include Monteverdi's *Orfeo* (1981) and *Il ritorno d'Ulisse* (1989), Glass's *Akhnaten* (1985), Birtwistle's *The Mask of Orpheus* (1986) and B.A. Zimmermann's *Die Soldaten* (1996). A co-production of Prokofiev's *The Fiery Angel* (1992) was taken from the Mariinsky to Covent Garden and San Francisco. His spectacular, large-scale productions in-the-round at the Royal Albert Hall of *Madama Butterfly* (1998) and *Tosca* (1999) – for the former the arena was flooded – were highly acclaimed.

BARRY MILLINGTON

Freeman, John (*b* 1666; *d* London, 10 Dec 1736). English tenor, tenor-countertenor and composer. He was a leading theatre singer from 1692 to 1700, when he entered the Chapel Royal. He also sang at St Paul's Cathedral and at Westminster Abbey, where there is a memorial tablet to him and his wife in the west cloister. From manuscripts and printed songs we know that he sang in Purcell's music for *The Fairy Queen*, *The Prophetess* (*Dioclesian*), *Don Quixote*, *The Indian Queen* and *Bonduca* and was a soloist in his 1692 St Cecilia ode and in his 1695 birthday ode for the Duke of Gloucester, *Who can from joy refrain?* These parts demand a range of *e* to *a*′, with an occasional *b*♭′, and several have a trumpet obbligato. A Handel autograph names him as a soloist at George II's coronation.

A few songs composed by him were published in songbooks in the 1690s; the tune of his popular success 'Pretty parrot, say' was used in *The Beggar's Opera*.

OLIVE BALDWIN, THELMA WILSON

Freeman, (Harry) Lawrence (*b* Cleveland, 9 Oct 1869; *d* New York, 21 March 1954). American composer and conductor. He studied music as a child and began his professional career as a church organist. He studied the piano with Edwin Schonert and theory and composition with Johann Beck, founder and conductor of the Cleveland SO. In the early 1890s Freeman moved to Denver and decided to devote himself to composition. He first wrote salon pieces in the conventional style of the period and then turned to larger forms. Although not the first black composer to write an opera (from all evidence that achievement belongs to John Thomas Douglass), he is

historically important as the first to conduct his own works with a symphony orchestra (1907, Minneapolis) and the first to compose a substantial number of operas. His output includes 14, of which five were performed on stage or in concert between 1893 and 1947. He wrote in a neo-romantic style and made free use of black folksong idioms. Freeman was active as a teacher at Wilberforce (Ohio) University (1902–4), a theatre-orchestra and choral conductor and a director of musical comedy companies, particularly the Pekin Theatre Stock Company in Chicago and *The Red Moon* Company in New York. In 1911 he founded the Freeman School of Music in New York and in 1923 the Freeman School of Grand Opera.

WORKS
(*selective list*)

Stage (all ops with librettos by composer unless otherwise stated): The Martyr, 1893; Zuluki, orig. entitled Nada, 1898; The Octoroon, 1904; Valdo, 1905; Captain Rufus (musical, J. Green, A. Anderson), 1907; The Tryst, 1909; Voodoo, 1914; Vendetta, 1923; Slave Ballet from Salome, 1932; Zulu King (ballet), 1934

Choral: The Slave, sym. poem, chorus, orch, 1925; 2 cants.

Numerous stage songs, ballads, inst waltzes, marches

MSS in *US-Whu*

Principal publishers: S. Brainard, Chicago Music, Witmark

EILEEN SOUTHERN

Freeman, Paul (Douglas) (*b* Richmond, VA, 2 Jan 1936). American conductor. He studied at the Eastman School (BM 1956, MM 1957, PhD 1963), with Ewald Lindemann at the Hochschule für Musik, Berlin, and with Richard Lert and Pierre Monteux; while still a student at Eastman, he was director of the Hochstein Music School (1960–66) and conductor of the Opera Theater of Rochester (1961–6). As director of the San Francisco Community Music Center from 1966 to 1968, he conducted first the San Francisco Conservatory Orchestra and then the San Francisco Little SO, meanwhile winning the Dimitri Mitropoulos International Conductors' Competition (1967) and conducting *Tristan und Isolde* at the Spoleto Festival (1968). He was associate conductor of the Dallas SO (1968–70), conductor-in-residence of the Detroit SO (1970–79) and music director of the Victoria SO (1979–89). In 1987 Freeman was founding conductor of the Chicago Sinfonietta, a position he holds together with the post of music director of the Czech National SO, which he assumed in 1996. He has appeared with the LPO, New York PO, Moscow PO, Warsaw PO, Cleveland Orchestra, Chicago SO and Berlin SO, and with numerous regional and radio orchestras. His greatest impact has been in recordings, for many of which he has arranged financing and production. Freeman has made over 200 albums, including a series of music by black composers for CBS, the complete Beethoven, Haydn and Mozart piano concertos with Derek Han and a set of music from Broadway. In 1974 he won the Koussevitzky International Recording Award for the Cordero Violin Concerto.

DOMINIQUE-RENÉ DE LERMA/CHARLES BARBER

Freeman, Robert (Schofield) (*b* Rochester, NY, 26 Aug 1935). American musicologist. He received the BA from Harvard in 1957 and began graduate studies at Princeton University, where he worked with Mendel and Strunk; he took the MFA at Princeton in 1960, and the PhD in 1967, with a dissertation on currents of change in Italian opera from 1675 to 1725. He taught at Princeton from 1963 until 1968, when he joined the music faculty of MIT. In 1973 he was appointed professor of musicology and third director of the Eastman School of Music, Rochester, and in 1997 he became president of the New England Conservatory in Boston.

Freeman's principal area of scholarly inquiry was 18th-century Italian opera and the reform of the libretto in the first third of the 18th century; he also worked on piano music of the early 19th century, and has given piano recitals in both the USA and Europe. Since moving into musical education his interests have moved towards educational issues and arts funding.

PAULA MORGAN

Freeman, Roderick. *See* FRIML, RUDOLF.

Freer, Eleanor Everest (*b* Philadelphia, 14 May 1864; *d* Chicago, 13 Dec 1942). American singer, composer and writer on music. She played the piano, sang, composed and performed from an early age. After initial study at home with her musician parents, she travelled to Paris in 1883 to study singing with Mathilde Marchesi, composition with Benjamin Godard, and art song interpretation with Herbert Bemberg, Widor and Massenet. She became the first qualified teacher of the Marchesi method in the USA. After teaching privately in Philadelphia and at the National Conservatory, New York, she married (1891) and moved to Chicago, where she became a prominent organizer of and participant in cultural and philanthropic events. She also pursued further composition study with Ziehn (1901–7). An advocate of opera sung in English, she founded the Opera in Our Language Foundation, which later became the American Opera Society of Chicago. Her tireless efforts to gain recognition for American composers included the establishment of the David Bispham Memorial Award to motivate the composition and performance of American opera. A prolific writer, she wrote numerous articles championing American teachers, performers and composers. Her book, *Recollections and Reflections of an American Composer*, is unpublished.

By the end of her life, Freer had written and published 137 songs, 13 pieces for vocal ensemble, 11 chamber operas and 19 piano works. Her compositional style reflects her European training, displaying the colourful chromaticism of the late 19th century. Her harmonic

choices, particularly in the song accompaniments, are often surprising; an avoidance of strong dominant-tonic relationships is characteristic. Her most extended work is a song cycle on Elizabeth Barrett Browning's *Forty-Four Sonnets from the Portuguese*.

SYLVIA EVERSOLE

Free reed. A type of REED consisting of a flexible metal tongue, fixed at one end to a stationary plate. When activated by air pressure or suction, the tongue vibrates freely through a slot cut in the plate (in some cases the reed is cut out of the plate and lies flat within it). This contrasts with a 'beating reed' such as an organ reed-pipe tongue or clarinet reed, which beats against a flat surface having an aperture cut into it that is narrower than the tongue. Each free reed gives only one note, a different reed being required for each note of the instrument. However, since the reed is free to vibrate with varying degrees of amplitude in response to the amount of air pressure used, free reed instruments are nevertheless capable of dynamic inflection. The pitch of the note is produced by the natural frequency of the reed, either alone (as with the harmonica), or in some cases (*see* SHENG) in a coupled system combining the frequencies of both reed and pipe (in the manner of beating reed instruments). Timbre can be affected by the shape and design both of the reed itself and of the resonating chamber. The principle of the free reed has existed for many centuries in East Asia but was not extensively used in the West until the late 18th century, when it began being applied to organs.

For further discussion of free reeds *see* ACCORDION; CONCERTINA; HARMONICA; ORGAN, §III, 3; REED INSTRUMENTS; and REED ORGAN. Other free reed instruments entered in this dictionary include the *khāen*, keledi, mouth organ, *saenghwang* and *shō*.

BARBARA OWEN, RICHARD PARTRIDGE

Frege [née Gerhard], **Livia** (*b* Gera, 13 June 1818; *d* Leipzig, 22 Aug 1891). German soprano. A pupil of Pohlenz, she made her début in 1832 in a concert given by Clara Wieck at the Leipzig Gewandhaus, and in the following year she made her stage début, also at Leipzig, in the title role of Spohr's *Jessonda*. After singing in Dresden in 1835 she was engaged at the Royal Opera House, Berlin where she had a great success as Donna Elvira, but on her marriage in 1836 she retired from the stage and sang only in concerts. At Leipzig she maintained a choir of 50 voices and an orchestra, led by Ferdinand David and conducted by Lange; her house was a meeting-place for musicians and artists. She was a close friend of Mendelssohn and frequently performed his music, to which her pure, light voice and classical style were admirably suited; she sang his last song, *Nachtlied* (Eichendorff), at the first Gewandhaus concert after the composer's death in 1847.

ELIZABETH FORBES

Fregiotti, Dionigio [Dionisio] (*b* Rome, ?*c*1663; *d* Rome, after 1717). Italian singer and composer. He was one of the seven children of François Fraichot, described as a Burgundian painter, who had left Besançon about 1650 to settle in Rome. Dionigio and his elder brother Michele were listed as members of the Congregazione dei Musici di S Cecilia in 1684. Michele had applied unsuccessfully for a post as tenor in the papal choir the previous year, and did finally enter the choir on 11 October 1690; he died in Rome on 18 February 1709. Dionigio Fregiotti was also a tenor; he is mentioned as singing at S Maria Maggiore from 1685, and at S Giacomo degli Spagnuoli from 1697 to July 1716. He is last mentioned in the archives of that church on 31 January 1718.

In 1704 Fregiotti composed a cantata, *L'eresia deballata da S Tomaso d'Aquino*, for the celebrations in honour of St Thomas Aquinas held annually by the Dominicans of S Maria sopra Minerva; only the libretto, by Paolo Rolli, survives (copy in *I-Rli*). Fregiotti's extant works, in the Chigi collection *(I-Rvat)*, consist of a serenata for three voices (S, S, A) and strings, a large-scale cantata for two sopranos and strings, and 50 chamber cantatas for soprano and continuo (one with violin). The cantatas are in the style current in Rome at the time, including usually two da capo arias, but there are some rather surprising structural features; one cantata, *Voi che del Tebro*, includes an aria with a fully written-out harpsichord part. Handel seems to have admired Fregiotti's music and quoted from it several times.

JEAN LIONNET

Fregni, Mirella. *See* FRENI, MIRELLA.

Frei, Hans [Franchi, Giovanni Maria] (*b c*1500/10; *d c*1565). Lute maker, possibly of German origin, active in Italy. He was married to Margarita del fu Michele Strazarolo and was in Bologna from at least 1546 until at least 1564. He is sometimes described as 'Romano' in Bolognese documents, and may have previously worked in Rome. He has frequently been confused with another Hans Frei, son-in-law of Albrecht Dürer, who may perhaps have been the father of the lute maker; the error originated with Baron in 1727.

Frei's workshops are recorded first in the parish of San Giacomo dei Carbonesi (by 1548), and later in the Via San Mamolo close to that of Luca MALER (from 1554). The San Mamolo workshop was continued after Frei's death by his sons, Giovanni Giulio (*d* 1622) and Gasparo (*d* 1626). In spite of numerous records of real estate purchase and financial transactions, Frei's business seems to have been on a much smaller scale than Maler's, but his lutes were renowned. John Evelyn recorded a visit to Bologna in 1645: 'This place has likewise been famous for *Lutes* made by the old Masters *Mollen* (i.e. Maler),

Hans Frey, Nic: Sconvelt, which were of extraordinary price, & were most of them German Workmen'. In 1648 Jacques Gautier mentioned in correspondence with Huygens (see Jonckbloet and Land) that Frei had worked at Bologna a little later than Luca Maler.

There are eight lutes attributed to Frei, in Bologna, Copenhagen, Kremsmünster, Prague, Stockholm, Vienna and Warwick. Those in Vienna (two in the Kunsthistorisches Museum) and Warwick are very alike and are almost certainly genuine. They have long narrow bodies of few ribs, characteristics of the 'Bologna' style which they share with the Maler's lutes. Their labels are handwritten in large gothic letters, giving only Frei's name. All three have been converted to 11-course Baroque lutes, though they probably originated as large tenor lutes with only six courses. The Bologna instrument (in the Civico Museo Medievale) is dated 1597 and may be the work of Giovanni (Hans) Giulio Frei. The other instruments exhibit variations in shape and labelling style, and may not be genuine.

LYNDA SAYCE

Freiberg, Gottfried Ritter **von** (*b* Vienna, 11 April 1908; *d* Vienna, 2 Feb 1962). Austrian horn player. He studied with his uncle, Karl Stiegler, whom he succeeded in 1932 as principal horn of the Vienna PO and professor at the Musik Akademie. For 30 years Freiberg's distinctive tone and generous portamento were inseparably associated with the orchestra's style. He personified the Vienna horn school, in particular through his adherence to the single F horn with twin-piston valves at a time when advances in instrument design, bringing greater technical facility and accuracy at the expense of the Vienna horn's unique tonal qualities, had been generally adopted elsewhere.

In 1943 he gave the first performance of Richard Strauss's Second Horn Concerto. During the war years Freiberg, who was partly Jewish, was able to survive in his post only through a dispensation from the Nazis; after the war, not needing de-Nazification, he was accepted by the occupying powers as president of the orchestra (1946–7). He was twice president of the Wiener Waldhorn Verein, which he sometimes directed, and for which he composed a number of works. Among his pupils were Roland Berger and Wolfgang Tomböck, his successors as Vienna PO principals. The decline in Freiberg's health, which led to his early death, was exacerbated not only by the war and by postwar orchestral politics but also by the constant demand for technical perfection in the early days of LP recording. This he found at variance with his philosophy of taking necessary risks in the cause of expressiveness: 'Ein Hornist ohne Gickser ist kein Hornist' ('A horn player who never cracks is no horn player').

OLIVER BROCKWAY

Freiburger Orgelbau. German firm of organ builders. Alois Späth (*b* Ennetach, nr Mengen, 16 June 1825; *d* Ennetach, 7 Aug 1876) was apprenticed to, then succeeded Vitus Klingler in Ennetach, building six organs of up to 18 stops each in his region. His son Franz Xaver (1859–1940) set up an independent shop in 1882 following ten years of working as a journeyman with five regional builders. Together with his brother Albert he founded Gebrüder Späth in 1891, a prosperous firm which built some ten organs per year until the mid-1920s, after which Franz's sons Karl (1899–1971) and August (1908–1979) carried on its work. In 1964 August separated from the firm and reorganized its Freiburg branch under the name of Freiburger Orgelbau; his son Hartwig (*b* Ennetach, 8 Feb 1942) was trained in the shop and received his Master Organ Builder certificate in 1970. By the late 1990s the firm, headed by Hartwig, had built over 180 organs, of which 25 are in other countries, and undertaken about 30 restorations. Some notable instruments (all of three manuals) include those built for St Anne, Annapolis, Maryland (1975); St Clara, Berlin (1981); St Josef, Rheinfelden (1985); Auferstehungskirche, Fürth (1989); Kalvarienbergkirche, Vienna (1990); St Paul, Dinkelsbühl; and St Georg, Riedlingen, Württemberg (1996). While attentive to the southwest German organ building heritage, the firm has embraced a diversity of styles and has made a speciality of 'reciprocal sliders' (*Wechselschleifen*) allowing each stop of a one-division organ to be drawn on either of two keyboards, thus increasing the number of registration textures available.

KURT LUEDERS

Freier Satz (Ger.). *See* FREE COUNTERPOINT.

Freillon Poncein, Jean-Pierre (*fl* ?Dauphiné province, 1700–08). French writer on music and composer. According to Fétis he was *prévost* (deputy) *des hautbois* of the *grande écurie* at the French court, but he does not appear in court records. His treatise *La veritable maniere* (Paris, 1700) was the first published French tutor for the oboe, baroque recorder and flageolet. It was dedicated to his patron Pierre Bérulle, Viscount of Guyancourt, an official in the province of Dauphiné, suggesting that Freillon Poncein was based there rather than in Paris. He apologized for his lack of skill in language, and indeed the wording and organization of the tutor are often confusing. Addressing 'those who are not in a position to have the most skilful masters', he sought to teach both the rudiments of music and the basics of dance composition, including bass movement, adding a second part at the 3rd or 6th, and cadences. He assumed equal temperament for woodwind instruments, although he acknowledged the existence of major and minor semitones. The fingering charts are shown by schematic figures for each instrument; trill fingerings are described for the first octave only. Of considerable interest are the instructions for ornaments and articulation (like those of Loulié and Jacques Hotteterre, using the tonguing syllables *tu* and *ru*). The 41 preludes (for oboe, for recorder, and 'of several kinds, which are good for beginners') also double

as studies for learning 'wide and extraordinary intervals'. The treatise includes four short pieces in a charming, consonant style: *L'Embarras de Paris*, in 6 parts; a Trio for recorders; *Bruits de guerre*, in 3 parts, with scoring indications for violins, oboes, bass violins, bassoons, trumpets and timpani; and a *Passacaille* and two minuets for recorder. Freillon Poncein also wrote an *Abrégé de géographie* (Paris, 1708).

WRITINGS

La veritable maniere d'apprendre a jouer en perfection du haut-bois, de la flute et du flageolet, avec les principes de la musique pour la voix et pour toutes sortes d'instrumens (Paris, 1700; Eng. trans., 1969)

Freinsberg, Jean Adam Guillaume. *See* GUILAIN, JEAN ADAM.

Freire [Pinto Freire], **Nelson (José)** (*b* Boa Esperança, 8 Oct 1944). Brazilian pianist. He gave his first recital at the age of four, studied in Brazil with Nise Obino and Lucia Branco, and, after winning the International Competition in Rio de Janeiro at 13, with Bruno Seidlhofer in Vienna. In 1964 he won the Vianna da Motta Prize in Lisbon and the Dinu Lipatti Medal in London. He made his début in London and other European capitals in 1968, going to the USA in 1969 (playing with the New York PO and as a soloist with the RPO tour under Kempe), to Israel in 1970 and to Japan in 1971. He has subsequently performed much of the piano duo repertory with Martha Argerich, and has recorded with her works by Bartók and Ravel. His ample, unforced sound, the brilliance of his technique and the cleanness of his musical taste have made a strong impression, and he has developed a notable reputation as an interpreter of Chopin, whose complete Preludes he has recorded to acclaim.

MICHAEL STEINBERG/R

Freisslich [Freislich], **Johann Balthasar Christian** (bap. Immelborn, nr Bad Salzungen, 30 March 1687; *d* Danzig [now Gdańsk], 1764). German composer, half-brother of MAXIMILIAN DIETRICH FREISSLICH. In 1719 or 1720 he became director of the Hofkapelle in Sondershausen, where he wrote a *St Matthew Passion* (performed in 1720 at St John, Danzig), a cycle of cantatas and a short opera. He was sent to Dresden for a year by his employer, Prince Günther Schwarzburg. He went to Danzig about 1730 and in 1731, on the death of his half-brother Maximilian, he became Kapellmeister at St Mary, remaining in that position to the end of his life.

As a prolific composer and a skilful Kapellmeister Freisslich played an important role in the city's cultural life. Many of his compositions were connected with notable anniversaries, such as the 300th of the city's freedom from the Teutonic Knights, the 100th of the Peace of Oliva, and others at the Gymnasium Dantiscanum. He also wrote several cantatas (1733, 1755, 1763) connected with the Polish kings August II and III, and numerous cantatas on the appointments of teachers, the election of members of the town council, and for weddings and burials of eminent citizens. His music has been praised for its warmth and fluency, its accomplished imitative writing and its wide-ranging coloratura (even in bass parts); the lyrical style suggests Italian influence.

WORKS

Die verliebte Nonne (op); Was hör ich (serenata): *D-SHs*
Passio Christi (B.H. Brockes), solo vv, chorus, orch, *PL-GD*
St Matthew Passion (M. Vulpio), solo vv, chorus, orch, *GD*
Mag, B solo, orch; 13 chorales, chorus, insts: *GD*
Jauchzet, jauchzet (Ps c), *D-SHs*
Cants.: Cycle of 66 for church year, *SHs*; 14 sacred cants., solo vv, 1–2 choruses, orch, *PL-GD*; 14 occasional cants., 1–2 choruses, orch/solo vv, insts, *GD*; 2 secular cants., *D-SHs*; 8 sacred cants., doubtful authenticity, *PL-GD*
Lost: *c*40 occasional and sacred cants., text only, *GD*; St Matthew Passion; Ich ruf zu dir, chorale; O ewige Weisheit, school cant.; Turbabor, occasional cant.; 8 chorales, doubtful authenticity: formerly *GD*; Sonata, hpd, cited in Breitkopf catalogue, 1763

PAWEŁ PODEJKO

Freisslich [Freislich], **Maximilian Dietrich** (bap. Immelborn, nr Bad Salzungen, 6 Feb 1673; *d* Danzig [now Gdańsk], 10 April 1731). German composer, half-brother of JOHANN BALTHASAR CHRISTIAN FREISSLICH. He went as a boy, probably in about 1686–7, to Danzig, where he sang in the choir at the Marienkirche and studied composition as a pupil of the Kapellmeister, J.V. Meder. When in 1699 Meder had to flee from his creditors, Freisslich succeeded him as Kapellmeister and held the post to the end of his life, when he was succeeded by his half-brother. During his 32 years of activity he wrote much religious music and many secular works. The texts of his compositions, including a cycle of church cantatas (1708–9), were printed at Danzig, but the only surviving composition is a *Dixit Dominus* of 1726 (*PL-GD*), written in a sound contrapuntal style.

Besides Johann Balthasar Christian, two more of his brothers (sons of a pastor, Johann Weigold Freisslich, 1619–89) were musicians: Johann Thobias (*b* 1675), an organist in Salzungen, and Johann Wigaläus (*b* 1679), a member of the Kapelle at the Marienkirche, Danzig, from 1701.

Freistimmigkeit (Ger.: 'free-part style'). *See* TEXTURE.

Freitas, Frederico (Guedes) de (*b* Lisbon, 15 Nov 1902; *d* Lisbon, 12 Jan 1980). Portuguese composer and conductor. He studied the piano, the violin and composition at the National Conservatory, graduating in 1925. That year he won a government scholarship to study in several European countries. He was appointed conductor in 1935 of the newly formed Portuguese radio chamber orchestra and in 1940 founded the Lisbon Choral Society. He was conductor of the Oporto SO (1949–53) and of the Portuguese RSO from 1956.

He combined his career as a composer with that of conducting (both in Portugal and abroad), teaching and research into early Portuguese music. He wrote music of many kinds, from simple popular songs to elaborate vocal or instrumental music, and all his works show a melodic talent and a mastery of polyphony, polytonality and atonality. Freitas was essentially a composer for the theatre. His many revues, operettas and incidental music are important contributions to the Portuguese theatre of the 1930s and 40s, when few academic musicians worked in such genres. Most of his music is no longer played, although some of the songs he wrote for the theatre and cinema are still a success. Some of the ballet music he composed for the Verde Gaio Company in the 1940s, though not often staged, is played frequently in concert versions.

WORKS
(selective list)

DRAMATIC

Ops: A flor de S. Roque (vaudeville, L. Silva and A. Barbosa), Lisbon, Avenida, 1928; O meu menino (vaudeville), Lisbon, Avenida, 1931; A Senhora da Saúde (operetta, 2, S. Tavares, A. Amaral, X. Magalhães), Lisbon, Maria Vitória, 1931; Alvorada do amor (operetta, V. Rajanto), Lisbon, Ginásio, 1932, collab. A. Melo; De capa e batina (operetta, 3, L. Ferreira, F. Santos, L. Rodrigues and Magalhães), Lisbon, Politeama, 1933; O timpanas (fantasy operetta, 3, F. Bermudes), Lisbon, Avenida, 1933; O solar das picoas (operetta, 3, Ferreira, Santos), Lisbon, Trindade, 1934, collab. W. Pinto; O eremita (op, 1, P. Lemos), 1957; A igreja do mar (radio op, Lemos), Lisbon, S Carlos, 1960; Don João e a máscara (musical scene, 1, A. Patrício), Lisbon, Tivoli, 1960; Fandango (operetta)

Ballets: Dança, perf. 1935; Noite de S João, 1938; O muro do derrete, perf. 1940; A dança da menina tonta, perf. 1941; Imagens da terra e do mar, perf. 1943; Danças para a comemoração do VIII centenário da tomada de Lisboa, 1947; Nazaré, perf. 1948; Fado corrido, 1949; Arremedilho de Guimarães, perf. 1953; Suite medieval, 1958; A dama do pé de cabra, 1975–6; Bella (choreographical moment)

Other works incl. incid. music, *c*20 revues and film scores

VOCAL AND INSTRUMENTAL

Orch: Poema sobre uma écloga de Virgílio, str, 1922; A lenda dos bailarins, sym. poem, 1925; Prelúdio sobre um pregão de Lisboa, str, 1926; Danças portuguesas, suite no.1, 1928, rev. 1936; Nazaré, sym. sketch, 1935; Suite colonial, 1936–8; Ribatejo, choreog. poem, 1938; 2 danças do sec. XVII, 1939; Quarteto concertante, 2 vn, 2 vc, str, 1942; Homenagem a Chopin, 1949; Fl Conc., 1954; Canção do berço, 1959; Suite medieval, 1959; Sinfonia, 1961–2; A S. Francisco Xavier, 1964; Fantasia concertante, org, chbr orch, 1969; Alexandre herculano: in memoriam, 1977

Choral: Luzdor (prol to op), female vv, orch, 1923; Missa solene, 4 solo vv, chorus, orch, 1940; Marcha dos voluntários da India, 1v, chorus, orch, 1954; Missa Regina mundi, female vv, 1954; Exultabit cor meum (liturgical motet), female chorus, hmn ad lib, 1958; Stabat mater, female vv, org, 1971; Asas atlânticas (hymn), chorus, orch, 1972; Missa a S. Cristóvão, 2 equal vv, hmn, 1973; Tríptico vicentino (G. Vicente), chorus; other hymns, marches and songs

Songs (1v, pf): Amo, amas (R. Dario); Boas noites (J. de Deus), 1924; Chuva de Setembro (E. de Castro), 1924; Estabas triste (Buendia y Manzano), 1924; 2 sonetos de Camões, 1924; Bailada de moças (J. Zorro), 1927; 4 cantigas à gente moça (M.L. Almeida), 1927; Cantares de amigo (D. Dinis, Mendinho), 1927; Cantigas da Minho Terra (M. Lopos de Oliveira), 1934; 4 cantares de amigo (Dinis, P. Meogo, Mendinho, Zorro), 1938; A última cantiga (A.L. Vieira), 1941; 3 peças (A. Quadros), 1943; Bailia de amor (Dinis), 1958; 10 conções galegas, 1965, rev. 1968; Maria da Conceição, 1972

Solo vocal: Cant. (M. de Neves), Mez, orch, 1946

Chbr and solo inst: Allegro appassionato, vn, pf, 1922; Prelúdio e fuga, pf, vn, vc, 1923; Sonata, vn, vc, 1923; Sonata, vn, pf, 1923; Nocturno sobre soneto de A. Quental, vn, pf, 1924; Berceuse, vn, pf, 1925; Nocturno, vc, pf, 1926; Sonata, vc, pf, 1926; Str Qt, 1926; Sonata, vn, pf, 1946; Wind Qnt, 1950; 3 peças sem importância, vn, pf, 1954; Sonata, org, 1963; Canção triste, vc/va, pf, 1964; Dança dos palhaços, vn, pf, 1964; 13 variações, vc, pf, 1969

JOSÉ CARLOS PICOTO/ADRIANA LATINO

Freitas Branco, Luís de. *See* BRANCO, LUÍS DE FREITAS

Freithoff, Johan Henrik (*b* Christiansand [now Kristiansand], 1713; *d* Copenhagen, 24 June 1767). Norwegian violinist and composer. He received his first training from his father, Baltazar Freithoff, town musician in Christiansand. At the age of about 20 he set off on travels 'in Europe, Asia and Africa' which lasted until the end of 1742. Little is known of where he was or what he did, but he was certainly in Smyrna and Constantinople and, since he later published translations from both English and French, it is possible he visited England and France. Of more importance to his career as a musician is a period of residence in Italy which would seem to be indicated by the inscription 'Livorno a 20 de Fevrier 1739' on the manuscript of his sonata for two flutes and cello (*S-Skma*).

At the end of 1742 Freithoff wrote to the king in Copenhagen asking for a position, preferably in the civil service. It does not appear that his applications were successful, but he nevertheless went to Copenhagen, where in 1744 he created a sensation with his violin playing. In May 1744 he was appointed court violinist extraordinary, a special appointment which did not require his day-to-day attendance as a member of the court orchestra but reserved his services as a virtuoso performer for special occasions. In 1745 he was granted his wish of a position as secretary in the Danish chancellery. He died of consumption; in a poem published later in 1767 in a Copenhagen newspaper his death was lamented as a loss to music equal to that of Telemann, who had died the following day.

As a composer Freithoff appears to have limited himself to writing music which could be useful to him as a performer – with few exceptions his compositions are chamber music. He is above all the virtuoso violinist writing well and confidently for his instrument in an attractive style that might be described as moving away from the Baroque towards the Classical. If he wrote any church music it seems not to have survived; his only vocal music consists of a few theatre songs.

WORKS

Edition: *J.H. Freithoff: The Complete Works*, ed. B. Kortsen (Bergen, 1974)

principal sources: DK-Kk, S-L, Skma

2 sonatas, 2 vn, bc; 4 trios, 2 vn/fl, vc; Trio, 2 fl, vc

Sonata, vn, bc; Andante avec les variations, vn, bc [perhaps 3rd movt of sonata]; Sonata, fl, bc; Minuet, vn solo

2 minuets, hpd; Gavotte, hpd; 8 songs for comedies perf. at Royal Theatre, Copenhagen, and pubd in 18th-century anthologies

JOHN BERGSAGEL

Frémart, Henri (*b* late 16th century; *d* ?Paris, after 1646). French composer and priest. According to Gantez his family came from Picardy. He is first heard of in 1611 as master of the children at Rouen Cathedral, where Titelouze was organist. He held this post until 17 November 1625 even though he was appointed director of the choir school at Notre Dame, Paris, on 10 November 1624. At Rouen he showed a certain lack of respect for authority: in 1624 he wrote a chanson criticizing the master of the brotherhood of Ste Cécile in whose presence he had it sung by his choirboys at a *puy de musique*. Frémart was nevertheless 'highly esteemed as a composer'. He applied for the position at Notre Dame because he felt that his talents justified such a promotion, but he failed to keep the chapter of Rouen Cathedral informed of his actions, and he had to leave Rouen hastily. He remained in his post at Notre Dame until 8 October 1640, when he was replaced by Jean Veillot. In retirement he apparently continued to live in Paris, and he probably carried out duties as a priest. On 1 January 1646, when the publication of his masses by Ballard was complete, he presented them to the chapter of Rouen Cathedral. Frémart was proud by nature and had a fine presence – one report states that he 'resembled an emperor'. Mersenne and Gantez, who both valued his works highly, placed him on a par with men such as Aux-Cousteaux, Gobert, Cosset and Bouzignac. As a composer he is known only by eight masses, which are distinguished by excellent imitative counterpoint enlivened by frequent syncopations. They are unequivocally tonal, like the works of Aux-Cousteaux and Cosset, but Frémart surpasses them through the supple elegance of his writing.

WORKS

all published in Paris

Missa, 4vv, 'Ad placitum' (1642)
Missa, 4vv, ad imitationem moduli 'Confundantur superbi' (1642)
Missa, 5vv, ad imitationem moduli 'Paratum cor meum Deus' (1642)
Missa, 5vv, ad imitationem moduli 'Domine refugium' (1643), lost
Missa, 5vv, ad imitationem moduli 'Eripe me, Domine' (1643)
Missa, 6vv, ad imitationem moduli 'Jubilate Deo' (1645); San, Bs, Ag, ed. in Chartier
Missa, 6vv, ad imitationem moduli 'Salvum me fac, Deus' (1645)
Missa, 4vv, ad imitationem moduli 'Verba mea auribus percipe' (1645)

DENISE LAUNAY/JAMES R. ANTHONY

Frémaux, Louis (Joseph Felix) (*b* Aire-sur-Lys, Pas de Calais, 13 Aug 1921). French conductor. His studies at Valenciennes Conservatoire were interrupted by the war, in which he served with the Resistance in France and with the Foreign Legion in East Asia (1945–7), being twice decorated with the Croix de Guerre. He resumed musical studies in 1949 at the Paris Conservatoire, including conducting with Louis Fourestier, and in 1952 won a *premier prix* for conducting. His début the following year led to his appointment as musical director of the Monte Carlo opera orchestra (1956–65). He introduced concerts at the Monaco Royal Palace from 1959, and made a number of award-winning recordings with this and other orchestras. After his first concerts in Britain and Japan in 1968 he became musical director of the Rhône-Alpes PO at Lyons (1969–71). He was made a Chevalier of the Légion d'Honneur in 1969, the year he became music director of the CBSO where (until 1978) he developed both the spirit and the style of its performances, and achieved its wider recognition on a tour of eastern Europe in 1972. His recordings with the CBSO, mainly of French music, include an impressive account of Berlioz's Requiem with the CBSO Chorus he founded in 1974, Fauré's Requiem and music by Ibert, Poulenc and Satie. After leaving the CBSO Frémaux was principal conductor of the Sydney SO, 1979–81, and principal guest conductor, 1981–5. His performances were frequently distinguished by freshness, suppleness and, in the French repertory, an airy brilliance.

NOËL GOODWIN

Fremstad, Olive [Rundquist, Olivia] (*b* Stockholm, 14 March 1871; *d* Irvington-on-Hudson, NY, 21 April 1951). American mezzo-soprano and soprano of Swedish birth. Of illegitimate birth, she was adopted by an American couple of Scandinavian origin who took her to Minnesota. She studied in New York, and later in Berlin with Lilli Lehmann. After a notable stage début as Azucena with the Cologne Opera (21 May 1895) she sang there as a mezzo for three years, during which she also appeared in minor roles in the Bayreuth *Ring* of 1896 and made a mark at the Vienna Opera as Brangäne. After a further period of study in Italy she joined the Munich Opera for three years, from 1900, singing a great variety of parts, among which her Carmen was specially popular. During the Covent Garden seasons of 1902 and 1903 she made a very favourable impression in various Wagner roles. On 25 November 1903 she made her Metropolitan début as Sieglinde, and remained at the house with increasing success for 11 consecutive seasons, singing under both Mahler and Toscanini in her Wagner repertory, which soon included Isolde, Brünnhilde and Kundry. She also appeared as Meyerbeer's Selika, Carmen, Tosca, Santuzza, Salome and Gluck's Armide; the last two roles she introduced to America. She was still at the height of her powers when disagreements with the manager, Gatti-Casazza, caused her to leave the Metropolitan after singing Elsa on 23 April 1914. This final performance provoked one of the most remarkable demonstrations of affection and admiration in the history of the house.

Her vocal qualities were transcendent; it is clear from the fascinating account given by her secretary, Mary Watkins Cushing, that her vivid temperament made her

often a difficult colleague as well as an interpreter of genius. Her few recordings, made in 1911–12, are constrained and unworthy of her reputation; the best of them is 'O don fatale' from *Don Carlos*. Thea Kronberg, the heroine of Willa Cather's *The Song of the Lark*, is a fictional portrait of Fremstad.

DESMOND SHAWE-TAYLOR/R

French, Jacob (*b* Stoughton, MA, 15 July 1754; *d* Simsbury, CT, May 1817). American composer, tune book compiler and singing master. In 1774 he attended a singing school taught by William Billings at Stoughton. After working as a farmer and serving in the Continental Army, he seems to have led a peripatetic life, teaching singing schools in many different New England towns between 1781 and 1815. French compiled three tune books: *The New American Melody* (Boston, 1789), *The Psalmodist's Companion* (Worcester, MA, 1793) and *Harmony of Harmony* (Northampton, MA, 1802). These contain at least 96, and perhaps as many as 122, pieces by him, including about a dozen of anthem length. *The Worcester Collection of Sacred Harmony* (Worcester, MA, 1786) introduced French's two other known works; one of these, a setting of the Revelation text 'I beheld, and lo, a great multitude', is his earliest and perhaps most strikingly successful anthem. Although few of French's compositions achieved wide popularity in his time, all his music has been published (ed. D.C.L. Jones, New York, 1998). His music marks him as a composer of imagination and power, able to work on a larger scale than most of his American contemporaries.

RICHARD CRAWFORD/NYM COOKE

French, (William) Percy (*b* Cloonyquin, Co. Roscommon, 1 May 1854; *d* Formby, 24 Jan 1920). Irish singer and songwriter. He studied at Trinity College, Dublin (1872–80), and had a career in engineering, but in 1890 turned to writing and performing. His shows included story-telling, humorous sketching and singing, sometimes accompanied on the banjo. He moved to London in about 1900, and performed throughout Britain as well as on the Continent and in North America. One of French's first songs was *Abdulla Bulbul Ameer* (1877), which became widely popular in a pirated edition (he had failed to register the copyright). His numerous Irish comic ballads include *Phil the Fluther's Ball* (1889), *Slathery's Mounted Fut* (1889), *Mat Hannigan's Aunt* (1892), *Are ye right there, Michael?* (1902) and *Come back, Paddy Reilly* (1912). He wrote the words to several other songs, including *The Mountains o' Mourne* (1896), as well as to four musical plays which were mostly composed or arranged on traditional airs by W.A. Houston Collisson (1865–1920), who was a pianist with whom he frequently performed.

ANDREW LAMB

French Guiana. South American country that is administratively an Overseas Department of France. It has a total area of 85,534 km², over 90% of which is covered by the great Amazonian forest, and a population of 173,000 (2000 estimate). The first inhabitants were Amerindians who today number 4200 and are demographically on the increase. The largest population group in the country consists of Creoles, the local term for the descendants of slaves brought from Africa and not freed until 1848. The Creole culture is similar to that of neighbouring GUYANA, SURINAME and the West Indies. The Maroons, the third important group, are descendants of slaves who managed to escape in the 17th and 18th centuries and formed their own cultures with a very strong African component. Finally, this ethnically mixed society includes people of French, Asian, Lebanese, Haitian and Brazilian origin. The demographic mixture resembles that of Suriname, although there is a much more marked tendency in French Guiana for people to stay in their respective groups. There is little exchange between the different cultures (Amerindian, Creole, Maroon etc.), and they relate to tradition in different ways. However, Creole music of the West Indies and popular African music have become a kind of 'common music' among the younger generation of all cultural groups, due primarily to the influence of the media.

1. AMERINDIANS. The Amerindian peoples live in two different natural environments and speak six distinct languages. The Arawak and Palikur people belong to the Arawak linguistic family and live in the coastal area in the north of the country; the Emerillons and Wayãpi (Wayampi) are Tupi in language and culture and live in the south of the country; and the Wayana people, also living in the south on the Maroni river, and the Kalina (Kalihna or Galibi) people (the most numerous group and the most active in the Amerindian political movement) in the north at the mouth of the same river, speak Carib languages. The musical systems of the peoples of the south are very similar to each other, although the three ethnic groups have different historical origins. Cultural exchange is much less apparent among the people of the coast, the Arawak, Kalina and Palikur, who have been in continuous contact with colonization for three centuries.

All the Amerindian peoples of the Guianas distinguish between communal music, which accompanies dancing and the drinking of manioc beer, and individual music, which is played solo, has no particular kind of audience and does not require drink. Certain repertories are situated between these two poles. Within individual music, there are male repertories (usually flute tunes) and female repertories (love songs, lullabies), of which the latter are now performed with decreasing frequency. Among the Emerillons, Wayana and Wayãpi, the women sometimes accompany their men in communal song, but their place in the performance is clearly secondary. For these three ethnic groups of the south, the men initiate and are responsible for the music, while on festival days the women are chiefly responsible for providing the beer, which is served according to social codes ruling the relationship between music and drinking (Beaudet, 1992).

On the coast, the situation is different: Palikur women have their own extensive repertory of communal chants. This includes *wawapna* ('the song of the rattle; see illustration), where the triple metre is marked with small *waw* rattles fixed to long sticks, *mayapna* ('the song of the Maye', one of the Palikur founding groups), *wukikapna*, to accompany the cutting of hair after a death, and *kuwapna* ('the song of the butterflies'). The Kalina women also have a specific repertory associated with the various stages of the ceremonial mourning cycle; they mark the rhythm of these unison chants, with a slow isochronous pulsation produced by rattles on sticks called *ka:lawa:si*.

Apart from the rattles played by Palikur and Kalina women, all other Amerindian musical instruments are reserved for men. The sexual distinction of instrumental performance takes the form of an actual ban in the case of aerophones, conforming to a general law of Amerindian cultures in the three Americas (Beaudet, 1983). In the same way, as with most of the indigenous peoples of South America, the French Guianan Amerindians make a wide variety of flutes, trumpets and clarinets (see Jean-Louis and Collomb, 25–39), which often convey important social and religious meaning. These aerophones include characteristic instruments of the centre and north of Amazonia, such as the large *ture* clarinets (Beaudet, 1980 and 1989), as well as instruments more frequently found in the north and west periphery of Amazonia, for instance panpipes, sometimes played with a tortoiseshell. The Amerindians of southern French Guiana prefer rattles (*away* or *kaway*) made of thevetia (yellow oleander) seeds to mark the rhythm of their dances. The Kalina people give pride of place and significance in their mourning rituals to *sambula* drums, large double-headed instruments, probably of European origin. The first sequences of these rituals employ two distinct forms of music: six to eight men sing vigorously to the beating of their drums, while some ten women (their number increasing as the ceremony progresses) pound the long sticks of their rattles on the ground and sing a different repertory in shrill, plaintive tones (Kloos, 1975). Communal vocal music is held in high esteem. This always involves singing in unison, except among the Wayãpi, where the women, when singing with the men, perform a heterogeneous canon superimposed on the lower register of the men's vocal unison.

Palikur women – Cecilia Yoyo, Shabak Apush and Madeleine La Bonté – singing and dancing wawapna ('the song of the rattle'), Lower Oyapock, French Guiana, 1981; each of them is pounding the ground with a waw (a rattle on a stick)

In all these traditions, the repertories' origins are uncertain: they are said to belong to the world of myth or to derive from neighbouring groups. The method of composition most frequently described is a communication from forest or river spirits conveyed through shamans, whose musical inspiration is explicitly defined as mediation between village society and the world of supernatural powers.

The musical practice of the Wayãpi is clearly organized to correspond with the structure of society: there are instruments and repertories for every social level (individual, nuclear family, larger family group, village, regional group). Emerillon music, which is little known, should be understood primarily as an assertion of the people's present identity, a miraculous one in view of the demographic catastrophe of the past. Wayana socio-musical organization seems to centre around two focal points: shamanism and the important ritual of adolescent initiation, the *marake* (Hurault, 1968). The repertories and musical performances of the Palikur people are evidence of the federative dynamic that has shaped their identity for several centuries. This Arawak group is also involved in the production of folklore performances associated with cultural revivalism, as are Kalina and other Arawak peoples. Throughout the country, individual music is dying out faster than communal music, although the latter has been increasingly threatened by the pressure of the tourist industry.

2. Creoles. Creole musical performances have fallen into two large categories: the first, 'folkloric music' or 'local dances', consists of dances accompanied by song, led by drum ensembles, with rhythms of African origin; the second, 'typical music', comprises dance music played by bands made up of different instruments according to period and social class. These types of dance and music are of more pronounced European origin but have undergone local modification of the kind common in the West Indies (see Jean-Louis and Collomb, 73–90).

The 'local dances', originally danced by slaves, again divide into two subsidiary categories, depending on whether they are regarded as 'reserved' or 'frenzied'. The former could be danced before slaves' masters and even in drawing-rooms: examples are the *gragé*, found chiefly in the Sinnamary area, accompanied by circular frame drums of different sizes, and the *lérol*, a kind of quadrille accompanied by three drums and a rattle. The *kamougué* (also 'reserved') is a dance accompanied by two long

conical drums with single heads, which rest on the ground; the first drum, 3 metres long, is regarded as male and is used for rhythmic ostinatos (*foulé*). One drummer beats the skin with his hands while another strikes the body of the drum with *tibwa*, two short sticks. The other drum, considered female, is shorter and is used for playing various formulas described as *coupé*.

The *belya* and the *kaseko* ('break the body'), the most 'frenzied' dances, were originally performed by the slaves among themselves; only the *kaseko* really survives in French Guiana. Accompanied by a *tibwa* and two single-headed cylindrical drums, held between the knees, it is still sometimes danced in the evening in the yards of private houses in the suburbs of Cayenne or in small towns, but, like other folkloric dances, it is chiefly performed at spectacles associated either with the revivalist movement or with tourism (Blerald-Ndagano, 1996).

'Folkloric music' is associated with a strong sense of locality (it is said that the *gragé* of the Approuague is different from the *gragé* of Sinnamary), whereas the whole body of 'typical music' is felt by the Creoles to be unoriginal and 'copied' from the rest of the West Indies, and in fact the constitution of Creole instrumental ensembles, their musical genres and sometimes even the musicians themselves are from the Caribbean. The middle classes in Cayenne, like other Creole middle classes, have performed European art music with piano and violin, but their main musical life has been in ballroom ensembles. The make-up and repertory of these ensembles has changed in accordance with musical changes throughout the region.

In French Guiana, the most creative period was that of the gold rush at the end of the 19th century, when such ensembles proliferated. During the 20th century the banjo, clarinet, guitar, trombone, accordion, saxophone, electric guitar and synthesizer succeeded one another as the leading instrument of bands, which, depending on the period, played waltzes, mazurkas, schottisches, beguines, merengues, campas, kadens, reggae and finally zouk. The most original part of both 'folkloric' and 'typical' music has always been the words of the songs, in which the particular features of the Creole culture of Guiana could be expressed. The poetry and vigour of Guianan song are found in the repertory of drum-accompanied dances in the carnival procession (the *vidé*) and among the singers themselves. The best-known singers of the first half of the 20th century include Sabas, Lubin, the Volmar brothers and Ruffinel; Viviane Emigré may be considered representative of the 1980s (Play, 1989).

3. Maroons. Less numerous than in Suriname, most of French Guiana Maroons live along the Maroni river, where they fall into four large distinct groups: the Aluku (or Boni), the Djuka (or Aukan), the Paramaka (or Paramaccan) and the Saramaka (or Saramaccan). The Aluku, the last of these groups to form (at the end of the 18th century), live mostly in French Guiana. Although their histories are different, these peoples share many characteristics, particularly a marked African inheritance. Their multiple African origins have been synthesized into original forms, often incorporating elements of local Amerindian and Creole cultures. Creativity is another common characteristic, particularly evident in the arts (R. and S. Price, 1980). In musical life, this becomes evident in the high value placed on improvisation and the element of play, even in ceremonies (Hurault, 1968). Women and men alike enjoy the spontaneous creation of songs alluding to everyday life or accompanying heavy work; formerly men might have accompanied such songs with an *agwado*, a pluriarc with a resonator. The same instrument might also have led certain games.

The most important ceremonies of the Aluku (which bear the generic name of *pee*, 'play') are the *booko dei* funeral rites and the *puu baaka* marking the end of mourning (see Jean-Louis and Collomb, 49–68). They are usually led by an ensemble of three drums, the *gaan doon* ('big drum'), the *pikin doon* ('little drum') and the *tun*. These single-headed conical drums, often profusely ornamented with carving (Hurault, 1970), appear to be very similar to West African drums (see Jean-Louis and Collomb, 49–68). *Kaway* rattles are important rhythmic instruments in this ceremonial music; as their name and shape indicate, they are borrowed from the neighbouring Amerindian Wayana people. Funeral rites consist of a series of sequences (*mato*, *susa*, *songe*, *awawa*, *awasa*) mingling song, recitation, dances, demonstrations of virtuosity, challenges and improvisations. Besides these funeral ceremonies, there are many other occasions for performance: some are formal, like the other festivals, principally held with the aim of keeping in touch with the various gods, but the dances performed by young people for their own amusement (*aleke*) are also very popular (*Aleke Sapatia*, 1994). All these performances are of great sensuous, dramatic and emotional intensity. This vivacity and formal dynamism bear witness to a deliberate and successful synthesis between the African tradition claimed by the Maroons, the value they place on ludic creativity, the physical memory of their historic recovery of their liberty and the active incorporation of foreign elements. Young people coming back from urban areas may amuse themselves by imitating the rhythm of a cola-bottling machine on their drums (R. and S. Price, 1980); similarly, ritual demonstrations of agility during a *songe* may be performed either to the rhythm of the village drums or to cassettes of popular African music bought in the nearest Creole town.

JEAN-MICHEL BEAUDET

French horn (i). *See* HORN.

French horn (ii). *See under* ORGAN STOP.

French overture. A festive musical introduction for an opera, ballet or suite. The form combines a slow opening, marked by stately dotted rhythms and suspensions, with a lively fugal second section. It originated with Lully's ballet overtures of the 1650s and quickly became the sole pattern for French opera and ballet overtures. In its day it was much copied, borrowed and adapted, but gradually in the mid-18th century it gave way to more flexible, energetic or dramatic approaches, particularly the rival Italian sinfonia. The French overture is now regarded not only as a prominent Baroque form, but as an expression of the elegant tastes of 17th-century France, as an illustration of Lully's penetrating influence, and above all as the earliest important genre of prefatory music for the stage.

1. Structure and style. 2. Early history. 3. Later history.

1. STRUCTURE AND STYLE. Division into two parts is basic to the French overture. The main sections, each embraced by double bars and repeat signs, depend upon and balance each other partly because they are in complementary styles, and partly because the first ends on dominant harmony that calls for an answering structure with a tonic ending. In more than half the early examples and in many of the later ones, the second section ends with a brief echo of the first, recalling its style, pace and sometimes even its melodic content (e.g. Lully, *Alceste* overture, HAM no.224). This functions as a closing statement, rather like a codetta; and because it occurs before the repeat sign of the second section, it leaves the bipartite structure intact. Other additions usually found in later examples are set off by double bars either between the two sections or at the end. They may recall the general style of a main section, as in Purcell's overture to the 1692 Ode on St Cecilia's Day, or belong to a standard dance type, such as the minuet in Handel's overture to *Samson*. Generally such added sections lengthen the work without altering its balance or lessening the significance of the two principal sections.

The most conspicuous stylistic feature of the first section is its combination of a slow tempo (usually marked *grave* or *lent*) with dotted rhythms, often called *saccadé* (meaning 'jerked'). The dotted rhythms sometimes move along at differing paces, as shown in ex.1, and those in longer values invite exaggerated performance to bring all the short notes down to the same value (*see* DOTTED RHYTHMS and NOTES INÉGALES). This kind of rhythm

Ex.1 Lully: *Cadmus*, Overture

gave rise more than any other stylistic element to the descriptive adjectives commonly applied to the opening section: majestic, heroic, festive and pompous. In fact, these associations may have arisen from the halting footsteps employed in ceremonial processions. The *tirades* produce a similar effect. These upbeat flourishes (ex.1 bar 4) are found in many opening sections and were often performed even where not written. They herald the downbeats with an elegance perfectly suited to the court of Louis XIV. Although the general style of the opening section is homophonic, some contrapuntal activity is heard among the inner voices; occasionally homophony gives way almost completely to imitation, as in Lully's overture to the opera *Xerxes* (1660). Binary metre (¢ or C) is almost universal, and five-part texture is normal, though four-part is common in the early overtures. The overtures by later composers, as well as those composed or transcribed for keyboard instruments, often show free-voiced texture in both sections. A grand close on dominant harmony typically ends the first section.

The second section unfolds in a contrasting fugal style; entries come in rapid succession (ex.2), imitating at the octave, 4th or 5th, and develop a fleet but dignified motion of the full texture. Thus the two principal characteristics of the second section, speed (usually indicated by *vite* or *gai*) and imitation, make themselves evident at the outset. Later portions of the section, however, often become more homophonic, and in this respect resemble the Venetian canzona, the supposed ancestor of the fugal section (see below). Only one feature, in fact, is maintained throughout this section in almost all French overtures: a faster pace than that of the opening section. Other features commonly associated with the form are less pervasive and less universally employed. Ternary or compound metre (especially 6/4) is used for the second part of slightly more than half of all French

Ex.2 Lully: *Cadmus*, Overture

overtures. The texture of the second section is often less consistent than that of the first, and a few overtures even achieve a concertato effect, as between an instrumental trio and the rest of the orchestra (e.g. Handel's overture to *Teseo*). Hemiolas are often found at cadence points (e.g. overture to Lully's *Armide*). A tonic cadence concludes the second section unless it is followed by a separate Grave, in which case the former may end on dominant harmony, thus allowing the latter to function as a tonic return. Though deviations from this plan were common, the French overture remains a distinct and recognizable form because its most basic features (i.e. slow–fast contrast between sections, with dotted rhythms in the first and fugato in the second) are so obvious. Only when the form was passing out of favour did hybrid forms appear, usually with added sections or a mixture of French and Italian overture characteristics.

2. Early history. Although the French overture arose as a fresh combination of formal and stylistic practices of its time, it nevertheless had a forerunner in the entrées of earlier *ballets de cour*. These were march-like instrumental pieces (not whole sections of the ballet, for which the term 'entrée' was also used) that developed within the French tradition of theatrically unified court ballet, which began with Beaujoyeux's *Balet comique de la Royne* (1581). The entrées were short and ceremonious, usually bipartite, with rhythmically contrasting sections; each half was repeated, the first ending in dominant harmonies and the second returning to the tonic. The whole proceeded homophonically in a festive, declamatory style with many dotted rhythms. Either the second section or both parts were played as many times as required for the dancers to complete their initial promenade, a practice that may have been reflected later by the label 'reprise' (from 'reprendre', meaning 'to take up again') often inscribed over second sections of French overtures. Examples of entrées from the *Ballet de Madame* (1615) and *Ballet du roi* (1621), which survive in the Philidor Collection, are quoted by Prunières. Such pieces evidently gave rise to the earliest overtures: the *livrets* (programmes) of many *ballets de cour*, including *Balet comique de la Royne*, directed that performances were to begin with concerted instrumental music. Examples of this music have survived in the Philidor Collection from as early as the ballets *de la chienne*, *des senateurs* and *de la comédie* (1604, 1607 and 1608), and by 1640 such introductory pieces were entitled 'ouverture' (Prunières quoted from the 1640 *Ballet de Mademoiselle* and 1647 *Ballet des rues de Paris*). It is noteworthy that these early overtures not only show a structure and style nearly identical with those of the entrées but also immediately predate the fully developed French overture.

The notion of contrasting a fast concluding section with a slow beginning had been established in the 16th century in dance pairs such as the pavan and galliard. These dances, however, cannot be regarded as antecedents of the French overture, even though in style they resemble the later introductory pieces, often employing dotted figures. This manner of contrasting musical material had already been transferred to entrées half a century before the first fully developed French overture appeared (1658). Moreover, dance pairs show a trend of development which stands apart from overtures in that many are subdivided, so that each dance is multipartite. The allemande by itself tempts one to interpret it as a forerunner of the overture, since it developed some of the latter's functions: it was performed as a musical entertainment apart from dancing as early as Mersenne's treatise, *Harmonie universelle* (1636–7), and was placed at the head of suites. Yet its musical content only vaguely resembles that of the French overture: the allemande employs a similar general style (dance idiom) and is sometimes coupled to a faster piece. These resemblances between the two forms evidently derive from their common root in 16th-century dance music.

Lully is credited with having fixed the final form of the French overture in his ballets *L'amour malade* (1657) and *Alcidiane* (1658). The latter begins with the first true French overture, though a better example is that of Cavalli's *Xerse* (1660; Lully's overture was substituted to adapt the opera to the taste of its Parisian audience). These works differ from earlier overtures chiefly in scale and in a sharper differentiation of styles between the sections. The Reprise is not only faster than the Grave, but it is lighter, rhythmically more fluid, and markedly imitative. This fugal tendency, for which Lully is responsible, was perhaps inspired by the Venetian canzona, but the resemblance is only general, not tied to unique features of the two genres, and is insufficient to establish the canzona as Lully's source of inspiration. It is not known exactly what Italian music Lully heard in the 1650s. Probably he heard canzonas and even Italian sinfonias (with fugato sections), or he may have known these forms from his Florentine boyhood. In Paris he also must have heard a variety of French imitative music: in addition to the continuing tradition of sacred polyphony there were fugato sections scattered among lute-songs and suites, and imitative fantasias were common in France as well as England. Denis Gaultier's *La rhétorique des dieux* contains numerous imitative gigues (including binary ones), and Chambonnières wrote imitative dances. L. Couperin

wrote unmeasured keyboard preludes with measured, imitative second sections; these pieces further resemble French overtures in that about half of them show a return to the style of the first section. Since Lully knew of these composers and their works, it is reasonable to suppose he was influenced by their fugato compositions as well as the Italian forms.

3. Later history. The French overture flourished for at least 60 years beginning in 1660 (D'Alembert, *De la liberté de la musique*, 1759). From the first, Lully's works in this form met with great success (undoubtedly in part because they delighted the young Louis XIV), and his long adherence to the genre anchored it in the minds of many. He composed them for all his ballets, beginning with *Alcidiane* (1658), and for his yearly opera, starting with *Cadmus et Hermione* in 1673. Beauchamp was next to take up the form, in his ballet for Molière's play *Les fâcheux* (1661), and other composers quickly followed, including Cambert, Bullamord, Blow, Bannister, Grabu, Lalande, M.A. Charpentier, Provenzale, Purcell and possibly Cesti (the Venetian performance of *L'Argia*, 1669). The cosmopolitan nature of this sample suggests how fast and how far the French overture spread, aided no doubt by the abundance of French music and musicians at provincial and foreign courts during the later 17th century. To Germany, where Hammerschmidt had introduced French dances and *airs*, the overture travelled with Georg Muffat, J.C.F. Fischer, Kusser and Steffani. Kusser, for example, spent most of the decade 1672–82 in Paris, returned to Germany and published his *Composition de musique suivant la methode françoise, contenant six ouvertures de théâtres accompagnées de plusieurs airs* (Stuttgart, 1682).

By 1700 the French overture had long enjoyed widespread use (by François Couperin, Collasse, Destouches, Mouret, Montéclair, Clérambault, Marais, Desmarets, Campra, Corelli, Erlebach, Keiser, Ariosti, Bononcini and many others). Its adaptive possibilities too had been extensively explored: French overtures had been played as concert pieces, joined to operas and ballets other than those with which they originated, transcribed for keyboard (D'Anglebert, *Pièces de clavecin*), and placed at the head of numerous suites and sonatas (Böhm; later Dieupart, Christophe Moyreau, Mondonville). In Germany Georg Muffat (*Florilegium primum*, 1695) and Fischer had begun writing overture suites (so called because they open with French overtures), and some were even entitled 'Ouvertüre', for example Bach's orchestral suites. But also by 1700 the rival Italian overture, or sinfonia, with its tripartite, fast–slow–fast form and energetic, popular style, was fast becoming a fully developed and successful alternative. In opera particularly it began to displace the French overture, passing beyond its national boundaries much as the French overture had done 40 years earlier. But with certain composers in France and elsewhere the French form remained popular for several more decades, spawning some noteworthy examples. Handel and Bach, among others, used and adapted both overture forms, the former composing monumental French overtures for all his operas (e.g. *Deidamia*, *Alcina*, *Serse*) and for many of his anthems and oratorios, including *Messiah*; Handel's use of the form, like that of such of his English contemporaries as Boyce and Arne, is sometimes unorthodox. Bach contributed, in addition to the four orchestral suites and the 'French overture' for harpsichord (BWV820), overtures to cantatas (BWV97, 110 and 119), the fourth keyboard partita (BWV828), and, on the same French plan, such divergent items as the 16th Goldberg variation and a choral fantasy (in the cantata BWV61). These and other French overtures of the time, such as Telemann's, were contrived carefully and perhaps deliberately with somewhat limited expressive means, as if to accommodate the precise requirements and formality of the French plan. Such qualities had been well suited to the kind of formalized heroic expression that Lully sought and his century idealized, but by the time of Rameau they were old-fashioned, and the French overture became obsolescent as a result. Rameau used the form only in his early operas such as *Hippolyte et Aricie* (1733), but with *La princesse de Navarre* (1745) he broke away from it. In some later operas he used the slow–fast formula but not the style of the French overture. Monsigny, Philidor and Grétry continued occasionally to write overtures in this pattern, and a few anachronistic examples appeared at the time of the French Revolution (by Méhul, Catel and others), mixing but not blending old musical language with new. Vestiges also survived in slow introductions to first movements of some sonatas and symphonies, especially of the Viennese masters (including Haydn's symphonies nos.7, 50, 85 and 104, Mozart's Symphony no.39 K543 and *Die Zauberflöte* overture, and Beethoven's 'Pathétique' Sonata and op.111). At least some of these illustrate the persistent association of dotted rhythms with regality.

The French overture played a major role in the 20th-century controversy concerning the performance of dotted rhythms in French music. The problem concerns the double dotting (or overdotting) of notes and rests within the context of passages dominated by dotted rhythms. The conventional view, adhered to by most musicologists, was that in a French overture the lengthening of the dotted note and the corresponding shortening of the complementary note was common practice in performance, in spite of the notation. That view was first challenged in 1965 by Frederick Neumann, who held that the concept of double dotting was 'essentially a legend'. The battle of the double dot continues unabated, with charge and counter-charge often shedding more heat than light on a complex problem of performing practice.

GEORGE GOW WATERMAN/JAMES R. ANTHONY

French Polynesia. *See* POLYNESIA, §II, 3.

French sixth chord. The common name for the AUGMENTED SIXTH CHORD that has both a major 3rd and an augmented 4th in addition to an augmented 6th above the flattened submediant.

French time names. A device for teaching rhythmic notation introduced by John Curwen for use with the Tonic Sol-fa method. It was an adaptation of the 'langue des durées' originally invented by Aimé Paris as part of the GALIN-PARIS-CHEVÉ METHOD. In Curwen's version the notes were given names (ex.1*a*) phonetically equivalent to the French originals which, when spoken aloud, reproduced the rhythmic effects concerned (ex.1*b*). Later teachers preferred the term 'rhythm names' for this device.

BERNARR RAINBOW

Freni [Fregni], Mirella (*b* Modena, 27 Feb 1935). Italian soprano. She studied with Campogalliani at Bologna and in 1955 made her début at Modena as Micaèla. After a season with the Netherlands Opera, she sang Zerlina at Glyndebourne (1960–61), returning in 1962 as Susanna and Adina. She made her Covent Garden début as Nannetta, and later appeared there as Zerlina, Susanna, Violetta, Mimì, Micaëla, Gounod's Marguerite, and Tatyana (1988). In 1962 she sang Elvira (*I puritani*) at Wexford and first appeared at La Scala as Mimì; subsequent roles included Marie (*La fille du régiment*), Manon and Amelia (*Simon Boccanegra*), which she also sang at Covent Garden during the 1976 Scala visit and Elvira (*Ernani*). She made her Metropolitan début in 1965 as Mimì and her repertory there included Gounod's Juliet, Liù and Tatyana (1989). At Salzburg, where she made her début in 1966 as Micaëla, she took on heavier roles, singing Desdemona (1970), Elisabeth de Valois (1975) and Aida (1979). She later added Manon Lescaut and Butterfly to her repertory, and sang Adriana Lecouvreur at San Francisco (1985), Bologna (1988) and Munich (1990). She sang Lisa (*Queen of Spades*) at La Scala in 1990. In the last years of her career she sang Fedora in several theatres. The purity, fullness and even focus of her voice are evident in her many recordings, most notably in her Mimì, Aida, Micaëla and Tatyana.

HAROLD ROSENTHAL/ALAN BLYTH

Frenkel′, Daniil Grigor′yevich (*b* Kiev, 2/15 Sept 1906; *d* Leningrad, 9 June 1984). Russian composer. He studied the piano with Ya.I. Tkach at the Odessa Conservatory (1925–8) before he moved to Leningrad where he spent the greater part of his life. He was a student at the Second Leningrad Music Technical College (1928–9), and then continued his education privately with A.P. Gladkovsky, from whom he received lessons in theoretical disciplines and composition (1932–5), and from Steinberg for orchestration (1936–8). His working life began in the 1920s: he was a pianist at the Perekop Theatre in Ba′lta (1922–4) and at the Soyuzkino cinema in Leningrad (1928–32). During World War II he was the conductor and music director of the theatre of drama in Orenburg Province (1941–4), and later at the V.F. Kommisarzhevskaya theatre of drama in Leningrad (1945–7). In the postwar years (1945–53) he directed the Soviet navy's ensemble for musical amateurs.

Frenkel′'s creative work embraces all the main genres and is conservative in style, gravitating towards classical and Romantic traditions and notable for vivid melodic expressiveness and dramatic writing.

WORKS

Ops: Zakon i faraon [The Law and the Pharaoh] (N. Nikolayev-Shevïryov, after O. Henry), 1933; V ushchel′ye [In the Gorge] (Nikolayev-Shevïryov, after Henry), 1934; Rassvet [Dawn] (O. Forsh and S. Levik), 1937; Diana i Teodoro, [Diana and Theodoro] (Frenkel′ and M. Lozinsky, after F. Lope de Vega: *A Dog on the Hay*), 1944; Ugryum-reka [The River Ugryum] (S. Ostrovsky and V.Ya. MARINA MOISEYEVNA MAZUR

Frensel Wegener [née Koopman], **Bertha** (*b* Bloemendaal, 27 Sept 1874; *d* Amsterdam, 17 July 1953). Dutch composer, mother of Emmy Wegener. She studied at the Amsterdam Conservatory with Sara Bosman-Benedicts (piano) and Zweers (composition). While still a student, her *Stabat Mater* was performed under the baton of Daniël de Lange. After graduating in 1898 she went to Frankfurt to study singing with Hugo Bellwidt. For some years she worked as an accompanist in the Netherlands and Germany. She married the insurer John Frensel Wegener, and in 1901 their first daughter Emmy was born.

Frensel Wegener concentrated on writing songs, which were performed by leading Dutch singers. The songs to German texts are in a late Romantic idiom, while she later adopted a style close to French Impressionism. Some of her best-known works include *Der Wetterhahn*, *Sterbeglocken*, *Droome-vrouw* and the *Three Love Songs*. Her cantata *Meilied*, written for the exhibition 'De Vrouw, 1813–1913' (Amsterdam, 1913), calls on Dutch women to unite in their struggle for emancipation.

WORKS
(*selective list*)

4 Lieder (E. Geibel, H. Heine and others), 1896; 8 Lieder (Geibel and others), A/T, pf, 1897–*c*1899; Stabat Mater, 3 solo vv, female chorus, 1898; Meilied (cant.), S, S, A, A, female chorus, vn, str, pf, 1913, lost; 3 Love Songs (R. HELEN METZELAAR

Frequency. The number of times per second (or other unit of time) that a cycle of disturbances is exactly repeated. For example, if a string is vibrating in its fundamental mode, one cycle could be thought of as starting from the mid-position, moving to a maximum displacement in one direction, moving back to zero, moving to a maximum displacement in the other direction and finally back to zero. The time taken to complete this cycle is the period and the inverse of this quantity is the frequency. When the unit of time is the second, the unit of frequency is the hertz (abbreviated Hz), which is identical to the obsolete cycle per second (c.p.s.). *See* SOUND, §4.

CLIVE GREATED

Frequentato (It.: 'populated', 'crowded', 'frequented'). A moderate dynamic. *See* FORTE.

Frere, Walter Howard (*b* Cambridge, 23 Nov 1863; *d* Mirfield, 2 April 1938). English liturgist. Son and grandson of two Cambridge dons, he was educated at Charterhouse, Trinity College, Cambridge (gaining a first class in classics), and Wells Theological College. Ordained deacon (1887), then priest (1889), he served as curate of St Stephen's, Stepney (1887–92), before joining the recently founded Community of the Resurrection, Mirfield. As Superior (1902–13, 1916–22) he contributed greatly to shaping the religious and liturgical life of the young community. He was Select Preacher at both Cambridge (from 1901) and Oxford (1913). Appointed Bishop of Truro in 1923, he remained in Cornwall until his retirement to Mirfield in 1935.

Frere's interests included Russian Church history, English Tudor history, prayerbook reform and the promotion of Christian unity: he took part in the Malines Conversations (1921–5). He was a keen amateur musician and composed some songs. But it is as a scholar and a liturgist that he is chiefly known, particularly through his careful editing of the main service books of the Sarum Use: the gradual, antiphoner, customary, ordinal and tonary. He was the first modern scholar to disentangle successfully the complex web of English medieval church services and to present a complete and coherent picture. As a student of plainchant, he helped to disseminate a practical knowledge and appreciation of this idiom. Appointed chairman of the proprietors of *Hymns Ancient and Modern*, he was responsible for the historical edition (1909), which was later accepted by Cambridge University as his thesis for the Doctor of Divinity degree. He died without publishing the fourth volume of his *Studies in Early Roman Liturgy*, dealing with the responsories of the night Office.

MARY BERRY

Freschi, (Giovanni) Domenico (*b* Bassano del Grappa, 26 March 1634; *d* Vicenza, 2 July 1710). Italian composer. He was already a singer and priest at Vicenza Cathedral when on 24 August 1650 he received a canonry there. On 14 December 1656 he defeated Carlo Grossi to become *maestro di cappella*, and he held this post for the rest of his life. Between 1657 and 1696 he was often responsible for the music performed on significant feast days at the most important churches in Vicenza; indeed, from 1681 to 1696 (when it was discontinued), Freschi held the post of '*maestro di cappella* for the music that the magnificent city is obligated to perform'. He was otherwise mainly active as an opera composer, particularly at Venice but also for the private theatre of MARCO CONTARINI at Piazzola sul Brenta, near Padua. The score of *Tullia superba* (1678) has relatively well-thought-out melodic writing and makes much use of dotted and anapaestic rhythms; some of the later operas (e.g. *L'incoronatione di Dario*) contain large and demanding da capo arias. Freschi's church music includes simple four-part settings of hymns, which were still being performed at Vicenza in the 19th century. He was one of the teachers of G.A. Ricieri, who taught G.B. Martini.

WORKS

OPERAS

performed in Venice, Teatro S Angelo, unless otherwise stated

Iphide greca (N. Minato), ai Saloni, 1671, with G.D. Partenio and G. Sartorio, only Act 2 by Freschi, *I-Vnm* (2 copies)
Helena rapita da Paride (A. Aureli), 1677, *MOe*, *Vnm*, *Vqs* (arias)
Tullia superba (A. Medolago), 29 Jan 1678, *MOe*, *Vnm*, *Vqs* (arias)
La Circe (C. Ivanovich), 29 Jan 1679, *Vqs* (aria)
Sardanapalo (C. Maderni), 1679, *MOe*, *Vnm*
Berenice vendicativa (? G.M. Rapparini), Piazzola sul Brenta, 8 Nov 1680, *Vnm*
Il cittadino amante della patria overo Il Tello (Rapparini), operetta printed in lib of Berenice vendicativa, Piazzola sul Brenta, 1680, music lost
Pompeo Magno in Cilicia (Aureli), 22 Jan 1681, *Vnm*, *Vqs* (arias), *Rvat* (arias)
Olimpia vendicata (Aureli), 20 Nov 1681, *F-Pn*, *I-Vnm*, *Vqs* (arias)
Giulio Cesare trionfante (L. Orlandi), 10 Jan 1682, *Vqs* (arias)
Ermelinda (F.M. Piccioli), Piazzola sul Brenta, 1682, *Vnm*
Silla (A. Rossini), 4 Feb 1683, music lost
L'incoronatione di Dario (A. Morselli), 1684, *Vnm*
Teseo tra le rivali (Aureli), 7 Feb 1685, music lost
Gl'amori d'Alidaura (Piccioli), Piazzola sul Brenta, Aug 1685, music lost

DRAMATIC CANTATAS

All texts by F.M. Piccioli, and all performed at Piazzola sul Brenta, summer 1685; music lost unless source given

Il merito felice
Preludio felice, Camerini family private collection, Mossano, nr Vicenza
Il ritratto della gloria donata all'eternità

THOMAS WALKER/BETH L. GLIXON

Frescobaldi, Girolamo [Gerolamo, Girolimo] **Alessandro** [Geronimo Alissandro] (*b* Ferrara, bap. mid-Sept 1583; *d* Rome, 1 March 1643). Italian composer and keyboard

virtuoso. He was one of the greatest keyboard composers of the first half of the 17th century.

1. Ferrara, Rome and Flanders, 1583–1608. Frescobaldi was born into the last flowering of the musical culture of Ferrara under Duke Alfonso II d'Este (for his baptismal entry see Cavicchi, 1983). His father, Filippo, was a man of property and standing, possibly an organist like Girolamo and his half-brother Cesare. There is no evidence that the Frescobaldi of Ferrara were related to the homonymous Florentine noble house (Kirkendale, 1993, notwithstanding).

Although he had other artistic interests, Alfonso II's greatest passion was for music. He maintained a musical establishment, described in Ercole Bottrigari's *Il desiderio* (1594), which included both Italian and Flemish performers; a music library comprising more than 250 items; and a comprehensive instrumentarium: keyboard players alone had their choice of four claviorgans, five organs and five harpsichords, all maintained by professionals. The principal jewel of Alfonso's *musica* was the jealously guarded *concerto delle dame principalissime*, an ensemble of virtuoso female singers who also played harp, viol and lute, accompanied by keyboard (Luzzasco Luzzaschi, the ducal organist) and archlute (Ippolito Fiorini, the ducal *maestro di cappella*). For the *concerto delle dame* Luzzaschi composed virtuoso works for one to three high voices and written-out keyboard accompaniment (*Madrigali*, 1601). Among the musicians who visited Ferrara during this period were Porta, Marenzio, Merulo, Dowland, Wert, Lasso, Bardi, Corsi, Rinuccini, Caccini and Monteverdi, who prepared a collection of madrigals for dedication to Alfonso II. The most important visitor was Carlo Gesualdo, who arrived in 1594 to marry Eleonora, the sister of Alfonso's heir Cesare d'Este, with a suite including the keyboard player Scipione Stella, the lutenist Fabrizio Filomarino and Rinaldo dall'Arpa. Gesualdo 'set himself to imitate Luzzasco', and in return Luzzaschi was stimulated to a renewed production of polyphonic madrigals.

Little is known of Frescobaldi's musical training and early years. Superbi noted his precocity as an organist; Libanori described him as a child prodigy both as singer and an instrumentalist, especially on keyed instruments, who was 'brought through various principal cities of Italy', a career also suggested in a contemporary encomiastic poem. A list of organists of the Ferrarese Accademia della Morte made in 1683 names the 14-year-old Frescobaldi as successor to Ercole Pasquini (a pupil of Alessandro Milleville, second organist of the Ferrarese court) on Pasquini's departure in 1597 to become organist of the Cappella Giulia in S Pietro (Cavicchi, 1961). Possibly through the Accademia, Frescobaldi attracted the patronage of two members of the Bentivoglio family, the greatest Ferrarese nobles after the Estensi and sons of the celebrated singer Isabella Bendidio. Marchese Enzo Bentivoglio (*c*1575–1639) was a courtier, horseman and soldier who became the most important impresario of early 17th-century Italian spectacle, notably the 1628 wedding celebrations in Parma. His brother Cardinal Guido (1577–1644) was an intellectual, writer and ecclesiastic who at his death was a candidate for the papacy. In addition to the Bentivoglio brothers and Luzzaschi (who stood godfather to another of Filippo Frescobaldi's children), the Ferrarese circle of the young Frescobaldi included Fiorini and Antonio Goretti, a distinguished musical amateur who served as Monteverdi's collaborator and assistant for the Parma wedding.

In the dedication of his 1624 *Capricci* (A.5) Frescobaldi declared himself a pupil of Luzzaschi, who was considered one of the great organists of his time as well as one of the few players capable of performing on (and even composing for) Nicola Vicentino's *arcicembalo*. (In 1619 Frescobaldi was described as the only keyboard player in Rome capable of playing a similar instrument in the possession of Cardinal Alessandro d'Este.) Until recently only four authentic keyboard works of Luzzaschi were known, three of them written to order for Girolamo Diruta's *Il transilvano* (1593–1609). The rediscovery of a manuscript copy of the second of Luzzaschi's three known volumes of four-part keyboard ricercares permits a wider knowledge of his style. Features which the ricercares share with comparable early works of Frescobaldi include modal organization, the employment of various combinations of clefs and a sparing use of triple-metre sections. Their texture is often dense, unlike the sometimes awkward extensions of Neapolitan keyboard music. The unusual format, four-staff units across an opening (verso and recto), is employed as well in Frescobaldi's first keyboard publication, the *Fantasie* of 1608 (A.1). Frescobaldi also studied the works of a great northern composer working in Venice. A letter of 1607 states that on his departure for Flanders he had left with Luzzaschi a volume of 'old Ricercari without words of Adriano [Willaert] made only for playing' – possibly the *Fantasie recercari et contrapunti a tre voci* first published by Gardano in 1551. (In his preface to Tullio Cima's *Vespertina psalmodia* of 1673 Frescobaldi's pupil Giovanni Angelo Muti recounted that he had learnt in his youth 'to play *Partitura*, and to make Counterpoints in three parts'.)

Apel claimed to trace the origins of many of the distinctive features of Frescobaldi's keyboard style to Neapolitan sources, a judgment accepted uncritically by later writers. The most pertinent of Apel's observations concern the supposedly Neapolitan origins of Frescobaldi's chromaticism and his employment of 'rhythmical variants of the theme in the canzona'. Harper (1978–9), Ladewig and Newcomb (see Silbiger, 1987) argued that many Neapolitan characteristics and many Frescobaldian traits originated in a common north Italian tradition. They linked Frescobaldi's chromaticism with the *inganno*, a device for generating new motivic material by hexachord equivalences. Apel's 'rhythmical variants' were recognized by Ladewig as an important form, the variation canzona.

On the death of Alfonso II in 1597 and after an abortive claim by his cousin Cesare, Ferrara reverted to the papacy. Clement VIII Aldobrandini and his nephew Cardinal Pietro made a splendid visit to the city in 1598, where the pope celebrated a double royal wedding in the cathedral and the papacy began the wholesale exportation of Ferrarese art treasures to Rome. The three Piccinini brothers, celebrated Ferrarese lutenists, entered Cardinal Pietro's service and returned to Rome with him. Luzzaschi

visited Rome in 1601, where he dedicated his *Madrigali* to the cardinal.

The date of Frescobaldi's departure from Ferrara for Rome is not known, but he may be identified with the 'Girolimo Organista' employed at S Maria in Trastevere from January to May 1607. (The statement in Cametti, 1908, that Frescobaldi became a member of the Roman Congregazione di S Cecilia in about 1604 is without foundation.) In dedicating his *Fantasie* to Francesco Borghese, Duke of Regnano, the brother of Pope Paul V, Frescobaldi stated that he had played the works for Borghese while staying in Rome with Monsignor Guido Bentivoglio in spring 1607. In May of that year Bentivoglio was named titular Archbishop of Rhodes, and on 11 June he set out as nuncio to the court of the archdukes in Flanders. He was accompanied by a large suite, including Frescobaldi and Girolamo Piccinini, and arrived in Brussels on 9 August. The visit to Flanders marked a new stage in Frescobaldi's career: his first and only journey outside Italy, to a court celebrated for music and religious spectacle and employing Italian, Spanish and English, as well as Flemish, musicians. The court organists included Peeter Cornet and Peter Philips, but it is unlikely that Frescobaldi had any contact with Sweelinck in Amsterdam, as is sometimes claimed.

Perhaps the death of Luzzaschi in September 1607 accelerated Frescobaldi's growing independence. In 1608 he published his first complete work, a collection of 19 five-part madrigals printed by Pierre Phalèse of Antwerp (C.1). His dedication to Guido Bentivoglio, dated 13 June 1608, states that he had composed them in the nuncio's service, that he had come to Antwerp to see the city (the only interest he ever expressed in his surroundings) and that the local musicians greatly enjoyed his work and insisted on its publication (a well-worn trope). His avowed resolution to begin to submit his works to the judgment of the world, however, marked the beginning of the series of carefully considered publications on which his fame rests.

On 21 July 1608 the chapter of S Pietro, Rome, elected Frescobaldi organist of the Cappella Giulia, the resident musical establishment of the basilica, in succession to Ercole Pasquini whom they had dismissed 'for just cause' the previous May. The post was procured for Frescobaldi by Enzo Bentivoglio, who was Ferrarese ambassador to Rome and who coerced his financially embarrassed brother into transferring Frescobaldi to his own household musical establishment. Frescobaldi probably left Flanders in mid-May but delayed his arrival in Rome, pausing in Milan to publish the *Fantasie*. After much pressure from the Bentivoglio circle, Frescobaldi arrived in Rome from Ferrara on 29 October 1608. He took up his duties at first Vespers of All Saints (31 October) and played for the following two celebrations, All Saints and All Souls, 'with great satisfaction and commendation'. Libanori's assertion that Frescobaldi's fame drew 30,000 people to hear him at his first appearance is unlikely. Frescobaldi was a relatively minor participant in grandiose and complex papal ceremonies; his role was probably mostly limited to playing continuo on a portable organ, and in any case organ music was forbidden in theory and kept to a minimum in practice in the All Souls services.

2. Rome, 1608–15. At Frescobaldi's arrival the Cappella Giulia consisted of four each of basses, tenors and altos, and six boy sopranos, directed by Francesco Soriano (*maestro* from 1603 to 1620). Unlike the Cappella Pontificia, the pope's private choir, which usually performed *a cappella*, the Cappella Giulia employed instruments such as violin, cornett, violone, trombone, organ and lute. Their performances usually took place in smaller venues such as the chapels of the basilica and were by no means always marked by the massive polychoral forces now considered typical of the Roman Baroque. Polychoral music, employing additional singers (often from the more aristocratic Cappella Pontificia), instruments, and a small organ and a continuo player for each chorus, was performed by the Cappella Giulia especially on two occasions, the Feast of St Peter and St Paul (29 September) and the commemoration of the dedication of S Pietro (18 November). The musical repertory of both the Cappella Giulia and the Cappella Pontificia was essentially conservative in character, built on the works of Palestrina.

In addition to the portable continuo organ (others were rented for polychoral performances), Frescobaldi had two larger stationary instruments at his disposal in S Pietro. The older organ, commissioned by Alexander VI Borgia in 1496, was moved to the Cappella Clementina in 1609 and restored. This had a limited pedal-board and one keyboard with a divided Principal, a *pieno* of nine ranks, two registers of flutes and one of trombones. The second organ was built in 1580 and its façade is now in the Chapel of the Sacrament. In 1751 it had three Principals, possibly at 16′ pitch, nine registers for the *pieno*, 16′ and flute stops. Both organs were placed on a screen between two adjoining chapels and sounded into them rather than into the body of the basilica.

The Cappella Giulia paid Frescobaldi 72 scudi a year, and in order to survive he established a pattern that would persist throughout his career, earning supplementary income by service in a noble household, keyboard teaching and coaching, and casual employment in the active musical life of ecclesiastical Rome, first at S Giacomo (1614). At one point his annual income was estimated as 72 scudi from the Cappella, 100–150 from a patron and 300 from teaching and other sources – more than 500 scudi at a time when a good harpsichord could be purchased for 25.

On Enzo Bentivoglio's arrival in Rome in 1608, Frescobaldi joined his musical establishment. Modelled on Alfonso d'Este's *concerto delle dame*, it included two female singers and a Neapolitan harpist, and possibly the lutenist Alessandro Piccinini, who at least composed music for the 'Napoletana'. Like their Ferrarese counterparts, Enzo's singers were also expected to perform on instruments; they were instructed in counterpoint and performance by Frescobaldi and a certain 'Orazietto'. In 1609 Frescobaldi defended himself hotly against accusations that he had seduced and promised to marry Angiola Zanibelli, a singer in Enzo's service in Ferrara who may have performed the title role in Marco da Gagliano's *La Dafne*. When Enzo's project of marrying Frescobaldi off to Giulio Caccini's daughter Settimia was foiled by the Medici, he increased pressure on Girolamo and his father for a marriage with Angiola. Their intransigence may have resulted in a break between Frescobaldi and Enzo.

In June 1612 an illegitimate child, Francesco, was registered as the son of Frescobaldi and the Milanese Orsola Travaglini (also called Dal Pino). The two were married privately in February 1613, and in July the bride gave birth to a daughter, Maddalena. Their first 'official'

child, the poet, cleric and art collector Domenico, was born in 1614. Two other children, Stefano and Caterina, followed in 1616–17 and 1619. Frescobaldi and his wife owned (but did not inhabit) a small house on the edge of Piazza Colonna, probably part of her dowry.

In 1613 Frescobaldi returned briefly to instructing members of the Bentivoglio household, in company with other Roman musicians, but his performance was unsatisfactory: 'S.r Girolimo came here but now he does not come here at all . . . the poor man is half crazy as it seems to me'. Frescobaldi's last known work with the Bentivoglio was the instruction of a boy singer in 1615, although in 1627 he petitioned Enzo for a role in the 1628 Parma wedding.

3. Mantua and Rome, 1615–28. The entry of Frescobaldi into the service of Cardinal Pietro Aldobrandini has been dated between mid-1610 and the end of 1611, coinciding with the departure of Filippo Piccinini from the cardinal's service and the expiry of Enzo Bentivoglio's appointment as Ferrarese ambassador. Frescobaldi's negotiations with the Mantuan court of Cardinal-Duke Ferdinando Gonzaga, melomane and composer, reflected the changing political fortunes of his Roman patron after the death of Clement VIII. Their opening late in 1614 coincided with a crisis in the Aldobrandini family (the incrimination of two of the cardinal's nephews), and Frescobaldi's journey to Mantua took place while the cardinal visited the Spanish viceroy in Naples. Frescobaldi's return to Rome and to Cardinal Pietro's service was followed by a papal pardon for the nephews. Some time in 1615 Frescobaldi dedicated his *Recercari, et canzoni franzese* (A.4) to Cardinal Aldobrandini as 'this first, & tiny child of my weak talent'.

The negotiations with Mantua, conducted by Paolo Faccone, a pensioned bass singer in the papal chapel, began in November 1614, when Faccone wrote to Ferdinando Gonzaga to say that Frescobaldi could be induced to leave Rome for a substantial offer. Frescobaldi expressed his willingness to take part in the re-establishment of musical life at the court of Mantua by proposing to dedicate his first volume of *Toccate*, already in preparation, to the duke. Their agreement included a salary of 600 scudi, a loan of 300 scudi for the publication of the *Toccate*, real estate, and a house and provisions for two years. Faccone remained sceptical, reminding the duke of events in 1612 when his brother had succeeded to 800,000 ducats of debt and had resolved to dismiss Claudio and Giulio Cesare Monteverdi 'when they least expect it' ('licenza alla mantovana'). The court sent Frescobaldi 143½ scudi for the *Toccate* and no travel money, but in mid-February 1615 he was on his way, arriving at the end of the month. Although his playing pleased the duke, Frescobaldi was ignored by the court. He was back in Rome by May and in September refused another offer, finally receiving compensation of 300 scudi; the project was ended by Faccone's death in the same month.

The most tangible result of the Mantuan venture was the first book of *Toccate* (1614–15, A.2). Unlike Frescobaldi's previous works, printed inexpensively from movable type, this was a presentation volume engraved on copper by the musician and instrument builder Nicolò Borbone (see Morelli, 1988). Frescobaldi and Borbone had already been working together from December 1613. Their contract of January 1614 describes the publication as 'a work of *toccate di cimbalo* of 60 or 80 *pezzi* [single plates]'. The contract stipulated that if Frescobaldi wished to employ Borbone for a performance or for other services the latter was required to go; if he sent Borbone harpsichord or organ pupils, Borbone was to give him half the fee. Frescobaldi was obliged to give Borbone room, food, drink and lessons in harpsichord playing and counterpoint for two years beginning in December 1613. He was to repay Borbone for the engraving with 200 copies of the book, which Frescobaldi could not sell in Rome until Borbone's stock was exhausted. The composer was to keep the plates and could print as many copies as he wished, and on the basis of this Borbone received a loan of 50 scudi. A new contract drawn up the following June reflected the negotiations with the Gonzaga. The volume was now described as '25 or 30 *pezzi*', and Borbone was to cut the plates in October for 100 scudi. He was paid 50 scudi for work up to that time (34 *pezzi*; this disproves the hypothesis that Borbone took years to engrave the volume). Frescobaldi's revisions show that he was concerned about aesthetics as well as music. The work was reissued in an enlarged version in 1615–16 (A.3).

In his dedication Frescobaldi described the volume as 'my first book of musical efforts on the keys' and stated that Ferdinando Gonzaga 'in Rome deigned with frequent requests to stimulate me to the practice of these works'. The two versions of the address 'To the Reader', the instrumental equivalent of Caccini's preface to *Le nuove musiche*, provide an extended discourse on the performance of the toccatas.

On his return to Rome and to the service of Cardinal Aldobrandini, Frescobaldi augmented his salary at S Pietro by teaching and by service on special occasions in the churches of Santo Spirito in Sassia (1620–21, 1626, 1628), S Lucia del Gonfalone (1623), S Luigi dei Francesi (1624–7, 1634–6, 1638) and doubtless elsewhere. In December 1617 Cardinal Aldobrandini forced the dispossession of the Frescobaldi house to build a palace. Frescobaldi and his wife contested the valuation and in 1618 were awarded 689 scudi 27 baiocchi, paid in bond-shares (which tied up their capital and implied that they owned no other property). Despite this, Frescobaldi republished the *Recercari* with their dedication to the cardinal unaltered in 1618 (A.4a) and continued to serve the family after the cardinal's death in 1621.

In 1624, perhaps in search of another full-time patron (he seems to have had no relationship with the Ludovisi or the Barberini, the family of the newly elected Urban VIII), Frescobaldi dedicated his *Capricci* (A.5) to Alfonso d'Este, Prince of Modena. He recalled his Ferrarese training with Luzzaschi and the fostering of the arts by the Estensi, and references to Ferrara have been traced in nine of the capriccios. The address 'To the Students of the Work' contains important information on their performance, especially on metrical notation. Here and elsewhere Frescobaldi's compositional process continued during and even after the printing of his works (Darbellay, 1986, pp.361–74, see Fabris and Durante; Darbellay, 1988).

In 1626 Frescobaldi combined the *Recercari* and the *Capricci* (minus their dedications and the variation-capriccio 'Or che noi rimena') into a single volume, the first of his Venetian publications (A.5a). In 1627 (the dedication is dated 15 January) he published a second volume of *Toccate* (A.6), also engraved by Borbone,

dedicated to Monsignor Luigi Gallo, Bishop of Ancona and nuncio of Savoy. The nephew of an important cardinal, Gallo was a failure as a diplomat but was an exceptional keyboard player and may have been a pupil of Frescobaldi, who praised his 'great grace, ease, variety of measure and elegance, conditions necessary to this new manner'. The first of Frescobaldi's two volumes of small motets is lost. The second, *Liber secundus diversarum modulationum* (D.5), lacking the second canto book, was dedicated on 1 June 1627 to Cardinal Scipione Borghese, archpriest of S Pietro and nephew of the dedicatee of the *Fantasie*. Frescobaldi continued to serve at the basilica, playing organ continuo in a notable vesper service for 12 choirs at the feast of St Peter and St Paul in 1628.

4. FLORENCE, 1628–34. In November 1628 Frescobaldi accepted an appointment at a monthly salary of 25 (later 29) scudi as organist to the young Ferdinando II, Grand Duke of Tuscany, who had visited Rome in March. Frescobaldi sealed the arrangement by dedicating to the duke a collection of instrumental *Canzoni* in one to four parts with continuo (B.2a). The collection was also published in score for keyboard performance by Frescobaldi's pupil Bartolomeo Grassi (B.2). In his extended preface Grassi stressed the importance of reading from open score, described Frescobaldi's printed collections as a coordinated output supplying all the needs of keyboard players and noted that the composer constantly produced additional works which remained in manuscript. (As late as 1664 Domenico Frescobaldi was described as possessing his father's 'Compositions in harpsichord tablature written by hand, and not printed'.)

Frescobaldi, the most highly paid of the Medici court musicians, remained in Florence until 1634, visiting Venice on at least one occasion. His few documented musical activities predate the plague of 1631. In April 1629 he and Marco da Gagliano furnished music for the canonization celebrations of the Florentine Andrea Corsini in the church of the Carmine. In May 1630 he performed with two singers in the chamber of the archduchess for Béthune, the French ambassador, who had promoted the canonization. For the consecration of a new cathedral in Colle di Val d'Elsa on 1 July 1630 Frescobaldi served as organist with four singers under Gagliano's direction. The contract for one of the two new organs of the church named him 'in organorum modulamine in Europa unico et singularissimo'. In October 1630 he was appointed organist of the Florence baptistery. Later in the same year he published with Landini, Galileo's printer, two books of *Arie musicali* comprising 44 settings for one to three voices and continuo (C.5–6). The first book was dedicated to the grand duke in a letter which recycles the 1614 dedication of the *Toccate*. In the considerably more personal dedication of the second volume to Marchese Roberto Obizzi, a Ferrarese nobleman who served as the duke's Master of the Horse, the composer again recalled his Ferrarese origins and his study with Luzzaschi.

5. ROME, 1634–43. Frescobaldi's last years in Rome saw him established on a new level of reputation and financial security. He returned in April 1634, now under the patronage of the family of the reigning pope, Urban VIII Barberini. The most powerful of Urban's three nephews, Cardinal Francesco, paid 100 scudi for Frescobaldi's journey from Florence with his household, gave him casual gifts of money and a regular allowance of 30 scudi for the rent of his dwelling on the Salita Magnanapoli by Trajan's Column, and enrolled him in his service at the same salary as J.H. Kapsberger, 3 scudi 60 baiocchi a month. As the new archpriest of S Pietro, Francesco also raised Frescobaldi's salary as organist of the Cappella Giulia (now under the direction of Virgilio Mazzocchi) from 72 to 96 scudi a year. In January 1643 Frescobaldi also gave well-paid music lessons to the sons of the middle Barberini nephew, Don Taddeo, Prince of Palestrina.

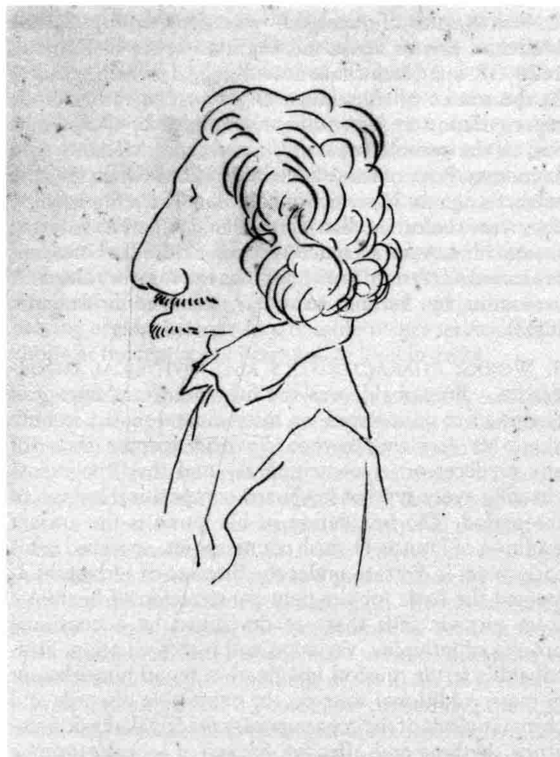
Perhaps at the behest of Cardinal Francesco, Frescobaldi dedicated a reworked version of the instrumental *Canzoni* (B.3) to Cardinal Desiderio Scaglia of Cremona, a Dominican who with Francesco had belonged to the committee that condemned Galileo. The *Fiori musicali* (Venice, 1635; A.7), comprising three organ masses, was dedicated to Cardinal Antonio Barberini: this was Francesco's younger brother, an equally brilliant patron of the arts, not their austere Capuchin uncle of the same name, as is sometimes stated. The address 'To the Reader' forms the last of Frescobaldi's important statements on the performance of his works. In 1637 Cardinal Francesco subsidized the republication of both books of toccatas (presumably from the plates in Frescobaldi's possession), his own arms now replacing those of Ferdinando Gonzaga on the title-page of the revised version of the first book (A.8). The *aggiunta* to this volume constitutes the last keyboard works by Frescobaldi published during his lifetime. (A posthumous collection of *Canzoni alla francese* (A.9) was issued by Vincenti in Venice in 1645.) In 1640 Pietro Della Valle wrote to Lelio Guidiccioni that 'today [Frescobaldi] uses another manner, with more *galanterie* in the modern style . . . because with experience he will have learnt that to please everyone, this manner is more elegant, although less learned'. The relation between this observation, the *aggiunta* to the first book of *Toccate* and later manuscript works attributed to Frescobaldi remains a matter for investigation.

Frescobaldi did not take part in the brilliant series of operas produced by the Barberini in 1631–43, but he may have participated in the select household musical academies presented by Cardinal Francesco under the direction of Virgilio Mazzocchi, which featured instrumental soloists, polyphonic madrigals and a consort of viols. The writings of the theorist Giovanni Battista Doni, a former secretary to the cardinal, contain a number of unflattering references to Frescobaldi from this period. Doni denigrated Frescobaldi to Marin Mersenne as skilled only in keyboard music and virtually illiterate. In the *De praestantia musicae veteris* (1647) Doni reported that in about 1638–40 Ottaviano Castelli, 'by means of frequent and free drinks', had seduced Frescobaldi into convincing Cardinal Francesco to have an organ which he had commissioned for the restoration of his titular church, S Lorenzo in Damaso, tuned in equal temperament – a project thwarted by the opposition of Doni and of singers who refused to perform with such tuning. There is some evidence, however, that Frescobaldi was not in fact uncultured. His patrons were among the most sophisticated magnates of the period, and he was praised by Banchieri, Giustiniani, Mersenne, Bonini, Liberati and even Doni's protégé, Della Valle. The erudite Lelio Guidiccioni left in his will 'the *arpicordo* called "the Jewel" by Frescobaldi' (Hammond, 1994). Frescobaldi's

choice of texts for vocal works included poets such as Marino and Carissimi's librettist Francesco Balducci.

During his last years Frescobaldi was active, always as a harpsichordist, in the celebrated Lenten performances at the Oratorio del Crocifisso. The most vivid picture of him as a performer comes from the *Response faite à un curieux* by the French gamba virtuoso André Maugars, who heard him at the Crocifisso in 1639. (Frescobaldi also performed there in 1640 with the two most celebrated Roman castrati, Loreto Vittori and Marc'Antonio Pasqualini.) The Crocifisso performances combined instrumental works with motets and Latin oratorios. Maugars described the ensemble as containing organ, large harpsichord, *lira*, two or three violins and two or three archlutes. The instruments alternated in improvised solo and concerted passages, 'But above all the great *Friscobaldi* showed a thousand sorts of inventions on his Harpsichord, the Organ always holding firm'. Manuscript pieces in Uppsala exactly fit Maugars's description, in which improvisation by solo instruments is indicated (sometimes notated, sometimes not) over a held note in the continuo (Hammond, 1994). Maugars concluded that, 'although [Frescobaldi's] printed works give sufficient witness of his ability, in order to judge of his profound knowledge it is necessary to hear him improvise toccatas full of contrapuntal devices and admirable inventions'.

These are the last references to Frescobaldi as a performer. Despite the vicissitudes of the War of Castro, he continued at the Cappella Giulia and in Cardinal Francesco Barberini's household. He died on 1 March 1643 after an illness lasting ten days, and was buried in the neighbouring basilica of SS Apostoli; his tomb disappeared in the rebuilding of the church in the 18th century.



6. Pupils. As Maugars suggested, despite the printed repertory which Bartolomeo Grassi advised every keyboard player to provide himself with, personal contact with the art of improvisation constituted the culminating experience of Frescobaldi's pupils. (It becomes increasingly clear that 17th-century Italian manuscript compositions for teaching purposes were *aide-mémoire* or groundplans, rather than exact notations.) Frescobaldi taught throughout his professional life (Silbiger, 1980; Annibaldi, 1995). In Florence his pupils included Bernardo Roncagli, Filippo Bandini, and Francesco Nigetti, who invented an *omnicordo* and taught Giovanni Maria Casini. Frescobaldi's Roman pupils – Borbone, Grassi, Luigi Battiferri, Leonardo Castellani, Lucia Coppi, Giovanni Battista Ferrini, Tommaso Luna, Francesco Muti, Giovanni Angelo Muti, and the Pistoiese Valerio Spada (the protégé of Giulio Rospigliosi's brother) – have left important documentation. Battiferri published a collection of *Ricercari* in 1669. The manuscripts connected with Frescobaldi in the Chigi collection (*I-Rvat*) may have come from Castellani and may contain Frescobaldi autographs (fig.3). Ferrini and 'Franceschino' Muti performed with Frescobaldi at the Crocifisso, and Ferrini's works are transmitted in the Muti manuscript (*Rvat* Mus.569). The most famous of Frescobaldi's pupils was J.J. Froberger, who came with a subsidy from the imperial court in Vienna to study in Rome in 1637–41. Contrary to what is often asserted, Michelangelo Rossi did not study with Frescobaldi; Johann Kaspar Kerll, Johann Heckelauer and Franz Tunder have also been incorrectly cited as his pupils.

7. Portraits. Frescobaldi was depicted by Claude Mellan, a French artist and engraver active in Rome in 1624–37, in a black chalk drawing (fig.1) which seems to be the source of subsequent engravings: a rather crude representation by Jean Saillant, engraved by Christianus Sas, in the second book of *Toccate*, and Mellan's own engraving. Both of these have inscriptions which give the subject's age as 36, which would date them implausibly eight years before Mellan's arrival in Rome. The painting from Schloss Ambras, Innsbruck (reproduced in *Girolamo Frescabaldi: Ferrara 1983*), follows the same tradition. A caricature by Bernini strongly resembles Frescobaldi (fig.2).

8. Works: characteristics and historical importance. Frescobaldi was the first important European composer to concentrate on instrumental music. In bulk alone his surviving keyboard works surpass those of any predecessor or contemporary and they encompass virtually every type of keyboard composition known to the period. The foundation of his music is the ancient tradition of Franco-Flemish counterpoint, absorbed in his early years in Ferrara under the tutelage of Luzzaschi. It formed the basis for the tight construction of his music from motivic cells that are developed by a continual process of interplay, variation and transformation. Frescobaldi's fertile musical imagination found nourishment in many additional sources: the expressive discords and chromaticisms of the contemporary madrigal, the declamatory rhythms and affective figures of *seconda pratica* recitative, the brilliant preludes and interludes improvised by virtuoso church organists, the free, ever-changing textures of lute and theorbo playing and the earthy vitality of popular songs and dances. His keyboard style in particular is thought to draw on diverse elements: from Ferraresi like Luzzaschi and Ercole Pasquini, from Venetians like the Gabrielis and especially Merulo, and from

1. Girolamo Frescobaldi: drawing by Claude Mellan, black chalk, c1624–8 (Ecole des Beaux-Arts, Paris)

2. Caricature by Gianlorenzo Bernini resembling other depictions of Girolamo Frescobaldi, pen and brown ink (I-Rvat Chigi P.VI.4, f.9r)

Neapolitans like Macque (actually from the north, by way of Rome), Trabaci and Mayone. Frescobaldi, however, did not merely emulate the appropriated styles, forms and conventions; he played with them, confronted them, crossed them, recreated them and turned them upside down.

Like few composers before him, Frescobaldi took on the challenge of creating a substantial musical narrative not carried by a text – an endeavour that continued to engage him through more than three decades of creative activity. In each of his works a unique plot unfolds against the setting of a particular genre, instrumentation, mode or tonal type, or (especially in the contrapuntal works) OBBLIGO or compositional premise. (On the *obbligo* tradition in early 17th-century Italy see Durante in Silbiger, 1987.) Musical ideas stated at the outset serve as central characters and are taken through a succession of episodes in which they may undergo repeated transformations. In these episodes Frescobaldi availed himself of a wide range of styles, often borrowing from other genres; this practice, especially notable in compositions from the 1620s (e.g. the capriccios in A.5 and toccatas and canzonas in A.6) but already present in the early fantasias in A.1, sets him apart from most of his predecessors and contemporaries, and allows these works to be sustained over considerable stretches of time. In the 1630s his experiments with extended narratives included, in addition, the joining of different dance forms, either as separate pieces or bridged by transitional passages.

Particularly novel was his use of dramatic tempo changes between successive sections. Although some changes are achieved by accent shifts (metric modulation) or mensural proportions, others are no longer mediated by tactus continuity but governed by the expressive affect of each episode. Indeed, at the end of a section the sense of a tactus may be wiped out entirely by an extended cadential flourish. Thus, many tempo changes are not prescribed with mathematical precision; although Frescobaldi provided some guidance with his prefatory instructions and manner of notation, the performer has ultimate responsibility for their execution (for different views see Darbellay and Murata in Silbiger, 1987).

The musical ideas or subjects themselves become more distinctive and individual through the years, and therefore easier to follow in their journeys through the episodes. In the early works they tend to derive from the stereotypical modal and ultimately chant-derived language of Renaissance polyphony, but in later compositions they often include triadic elements or outline functional harmonic progressions, and quite a few are based on easily recognizable popular tunes and motifs (like *la Bergamasca* and the cuckoo call).

Tonal areas and modulations tend to play a secondary role in the structuring of Frescobaldi's narratives. In general, the development of his tonal language reflects the trends of the early Seicento (some scholars even regard him as conservative, but that may reflect his concentration on instrumental music). The 'white-key' diatonic system, or its transposition by one flat, with limited chromatic alterations, provides the basic pitch material, regardless of the tonal centre, but in his later works (especially in A.8) the range of the alterations widens, allowing for such previously uncommon tonalities as E minor, with D♯ leading notes. Clear goal-directed harmony in the service of extended cadential preparation becomes more prevalent, and there are occasional examples (e.g. in the *Cento partite*) of modulations to different key areas. The conventional ordering of sets of pieces according to the church tones is observed in the early publications A.1–6, but no longer in collections, such as A.5 and A.6, published after 1620.

9. FIRST PUBLICATIONS: 'MADRIGALI' AND 'FANTASIE' (1608). In his first published collection (C.1), a set of well-crafted but otherwise unremarkable madrigals, Frescobaldi demonstrated his mastery of this fashionable medium; the publication of a book of madrigals was a traditional means for a young composer to establish his artistic credentials. By and large these works are still close to those of his teacher Luzzaschi and other Ferrarese madrigalists. Similarly, a few ensemble canzonas included in a Venetian anthology (B.1) generally fit in with contemporary practice. But in his next publication (A.1), issued only a few months later, Frescobaldi turned to the keyboard and moved beyond well-trodden territories.

The fantasias are complex works which challenge performers and listeners alike. Most start with the calm and spacious imitative polyphony that characterized the late 16th-century ricercares, but in many the texture soon shifts to a dense web of motifs or fast-paced metric and rhythmic styles not usually associated with that genre. In addition to undergoing traditional augmentations, diminutions, inversions and ostinatos, subjects are often transformed by chromatic passing notes, rhythmic distortions and, through the INGANNO technique, even more radical changes of shape. These transformations generate a rich supply of motifs and counter-motifs that may eventually saturate the entire texture.

10. 'Recercari, et canzoni' and 'Primo libro di toccate' (1615). In 1615 Frescobaldi brought out two new publications of keyboard music, A.2–3 and A.4. These formed the first instalment of a published canon of works that until his last years he would continue to revise, refine and extend. Evidently the earlier publications of 1608 were regarded as youthful works that did not form part of this canon: he never published revisions or reprints of them. (Manuscript copies of the *Fantasie* show that, nevertheless, they continued to interest later musicians: among surviving copies is one by Bernardo Pasquini, the leading late 17th-century keyboard master.)

The two 1615 collections provided a compendium of the keyboard genres of the time. Each genre is represented in its purest form, as if to clarify its identity, and each is exemplified by a series of pieces that exhibit a wide range of possibilities. The distinction between the two volumes can be seen as a larger stylistic categorization, analogous (though not identical) to Monteverdi's *prima* and *seconda pratica* (of course, the relation to the text – the principal basis of Monteverdi's division – plays no role here), or to Bernhard's *stylus gravis* and *stylus luxurians*. Like A.1, A.4 was typeset in four-part open score and no instrument is mentioned in its title. Although the pieces were no doubt conceived primarily for keyboard, they are, first of all, works of musical counterpoint which could be played on harpsichord, organ or even by an instrumental ensemble. The pieces in A.2–3, elegantly engraved in two-stave keyboard score, were, on the other hand, designed for a particular medium, as indicated by the title (the first editions mentioned only 'cimbalo'; later editions added 'et organo') and confirmed by the style of the music.

Within each volume there are further subdivisions of this stylistic hierarchy. The ricercares in A.5 represent the 'old style' in a deliberately archaic manner. Like the fantasias of A.1, they rely on time-honoured contrapuntal techniques, but the counterpoint is less dense than that of the fantasias, making the individual voices easier to follow. Each ricercare displays a different combination of contrapuntal artifices, thus illustrating the subclasses of the genre. Unlike the fantasias and many ricercares of earlier composers, no figurations in fast note values or sections in lighthearted triple metre are allowed to distract from their stylistic purity, and the introduction of accidentals is comparatively restrained. However, the 'old style' is more on the surface than in the substance, and the ricercares are by no means stodgy or lacking in wit. For examples of the latter, see ricercare no.6, which has fun with the *Fra Jacopino* ditty (the Italian *Frère Jacques*), and no.8, which avoids all motion stepwise.

The canzonas in this collection, although in a relatively conservative idiom, have less restrictive compositional premises and allow for a greater variety of metrical organizations and rhythmic patterns. Their central device, one already explored in A.1, is the transformation of a subject through a series of clearly articulated imitative sections in different rhythmic textures. Both ricercares and canzonas were frequently employed during church services, but bringing the two together in a single volume was appropriate for another reason: the two genres, differentiated by contrasting characteristics within a shared stylistic tradition, apparently formed an intriguing duality in the minds of the composer and his contemporaries. Similar dualities existed on different levels of the genre hierarchy, from the overall dichotomy of the old and new style to the romanesca–Ruggiero and the chaconne–passacaglia pairs, and Frescobaldi was to explore such dualities in several subsequent compositions.

Compared with the ricercares, the toccatas in A.2–3 stand at the other end of the stylistic spectrum. With these works Frescobaldi laid the foundation of the expressive keyboard style; they are the instrumental equivalents of the *seconda pratica* madrigals, sacrificing the traditional modes of composition to the expression of *affetti* (feelings, moods). As with the madrigals, this expression requires an unprecedented flexibility of tempo and rhythm; the novelty of this performance manner is apparent from the composer's instructive remarks in his prefatory notes (English translations in Hammond, *Girolamo Frescobaldi*, 1988). Although the toccatas differ markedly among each other in character and shape, they are kept stylistically 'pure', like the ricercares. No distinct segments of strict imitative counterpoint (often present in toccatas by earlier composers) are permitted to interrupt the free play of sound, even if the seemingly improvisatory passage-work is always supported by solid contrapuntal underpinnings. There is little doubt that these works, and perhaps even more the toccatas in his second book (A.6), are largely responsible for the fascination Frescobaldi has exerted on musicians throughout the ages; their purely musical expression of intense and continually shifting passions has had few equals.

A third style, which one could call the popular style, also makes its appearance in this volume. It is represented by the *partite*, variations on traditional songs, and by a set of correntes. Actually, the correntes did not appear until the second edition of the volume, issued only a month after the first; they represent the popular style in its purest form. Although the settings of dances and popular songs had formed part of the Italian keyboard repertory almost since its beginnings, most earlier examples tended to be simple melody and bass settings, reinforced by triadic chords that followed each other with little regard for smooth part-writing. Frescobaldi introduced a more subtle and varied style in his dance and song settings, enlivened by a continuous entry of new voices which vanish again before they have a chance to burden the texture.

With their bold sweeps over the keyboard, the four correntes show the exuberance and easily flowing inspiration of a composer who has just reached his full powers. The apparent simplicity of Frescobaldi's charming dance-tunes represents a side of his art far removed from that of his works in the learned and expressive styles; but they must have found appreciative audiences in households across Europe, for they made their way into the unpretentious dance collections of many countries.

Some of the *partite*, especially those on the romanesca and the Ruggiero, contain a blend of the popular and expressive styles – the earliest examples of Frescobaldi's efforts to enrich keyboard music by the synthesis of different styles. The lovely romanesca set, whose variations introduce a wide spectrum of expressive characters, is deservedly among his most often performed harpsichord works.

11. 'Capricci' and 'Secondo libro di toccate' (1624–7). The years 1624–8 produced a second wave of publications, beginning with the *Capricci* (A.5). The capriccios are mostly works of imitative polyphony, but they do not follow any single genre convention; stylistic

procedures are borrowed from the ricercares and the canzonas, and even occasionally from the variations and, in some cadential flourishes, from the toccatas. Each capriccio is based on a distinct idea, which may take the form of a traditional contrapuntal subject like the hexachord, a popular melody like *La Spagnoletta*, or an unusual compositional device like the upward resolution of suspensions. Several capriccios bring to mind the fantasias, in that the subject is taken through a series of distinct, contrasting episodes; but in addition to shifting metres and rhythms, both gradual and abrupt changes of tempo (sometimes as a sequence of progressive accelerations) have become part of their individual plots. However, whereas the subjects of the fantasias tended to be generic and easily absorbed into the polyphonic fabric, those of the capriccios are distinct and memorable (if not already familiar to the listeners as popular tunes); furthermore, their paths through the piece are not obscured by the excesses of *inganni* and rhythmic distortions. The capriccios are not among the most performed of Frescobaldi's works, but they provide the connoisseur with continual surprises and pleasures and demonstrate Frescobaldi's compositional ingenuity and imagination functioning at their highest levels.

In 1626 Frescobaldi published the contents of A.4 and A.5 together in a single volume (A.5a) – a suitable combination, since they share a four-part contrapuntal texture and open-score notation. The following year saw the publication of a second *Libro di toccate* (A.6). Like the first book, this volume encompasses several other genres in addition to toccatas, but the conception of some of these has considerably broadened, in part by crossing the very genre boundaries that were so clearly staked out in the 1615 collections. The toccatas cover still more types and styles, including the occasional insertion of canzona-like segments. Passages in various triple and compound metres, absent from the first book, introduce further variety. In addition, four toccatas are specifically designated for the organ: two are of a contemplative type 'per l'elevatione' and two are pedal toccatas (actually designated 'with or without pedals', and, indeed, they work either way). The mixture of organ and harpsichord pieces, not found in the first book, is carried further by the inclusion of a group of liturgical plainchant variations, as well as by more dances and *partite*. Another set of canzonas considerably extends the stylistic boundaries, in part by the admixture of improvisatory toccata elements, graceful dance gestures and echoes of the dynamic new violin repertory. Finally, Frescobaldi paid homage to the past with his only published contribution to one of the most ancient of keyboard genres: an intabulation of a vocal composition (Arcadelt's madrigal *Ancidetemi, pur*, set previously by several Neapolitan composers). Yet even with this archaic gesture he distanced himself from his predecessors; rather than piling fanciful decorations on top of the original madrigal, he achieved a total metamorphosis, turning his intabulation into an idiomatic and expressive keyboard work not unlike the toccatas with which it is placed (in effect taking the place of the 12th toccata; see Silbiger, 1995).

12. Music for voices and for instrumental ensemble (1627–30). Among the *partite* in A.6 are sets on the chaconne and the passacaglia. Frescobaldi appears to have been one of the first to introduce these genres into the written art-music repertory, and may have been the first to bring them together as a pair. His individual conception of these two genres and their relationship was to serve other composers as a model, but he seems not to have been happy with the particular guises in which they appeared here, since he omitted these settings when he revised the volume.

All Frescobaldi's published collections since the madrigals of 1608 had been devoted to keyboard music, although through the years a number of vocal pieces on sacred and secular texts had appeared in miscellaneous contemporary anthologies. In his next four publications, from the years 1627–30, he offered a large quantity of ensemble music for voices and instruments, much of it probably written over an extended period but not previously published. As is the case with his keyboard publications (which, similarly, may have gathered together earlier works), each volume nevertheless presents a carefully planned and logically arranged series of pieces, exhibiting many different types of compositions within a given framework.

The 1627 collection of 32 small motets (D.5) and the 1628 collection of 40 ensemble canzonas (B.2 and 2a) are in many ways counterparts to one another. Each volume presents a series of pieces for one to four parts in various combinations of high and low voices. Compared to the contemporary keyboard collection (A.6), both are written in a conservative, restrained idiom that makes them suitable for liturgical use, although, unlike the keyboard ricercares, they are not confined to a deliberately purified old style and include numerous expressive embellishments. The ensemble canzonas were published both as a set of partbooks (B.2) and (in an edition prepared by Frescobaldi's pupil Bartolomeo Grassi) in open score (B.2a); the latter edition also included a few curious pieces with obbligato spinettina parts.

The two volumes of secular songs (A.5 and 6) appeared in 1630, when Frescobaldi served at the Medici court in Florence, but many were probably written earlier in Rome (Hill; see Silbiger, 1987). Like the sacred concertos and ensemble canzonas, the songs explore different combinations of high and low voices, but in addition present a diversity of vocal (and poetic) genres, designated by the composer as 'canto in stile recitativo', 'aria', 'sonetto', 'madrigale', 'canzone' etc. Among these works are two genre pairs that Frescobaldi had coupled previously in keyboard settings: these being the romanesca–Ruggiero and the chaconne–passacaglia. In the latter pair, ostinato aria sections move through different keys and alternate with modulatory recitatives, thereby creating miniature recitative–aria chains.

13. Last keyboard publications (1634–7). In 1635 Frescobaldi brought out another publication of keyboard music, the *Fiori musicali* (A.7). This is his only collection containing exclusively service music for the church, specifically for the celebration of Mass, and it was to be his last publication devoted entirely to new works. Unlike his earlier collections, it is not organized by genre but according to the order of the Mass, and presents three cycles, for the Sunday Mass, the Mass of the Apostles and the Mass of the Virgin (which together provide the music for just about any Mass except those for memorial services). Frescobaldi published the collection in Venice and it may originally have been composed for use at S Marco and similar major churches, since the three cycles

conform to their liturgical needs rather than to those of small parish churches (Moore; see Silbiger, 1987).

The music in A.7 cuts across several styles and genres, the only constraint being appropriateness to the dignity of the service, and some have questioned whether even that line was crossed in the two capriccios on popular tunes that conclude the collection. Virtually all genres found in his earlier works are represented here, except those in the popular style (his last contributions to the popular style would find a place in the supplement to his first book of toccatas, to appear a few years later). The musical language of the *Fiori musicali* has been especially well received in later times. This probably has to do with the purposefully organized harmonies (although with frequent and often surprising diversions), and with the transparency of the counterpoint, especially in the ricercares and canzonas, which continue the trends already observed in A.4 and A.6, including the use of memorable subjects and quotation of popular tunes. The often played toccatas for the Elevation surpass even those in A.6 for their sustained moods of passionate mysticism.

Through the years Frescobaldi continued to prepare new editions of some of his earlier collections. Probably the most thoroughly revised collection was that of the ensemble canzonas; in the 1634 edition (B.3) 10 of the 40 pieces were entirely replaced and another 16 were subject to various degrees of revision (see Harper, in Silbiger, 1987) – yet further evidence, if any were needed, of Frescobaldi's concern not only for the text of individual works but also for the contents of his collections as a whole. The newly added pieces included yet another Ruggiero–romanesca pair.

In 1637 Frescobaldi brought out revisions of both books of toccatas. The first book includes a substantial supplement of pieces in the popular style which appears to have been in preparation for some years and was originally intended for the new edition of the second book. It underwent repeated revision before its final publication; evidence of some of the earlier phases has been detected in pieces and fragments surviving in manuscript (Darbellay, 1988). The added works show that during his last years Frescobaldi became interested in the creation of extended compositions or cycles out of a succession of individual pieces, sometimes joined by transitional passages. Apparently a considerable amount of experimentation preceded the final products, which include several two-movement and three-movement dance sequences, as well as the lengthy *Cento partite sopra passacagli*.

Frescobaldi seems also to have been occupied during this period with refining his conception of the chaconne–passacaglia pair. An example of one of these concludes all but one of the dance cycles, and their opposition (with a brief excursion to the corrente) forms the main subject of the *Cento partite*. This last work, one of Frescobaldi's most impressive achievements, includes several segments that during a preliminary phase had been destined as parts of separate compositions. The final published version is a masterful essay on the passacaglia and the chaconne and on their relationship. The two genres are conceived dynamically rather than statically; they undergo constant changes of character, mode and tempo, and several times transform into one another through subtle metamorphoses (see Silbiger, 'Passacaglia and Ciaccona', 1996). The *Cento partite* also stretches further the range of chromatic pitches (from D♭ to D♯) already expanded in other late works, suggesting a turn either towards equal (or other circulating) temperament, or, more likely, use of keyboards with split keys (Barbieri, 1986; see Fabris and Durante).

Except for a new edition (1642) of A.5 with only minor revisions, the 1637 volumes were Frescobaldi's last publications. However, among the works surviving only in manuscript are thought to be several that date from his final years but that he did not live to see published. Mention should also be made of a collection of canzonas (A.9) published posthumously in Venice by Alessandro Vincenti, who acquired them after Frescobaldi's death from unknown sources.

14. MANUSCRIPT REPERTORY. A substantial amount of music in manuscript has been attributed to Frescobaldi, either in the sources or by modern scholars; the number of keyboard works in particular almost rivals that contained in his printed collections. The geographical distribution of these manuscripts, compiled in France, England, Italy and various parts of the Austro-German empire, reflects the wide reception his music enjoyed during the 17th century. However, by comparison with the published works, the quality of this manuscript repertory is variable; some of it clearly is spurious, misattributed or at best questionable. Even among the works considered to be genuine, many are rather brief and simple, some giving the impression of having been jotted down on the spot for a music lesson. Nonetheless, a number of compositions deserve consideration alongside the major works in the printed collections.

Of particular importance is a collection of keyboard manuscripts formerly in possession of the Chigi family and now in the Vatican library (A.16). It has been shown that all these manuscripts most likely belonged to one of Frescobaldi's pupils and assistants, Leonardo Castellani (*c*1610–67), and that they include materials for teaching composition and improvisation used by Frescobaldi and other musicians associated with the Cappella Giulia at S Pietro (Annibaldi, 1990). One of the manuscripts (Chigi Q.IV.29) includes a set of short pieces in Frescobaldi's own hand dating from his earlier years (fig.3). Other manuscripts contain what are thought to be copies of his works by students or assistants; some of these appear to be earlier versions of pieces published subsequently (Darbellay, 1986, see Fabris and Durante, pp.107–24). The discovery of Frescobaldi's close connection with the Chigi manuscripts has lent credibility to many of the attributed works, and even led to proposing him as author for some of the anonymous pieces, although controversy persists over the authorship of several compositions.

The last three toccatas in Chigi Q.IV.25, marked 1, 2 and 3, may provide a glimpse of the compositional development of Frescobaldi's last years. They incorporate several new features that recur in the toccatas of his pupil J.J. Froberger and his younger contemporary Michelangelo Rossi, such as the inclusion of several lengthy and sometimes motivically related canzona segments and the exploration of unusual key areas. If these works are indeed authentic, they may represent the beginning of a third toccata cycle, left unfinished at the composer's death.

Some of the composer's last work on the canzona may have survived in a manuscript entitled 'Fioretti del Frescobaldi' (A.13) in the hand of his assistant (and the

3. Fragment of an unpublished toccata by Frescobaldi, thought to be an autograph copy (I-Rvat Chigi Q.IV.29, f.29r)

engraver of the two books of toccatas) Nicolò Borbone (see SCKM, ii (1987), pp. v–xiii). The 11 canzonas in that volume show a further development of trends evident in A.7, such as subjects that outline functional harmonic progressions, frequent use of short note values, especially in the sections in triple metre, consistent use of counter-subjects and extension of the chromatic compass (from A♭ to A♯).

Relatively few non-keyboard works are preserved in manuscript. Two polychoral mass settings on popular tunes (*La monicha* and the *Aria di Fiorenza*) have been ascribed to Frescobaldi by some scholars and included in the *Opere complete*; but other scholars have questioned Frescobaldi's authorship and have proposed Nicolò Borbone (Annibaldi, 1986; see Fabris and Durante) or Paolo Agostino as more likely authors. A survey of Frescobaldi's works must not fail to mention the two perhaps most widely known compositions, both manifestly spurious: a Fugue in G minor (E.3) now shown to be the work of the 18th-century composer Gottlieb Muffat; and a Toccata (E.4) for cello and piano (often performed in arrangements for concert band and orchestra), probably concocted by the 20th-century Gaspar Cassadó.

15. Influence and reception. Frescobaldi's influence was wide and long-lasting. It was, of course, most direct on the circle of musicians who worked with him in Rome (see §6), among them G.B. Ferrini, and was passed on to succeeding generations of Roman musicians, most notably Bernardo Pasquini. His celebrated German pupil, Froberger, showed a clear debt to the older master in toccatas and contrapuntal pieces, and is often credited with having introduced Frescobaldi's music north of the Alps, although the extent of the training Frescobaldi provided his young pupil has recently been questioned (Annibaldi, 1995) and Frescobaldi's music appears to have been known in France (Hammond, 1991, p.150), Flanders (see SCKM, xviii (1987), p.ix) and the German lands (Riedel; see Silbiger, 1987) well before Froberger's visit to Rome. By the late 17th century Frescobaldi had become a much admired and emulated figure; homage in the form of literal quotations from his works can be found in the keyboard music of leading European musicians, among them Bernardo Pasquini, J.C. Kerll and John Blow.

Some of the earliest works to be widely circulated were the little dance pieces which started appearing, often anonymously, in popular song and dance manuscripts, as well as in guitar and ensemble arrangements, for example in arrangements of the *Corrente primo*, I.3, for guitar in *battuto* chord tablature in Antonio Carbonchi's *Le dodici chitarre spostate* (Florence, 1643) and for instrumental ensemble in J.E. Kindermann's *Deliciae studiosorum* (Nuremberg, 1640). For later composers, however, it was the *stylus fantasticus* of the toccatas that seems to have exerted the greatest fascination; echoes of their extravagant gestures continue to be audible in the keyboard fantasias, preludes and toccatas of the late 17th century and the 18th, especially in Germany. However, the most enduring impact may have come from his works in the 'learned style', which assumed a role in the study of instrumental counterpoint comparable to that of Palestrina's music in the study of vocal counterpoint. J.J. Fux, author of the influential treatise *Gradus ad Parnassum* (1725), used the *Fiori musicali* as a model for composition in the strict style; his *a cappella* compositions show more influences from the instrumental polyphony of Frescobaldi than from the vocal polyphony of Palestrina (Riedel; see Silbiger, 1987). Works in the contrapuntal style were copied by J.S. Bach and by his followers, including C.P.E. Bach, Kirnberger and Forkel (C.P.E. Bach named Frescobaldi among the composers who influenced his father). Anton Reicha included a fugue on a subject from the *Fiori* in his *Dreissig Fugen für das Piano-Forte* (Vienna, 1804).

During the 19th and 20th centuries the interest in Frescobaldi shifted from a pedagogical to a historical one; a landmark was the 1889 edition of a selection of his works by the organist and scholar Franz Xaver Haberl. Among 20th-century composers, Bartók took an interest in his music, performing and publishing brilliant piano

adaptations, and Jehan Langlais paid tribute with his *Hommage à Frescobaldi* for organ.

FREDERICK HAMMOND (1–7, bibliography), ALEXANDER SILBIGER (8–15, work-list)

Fresneau, Henry (*fl* 1538–54). French composer. Bibliographical evidence suggests that he had connections with Lyons. Moderne's anthologies ascribe to him one motet, *Miser ubi parebo*, and 20 chansons for four voices. 13 of these appeared in the second volume of *Le difficile des chansons* (RISM 1544[9]); they include two anecdotal pieces about the sexual adventures of Franciscan and Dominican friars (*Ung Cordelier* and *Ung Jacobin*), both perhaps of local significance. Another chanson, *Montez soubdain* (RISM 1540[17]), may refer to the 'chevauchée de l'âne', a jovial tradition celebrated annually in Lyons. One clumsy text, *Mignons qui suives la route*, is no more than a publicity jingle advertising a travelling troupe of officially sanctioned players. Like some other composers of polyphonic music (e.g. Sandrin), Fresneau may have been connected with dramatic entertainment: his knowledge of the popular repertory is attested in a *fricassée* which quotes from over 100 contemporary chansons. He specialized in novelty pieces, composed in a catchy style with rapid syllabic patter, and it is easy to see how *Le jeu m'ennuye* ascribed to Fresneau in the sixth book of Moderne's *Parangon* (RISM 1540[16]) came to be attributed to Janequin in Attaingnant's 23rd book of chansons published in Paris several years later. Attaingnant was clearly uncertain about Fresneau's music: he reprinted two of the pieces from *Le difficile des chansons* with ascriptions to Santerre, and after attributing *Par toy Amour, hélas je suis laissée* to Fresneau in his 18th book (RISM 1545[13]), he ascribed it in the next book to Guyon. He did however issue three new chansons by Fresneau between 1545 and 1547; Du Chemin added one more in 1554.

WORKS

all for 4 voices

Motet, 4vv, 1539[10]

A bien compter, 1538[17], ed. in SCC, xxiv (1992), and in Dobbins (1972); Encores un coup, 1544[9]; Frere Jehan, 1544[9]; Hellas la paix, 1544[9]; J'ay la promesse, 1538[17], ed. in SCC, xxiv (1992); La fricassée, 1538[17], ed. in SCC, xxiv (1992), and in Dobbins (1972); Le cruel Mars rebelle et rigoureux, 1554[21]; Le jeu m'ennuye, 1540[16] (attrib. Janequin in 1547[10]), ed. in SCC, xxvi (1993), and in Dobbins (1972); Le mien esprit, 1544[9]

Mignons qui suives la route, 1539[20], ed. in SCC, xxvi (1993), RRMR, xxxviii (1981) and in Dobbins (1972); Montez soubdain, 1540[17], ed. in SCC, xxvii (1993), and in Dobbins (1972); N'aymés jamais ces vielles, 1544[9]; Oeil importun qui mon cueur a rendu, 1547[8]; Par toy Amour, hêlas je suis laissée, 1545[13] (attrib. Guyon in 1546[12]); Peine et travail ne m'est qu'esjouyssance, 1545[12]; Qu'est la, c'est le beau pere (Trac, trac, trac), 1547[10]; S'il est ainsi, 1544[9]

FRANK DOBBINS

Fresneau [Fresnau, Frasnau], **Jehan** [Johannes de Frania] (*b* Cambrai; *fl c*1468–1505). French composer. A Milanese document from 1476 describes him as a priest of Cambrai, and he may be identifiable with the petit vicaire 'Jo. Fremniau' who is documented at Cambrai Cathedral from 1468 to 1469. Fresneau was a *chapelain ordinaire* in the French royal chapel from 1469 to 1475. He was in Milan in 1476, where he is listed among the singers in the chapel of Galeazzo Maria Sforza. (He is here called 'Johannes de Frania', but also appears as 'Franeau' and 'Frania', which opens up the possibility that he could be identified with the 'Jehan Verneau dit Loyauté' in the French royal chapel, 1452–9.) According to a letter of 14 November 1476, Duke Galeazzo Maria wished to obtain a clerical position for Fresneau at Como. Following the duke's assassination (26 December 1476), 'Johannes de Frania' is included in a letter of safe conduct dated 6 February 1477. A letter from the papal court of 28 July 1486 identifies Fresneau as *cantor-capellanus* of the king of France and canon at St Martin, Tours. He was at the choir school of Chartres Cathedral from 1494 until February 1505, as procurator of the canonships of St Martin; he held the title of 'canon and provost of Mayet in the church of said St Martin' and is also described as a 'notary and procurator in the church's court'.

Six works, one mass and five chansons, by him survive. Although three of the chansons are also attributed to other composers, the evidence of the sources and stylistic considerations favour Fresneau. His chansons, all of which seem to be from the 1470s, stay within the structural confines of the *formes fixes* and make sparing use of imitation. It is likely that he was Ockeghem's student, as he is included in Guillaume Crétin's famous *Déploration* on the death of Ockeghem; he is listed here among the living composers, alongside Josquin, Agricola, Brumel and Compère. That he was considered a musician of some stature is suggested by the sentence 'Prenez Fresneau pour vos chantz accorder'.

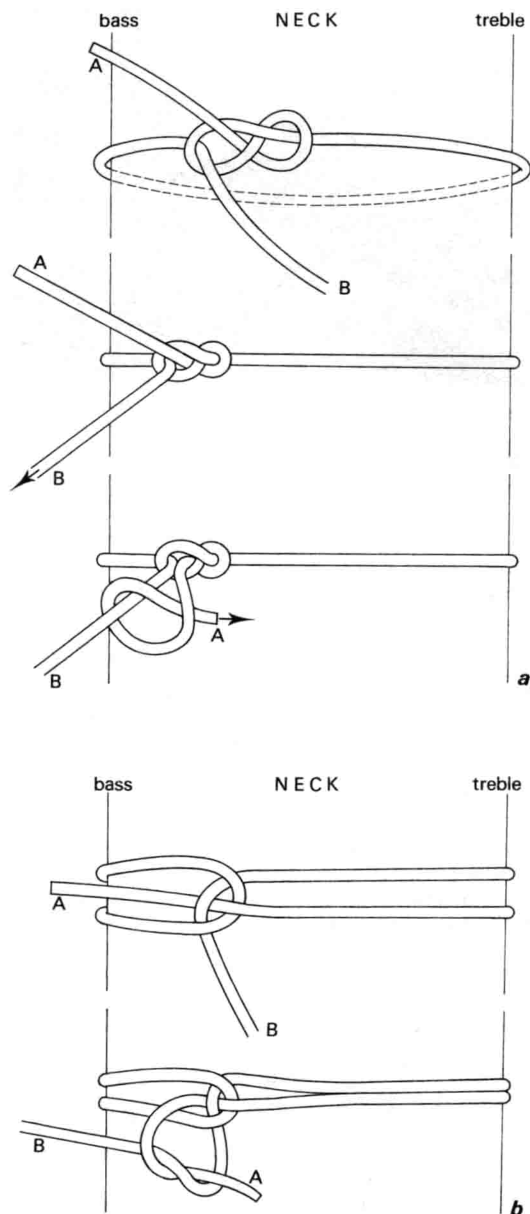
ALLAN W. ATLAS/JANE ALDEN

Fresnel, Baude (*b* Reims, mid-14th century; *d* 1397–8). French harpist and organist to Philip the Bold of Burgundy, possibly identifiable with BAUDE CORDIER.

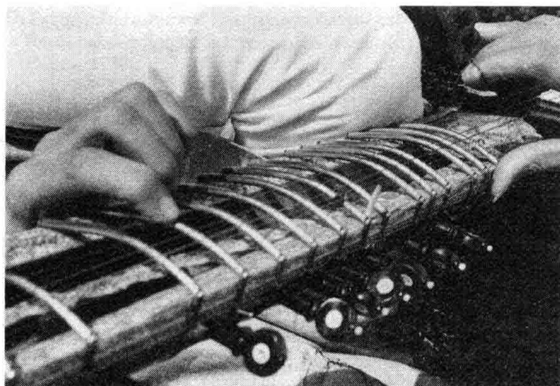


Fret (Fr. *touche*, *ton*; Ger. *Bund*, *Tonbund*, *Griff*, *Band*; It. *tasto*). A strip of gut, bone, ivory, wood or metal, placed across the fingerboard of certain bowed and plucked instruments. The sound of a plucked string stopped by the finger against a fingerboard without frets is unsatisfactory: the flesh of the fingertip does not make a sufficiently sharp cut-off point on the vibrating string, which is consequently partly damped and sounds with less of an 'edge' to the musical tone. The hard ridge of the fret, against which the finger presses the string, forms a small nut and restores something of the 'open string' quality to the sound. The presence of frets also aids the intonation of chordal playing.

In the 16th and 17th centuries instruments with gut strings such as the lute and the viol were most often fitted with movable gut frets, tied round the neck and fingerboard and fastened with a special knot – either as a single fret (one thickness of gut) or a double fret (two thicknesses side by side), as shown in fig.1. Double frets keep tight more easily and are very satisfactory on bowed instruments such as viols. On lutes and guitars, however, where the strings should lie very close to the fingerboard, the initial impetus at the moment of plucking can give a less satisfactory tone with double frets. The string, sharply pressed down on the strand of gut nearest the fingertip, buzzes slightly against the other strand. Mace (1676) mentioned both single and double frets, saying that the latter were 'after the old fashion'. Many modern makers and players use frets all of one thickness, but a useful pointer to early practice is given in John Dowland's 'Necessarie Observations' in *Varietie of Lute-lessons* (1610/*R*), edited by his son Robert:

> ... let the two first frets nearest the head of the Instrument (being the greatest) be of the size of your Countertenor, then the third and fourth frets must be of the size of your great Meanes: the fift and sixt frets of the size of your small Meanes: and all the rest sized with Trebles. These rules serve also for Viols, or any other kinde of Instrument whereon frets are tyed

Such a grading in fret thickness, from the equivalent of the fourth string (Countertenor) to the first (Treble), has important implications for the height of the action on these instruments.



On lutes and guitars, frets beyond the fingerboard were generally made of wood, glued to the soundboard. Instruments with metal strings, such as the cittern and bandora, usually had fixed metal frets, made from thin strips of sheet brass, held in tapering slots by thin wedges of hardwood. Bone or ivory was sometimes used, and

1. Method of tying (a) single and (b) double fret knots

modern instruments such as the guitar and mandolin have frets of specially extruded wire let into slots cut in the fingerboard.

On Western instruments frets are usually placed at intervals of a semitone (though on the cittern some semitone frets were omitted (for further discussion *see* CITTERN). The fixed frets of modern instruments are usually arranged for an approximation of equal temperament, to give an octave of 12 equal semitones. Perhaps the commonest such approximation is the 'rule of 18', where each fret is at $\frac{1}{18}$ of the distance from the previous fretto the far end of the string. Some early 16th-century composers for the lute or vihuela may have preferred an instrument in some form of mean-tone temperament. In any case the use of adjustable gut frets

2. *Detail of frets on an Indian sitār*

on Renaissance and Baroque instruments enabled the player to accommodate particular compositions or prevent unwanted irregularities of intonation owing to variations in the density of the gut strings (*see* TEMPERAMENTS, §8).

On certain Asian instruments, for instance the Indian *sitār*, the frets are several centimetres high (fig.2), so inflections in intonation can be obtained by pulling the string along them (*see also* SITĀR, §3). The frets of the *sitār* are movable: e.g. the first fret may be positioned either a whole tone or a semitone above the open string (the tonic drone), resulting in two different scale patterns.

Although frets appeared on some Asian and Middle Eastern plucked instruments as early as about 2000 BCE, they do not seem to have been known in Europe before the Middle Ages. By the 14th century, however, both bowed and plucked instruments were frequently fretted. One of the miniatures in Alfonso el Sabio's *Cantigas de Santa Maria* depicts two rebecs, one with frets and the other without (*see* REBEC, fig.3). In the 16th century frets became characteristic of the viol family. They have also occasionally been used on the violin to help the beginner play in tune. Playford wrote: 'It is the best and easiest way for a Beginner who has a bad Ear, for by it he has a certain rule to direct and guide him to stop all his *Notes* in exact *tune*'. The most important function of frets, however, was the special tonal quality that they provided.

A clavichord in which more than one tangent strikes a given pair of strings, producing different notes according to the distance from the bridge, is called 'fretted' (Ger. *gebunden*), since the tangent positions are determined in the same way as the fret spacing on a fingerboard.

IAN HARWOOD

Fretwork. British viol consort. It was formed in 1985, and after six months' intense study, funded by the Arts Council, made its début at the Wigmore Hall in 1986. By the 1990s it was recognized as the leading viol consort in the world. Its members in 1999 were Richard Campbell, Wendy Gillespie, Julia Hodgson, Susanna Pell, Richard Boothby and William Hunt, with the frequent participation of singers such as Michael Chance, James Bowman and Catherine Bott, the vocal ensemble Red Byrd, the organist Paul Nicolson and the lutenist Christopher Wilson.

Fretwork has toured extensively throughout Europe, the USA, East Asia and Australia, performing principally the English consort repertory, but also Renaissance and contemporary works. It has commissioned (and recorded) new compositions for viols by a wide range of composers, including George Benjamin (*Upon Silence*), Elvis Costello (*Put away forbidden playthings*), Tan Dun (*A Sinking Love*), Thea Musgrave (*Wild Winter*), Michael Nyman (*Self-Laudatory Hymn*) and Peter Sculthorpe (*Djilile*). However, Fretwork is best known for its CDs of the English repertory from Byrd to Purcell. Its performances are characterized by rich and passionate yet clean playing, with a strongly supportive bass; its excellent treble viols always maintain a sweet tone (in the tradition of Francis and June Baines). Fretwork has also published viol music and David Pinto's book *William Lawes*.

LUCY ROBINSON

Freund [Freundt]. German family of organ builders. The oldest surviving instrument ascribed to an organ builder named Freund is the organ at Ardagger, Lower Austria, with an inscription (dated 1770) which states that the organ was built in 1620 by a 'Passauischen orgelmacher Frynd'. A 'Johann Georg Freund', often mentioned in organ-building literature, was formerly thought to be the foremost member of the family, but there is no archival evidence to support this. The first traceable member of the family is Johann Freund (*d* Passau, 3 Dec 1678). He is possibly identical with 'Johannes Frondt' who worked in 1629 in Innsbruck with Leopold Rottenburger of Salzburg; he also worked together with Andreas Butz in Schlägl (1635; *see* BUTZ). Johann Freund built one of the most important organs of the 17th century for Klosterneuburg Abbey, near Vienna (1636–42; restored 1983–90 by the firm of Theodor Kuhn). The overall impression of the *plenum* is characterized by a comprehensive chorus with a Mixtur XII–XIV (4′) in the *Hauptwerk*; the specification also includes six reeds, of which the Regal 8′ in the *Brustwerk* is original (*see* ORGAN, §V, 12, Table 25). Freund also built organs for the St Afra chapel, Klosterneuburg (1649); the parish church, Linz (1650); St Bartholomäus, Passau-Ilzstadt (1655); St Leonhard, Aigen am Inn (1658); and Baumgartenberg Abbey (1662).

Johann was succeeded by his son Leopold (*d* Passau, 19 April 1722), who built organs for the Benedictine abbey at Kremsmünster (1680–82); the Benedictine abbey at Seitenstetten (1685–7); Passau Cathedral (1685–8); Korneuburg (1691); Freistadt (1705); and the pilgrimage church of Maria Brunnenthal (1711). The workshop was gradually taken over by his son-in-law Johann Ignaz Egedacher (*see* EGEDACHER). Franz Freund (*d* before 1696), also a son of Johann, was an organ builder in Rottenburg am Neckar, where he married in 1668 and obtained the freedom in 1670. He built an organ for the collegiate church at Wiesensteig (1680) and worked at Temple Neuf, Strasbourg (1683–4; repairs and rebuilding) and the Cistercian abbey at Schöntal an der Jagst (1690; new Posaune).

ALFRED REICHLING

Freundt [Bonamicus], **Cornelius** (*b* Plauen, *c*1535; *d* Zwickau, bur. 26 Aug 1591). German composer. He is first heard of in 1554 as the dedicatee of a Zwickau music manuscript. By 1564 he was Kantor at Borna. On 1 November 1565 he became Kantor of St Marien, Zwickau, and a teacher at the town school, in succession to David Köler (to whose memory he dedicated a composition). There he led a busy and fruitful life and was held in high esteem, not only for his abilities as a musician in the service of the town and church: he also produced school plays, built the town a sundial and in 1588 was invited to become a preacher, an offer that he declined. His music, which consists overwhelmingly of sacred works, including Christmas and wedding songs, probably all originated in his work at Zwickau; he wrote surprisingly little for the Lutheran Mass. A few of his Christmas songs found their way into the Dresden, Brunswick and Gotha songbooks, some remaining in use until the 18th century. They are attractive pieces, some in a simple homophonic style, others more sophisticated and motet-like; historically they represent a transition from the older Tenorlied to the newer chorale.

WILFRIED BRENNECKE

Frevylle, Richard (*b* *c*1475–80; *fl* 1490–1540). English composer. A Richarde Frevylle is recorded as a chorister at St George's Chapel, Windsor, between Michaelmas 1489 and Michaelmas 1494, when he was the senior boy. A florid four-voice setting of the *Nunc Dimittis*, written probably in the second or third decade of the 16th century, is attributed to him in *GB-Olc* 124, f.222.

ANDREW WATHEY

Frey, Emil (*b* Baden, canton of Aargau, 8 April 1889; *d* Zürich, 20 May 1946). Swiss pianist, brother of WALTER FREY (ii). He studied with Otto Barblan, Joseph Lauber and Willy Rehberg at the Geneva Conservatory, and with Diémer, Fauré and Widor at the Paris Conservatoire, where he won a *premier prix* for piano in 1906. Between 1912 and 1917 he held masterclasses in Moscow; from then until his death he taught in Zürich. As a pianist Frey toured successfully in Europe and South America. He also was a prolific composer, in a conservative style; his works include two symphonies, concertos, chamber works, piano music and studies.

JÜRG STENZL

Frey, Jacques-Joseph (*b* 1782; *d* 9 June 1838). French music publisher. He studied the violin at the Paris Conservatoire and from 1816 to 1838 played the viola in the Opéra orchestra. In August 1811 he purchased the engraved plates, manuscripts and business of Magasin de Musique (ii), establishing himself in their premises at 76 rue de Richelieu. Shortly afterwards (by November 1812) he moved to 8 place des Victoires, and in April 1838 to 22 boulevard Montmartre. On 17 November 1839 Richault announced that he had purchased 'all the engraved plates constituting the music business of the late M. Frey'.

Frey's prime achievement was to publish orchestral scores of Mozart's seven major operas. Only two had previously appeared in France: *Die Zauberflöte*, published by Sieber *père* in a strange adaptation entitled *Les mystères d'Isis*, and *Figaro*, published by Magasin de Musique (ii); Frey engraved a correct edition of the former and reissued the latter as part of his series, which attracted more than 250 subscribers. He also reprinted 32 of Grétry's operas from the original plates, but this series had a mere 19 subscribers. He published full scores of operas by Rodolphe Kreutzer, Le Sueur and Méhul as well as instrumental and vocal music and a number of instrumental methods; the latter included two of his own authorship, for violin and for tambour de basque. All his publications were engraved.

RICHARD MACNUTT

Frey, Walter (i). *See* FRYE, WALTER.

Frey, Walter (ii) (*b* Basle, 26 Jan 1898; *d* Zürich, 27 Aug 1985). Swiss pianist, brother of EMIL FREY. He studied the piano with Friedrich Niggli (1906–13) and Willy Rehberg (1913–16). From 1917 he was active as a pianist and teacher in Zürich, where he held piano and chamber music classes at the conservatory. On his numerous concert tours he played mainly contemporary music and introduced works by, among others, Hindemith, Wellesz, Toch and many Swiss composers; in 1927 he gave the first performance, with Stefi Geyer, of Berg's Chamber Concerto in Berlin (under Scherchen). He was co-founder and first president of Pro tunder Scherchen Musica (the Zürich branch of the ISCM) from 1934 to 1960, and

edited *25 Jahre Pro Musica* (Zollikerberg, Zürich, 1959). In later years his main concern was with the keyboard works of Bach, of which he gave complete performances in concert cycles.

JÜRG STENZL

Freyer, Achim (*b* Berlin, 30 March 1934). German painter, theatre designer and opera director. He studied at the Akademie der Künste in Berlin and made his stage début, designing the sets and costumes for Ruth Berghaus's production of *Il barbiere di Siviglia*, at the Berlin Staatsoper in 1967. He defected to the West in 1973 and made an immediate impression with his striking, painterly and abstract designs for Hans Neugebauer's productions of *Cardillac* (1973) and *Pelléas et Mélisande* (1975) at the Cologne Opera. In 1979, he made his début as director as well as designer with *Iphigénie en Tauride* at the Bavarian State Opera. He staged Philip Glass's *Satyagraha* (1981) and *Akhnaten* (1984, première) at the Stuttgart Opera. His 'pop art' style, evident in his productions of *Die Zauberflöte* for the Hamburg Staatsoper and, circus-style, for the 1997 Salzburg Festival, and *Orfeo ed Euridice* for the Deutsche Oper Berlin in 1982, aroused controversy.

HUGH CANNING

Freyer, August (*b* Mulda, nr Dresden, 15 Dec 1803; *d* Pilica, nr Warsaw, 28 May 1883). Polish organist, composer and teacher of German birth. He studied in Leipzig with Friedrich Schneider and Christian Pohlenz, and arrived in Warsaw in 1827. In the following year he entered the Warsaw Conservatory, where he studied figured bass and the organ with Lenz and took lessons in composition with Elsner. In 1831 he became the double bass player at the Wielki Theatre in Warsaw, but after three years had to resign because of illness. On 1 January 1837 he succeeded K.F. Einert as organist at the Lutheran church in Warsaw, where he remained for over 40 years. He rebuilt the organ and made the church one of Warsaw's most important musical centres. He founded a large choir there, performing oratorios and other vocal and instrumental works. He also organized a singing school at the church and directed amateur and professional choirs in performances of a wide range of music, including his own compositions. He gave frequent concerts in Warsaw and Kraków, in the major German cities (1834) and in Paris (1857); his performances were admired by some of the most prominent artists of the day, particularly Adolf Hesse, Mendelssohn, Spohr and Glinka, and he was considered the most distinguished organist in Europe.

From 1831 Freyer directed a free school of organ playing and taught composition and singing. He taught many well-known Polish musicians, including Moniuszko. From 1861 he worked at the Music Institute in Warsaw, where he became teacher of organ, harmony and counterpoint (until 1866). He wrote several textbooks, from which many Polish musicians were educated. He was also partly responsible for the founding of the Warsaw Music Society.

As an organist and teacher Freyer was important to Polish culture in the reawakening of interest in the declining art of the organ. His compositions, almost entirely for organ, can be divided into three groups: virtuoso pieces, preludes for his pupils, and accompaniments to sacred choral works. It is the flamboyant virtuoso works which have the greatest artistic value; they are distinguished by varied figuration, a resourceful use of register and a well-judged balance between polyphony and homophony. To this group belong the fantasias and variations: they were the earliest virtuoso organ works in 19th-century Polish music, and remain in the repertory.

WORKS

Sacred: Choralbuch für die evangelische Gemeinde (Warsaw, 1845); Anthems, op.6 (Warsaw, n.d.); Veni Creator, 4 male vv, org, op.10 (Warsaw, 1861); Anthems, op.12 (Warsaw, n.d.); Salve Regina, 4 male vv, op.13 (Warsaw, 1862); Anthems, op.16 (Warsaw, n.d.); Mass 'Na stopniach Twego upadamy tronu' [We Fall at the Steps of Thy Throne], 4vv, org, op.19 (Warsaw, *c*1867); other short choral pieces, all lost

Org: Concert fantasy, f, op.1, before 1857 (Leipzig, n.d.); Concert variations on a Russian song by A. L'vov, op.2, before 1857 (Berlin, n.d.); Concert variations on a church chant by Bortnyansky, op.3 (Leipzig, n.d.); 12 Easy Pieces, op.4 (Leipzig, 1857); 8 Pieces, op.5 (Leipzig, 1857); 12 Preludes, op.7 (Leipzig, 1858); 6 Preludes and 2 Postludes, op.8 (Leipzig, 1858); 8 Preludes, op.9 (Warsaw, 1861); 8 Preludes, op.11 (Warsaw, 1861); 26 Short and Easy Preludes, op.14 (Leipzig, 1865); 26 Short and Easy Preludes (Leipzig, 1865); 12 Preludes, op.17 (Warsaw, n.d.); 10 Preludes, op.18 (Warsaw, n.d.); 104 Ausgeführte Chorale, 1857–8, *PL-Wtm*

Pf: Masure, 1835 (Warsaw, n.d.); Valse, 1835 (Warsaw, n.d.)

ZOFIA CHECHLIŃSKA

Freylinghausen, Johann Anastasius (*b* Gandersheim, nr Brunswick, 2 Dec 1670; *d* Halle, 12 Feb 1739). German theologian and poet. He grew up in Gandersheim, where his father was mayor, and then from the age of 13 he attended the grammar school in the neighbouring town of Einbeck, where his maternal grandfather was a pastor. In 1689 he went to the University of Jena, where he soon came under the influence of the Pietists. In 1691, in Erfurt, he became acquainted with the leading Pietist A.H. Francke, following him in 1692 to the newly founded University of Halle. After some periods spent in Gandersheim, where because of his Pietist attitudes he did not obtain an incumbency, he became Francke's unpaid assistant in Halle in 1695, living with Francke's family. Only in 1715 did he receive a post there at the Ulrichskirche, enabling him to marry Francke's daughter Johanna Sophie Anastasia, his godchild, born in 1697. In 1727, after his father-in-law's death, he became director,

together with Francke's son Gotthilf August, of the Halle educational establishments.

Freylinghausen was editor of the most influential of the Pietist songbooks, *Geistreiches Gesang-Buch: den Kern Alter und Neuer, wie auch die Noten der unbekannten Melodeyen ... in sich haltend* (Halle, 1704), and its second part, *Neues geistreiches Gesang-Buch* (Halle, 1714). Both parts appeared in numerous, constantly expanded editions, the first in 19 up to 1759, the second in four up to 1733. An edition comprising both parts, containing 1581 songs with 609 tunes, was prepared by G.A. Francke in 1741; this appeared in several further editions up to 1778. Behind these numerous publications it is possible to discern the importance that A.H. Francke attributed to singing both in Pietist congregations and in his education system. In addition to its wide circulation, Freylinghausen's songbook was used in many subsequent publications, including the songbooks of the established church in the 18th century, notably the Schemelli Hymnbook (Leipzig, 1736), in which J.S. Bach played a part. The sources for the new treasury of songs in Freylinghausen's work, which contains hitherto unknown tunes and gives them with notated figured bass, are only partially indicated; for example, 37 texts with their melodies originate in H.G. Neuss's *Hebopfer zum Bau der Hütten Gottes* (Lüneburg, 1692, and Wernigerode, 1703), while the origins of others remain obscure. The *Geistreiches Gesang-Buch* makes comprehensive use of the aria manner of early evangelical Pietism, both in its strictly isometric style and, more characteristically, in its dactylic melodies in triple time set to suitable poems (for example the song *Eins ist not! Ach, Herr, dies eine* with a melody borrowed from Adam Krieger's *O Rosidore, edele Flore*, 1657). Although the songs of Freylinghausen's songbook owe much of their popularity to this style, it was just this which militated against the critical approval of the Wittenberg Theological Faculty in 1716, because the tunes were 'not in the slightest compatible with the gravity of the elevated mysteries which ought to be contained therein'. This style did however endear the songs to the Brethren who took many of them over for their first hymnbook (1720).

WALTER BLANKENBURG/DOROTHEA SCHRÖDER

Freystädtler [Freystädter, Freystadler], **Franz Jakob** (*b* Salzburg, 13 Sept 1761; *d* Vienna, 1 Dec 1841). Austrian composer. He was the son of Johann Jacob Freystädtler (1723–87, composer, choirmaster and 'Totensänger' of St Sebastians-Kirche). After serving as a choirboy in the fürstliches Kapellhaus, Freystädtler studied the organ with Franz Ignaz Lipp, and in 1777 entered the Kapelle of St Peter, where he was organist until September 1782. He then went to Munich as a piano teacher; he ran up debts, as he had done in Salzburg, and was imprisoned. On 13 May 1786 he arrived in Vienna, where he studied counterpoint with Mozart. Until 1961 it was thought that his book of studies (*A-Sm*) was Mozart's own material from his studies with his father Leopold. Mozart employed his pupil as a copyist, and Freystädtler copied the Piano Concerto in B♭ K456 and replaced six pages of the autograph score of the String Quintet in G minor K516. During a lawsuit in 1786/7, in which Freystädtler was accused of having stolen a piano, Mozart came to his help by posting bond for him and presenting a written surety. In summer 1787 he was the eponymous hero of Mozart's project for a burlesque *Der Salzburgerlump in Wien* (K509*b*), which includes the canon *Lieber Freistädtler, lieber Gaulimauli* (K509*a*). Freystädtler was still active as a piano teacher in 1834. He moved into a pensioners' home in April 1837 and died there, destitute, in 1841. Nowak's theory that Freystädtler was involved in completing the orchestration of the 'Kyrie' in Mozart's *Requiem* is ruled out by recent studies of his manuscripts.

Freystädtler's compositions include sonatas and sets of variations (and also a variation for Diabelli's *Vaterländischer Künstlerverein*, 1824), programmatic piano fantasies, two piano concertos (*a quattro*), songs in the popular, simple style, and two cantatas. In 1793 he arranged Mozart's last three string quartets for piano trio (with viola). An arrangement for piano quartet of the Piano and Wind Quintet K452 dating from 1786 and ascribed to him by Deutsch and Oldman in 1931, must be regarded as spurious.

MICHAEL LORENZ

Freytag, Heinrich Hermann (*b* Hamburg, *c*15 April 1759; *d* Groningen, 11 April 1811). Dutch organ builder of German birth. He was the son of a cabinetmaker from Württemberg. It is not known where he received his earliest training; he went to work for Hinsz just a few years before the latter's death in 1785. Hinsz's stepson and co-worker Franz Caspar Schnitger the younger inherited the business after Hinsz's death, and went into partnership with Freytag. Their first organ, a small 4′ instrument built for the Mennonite Church, Groningen (1785), had the same specification as a late Hinsz *Rugwerk*. In 1789 they added an independent Pedal and a small *Borstwerk* to the Hinsz organ of the Bovenkerk, Kampen (completed in 1790). This was followed by: a rebuilding of the organ in 't Zandt (1791); a new organ in Bierum (1792), which had a *Hoofdwerk* façade in the

style of Hinsz with a fake *Onderpositief* façade (for the Praestant 16′ treble) harking back to Arp Schnitger's organs; and another small organ in Zuidhorn (1793). They then built their largest new organ for the church of Zuidbroek, following a contract that had been drawn up by Hinsz. It had two manuals, an independent Pedal and 28 stops, and was the only new organ with independent Pedal built by them or by Freytag alone. Their last joint organ, with two manuals and pull-down pedals, was built for Bellingwolde (1796–8); a curiosity was that it had a roof-like structure over the Vox humana.

Freytag's first work outside the province was for the Zuiderkerk, Enkhuizen, where he added a *Rugwerk* and rebuilt the old organ in 1799. The metal plates for the Trompet 8′ for this organ were cast on sand. In 1802 he reduced and updated the now famous organ of Noordwolde from three manuals to two (the Vox humana of the *Rugwerk* was given a resonance box, covering the entire stop). In 1803 he carried out a rebuilding project in Loppersum, followed by work on the large organ of the Laurenskerk, Rotterdam (1806–7 and 1809–11, incomplete). A large one-manual organ with 15 stops, including two 16′ labials and a 16′ reed, was completed in 1808 for the village church of Finsterwolde. Another rebuilding project was carried out in Noordbroek (1806–9), where the Pedal was moved from behind the organ to two visible side Pedal towers. After a renewal with new façade of the small organ of the Doopsgezindekerk, Bolsward (1808–9), Freytag built one more new organ with two manuals and pull-down pedals for Oostwold in 1811. He died during its construction and it was erected by his master pupil Johan Wilhelm Timpe (1770–1837) who also completed the organ designed and perhaps partially built by Freytag for his widow in Warffum in 1812.

Most of Freytag's organs are preserved, and his work belongs to the best of the Schnitger school. He was enormously inventive with his case designs, continuing an age-old tradition and showing tremendous respect for old pipe material whenever renewing an old organ. Despite his conservatism, he was nevertheless willing to adopt ideas, styles and designs from other organs, such as the organ of Nieuwolda by Wenthin, which inspired him to introduce instruments with *Hoofdwerk* and *Bovenwerk* (Bellingwolde, Oostwold and Warffum). While no two organs look alike, their stylistic relationships remain unified. Three cabinet organs by Freytag survive.

After his death the business was continued on a small scale, mainly by his son Herman Eberhardt (1796–1869), who retired in 1862. The firm was then sold to N.A.G. Lohman.

ADRI DE GROOT

Frezzolini [Frezzolini-Poggi], **Erminia** (*b* Orvieto, 27 March 1818; *d* Paris, 5 Nov 1884). Italian soprano. She is identified with Romantic opera and especially with Verdi, two of whose heroines she created: Giselda in *I Lombardi* and *Giovanna d'Arco*, at La Scala, Milan (in 1843 and 1845 respectively). Trained mainly by her father, the noted bass Giuseppe Frezzolini (1789–1861), and Domenico Ronconi, she had bel canto skills but sang in the new manner called for by Verdi's works, uniting smooth legato and dramatic power. Her sensational début, at Florence in 1837, was in the title role of Bellini's *Beatrice di Tenda*; this remained one of her most effective parts, along with Donizetti's Lucrezia Borgia (in which she caused another sensation, at La Scala in 1840), Bellini's Elvira (*I puritani*), and Verdi's Giselda, Gilda (*Rigoletto*) and Leonora (*Il trovatore*). She was compared to Maria Malibran for boldness, intensity and pathos, with an added sweetness of timbre; Fétis wrote of her beauty and nobility on stage. After an early London season (1841) and many Italian engagements, she spent the years between 1847 and 1857 in St Petersburg, Madrid, London and Paris. Vocal decline and financial extravagance led her during the years 1857–60 to tour, at times hazardously, in the USA and Cuba and, as late as 1874, to appear in minor Italian theatres; Mark Twain records a concert in Naples in 1867 greeted with both applause and hisses. Her brief marriage in 1841 to the tenor Antonio Poggi ended in legal separation; her letters (in *I-FOc*) show her aware of the difficult position of women in a male-dominated world. After Poggi died (1875) she married a French doctor.

JOHN ROSSELLI

Friant, Charles (*b* Paris, 1890; *d* Paris, 22 April 1947). French tenor. His father was a principal dancer at the Opéra, Paris, and he himself sang in the chorus and appeared in the première of d'Indy's *L'étranger* as a boy. He later trained with Sarah Bernhardt and joined her company as an actor, then going to the Conservatoire to study singing in 1910. His operatic début was in the Paris première of Massenet's *Cléopâtre*. From 1920 to 1939 he was a member of the Opéra-Comique, appearing in a wide repertory but enjoying special success in Massenet operas such as *Manon*, *Werther* and *Le jongleur de Notre Dame*. Premières included *Le roi Candaule* by Bruneau and *Le Hulla* by Samuel-Rousseau. He also sang at Monte Carlo and La Monnaie, Brussels. His recordings, especially those from *Werther*, are distinctively stylish and expressive.

J.B. STEANE

Friar of Bristol. *See* TUNSTEDE, SIMON.

Friars Society Orchestra. Original name of the NEW ORLEANS RHYTHM KINGS.

Fribec, Krešimir (*b* Daruvar, Croatia, 24 May 1908; *d* Zagreb, 23 Dec 1996). Croatian composer. He studied music privately in Zagreb with Zlatko Grgošević and held the position of music editor of Radio-Televizije Zagreb from 1943 to 1964. Later he was appointed an associate of Zagreb Radio and director of the Croatian Music Society of Zagreb. Fribec was a prolific composer, particularly in the fields of opera and ballet. Most of his early music was based on folksong, but between 1955 and 1964 he used 12-note, serial and aleatory procedures.

The ballet *Vibracije* ('Vibrations', 1955) was a crucial work in the change, with its evocation of the multiplicity of vibrations within and around the human body. Despite the high quality of many of his instrumental works of this period, notably *Panta rhei*, *Asonance* and the String Quartet no.1, Fribec went back to his more conventional and approachable expressionist idiom. His old fluency returned in a large number of works – operas, ballets, cantatas, orchestral and chamber works – which satisfied his desire to make his music appeal to as large a public as possible.

Fribert [Friberth], **Joseph.** *See* FRIEBERT, JOSEPH.

Friberth [Frieberth, Friebert, Friedberg], **Carl** [Karl] (*b* Wullersdorf, Lower Austria, 7 June 1736; *d* Vienna, 6 Aug 1816). Austrian tenor, librettist and composer, brother of Joseph Frieberth, with whom he is often confused. He was a musician in the Esterházy retinue from 1 January 1759, numbering among the highest-paid singers; also in 1759, Prince Paul Esterházy sent him to Italy to study singing. Haydn wrote a number of roles and arias for him and for his wife of 1769, the former Maria Magdalena Spangler, and seems to have aided their careers at Eisenstadt out of friendship. The couple took the roles of Tobias and Sarah in the première of *Il ritorno di Tobia* (Vienna, 1775), and Friberth wrote the libretto (in Italian) to Haydn's opera *L'incontro improvviso* of the same year (based on L.H. Dancourt's *La rencontre imprévue*, set by Gluck); he may also have adapted *Lo speziale*, *Le pescatrici* and *L'infedeltà delusa*. After leaving Esterházy's service in 1776, Friberth became Kapellmeister at Vienna's two Jesuit churches (the Kirche Am Hof and the Universitätskirche) and at the Minoritenkirche. He retained these posts until his death and devoted himself primarily to the composition of church music, including nine masses. He also sang in Katharina Schindler's troupe (1776), published 24 lieder in Kurzböck's *Sammlung deutscher Lieder für das Klavier* (iii, 1780), and from 1771 was a member of the Vienna Tonkünstler-Societät, which he later served in various important administrative capacities. An Italian journey of 1796, underwritten by Prince Esterházy, is said to have brought him the pope's Order of the Golden Spur. Some Italian and Latin vocal pieces by him are extant (*H-P*, *A-Wgm*, *Wn*, *HE*, *KR*,

Wm, *Z*, *D-Bsb*, *S-Smf*), and there are editions of nine of his lieder (DTÖ, liv, Jg.xxvii/2, 1920/*R*).

MARY HUNTER/R

Fricassée (Fr.: 'hash'). A kind of QUODLIBET popular in 16th-century France. The term was first used in Attaingnant's *Second livre contenant XXV chansons* (Paris, 1536) and refers to a small number of pieces associated with the repertory of the Parisian chanson in which melodies and melodic fragments from French chansons were mixed and juxtaposed in a new polyphonic framework, often to witty, hilarious or obscene effect. (Like its Spanish counterpart, the *ensalada*, this 'stew' takes a gastronomic concoction as a figurative model for a musical procedure.) The musical processes at work in early *fricassées* may derive from some used in theoretical and practical sources of the late 15th century, in which a complete voice part from some well-known work was combined with another line crafted from many different sources – polyphonic art songs and monophonic popular songs alike. Three of the four extant *fricassées* of the early 16th century (an anonymous piece, as well as one each by Henry Fresneau and Jean Crespel) similarly juxtapose a complete voice from a well-known chanson by Sermisy, Janequin or Crecquillon with catchphrases from many other pieces. The eclecticism of these pieces is prodigious: Lesure identified quotations from well over 100 sources in Fresneau's *fricassée* alone. Pierre Certon's *Vivre ne puis content sans ma maistresse* (RISM 1538[14]) stands somewhat outside the radical 'polymusicality' of these pieces, and instead reworks only a few melodies from chansons by his friend and colleague Sermisy. The established collage technique nevertheless survived well into the second half of the 16th century: Petit Jean de Latre's *Fricassée sur les dessus de mon pouvre coeur*, issued uniquely in the 1564 edition of Phalèse's famous *Septieme livre*, similarly draws on chansons by Sermisy, Janequin and Northern masters such as Gombert and Crecquillon. Late examples include a *Fricassée des cris de Paris* in Jean Servin's *Meslanges de chansons nouvelles* of 1578 (like an earlier one by Janequin, it consists exclusively of Parisian STREET CRIES or vendors' calls) and Denis Caignet's five-voice *fricassée N'avons point veu la peronelle* from his *Airs de court* of 1597.

For further bibliography *see* QUODLIBET.

MARIA RIKA MANIATES/RICHARD FREEDMAN

Frichot, Louis Alexandre (*b* Versailles, April 1760; *d* Lisieux, 9 April 1825). French musician and inventor of instruments. He was the son of a cook in the service of the Duke of Burgundy, and went to England, a refugee from the Revolution, in the early 1790s. By 1793 he was playing the serpent in the Ancient Concerts orchestra and he is listed in Doane's *Musical Directory* of 1794. A memoir in the *Quarterly Musical Magazine and Review* of 1825 described a 'very extraordinary performance' by Frichot during the 1790s on what was very probably an early BASS-HORN (perhaps one like no.284 of the Carse Collection, now in the Horniman Museum, London), an instrument of his own invention. In 1800 the London music publisher and instrument dealer George Astor published *A Compleat Scale and Gamut of the Bass-Horn: a New Instrument, Invented by M. Frichot*. Astor also began to make bass-horns; a fine specimen, signed by Astor & Co. and dated 1807, is in *F-Pc*.

After the Peace of Amiens, Frichot returned to France and submitted his bass-horn to a jury of Paris music professors. Sachs referred to this instrument as 'die erster Name der Basse-trompette'; Frichot indeed patented a BASSE-TROMPETTE in 1810, but although closely related to the bass-horn the two instruments were in fact distinct (the *basse-trompette* having interchangeable bows of different length – *pièces de rechange* – for pitch adjustment). Pierre noted another instrument by Frichot, mainly wooden, with a substantial section made of brass. He described it as an early wooden two-keyed ophicleide, dating from about 1812, which had apparently been awarded a medal in England.

Frichot eventually settled at Lisieux as a teacher of music.

HOWARD MAYER BROWN/STEPHEN J. WESTON

Frick, Gottlob (*b* Ölbronn, nr Pforzheim, 28 July 1906; *d* Mühlacker, 18 Aug 1994). German bass. He studied at the Musikhochscule in Stuttgart and was a chorus member at the Stuttgart Opera (1927–31). He was engaged at Coburg in 1934, making his début as Daland. After periods at Freiburg and Königsberg he was engaged at the Dresden Staatsoper, where he created Caliban in Sutermeister's *Die Zauberinsel* (1942) and the Carpenter in Haas's *Die Hochzeit des Jobs* (1944), and sang Rocco, Nicolai's Falstaff, Prince Gremin, the Peasant in Orff's *Die Kluge*, and, especially, the Wagnerian bass roles. He joined the Berlin Städtische Oper in 1950 and the Bavarian and Vienna Staatsopern in 1953. He first sang at Covent Garden in 1951, as Hunding and Hagen, and appeared there regularly from 1957 to 1967 in the Wagner repertory and as Rocco. He also appeared at Bayreuth, Salzburg (where he took part in the première of Egk's *Irische Legende*), the Metropolitan, La Scala and other leading theatres. Although he officially retired in 1970 he continued to make occasional appearances in Munich and Vienna, and in 1971 sang Gurnemanz at Covent Garden. In 1976 the Stuttgart Opera staged *Die lustigen Weiber von Windsor* to honour his 70th birthday. Frick had a strong, firmly centred yet flexible bass voice which was immediately recognizable; he sang with the utmost intelligence and with incisive diction. He recorded all his major roles, notably his Rocco (three times), Hagen and Gurnemanz.

HAROLD ROSENTHAL/ALAN BLYTH

Frick [Frike], **Philipp Joseph** (*b* Willanzheim, nr Kitzingen am Main, 27 May 1740; *d* London, 15 June 1798). German organist and glass harmonica player. He was organist to the court of the Margrave of Baden-Baden, but became the first German virtuoso on Benjamin Franklin's glass harmonica and attempted to improve the instrument by applying keyboard action to it. After several years in St Petersburg he made his first appearance in London in 1778 and settled there shortly afterwards. He gave up concert tours on health grounds and devoted himself to teaching the piano and harmonica. In London he published three trios for harpsichord or piano and obbligato violin and cello (1797), two piano duets (1796) and the following theoretical works: *The Art of Musical Modulation* (1780; after *Ausweichungs-Tabellen*, Vienna, 1772), *A Treatise on Thorough Bass* (*c*1786) and *A Guide in Harmony* (1793).

BRUNO HOFFMANN

Fricker, Herbert (Austin) (*b* Canterbury, 12 Feb 1868; *d* Toronto, 11 Nov 1943). English organist and choirmaster. He was city organist at Leeds and choirmaster to the Leeds Musical Festival; the high reputation of the Leeds choir at the triennial festivals up to 1913 was largely the result of his training. He initiated municipal concerts at Leeds in 1903 from which grew the Leeds SO (later Northern PO), and furthered Yorkshire's musical development in many other ways. In 1917 he went to Canada to become conductor of the Mendelssohn Choir of Toronto with which he achieved a similarly high standard of performance. In this capacity he conducted the first Canadian performances of Beethoven's *Missa solemnis* in 1927, Walton's *Belshazzar's Feast* in 1936 and Berlioz's *Grande messe des Morts* in 1938. At the New York World's Fair in 1939 Fricker conducted the broadcast performance of Bach's B minor Mass with the New York Philharmonic SO and Chorus; the same work was the subject of his farewell concert with the Mendelssohn Choir in Toronto on 23 February 1942. (*EMC2*, R. Pincoe)

H.C. COLLES/HELMUT KALLMANN

Fricker, Peter Racine (*b* London, 5 Sept 1920; *d* Santa Barbara, CA, 1 Feb 1990). English composer. The most prominent British composer to emerge immediately after World War II, he developed a free atonal style which exerted a strong influence at a time when British composers were turning from the insularity of the war years.

1. LIFE. His family came from Wiltshire; the middle name is after his great-grandmother, a descendant of the dramatist. Fricker was educated at St Paul's School, London. It was planned that he should leave school at 14 to join the merchant navy, but he was not accepted because of his poor eyesight. In 1937 he entered the RCM, where he studied theory and composition with Morris, the organ with Bullock and the piano with Wilson. He also attended classes at Morley College, where in 1939 he met Tippett. In 1941 Fricker joined the Royal Air Force and was trained as a radio operator. He was married in 1943, and that year was posted to India as an intelligence officer, after an intensive course in Japanese at the University of London.

When Fricker was demobilized in 1945 he was refused readmission to the RCM since he had already spent four years there, and instead he returned to Morley College, where Tippett, now director, suggested he study with Seiber. Following his formal composition lessons (1946–8) Fricker continued to work closely with Seiber until the latter's death in 1960, acting as his assistant conductor and helping with film scores. At Morley College he occasionally conducted and was rehearsal pianist for the choir, while earning his living as a copyist and arranger. In 1952 he succeeded Tippett as director of the college, and from 1955 he also taught composition at the RCM. His position in London musical life brought with it an increasing burden of administrative work, until in 1964 he accepted a one-year appointment as visiting professor of music at the University of California at Santa Barbara. He found the circumstances there so congenial that in the next year he accepted a full-time appointment as professor of music. While maintaining strong ties with English musical life (e.g. serving as president of the Cheltenham Festival, 1984–6), he remained in Santa Barbara, as chairman of the music department (1970–74), faculty research lecturer (1980) and Corwin Professor of Composition (1988).

2. WORKS. During World War II English music had been dominated by the pastoral folksong tradition. The new spirit of the immediate postwar years was epitomized by Fricker's music, which owed nothing to folksong (his mentors were Bartók, Berg, Hindemith and Schoenberg, rather than Holst and Vaughan Williams), which was predominantly instrumental and densely chromatic, and which displayed an assured grasp of large-scale formal processes and a rigorous intellectual drive. His quick rise to fame was a recognition not only of his individual and highly developed language, but also of a general desire to rejoin a European tradition. Both in Britain and abroad his music gained awards and performances: in 1947 the

Peter Racine Fricker, 1962

Wind Quintet won the A.J. Clements Prize; in 1949 the Prelude, Elegy and Finale was first heard at the Darmstadt summer courses and the Symphony no.1 received the Koussevitzky Prize; in 1950 this work had its première at the Cheltenham Festival and the First Quartet was performed at the ISCM Festival; in 1951 the Violin Concerto no.1 won the Arts Council Festival of Britain Competition for Young Composers and the Second Symphony was commissioned for the Liverpool Festival; and in 1952 the Edinburgh Festival commissioned the Viola Concerto. Subsequently the catalogue of commissions was enlarged – if not at quite the same rate – a token both of the more conservative position Fricker represented from the mid-1950s and of his willingness to see the composer as a functioning member of society.

From his earliest works it was evident that Fricker was a fluent contrapuntist. Such works as the Wind Quintet and the Symphony no.1 (whose first movement includes a passage in seven real parts) offer striking examples of his skill in an orthodox manner, the fourth movement from the fine Octet an instance of his more individual treatment of contrapuntal textures. Although he never entirely abandoned the structural resources of tonality, in his early music Fricker used a high level of dissonance, emphasizing such intervals as the augmented 4th, the major 7th and the minor 9th, and basing chord sequences as much on the results of motivic working as on functional progression. A typical example of a Fricker chord would be G♭–C–B–F, such as appears at figure 2 in the Quartet no.1. The harmonic palette is rich, however, including much sweeter sounds and even triads at final cadences. Fricker's feeling for harmony was indeed one of the most sophisticated aspects of his style. Yet at the same time it was one of the most conventional, since his fondness for the principle of melody and accompaniment obviously derived from 19th-century models. Sometimes he could rely too heavily on the expressive quality of his harmonic accompaniment without sufficiently characterizing its presentation. This tendency to settle on repeated harmonic patterns may be regarded perhaps as a product of native English caution. On the other hand he drew strength from this by writing a large number of concertante works where the principle finds a natural outlet and where his melodic gifts could flower. The two violin concertos, the viola and piano concertos and *Laudi concertati* for organ and orchestra must be counted among his finest works. The melodic invention is notable as much for its suitability for development as for its intrinsic quality. Fricker could sustain melodic growth over extended structural units and regulate the dramatic tension of large-scale quasi-sonata forms with remarkable assurance. In some works, such as the *Rapsodia concertante*, the second and third symphonies and the Concerto for orchestra, this resulted in a controlled vehemence rare in British music.

Although Fricker's language may frequently suggest the use of 12-note technique, wholly 12-note works are few and of modest dimensions, such as the Concertante no.1 and the *Sonnets* for piano. The technique is used more as a tool than a method. From a series he could derive a melodic and chordal vocabulary deployed within a more traditional conception of musical development. In the *Rapsodia concertante*, for example, there is more music in a 'free' than in a strictly 12-note style, although the work is based on a series derived from the opening bars. The *Litany*, one of his most beautiful works, makes free use of a 12-note melody complementing the dominant plainsong theme. In later works Fricker developed his thematic use of serialism, by using series of intervals (as in the piano *Episodes*) or a family of short series of a few notes each (as in *Come Sleep*).

In the first 20 years or so of his creative maturity Fricker worked largely in traditional forms. He showed a masterly command of three- and four-movement designs and an especially inventive use of rondo (notably in the Symphony no.2, each of whose three movements is in a complex rondo form). The oratorio *The Vision of Judgement* was perhaps the most spectacular example of his neo-classical temperament. But after the mid-1960s Fricker grew impatient with classical prototypes. His Symphony no.4 is in a single movement, whose ten sections bear little relation to the conventional four-movement design. Its multiplicity of tempos is mirrored in the mosaic-like character of the piano *Episodes* and the *Rondeaux* for horn and orchestra. Fricker's interest in independent tempos can be seen in such works as *The Roofs*, *Introitus* and the Third String Quartet. In general the more economical, linear textures of his later work show Fricker developing a style as concentrated as his early music was expansive.

WORKS

ORCHESTRAL

Rondo scherzoso, 1948; Sym. no.1, op.9, 1948–9; Prelude, Elegy and Finale, op.10, str, 1949; Conc. no.1, op.11, vn, small orch, 1949–50; Concertante no.1, op.13, eng hn, str, 1950; Sym. no.2, op.14, 1950–51; Concertante no.2, op.15, 3 pf, str, timp, 1951; Va Conc., op.18, 1951–3; Conc., op.19, pf, small orch, 1952–4; Rapsodia concertante (Vn Conc. no.2, Concertante no.3), op.21, 1953–4; Dance Scene, op.22, 1954; Litany, op.26, double str, 1955; Fantasie, small orch, 1956 [on a theme of Mozart]

Comedy Ov., op.32, 1958; Toccata, op.33, pf, orch, 1958–9; Sym. no.3, op.36, 1960; Sym. no.4, op.43, 1964–6; 3 Scenes, op.45, 1966; 7 Counterpoints, op.47 [op.2 orchd with 3 more movts], 1967; Concertante no.4, op.52, fl, ob, vn, str, 1968; Nocturne, op.63, chbr orch, 1971; Introitus, op.66, chbr orch, 1972; Sym. no.5, op.74, org, orch, 1975–6; Sinfonia, op.76, 17 wind, 1976–7; Laudi concertati, op.80, org, orch, 1978–9; Rondeaux, op.87, hn, orch, 1981–2; Conc. for St Paul's, op.91, chbr orch, 1985; Conc. for Orch, op.93, 1985–6; Walk by Quiet Water, orch, 1989; Conc. no.2, pf, orch, 1989

CHORAL

2 Madrigals, op.4 (W. de la Mare), 1947; Rollant et Oliver (Song of Roland), 1949; Musick's Empire, op.27 (A. Marvell), chorus, small orch, 1955; 2 Motets, 1955–6; 2 Carols, 1956; The Vision of Judgement, op.29 (orat, Cynewulf), S, T, chorus, orch, 1957–8; Colet (school cant., D. Colet), S, A, T, B, chorus, orch, 1959; 2 Carols, 1962; Commissary Report (S. King), male vv, 1965; Threefold Amen, chorus, insts, 1966; Ave maris stella, op.48, T, male vv, pf, 1967; Magnificat, op.50, S, A, T, chorus, orch, 1968; 7 Little Songs, op.69 (F. Hölderlin, trans. M. Hamburger), 1972; Mirabilem misterium, SATB, 1974; 2 Madrigals (Petrarch), SSATB, 1974; A Wish for a Party (? St Bridget), male vv, 1977; Rejoice in the Lord (Ps xxxiii), SATB, org, 1983; Whispers at these Curtains (J. Donne), op.88, Bar, boys' choir, chorus, orch, 1983–4; Advent Motet, op.99, women's choir, mixed chorus, 1989

SOLO VOCAL

Night Landscape, op.6, S, str trio, 1947; 3 Sonnets, op.7 (C. Angiolieri, trans. C. Rossetti), T, wind qnt, vc, db, 1947; King o' Love (Scottish ballad), S, pf, 1949; Roses et muguets (C. Cros), S, pf, 1952; The Tomb of St Eulalia, op.25 (Prudentius), elegy, Ct, b viol, hpd, 1955; O Mistress Mine (W. Shakespeare), T, gui, 1961; Cant., op.37 (W. Saroyan), T, wind qnt, str qt, db, 1961–2; O longs désirs, op.39 (L. Labé), S, orch, 1963; Vocalise, S, pf, 1965

4 Songs, op.42 (A. Gryphius), S/T, pf/orch, 1965; The Day and the Spirits, op.46 (primitive verse, ed. M. Bowra), S, hp, 1966–7; Cantilena and Cabaletta, op.54, S, 1967–8; Some Superior Nonsense, op.56 (C. Morgenstern, trans. M. Knight), T, fl, ob, vc,

hpd, 1968; The Roofs, op.62 (W.S. Merwin), coloratura S, perc, 1970, rev. 1987; Ich will meine Seele tauchen (H. Heine), Bar, pf, 1970; Come Sleep, op.67 (J. Keats), A, a fl, b cl, 1972; 2 Songs (T.E. Hulme), Bar, pf, 1977; In Commendation of Music, op.82 (W. Strode), S, rec, b viol, hpd, 1980; 6 mélodies de Francis Jammes, op.84, T, vn, vc, pf, 1980; A Dream of Winter (D. Thomas), op.98, Bar, pf, 1989

CHAMBER AND INSTRUMENTAL

Wind Qnt, op.5, 1947; Str Qt no.1, op.8, 1947; Sonata, op.12, vn, pf, 1950; Aubade, a sax, pf, 1951; Str Qt no.2, op.20, 1952–3; Pastorale, 3 fl, 1954; Sonata, op.24, hn, pf, 1955; Trio, 2 cl, bn, 1955–6; Suite, 2 tr rec, t rec, 1956; Sonata, op.28, vc, pf, 1956; Octet, op.30, fl, cl, bn, hn, vn, va, vc, db, 1957–8; Serenade no.1, op.34, fl, cl, b cl, va, vc, hp, 1959; Trio (Serenade no.2), op.35, fl, ob, pf, 1959; 4 Dialogues, op.41, ob, pf, 1965

Fantasy, op.44, va, pf, 1966; 5 Canons, 2 fl, 2 ob, 1966; Serenade no.3, op.57, sax qt, 1969; Refrains, op.49, ob, 1968; 3 Arguments, op.59, bn, vc, 1969; Carillon Music I, 1969; Carillon Music II (3 Variants), 1970; Paseo, op.61, gui, 1970; Concertante no.5, op.65, pf qnt, 1971; Sarabande, vc, 1971; A Bourrée, vc, 1971; Ballade, op.68, fl, pf, 1972; Gigue, vc, 1972; The Groves of Dodona, op.70, 6 fl, 1973; Spirit Puck, op.71, cl, perc, 1974; Str Qt no.3, op.73, 1974–6; Seachant, op.75, fl, db, 1976; Serenade no.4, op.79, 3 cl, b cl, 1977; Serenade no.5, op.81, vn, vc, 1980; Spells, fl, 1980–81; Bagatelles, op.85, cl, pf, 1981; For Three (Serenade no.6), op.86, ob, ob d'amore, eng hn, 1981; 2 Pieces, rec, 1984; Madrigals, op.89, brass qnt, 1984; Aspects of Evening, op.90, vc, pf, 1984–5; Second Sonata, op.94, vn, pf, 1987

KEYBOARD

Pf: 3 Preludes, op.1, 1941–4; 4 Fughettas, op.2, 2 pf, 1946; 4 Impromptus, op.17, 1950–52; Nocturne and Scherzo, op.23, duet, 1954; 4 Sonnets, 1955; Variations, op.31, 1957–8; 14 Aubades, 1958; 12 Studies, op.38, 1961; Episodes I, op.51, 1967–8, II, op.58, 1969; Anniversary, op.77, 1977; Sonata, op.78, 2 pf, 1977; 2 Expressions, 1981; 6 Diversions, op.95, 1987

Org: Sonata, op.3, 1947; Choral, 1956; Pastorale, 1959; Wedding Processional, 1960; Ricercare, op.40, 1965; Trio (Canon Ostinato), 1968; 6 Pieces, op.53, 1968; Toccata 'Gladius Domini', op.55, 1968; Praeludium, op.60, 1969; Intrada, op.64, 1971; Trio Sonata, op.72, 1974; Invention and Little Toccata, 1976; 5 Short Pieces, op.83, 1980; Recitative, Impromptu and Procession, op.92, 1985

Hpd: Suite, 1956

DRAMATIC

Ballet: Canterbury Prologue, op.16, 1951

Incid music: King John (Shakespeare), 1961

Film scores: The White Continent, 1951; Inside the Atom, 1951; The Undying Heart, 1952; The Inquisitive Giant, 1958; Atomic Energy, 1958; Das Island, 1958; Looking at Churches, 1959

Radio scores: Le morte d'Arthur, 1952; The Quest for the Holy Grail, 1953; My Brother Died (op), 1952–4; Clive of India, 1954; The Death of Vivien (op), 1955–6; Lemons and Hieroglyphs, 1959

IAN KEMP/MICHAEL MECKNA

Fricsay, Ferenc (*b* Budapest, 9 Aug 1914; *d* Basle, 20 Feb 1963). Hungarian conductor. He was a pupil of Kodály and Bartók, of whose music he became an outstanding interpreter, at the Ferenc Liszt Academy of Music in Budapest; he began his career as a conductor at Szeged from 1936 to 1944. In 1939 he first conducted at the Budapest Opera and in 1945 he became musical director. He combined this appointment with that of conductor of the Budapest PO, where Klemperer was then a guest conductor. Fricsay replaced the indisposed Klemperer to conduct the première of von Einem's opera *Dantons Tod* at the 1947 Salzburg Festival, which quickly furthered his international reputation. Thereafter he toured widely in Europe, and was based in Berlin from 1948 to 1952 as musical director of the Städtische Oper and of the RIAS (later Berlin Radio) SO.

His British début was at the 1950 Edinburgh Festival, when he conducted the Glyndebourne Opera in *Le nozze di Figaro*. In the USA he first conducted the Boston SO in 1953 and became conductor of the Houston SO in 1954, but disagreements on musical policy caused him to return to Europe after one season. He became musical director of the Staatsoper in Munich in 1956, remaining for two seasons, and then returned to Berlin and his former post with the Radio SO, which he retained until his death. He inaugurated the rebuilt Deutsche Oper, West Berlin, on 24 September 1961, conducting *Don Giovanni*. The same year he was awarded the Grosses Verdienstkreuz der Bundesrepublik Deutschland.

Fricsay soon discarded the use of a baton, and confounded the critics of this technique by the extreme clarity and precision of his performances. A conductor of dynamic spirit, he gave taut, vividly characterized interpretations of familiar classics and was widely admired as

Ferenc Fricsay

a brilliant exponent of mainstream music of his own time. He made a special study of recording techniques, and conducted a number of outstanding recordings for Deutsche Grammophon, including five Mozart operas, *Fidelio*, Verdi's Requiem and discs of Bartók and Stravinsky orchestral works.

Friction drum (Fr. *tambour à friction*; Ger. *Reibtrommel*, *Brummtopf*; It. *caccavella*, *puttiputi*; Sp. *tambor de fricción*, *zambomba*). A membranophone sounded by friction, either direct or indirect. See DRUM, §I, 4 and STRING DRUM.

Fricz, Thomas. See FRITSCH, THOMAS.

Frid, Géza (*b* Máramarossziget, 25 Jan 1904; *d* Beverwijk, 13 Sept 1989). Dutch composer and pianist of Hungarian origin. He first appeared in public at the age of ten. At the National Hungarian Royal Academy of Music he studied piano with Bartók (1912–24) and composition with Kodály (1920–24). Between 1926 and 1974 he undertook frequent concert tours through Europe, North and South America, the USSR and the Middle East, appearing with the violinists Zoltán Székely and Menuhin and the Dutch soprano Spoorenberg. In 1929 he settled in Amsterdam, taking Dutch nationality in 1948. He was music correspondent on the *Vrije volk* (1954–69) and, from 1964 until he retired five years later, was also principal teacher of chamber music at the Utrecht Conservatory.

Frid wrote works in many genres. His compositions are tonally oriented, often couched in traditional forms, and particularly from the point of view of rhythm betray his Hungarian origins. On many occasions he also incorporated Dutch folksongs into his music, as in *Luctor et emergo* for choir and orchestra, composed in 1953 to commemorate a disastrous drought in the Netherlands. In his later works he introduced improvisatory elements and electronics (*Dimensies*, 1967) and inclined towards 12-note writing (*Symfonietta*, 1963). Frid received several prizes, including the Bartók prize, awarded posthumously in 1990 by the Liszt Academy of Music in Budapest.

EMILE WENNEKES

Frid, Grigory Samuilovich (*b* Petrograd, 9/22 Sept 1915). Russian composer. He came from an intellectual Jewish background: his father was a music journalist and the founder and editor of the journal *Teatr* and his mother, a pianist who graduated from the St Petersburg Conservatory, was Frid's first teacher. In 1932 Frid enrolled at the music college attached to the Moscow Conservatory and studied there with Litinsky, the composer, polyphonist and theoretician. In 1935 he became a student of the conservatory proper, from 1937 studying with Vissarion Shebalin (1937–9, 1945–8). He soon showed a talent for organization: on his initiative a circle was set up where student pianists such as Svyatoslav Richter and Anatoly Vedyornikov performed works, largely unknown to Soviet musicians, by Mahler, Stravinsky, Prokofiev, Krenek, Richard Strauss and other contemporary composers. During these years he travelled with his fellow student and musicologist Isaak Shteynman to the Arctic where he recorded songs of the Nentsy people of the Yamal region.

Frid graduated in 1939 and was immediately called up; from 1942 to the end of World War II he was a member of the folk ensemble on the Western front. He fought on the front line at Kalinin and was shell-shocked and awarded military honours. He then continued at the conservatory (1947–52), and in 1965 he organized the Moscow Music Club for young people, affiliated to the Union of Composers. It was about this time that he began painting; a number of exhibitions were held in the All-Union House of Composers during the 1970s and 80s. He has written several books and numerous articles, and was a member of the USSR Union of Composers and an Honoured Art Worker of the Russian Federation (1984).

Until the mid-1960s Frid wrote in a broadly traditional manner, but the works from this earlier period are notable for their assured technique, polyphonic development and an economy of means. Shostakovich exercised a strong influence on him during these years, and his admiration for the man and the composer has remained strong. The work which marks a shift to a more distinctive voice is the tragic and complex Third Symphony for strings and timpani (1964), in which the restraint of means is compensated for by tensions between the modes and the harmony. These stylistic features and his increasing demands on the listener were intensified with Frid's subsequent fascination with the Second Viennese School and the aesthetics and the techniques of dodecaphony. These techniques were employed for the first time in the Trombone Concerto, and, interpreted freely, they gave added expressivity to Frid's tragic voice.

The high point of Frid's art are the two opera monologues – *Dnevnik Anniï Frank* ('The Diary of Anne Frank') (1969) and *Pis'ma Van Goga* ('The Letters of Van Gogh') (1975) – which are both distinctive for their documentary style and chamber proportions. Both operas and the song cycle *Federiko Garsiya Lorka* ('Federico García Lorca') strikingly present the composer's preoccupations with tragedy and the ability to retain one's faith

in the moral strength of humanity (as in the portrayal of Anne Frank), and his keen sense of conflict between the artist and the world (as in *Pis'ma Van Goga*). *Dnevnik Anni Frank* is in the repertory of a number of theatres in Germany.

NELLI GRIGOR'YEVNA SHAKHNAZAROVA

Friderici [Friederici; Fridrichs]. German family of clavichord, piano, organ and harpsichord makers. Christian Ernst Friderici (*b* Meerane, 7 March 1709; *d* Gera, 4 May 1780) learned organ building from his father, Johannes Friderici (1653–1731), and later worked as a journeyman for T.H.G. Trost in Altenburg and probably also for Gottfried Silbermann in Freiberg. He set up his 'Orgel- und Clavierbauanstalt' (organ and keyboard instrument workshop) in Gera in 1737. In 1745 he invented a *Pyramidenflügel* (pyramid piano), one of the earliest types of upright piano, whose bass strings rise obliquely to the right so that the 'peak' of the case appears in the middle. Several examples survive, one of which may have been owned by Goethe. Other inventions include an early square piano (1758), a lute-harpsichord, a *Clavecinbebung* (a harpsichord with a vibrato mechanism; 1761) which (according to Gerber) Friderici described in his *Avertissement von einer Invention, eine Bebung auf dem Clavecin anzubringen* (1770), and a 'Neue Erfindung einer Maschine beim Claviere, dass es klinge wie ein monochordischer Dreiklang' (built in Gera, 1781). It is not known how the latter two inventions worked, although presumably both were mechanical attachments of some kind. Agricola (see Adlung) commented on his 'most finely wrought invention, usually combined with the most successful execution'.

Christian Ernst's clavichords were much admired. C.P.E. Bach, who at his death owned two, preferred them to the instruments of Fritz and Hass, commending (in a letter to Forkel, 10 November 1773) their good construction and their lack of octave strings in the bass. Mozart also owned Friderici instruments, for he wrote (9 October 1777) that his guest should not speak of his 'instruments from Gera' to the maker J.A. Stein, 'for he is jealous of Friderici'.

Christian Ernst's organs were not always so successful. His organ in the church of St Jakobi in Chemnitz (1762–5) was at the centre of a legal dispute that lasted several years, and he was dismissed from his post as court organ builder in Altenburg in 1767. Nonetheless, the few organs of his that survive display good craftsmanship and the influence of both Trost and Silbermann. Most of his organs were small, and the influence of the *galant* style is apparent in his specifications, for instance in such stops as Flaute douce, Flaute d'amour, Flaute travers and Viola di gamba. His 'Le Don' (birdsong) stop on the organ in Meerane (1751–3) attracted a great deal of attention. Extant organs are at Niederschindmaas, near Glauchau (1734); Stanau, near Gera (originally in Ottendorf; 1746–7); Grossdeuben, near Leipzig (originally in Cröbern, Leipzig; 1754–5); Langenberg, near Gera (case only; 1755); and Gräfenwarth, near Gera (1771; designed 1741–3).

His brother, Christian Gottfried Friderici (*b* Meerane, 20 March 1714; *d* Gera, 6 March 1777) collaborated with him, having moved to Gera in 1744. The organ in Weissig, near Gera (originally in the Schlosskapelle, Lichtenstein; 1740), is by Christian Gottfried. Christian Gottlob Friderici (*b* Gera, 23 Aug 1750; *d* Gera, 21 Jan 1805), Christian Gottfried's son, continued to build pianos, clavichords and organs: his clavichords, of which two survive, were said to have been equal in quality to those of his uncle.

The eldest of Christian Gottlob's seven children was Christian Ernst Wilhelm Friderici (*b* nr Liebschwitz, Gera, 19 April 1782; *d* Gera, 3 Feb 1872), who, after periods in Dresden and Berlin, took over his father's business in 1803. He concentrated on making pianos, but occasionally sold clavichords. It is reported that he made more than 1000 instruments. He was succeeded by Ernst Ludwig Friderici (*b* Gera, 27 Jan 1806; *d* Gera, 7 May 1883), presumably his son, and the last of the dynasty.

For details of surviving string keyboard instruments by the Fridericis see Boalch and Clinkscale.

HANS KLOTZ/FELIX FRIEDRICH

Friderici, Daniel (*b* Klein Eichstedt, nr Querfurt, 1584; *d* Rostock, 23 Sept 1638). German composer, writer on music and music editor. He left home as a boy to earn his living as a Kurrende singer and later as a member of a *chorus symphoniacus*. After a short stay at Querfurt, he

went to Eisleben, where he met the local Rektor with whom he moved to Gerbstedt in 1598. According to Rhane, he received composition lessons there from Valentin Hausmann, who, being thoroughly aquainted with Italian secular music and poetry, probably introduced Friderici to the Italian madrigal style. Friderici stayed in Gerbstedt for four years and then went, via Salzwedel and Burg, to Magdeburg, where he encountered his second principal teacher, the Kantor Friedrich Weissensee. As the latter was one of the most important German exponents of the Venetian polychoral style, Friderici acquired a knowledge not only of the current Dutch and German motet repertory but also of the latest developments towards a new international style.

After finishing his studies, Friderici wandered across Hesse and Westphalia; Rhane reported that he also saw the Netherlands. He stayed in Osnabrück for some time, working as an assistant teacher at the Gymnasium, and in 1612 he entered the University of Rostock. His first published work, *Sertum musicale primum*, appeared early in 1614. In the meantime, he must have made his name known to Count Anton Günther of Oldenburg, who summoned Friderici to his residence in summer 1614 and installed him as Kantor and choirmaster. The Rostock authorities tried to persuade him to return, but the count would not release him until 1618. At Ascensiontide that year he became Kantor at the Marienkirche, Rostock's principal church, and for the following two decades he was to dominate the city's musical life.

The first important event for which he had to organize the music was the 200th anniversary of the founding of the university in 1619. Three days later he received his master's degree in theology. He applied for a vacant living at Rostock and delivered a trial sermon in 1623, but was not chosen. The town council, however, offered him the post of deputy Rektor of the school. Friderici refused the offer and remained a Kantor for the rest of his life. This was in no way a less profitable post; the authorities appreciated his work, increased his salary and appointed him Kapellmeister of all the Rostock churches. In 1632 he was invited to become Kantor and musical director of the Gymnasium at Reval (now Tallinn), but he chose to remain at Rostock. Six years later he died of the plague.

Although he was mainly occupied with church music, Friderici's output as a composer comprises approximately equal numbers of sacred and secular works. From a song in his *Amuletum musicum* (1627), listing the names of 42 composers, we know that he was familiar with the sacred works of Josquin and Clemens non Papa, though for him, as for most of his colleagues, Lassus took pride of place. Modern Italian composers like Caccini and Monteverdi, as well as Schein and Schütz, are, however, not listed, which points to Friderici's own retrospective style. His works for the church are mostly based on texts from the Psalms and the prophets, which he usually wrote himself, preferring the *AABB* form usually reserved for secular songs. The only exceptions are his double-choir setting of Psalm cxxi (1622) and the seven motets of the *Selige Grab- und Himmels Leiter* (1628). In 1625 Friderici published a new edition of *Piae Cantiones* (first published in 1582) by the Finlander Theodoricus Petri. This collection, originally compiled to revive Latin school song in Sweden, was used all over the Baltic region.

Friderici seems to have taken greater pleasure in the writing of music for entertainment purposes. In the prefaces or on the title-pages of his works, he repeatedly emphasized that he considered his songs as remedies to cure young hearts from melancholy and to renew cheerfulness; they must have been in great demand during this time of the Thirty Years War. The songs, resembling those by Hassler, are usually homophonic; however, Friderici also knew English secular music, especially by Thomas Morley, whose three-part *Canzonets* (1593) he edited (and possibly also translated) in 1624. His fondness for social gatherings and merry-making must have been well known, for in the preface to *Hilarodicon* (1632), a collection of drinking-songs, he had to defend himself against being called a drunkard. In his last collection, *Amores musicales* (1633), the settings (including a continuo part) are more elaborate; they include solo passages, flourishes and changes of metre.

As a teacher and theorist, Friderici took a progressive path. His German treatise *Musica figuralis* (1618) contradicted the older Burmeister's philosophical doctrine in many ways: Friderici was more concerned with the practical aspects of music, which he discussed in vivid language, and his treatment of the modes discloses a feeling for tonality. The work is a good source for German performing practice of the period. Opposed to the 16th-century rule of beating the *tactus* like a clock, he advised singers to vary the beat according to the words of the text. The treatise, from which an extract was published separately in 1632, enjoyed great success, with eight editions, and it was still highly esteemed in the German-speaking countries at the beginning of the 18th century.

MARTIN RUHNKE/DOROTHEA SCHRÖDER

Fridman-Kochevskoy, Sonia de. *See* ECKHARDT-GRAMATTÉ, S.-C.

Fridrich von Hausen. *See* FRIEDRICH VON HÛSEN.

Fridzeri [Fritzeri, Frizeri, Frizer, Frixer, Frixer di Frizeri], **Alessandro Mario Antonio** (*b* Verona, ?15 Jan 1741; *d* Antwerp, 16 Oct 1825). Italian composer, violinist and mandolinist. He lost his sight while still an infant. At the age of eight he started to play the mandolin, and soon learnt to play the flute, violin, horn, guitar, harpsichord and organ, despite only limited instruction. His childhood was spent in Vicenza, where, at the age of 20, he became the organist at the Madonna del Monte Berico. In 1765 he left for a European tour, during which he performed violin pieces by Tartini, Ferrari and Pugnani, and occasionally his own works; he also received praise for his improvisations. In 1766 he made his Paris debut, playing a concerto by Gaviniès at the Concert Spirituel. He then toured the north of France, Belgium and the Rhineland, eventually settling in Strasbourg for 18 months; there he composed two operas, which were evidently never performed. By 1771 he was back in Paris where he had two stage works produced and composed his first instrumental music. After a tour of the south of France he returned to Paris where he established a printing business and possibly dealt in music and instruments. His most successful opera, *Les souliers mordorés*, was performed in Paris in 1776 with great success, and in other countries for the next 20 years. He spent 12 years in Brittany in the service of the Count of Châteaugiron, returning to Paris occasionally to hear his own works. When the Revolution broke out the count emigrated and Fridzeri resumed his concert touring. He founded a philharmonic academy in Nantes before returning to Paris in 1794. There he composed Revolutionary hymns, became a member of the new Lycée des Arts and founded another philharmonic academy, which was first housed in the Palais Royal and subsequently in the storehouse of the Opéra. There, in 1800, the explosion of an 'infernal machine' destroyed Fridzeri's few belongings. Once again he started his travels, finally settling in Antwerp as a teacher and music merchant.

Though Fridzeri's stage works reflect French influence (in their use of vaudevilles, for example) and his instrumental pieces reveal a knowledge of German music, his style remained primarily Italian. His instrumental works until op.12 are all in three movements, following the Italian practice; thereafter they are in two fast movements, with the first in a free quasi-Romantic style. All of the instrumental works, and particularly the opera overtures, show a well-developed sense of form. His stage works, some of which show the influence of Grétry's *comédies-larmoyantes*, are characterized by full vocal ensembles, spontaneous melodies and abrupt modulations.

WORKS

STAGE

2 ops, 3 acts, Strasbourg, *c*1770, unperf.
Les deux miliciens, ou L'orpheline villageoise (comedy with ariettes, 1, L.G. d'Azemar), op.2, Paris, Italien, 24 Aug 1771, *F-Pn*; (Paris, 1771), excerpts pubd separately
Le billet du mariage (oc, 1, Desfontaines [F.G. Fouques]), perf. privately, Paris, 1771
Lucette (oc, 3, E.F. de Lantier), Paris, Italien, 18 Aug 1775
Les souliers mordorés, ou La cordonnière allemande (comédie lyrique, 2, A. de Ferrières), op.4, Paris, Italien, 11 Jan 1776, *D-Rtt*, *F-Pn*; (Paris, 1776), excerpts pubd separately
Les Thermopyles (op), unperf., 1 scene and 1 air in opp.8, 9

OTHER WORKS

Sacred: Messe, op.32 and Miserere, op.34, mentioned in *EitnerQ*
Other vocal: Recueil d'airs, harp acc., 1er cahier, op.6 (Paris, n.d.); Recueil d'ariettes, scènes et duos périodiques, op.8 (Paris, n.d.); Recueil d'airs, pf acc., 2e cahier, op.9 (Paris, n.d.); Recueil d'airs, harp acc., 3e cahier, op.13 (Paris, n.d.); Hyme à l'Etre suprême, 1v (?Paris, n.d.); 13 Revolutionary pieces, *c*1795, ?unpubd; Une femme, romance (Antwerp, Paris, n.d.); L'homme n'est pas ce qu'il affiche (vaudeville of La Perruque blonde) (Paris, n.d.), hpd acc. by Dreux

Inst: 6 quartetti da camera, 2 vn, va, vc, op.1 (Paris, 1771); 6 sonates, mandolin, op.3 (Paris, 1771), lost; 2 concerti, vn principal, 2 vn obbl, va, b, fls, hns, op.5 (Paris, n.d.); 4 duos, 2 vn, op.7 (Paris, n.d.); 3 quatuors, 2 vn, va, vc, op.10, bk 2 (Paris, n.d.); Première symphonie concertante, 2 vn principal, 2 vn, 2 va, 2 fl, 2 hn, b, op.12 (Paris, *c*1796)

FRÉDÉRIC ROBERT

Friebert, Carl. *See* FRIBERTH, CARL.

Friebert [Fribert, Friberth, Frieberth, Früberth], **(Johann) Joseph** (*b* Gnadendorf, Lower Austria, bap. 5 Dec 1724; *d* Passau, 6 Aug 1799). Austrian composer, brother of CARL FRIBERTH, with whom he is often confused. He probably received his early musical training from his father, a schoolmaster and organist. The Benedictines of Melk employed him as tenor at their abbey from the middle of 1743 until April 1745 with a salary of 30 florins. He left Melk to study with Giuseppe Bonno in Vienna, where he entered the service of Prince Joseph Friedrich von Sachen-Hildburghausen; in the 1750s he established himself as a successful tenor in the Viennese theatres, performing in the premières of Gluck's *Le cinesi* (1754, as Silango) and *La danza* (1755, as Tirsi).

From 1763 until his retirement in 1795 he was music director for the prince-bishops of Passau, where his stage works were performed at the Jesuit College and then, during and after its construction from 1774 to 1783, at the court theatre. His *Das Serail* was given at least as early as 1765 and found its way into the repertory of several troupes. Einstein claimed that a version of the text published in 1779 was the model for J.A. Schachtner's text for Mozart's *Zaide*. Under Friebert's leadership Passau experienced a strong Viennese influence, notably through his introduction of Mozart's operas (*Don Giovanni* and *Figaro*, both in 1789 in German translation, and *Zauberflöte* in 1793). Friebert's text and vocal parts added to Haydn's *Die Sieben letzten Worte* (in its instrumental version) were heard by the composer while en route to London (1794), inspiring him to make his own vocal-orchestral version (HXX:2) the following year based upon Friebert's text as revised by Gottfried van Swieten.

Too little of Friebert's music has been uncovered to permit a fair assessment of him as a composer. Upon hearing Friebert's arrangement of *Die Sieben letzten Worte* in Passau, Haydn told his pupil Neukomm that 'the vocal parts, I think, I could have written better', but later he referred to Friebert as 'a very skilled cathedral director' (letter of 10 August 1799).

WORKS

Sple: Das Serail, oder Die unvermuthete Zusammenkunft in der Sclaverey zwischen Vater, Tochter und Sohn (Der Renegat) (2, F.J. Sebastiani), ?Passau, 1765, lib (Bolzano, 1779), facs. in NMA. II: 5/x (1963), Kritischer Bericht, 75–91; Die Würkung der Natur (Schiffner and ?others), Rechnitz-Rohenez [now Burgenland], Batthyány Castle, 1774; Die beste Wahl, oder Das von den Göttern bestimmte Loos (Das Loos der Götter) (J. Nuth and others), Nuremberg, 19 Feb 1778; Adelstan und Röschen (Trauerspiel mit Gesänge, ? B.D.A. Cremeri, after J.F. Schink), Salzburg, 4 Jan 1782

It. ops, first perf. in Passau, 1764–74 (all music lost): Il componimento; Il natale di Giove (P. Metastasio); Dafne vendicata; La Galatea; La Zenobia (Metastasio); Angelica e Medoro

Orats, first perf. in Passau, from 1764: Giuseppe riconosciuto (?Metastasio); Pietro poenitente; Aggar [Agar]; Caino ed Abelle

Other works: Jagdsymphonie, Symphonia pastoralis (1774), ed. K. Schultz-Hauser (Berlin and New York, 1965); Missa pastoritia (1773), *A-KR*; vocal arr. of J. Haydn: Die Sieben letzten Worte unseres Erlösers am Kreuze, *c*1792, *Ee*, *D-Pg*, *H-Bn*; arr. of J.A. Hiller: Die kleine Aehrenleserin (children's operetta, C.F. Weisse), *A-SEI*, *Wn* (anon. attrib.)

ROBERT N. FREEMAN

Fried(-Biss), Miriam (*b* Satu-Mare, 9 Sept 1946). Israeli violinist of Romanian birth. She studied at the Rabin Academy in Tel-Aviv, and then in the USA as a protégée of Isaac Stern. She also worked with Josef Gingold at Indiana University (1966–7), and with Ivan Galamian at the Juilliard School (1967–9). She won the 1968 Paganini International Competition at Genoa, and the 1971 Queen Elisabeth of Belgium Competition at Brussels. Her prizewinning performance of the Sibelius concerto on the latter occasion was subsequently issued as a recording, and was praised for a maturity of approach and vibrant expression reminiscent of Ginette Neveu. Her New York recital début was in 1969, and her British début was at Windsor Castle in 1971. In 1986 she joined the faculty of Indiana University, where she gave the first performance of Donald Erb's *Together Forever: Three Poems* (1988) and recorded his violin concerto. She has toured widely, and is admired for intelligent and perceptive musicianship as well as spirited brilliance of technique.

GEORGE GELLES

Fried, Oskar (*b* Berlin, 1 Aug 1871; *d* Moscow, 5 July 1941). German composer and conductor. After a poor education as a wind player in Nowawes near Potsdam, Fried moved in 1889 to Frankfurt, where he received his first important engagement as a horn player in the Palmgarten Orchestra. He soon became a member of the orchestra of the Opernhaus and began composition lessons with Humperdinck. Fried composed an orchestral fantasy based on Humperdinck's *Hänsel und Gretel* and also made piano and orchestral arrangements of the work for Schott. After a period of travelling, Fried returned in 1898 to Berlin, where in 1904 he came to public attention with the première of his *Das trunkene Lied* under Muck in a concert of the Wagnerverein. He also quickly became popular as a conductor. The success of his first concert with the Sternscher Gesangverein, performing Liszt's *Heilige Elisabeth*, led to his appointment as conductor of the Neue Konzerte in 1905. His performance of Mahler's Symphony no.2 that year contributed substantially to establishing the work in the repertory. (Mahler, a friend of Fried, commented that he could not have performed its

Scherzo any better.) As conductor of the Gesellschaft der Musikfreunde in Berlin after 1907 and the Blüthner-Orchester after 1908, Fried introduced more of Mahler's works and also works by Busoni, Delius, Skryabin, Schoenberg and Strauss, among others. He was admired among his contemporaries for his strict discipline and knowledge of orchestral instruments. In 1913 he gave up composition entirely and devoted himself to a conducting career. He emigrated to Tbilisi in 1934 and devoted himself enthusiastically to music-making as an opera conductor in the new Soviet state; in 1935 he conducted 75 concerts throughout the Union, inspired by a desire to bring music to the people. He became a Soviet citizen in 1941.

Fried's early works include an important setting (1901) of Dehmel's *Verklärte Nacht* for soloists and orchestra, but his talent as a composer was fully recognized with *Das trunkene Lied*, which set a poem from Nietzsche's *Also sprach Zarathustra*. Contemporaries viewed *Das trunkene Lied* as one of the first truly successful choral pieces for almost a century, admiring its religiosity and orchestral brilliance within its tonally and formally conservative, post-Wagnerian framework. Fried continued to compose for voice, having most success with *Erntelied* of 1904, in which he returned to one of Dehmel's poems. In this work and *Die Auswanderer* (1913) Fried displayed his interest in social problems.

WORKS
(*selective list*)

Opera: Die vernarrte Prinzess (O.J. Bierbaum), unperf., unpubd

Vocal orch: Verklärte Nacht (R. Dehmel), op.9, Mez, T, orch (1901); Das trunkene Lied (F. Nietzsche), op.11, S, A, B, chorus, orch (1904); Erntelied (Dehmel), op.15, male chorus, orch (1904); Die Auswanderer (E. Verhaeren, trans. S. Zweig), spkr, orch (1913)

Orch: Fantasie über Motive aus 'Hänsel und Gretel' (1895); Adagio und Scherzo, op.2, 13 wind, 2 hp, timp (1905); Praeludium und Doppelfuge, op.10, str (1902)

Other works: 3 zweistimmige Gesänge, op.8, Mez, Bar, pf, 1902; lieder, female choruses

Principal publishers: Bote & Bock, Breitkopf & Härtel, Hainauer

TAMARA LEVITZ

Friedberg, Carl (*b* Bingen, 18 Sept 1872; *d* Merano, 9 Sept 1955). German pianist and teacher. He studied piano with James Kwast and for a short while with Clara Schumann at the Hoch Konservatorium, Frankfurt. He too became a teacher there (1893–1904) and later at the Cologne Conservatory (1904–1914), and from 1923 until his retirement in 1946 was principal piano teacher at the New York Institute of Musical Art. His pupils included Malcolm Frager, Bruce Hungerford, William Masselos, Elly Ney and his biographer, Julia Smith (*Master Pianist: the Career and Teaching of Carl Friedberg*, New York, 1963).

Friedberg's playing career spanned over 60 years in both Europe and America. He made his official début in 1892 with the Vienna PO under Mahler, receiving praise from Eduard Hanslick. This was followed in 1893 by an all-Brahms recital in the presence of the composer, who admired his playing and who later demonstrated to him in private the majority of his piano works. As a chamber musician he replaced Artur Schnabel in the Schnabel-Flesch-Becker Trio in 1920 and played in that ensemble until 1932. Friedberg gave numerous recitals with Kreisler throughout America and in 1937 formed his own trio with Daniel Karpilowsky and Felix Salmond. Friedberg's repertory was reputedly vast, and he became much associated with the music of Beethoven (his edition of the Beethoven sonatas was published by Schott in 1922), Chopin, Schumann and Brahms. He made one commercial recording of music by Schumann and Brahms in 1953 and some private recordings, some of which have been issued by the International Piano Archive.

DONALD ELLMAN

Friedel, Sebastian Ludwig. *See* FRIEDL, SEBASTIAN LUDWIG.

Friederici. *See* FRIDERICI family.

Friedheim, Arthur (*b* St Petersburg, 26 Oct 1859; *d* New York, 19 Oct 1932). German pianist, conductor and composer. He began the serious study of music at the age of eight. Later he studied for a year with Anton Rubinstein, but, disapproving of Rubinstein's disorganized methods, he went instead to Liszt. During the last eight years of Liszt's life Friedheim remained his pupil; he also lived with him in Rome and Weimar and acted as his secretary. This close association formed the basis for Friedheim's reputation as one of the foremost exponents of Liszt's music. He also gained orchestral experience conducting in theatres and opera houses in Germany. From 1891 to 1895 he taught and played in the USA, then spent some time in London, and for several years up to 1904 taught at the RMCM. From 1908 to 1911 he conducted at Munich and in 1915 settled in the USA, going to Toronto in 1921 as professor at the Canadian Academy of Music.

Friedheim's technique was awesome, but his greatest success lay in the clarity and repose that characterized his interpretations of Liszt's music. It is unfortunate that the best qualities of his playing survive in only a fragmentary way in the few recordings he made. Serious and deeply reflective by nature, he tried all his life to focus his powers not only on playing and conducting but also on writing and composing. He wrote a psychological study of Liszt and many reminiscences, later collected by his pupil Theodore Bullock under the title *Life and Liszt* (New York, 1961). Besides editing the works of Chopin, Friedheim was a dedicated composer, though few of his works were published and many of the manuscripts are lost. His operas include *The Last Days of Pompeii*, not performed, *Alexander and Thaïs* and *Die Tänzerin* (Karlsruhe, 1897), both performed in Cologne, 1904, and *The Christmas* and *Giulia Gonzaga*, both unfinished. He wrote two piano concertos, in B (performed in 1880) and B♭ (Karlsruhe, 1890), an early orchestral overture, *A Hero of our Times* (St Petersburg, 1877), and a march, *E pluribus unum* (1894).

JERROLD NORTHROP MOORE/R

Friedhofer, Hugo (William) (*b* San Francisco, 3 May ?1902; *d* Los Angeles, 17 May 1981). American orchestrator and composer. He gave up early study towards an artistic career in favour of a musical training, first as a cellist, and then as an arranger and orchestrator. During the 1920s he studied with Domenico Brescia and worked as an arranger for theatre and cinema orchestras, before joining Fox Studios in 1929 as an arranger for early sound film scores. These collaborative projects prepared him for his move to Warner Bros. in 1934 where he worked as principal orchestrator for Korngold and Steiner. He orchestrated 16 of Korngold's 17 original film scores, including *The Adventures of Robin Hood* (1938) and *The Sea Hawk* (1940), and 54 of Steiner's 77 scores for Warner Bros. between 1936 and 1947, notably including *Now, Voyager*, which won Steiner the Academy Award for 1942, and *Mildred Pierce* (1945). In 1943 he was offered a contract to compose for Twentieth Century-Fox, and he scored 69 films as principal composer and 200 as co-composer. His first original film score was in 1938 for *The Adventures of Marco Polo*, and he went on to compose for a variety of films including *Broken Arrow*, *Vera Cruz* and *An Affair to Remember*. He won the 1946 Academy Award for *The Best Years of our Lives*. Despite the modernist techniques of teachers such as Nadia Boulanger, Toch and Kanitz, with whom Friedhofer studied in the late 1930s and early 1940s, and the influence of jazz on the film scoring of consequent decades, his style is most clearly understood as a fusion of the thematic approach of Steiner and the atmospheric emphasis of Korngold, blended with more economic orchestration than he used for either composer. A large collection of Friedhofer's original scores is held in the Arts and Communications Archive, Brigham Young University, Utah.

WORKS
(*selective list*)

all film scores

As principal composer: The Adventures of Marco Polo, 1938; The Lodger, 1944; The Bandit of Sherwood Forest, 1946; The Best Years of our Lives, 1946; The Bishop's Wife, 1947; Enchantment, 1948; Joan of Arc, 1948; Broken Arrow, 1950; Edge of Doom, 1950; Ace in the Hole, 1951; Above and Beyond, 1952; Vera Cruz, 1954; Violent Saturday, 1955; The Rains of Ranchipur, 1955; Between Heaven and Hell, 1956; An Affair to Remember, 1957; Boy on a Dolphin, 1957; The Sun also Rises, 1957; The Barbarian and the Geisha, 1958; The Young Lions, 1958; One-Eyed Jacks, 1960; Geronimo, 1962; The Secret Invasion, 1964; Von Richtofen and Brown, 1971; Private Parts, 1973

As orchestrator: Captain Blood, 1935; The Adventures of Robin Hood, 1938; Juarez, 1939; The Private Lives of Elizabeth and Essex, 1939; The Sea Hawk, 1940; King's Row, 1942; Devotion, 1943 (film released 1946) [principal composer Korngold]

The Charge of the Light Brigade, 1936; Jezebel, 1938; Dark Victory, 1939; Santa Fe Trail, 1940; The Great Lie, 1941; Now, Voyager, 1942; Casablanca, 1943; Mildred Pierce, 1945 [principal composer Steiner]

KATE DAUBNEY

Friedl [Friedel], **Sebastian Ludwig** (*b* Neuberg, 15 Feb 1768; *d* Berlin, *c*1857). German cellist, baryton player and composer. A member of a musical family, he received his general musical education from *Hofmusikus* Simon. His first position was as a court musician in Mannheim, where he studied the cello with Peter Ritter. Friedl was equally respected as a baryton player, and following a performance at Schwetzingen was given by Prince Carl Theodore of Mannheim an inlaid and bejewelled instrument made by Joachim Tielke. In 1793, on returning from a concert tour in the Netherlands, he performed at Frankfurt for an audience which included Friedrich Wilhelm II, who then engaged him for the Royal Chapel in Berlin. He subsequently studied the cello with Jean-Louis Duport, to whom he dedicated his three cello sonatas op.1 (Offenbach, 1798). Friedl was pensioned in 1826; his name appeared in the Berlin Address Calendar until 1857.

Very little is known of Friedl's compositions. Eitner's *Quellen-Lexikon* lists only one published work, the three cello sonatas op.1. Schilling's *Universal-Lexicon der Tonkunst* indicates the existence of other works in manuscript, and credits Friedl with having arranged music especially for the baryton. A report in the *Allgemeine musikalische Zeitung* (1811) relates that he performed a potpourri of themes that he had arranged for the baryton.

EFRIM FRUCHTMAN/VALERIE WALDEN

Friedlaender [Friedländer], **Max** (*b* Brieg [now Brzeg, Poland], 12 Oct 1852; *d* Berlin, 2 May 1934). German musicologist. He studied singing under Manuel Garcia in London and Julius Stockhausen in Frankfurt, and went on to establish himself as a successful lieder and oratorio baritone. In 1884 he turned to the study of musicology under Spitta and German literature under W. Scherer in Berlin and took the doctorate at Rostock University in 1887 with a dissertation on Schubert. He completed the *Habilitation* in 1895 at Berlin University, where he was appointed reader and university director of music in 1903. In 1910–11 he worked as exchange professor at Harvard (receiving its honorary DCL) and at other American universities.

Friedlaender devoted his life to the interpretation, publication, collection and investigation of German folksongs and lieder. In all his scholarly work he never lost sight of the interests of the practical musician. From the time of his research into Schubert's songs he was concerned to reveal the original form of the work in

question by investigation of the source material, and thus to provide authoritative editions. This aim applied to the texts as much as to the music. The main consequence of his literary interests was his work on Goethe, which produced a valuable two-volume collection of Goethe settings (*Gedichte von Goethe in Compositionen seiner Zeitgenossen*, Weimar, 1896–1916). Apart from his concern with the 19th-century German lied, his principal interest was in the solo song and Singspiel of the 18th century. His two-volume study *Das deutsche Lied im 18. Jahrhundert* still retains its value as a work of reference and as source material.

No less fruitful was Friedlaender's work as a researcher, collector and editor in the field of German folksong. The critical notes to the collections he edited, especially the folksong books for male-voice choir and for mixed chorus, 'constitute in their own right a history of the folksong and partsong, embracing all the widely scattered material' (Kretzschmar). His foundation in 1917 of an archive of German folksongs in Berlin put the study of folksong on a firm footing.

ANNA AMALIE ABERT

Friedlein, Rudolf Fryderyk (*b* Kraków, 7 Aug 1811; *d* Warsaw, 20 July 1873). Polish bookseller and music publisher. He worked in the bookshop run, by his father, Jan Jerzy Fryderyk Friedlein, in Kraków, then from 1834 with E. Günther in Leszno. In 1839 he entered into partnership with F. Spiess's Warsaw firm, which he bought in 1848 and managed from 1851 under his own name. Friedlein's became one of the leading bookshops in Warsaw, being well stocked and providing a lending service. Soon after 1840 he also began to publish music, maintaining a high musical standard in the compositions he issued. His printing works were technically advanced: he was the first Warsaw publisher to number his plates, and he was also the first to print Moniuszko's works. In about 1860 Friedlein was in financial difficulties and sold some of his editions to the firm newly established by Gebethner and Wolff, both of whom had been his pupils. After the January Insurrection (1863) he was arrested by tsarist authorities and sent into exile in Tver′. He was released in 1870, but his firm had been liquidated in 1865.

KORNEL MICHAŁOWSKI

Friedman, Ignacy [Ignaz] (*b* Podgórze, nr Kraków, 13 Feb 1882; *d* Sydney, 26 Jan 1948). Polish pianist and composer. After piano lessons with Flora Grzywińska in Kraków, he studied composition with Hugo Riemann in Leipzig. In 1901 he began a four-year period of study in Vienna with Leschetizky, serving as his assistant; he also studied musicology with Adler and attended masterclasses given by Busoni. After a Vienna début in 1904 he performed throughout the world until 1943, giving some 2800 concerts. He appeared with such conductors as Nikisch, Weingartner, Mengelberg and Saint-Saëns, and in chamber music with Auer, Hubay, Huberman, Telmányi and Feuermann, among others; together with Huberman and Casals he played Beethoven sonatas and the 'Archduke' Trio for the composer's centennial festival in Vienna in 1927. Until 1917 he lived in Berlin, then in Copenhagen, then in Siusi, Italy (1919–39) and in 1940 settled in Sydney.

Friedman possessed a formidable technique – even Horowitz acknowledged it as superior to his own – coupled with a profound imagination. His repertory emphasized the major works of Beethoven, Schumann, Chopin, Liszt and Brahms, but also included new scores by Novák, Palmgren, Karl Weigl, Kodály and Glazunov. He played the Chopin Mazurkas with the same kind of rhythmic nuance that, by all accounts, characterized the composer's own playing of these pieces. In addition to his career as a performer, he was also an effective teacher: Ignace Tiegerman, Victor Schiøler, Leon Pommers and Bruce Hungerford were among his pupils. He published more than 100 compositions, mainly for piano, including transcriptions and two volumes of exercises; his finest work is the Piano Quintet (Leipzig, 1918). He edited the

complete piano works of Chopin, and major works by Beethoven, Mendelssohn, Schumann and Liszt. His recordings include much Chopin, music by Liszt, Beethoven and Mendelssohn, among other composers, and a few of his own compositions.

Friedrich. *See* FRIDERICI family.

Friedrich II. *See* FREDERICK II.

Friedrich, Götz (*b* Naumburg, 4 Aug 1930). German director. After studying at the Deutsches Theaterinstitut in Weimar (1949–53) he joined the Komische Oper, Berlin, as assistant to and later collaborator with Felsenstein (1953–72). He also taught dramaturgy in Berlin and, from 1973, in Hamburg, where he was appointed *Oberspielleiter* (1973–7) and *Chefregisseur* (1977–81). He was simultaneously director of productions at Covent Garden (1977–81), before moving back to Berlin, where he became Generalintendant and principal director of the Deutsche Oper in 1981 (*see* BERLIN, §3), as well as artistic director of the Theater des Westens in 1984.

Particularly notable productions, in a long list staged at many of the leading international houses, include *Fidelio* (1978, Munich), *Lulu* (1981) and *Elektra* (1990) at Covent Garden, and the world première of Berio's *Un re in ascolto* at Salzburg (1984). But the central pillar of Friedrich's work remains his series of Wagner productions. His first *Ring*, at Covent Garden (1974–6), emphasized perceived differences of mode between the four dramas: *Rheingold* as a mystery play viewed ironically through modern eyes, *Walküre* as typical 19th-century psychological theatre, *Siegfried* as black comedy and *Götterdämmerung* as the last stage of a glittering civilization doomed to decline. The purpose of the hydraulic platform on which the action took place (see illustration) was thus not to achieve optical unity but to suggest a space – the stage representing the world – on which an epic drama, open-ended and disparate in its styles, could be unfolded. Adopting Brechtian alienation techniques, Friedrich caused Loge, Alberich and Wotan to address the audience directly, outside the framework of the drama. His second *Ring*, which originated in Berlin (1984–5) before transferring to Tokyo, Washington, DC,

Götz Friedrich's production of 'Die Walküre' (Act 2) at Covent Garden, London, 1974, designed by Josef Svoboda

and Covent Garden, located the action in a tunnel, inspired by the Washington Metro, but intended to provide a performing space non-specific in chronology and place. The monochrome severity of Peter Sykora's sets, and the images of warlike aggression and destruction, reflected a bleakly pessimistic view of the work as an apocalyptic endgame. A third cycle was staged in Helsinki in 2000.

Of Friedrich's productions for Bayreuth – *Tannhäuser* (1972), *Lohengrin* (1978) and *Parsifal* (1982) – the first caused the greatest controversy with its brutal, militaristic representation of Wartburg society and its final chorus with the singers, in everyday clothes, making a clenched-fist salute (abandoned after the first performances). He has remained prolific on the international scene, with, for example, a spectacular but socially critical *Porgy and Bess* on the lake at Bregenz (1998).

BARRY MILLINGTON

Friedrich, Reinhold (*b* Weingarten, 14 July 1958). German trumpeter. He studied with Edward Tarr in Karlsruhe, 1979–86, and with Pierre Thibaud in Paris, 1982–3. In 1983 he became principal trumpeter of the Frankfurt RSO, and he is leader of the radio station's 19-piece brass ensemble, HR Brass. He won the ARD International Competition in Munich in 1986, and in 1989 was appointed professor at the Karlsruhe Hochschule für Musik. Friedrich is a noted exponent of Bernd Alois Zimmermann's Trumpet Concerto, and has given the first performances of works by Theo Brandmüller, Edison Denisov, Wolfgang Killmayer, Wolfgang Rihm and Caspar Johannes Walter, among others; he has made many first recordings, including an award-winning disc of Hans Erich Apostel's Sonatina, Berio's *Sequenza X*, Gubaidulina's Trio and Zimmermann's Concerto. Friedrich is also a specialist on the keyed trumpet, with which he has recorded the concertos of Haydn, Hummel and Michele Puccini.

EDWARD H. TARR

Friedrich [Fridrich] **von Hûsen** [Hausen] (*b* ?*c*1150; *d* Philomelium [Akşehir], Asia Minor, 6 May 1190). German Minnesinger. His ancestral seat was in Rheinhausen, near Mannheim in the Rhine region. He is attested in documents from 1171 and was in the service of the Hohenstaufen emperors; he is traceable in northern Italy in 1175 and again in 1186 and 1187. He participated in the third crusade under Friedrich Barbarossa in 1189 and fell at the Battle of Philomelium. Contemporaries depict Friedrich von Hûsen as a highly esteemed figure. He belonged to the closest circle of intimates of Barbarossa (as his secretary and legal adviser) and of Henry VI. Friedrich was primarily responsible, together with Rudolf von Fenis-Neuenberg and Hendrik van Veldeke, for the adoption of Romance poetic features in German lyric poetry and for the further independent development of Minnesang. He was among the first poets writing in German to give full lyrical expression to the themes of *Minne* (love) and *Minnedienst* (love service). Apart from treating familiar amatory motifs, his poems are concerned more generally with symbolizing the ideal of love as an ennobling power. Another theme is the conflict within the crusader between love for God (*Gottesminne*) and love for his lady (*Frauenminne*).

53 strophes by Friedrich von Hûsen have survived (in the Weingartner and Manesse manuscripts), which can be arranged into 17 or 20 lieder, but all without melodies, that can only be reconstructed from possible French and Provençal models. He is also mentioned as having composed *Leiche* (*see* LAI). Music can only be assigned tentatively to those of his poems that seem to be direct contrafacta of Romance poems whose melodies survive. Friedrich exerted a strong influence on a group of contemporary south-west German and Swiss Minnesinger, known as the Hausen school.

BURKHARD KIPPENBERG/LORENZ WELKER

Friedrich [Vriderich] **von Sunnenburg** [Sonnenburg, Sunnenburc, Suneburg; Meister Friedrich von Sonnenburg] (*d* before 1287). Austrian Minnesinger and composer. Coming from Sonnenburg in the Pustertal (Tyrol), probably from a ministerial family, he lived at the courts of Bavaria and Bohemia as well as in Tyrol and Thuringia. Sometimes included by the Meistersinger as one of their *alte Meister*, he should be counted as one of the most important *Spruchdichter* after Walther von der Vogelweide, Bruder Werner and Reinmar von Zweter. The 73 *Sprüche* (*see* SPRUCH) ascribed to him, mostly in the Jenaer Liederhandschrift (*D-Ju* El.f.101, ff.63*v*–72), may not all be authentic, but they are clearly influenced by Reinmar von Zweter and seem to have been written between about 1247 and 1275; they concern religion, morality and politics, in which Friedrich supported the pope against Rudolf of Habsburg. The song on f.72*v* of the Jena manuscript (*Ihc wil Singhen*, ed. in Holz, Saran and Bernoulli as no.XXIII, 64) is probably by Wizlâv; but the remainder of the section devoted to Friedrich's poems includes three melodies: *Eyn rîcher küninc hiez Kosdras* with eight strophes both here and in the Colmar Manuscript (*D-Mbs* Cgm. 4997); *Nû merke hô und edele man* with eight strophes, all of which also appear in the Colmar Manuscript together with five others; and *So wol dir werlst so wol dir hiute* with 47 strophes in the Jena manuscript and others elsewhere. A further melody appears in the Colmar Manuscript (f.526) with the annotation 'In Cunrads von wirczburg nachtwyse; *alii dicunt esse* In frider(ich) von suneburg sussem don'.

BURKHARD KIPPENBERG

Frieman (Friemann, Freeman), **Gustaw** (*b* Lublin, 28 Oct 1842; *d* Odessa, 26 Sept 1902). Polish violinist teacher and composer of Swedish descent. He studied the violin under Serwaczyński in Lublin, and from 1862 (or 1864) until 1865 with Massart at the Paris Conservatoire, where he won the Grand Prix and gold medal. He also studied composition with F. Rüfer in Berlin. In 1866 he began a concert career that took him to Dresden, Brussels, Vienna and Lemberg (now L'viv); he made his début in Warsaw in 1867, and subsequently gave many concerts there until 1899. He also performed in Poznań (1867), Kraków, Vilnius, Lublin (1869, 1875–7), Berlin (1872), Kiev (1880, 1884), St Petersburg (1882), and latterly gave about 40 concerts in the south of Russia (1888). From 1887 to 1888 he was professor of violin at the Music Institute in Warsaw, and from 1889 he held the same position at the conservatory in Odessa, where he was also director. He held honorary positions as soloist and chamber musician at the Austrian and Persian courts and also in Hesse. Widely known in Europe, his success was principally due to his performances of the violin concertos by Mendelssohn, Spohr, P. Rode, Vieuxtemps and Schumann. He often performed the music of H. Wieniawski, whose influence can be detected in his own compositions. His style of playing was characterized by a brilliant technique, a fine (though not big) quality of tone, musicality, and the charm and temperament typical of the French school. His compositions for violin are mainly salon miniatures, which are not especially virtuosic. Published in Warsaw, Paris, Berlin, Odessa and Moscow, they include *Kujawiak* op.6 no.4, Romance op.14, Grande polonaise op.18 and *Tańce góralskie* ('Mountain Dances') op.19.

BARBARA CHMARA-ŻACZKIEWICZ

Friemann, Witold (*b* Konin, 20 Aug 1889; *d* Laski, nr Warsaw, 22 March 1977). Polish composer, pianist and teacher. He attended the Warsaw Conservatory as a pupil of Michałowski for piano and of Noskowski and Statkowski for composition and orchestration. From 1910 to 1913 he studied in Leipzig and Meiningen with Reger (composition) and Josef Pembaur jr (piano). He taught the piano at the Lwów Conservatory (1921–9), served as music critic of the *Słowo polskie* and was founder and director of the Katowice Academy of Music. He then worked for Polish radio in Warsaw (1934–9) and, from 1946, as a teacher for the blind. In 1963 he received the prize of the Minister of Culture and Arts for his corpus of piano and vocal works. His works are fundamentally romantic and harmonically traditional, with an emphasis on melody.

BOGUSŁAW SCHÄFFER/R

Fries, Hans. *See* FRISIUS, JOHANNES.

Frigel [Frigelius], **Pehr** [Per] (*b* Kalmar, 2 Sept 1750; *d* Stockholm, 24 Nov 1842). Swedish composer. He studied at the Kalmar Gymnasium and at the University of Uppsala (1770–76), and earned a living in government service, holding many posts in succession until he could afford to retire at the age of 50. As a boy in Kalmar he wrote organ and vocal music; in Stockholm he became acquainted with J.G. Naumann and J.M. Kraus, both of whom gave him further instruction in composition. In 1778 he was elected to the Swedish Royal Academy of Music, and in 1780 two of his symphonies were performed; he became secretary of the academy in 1794, a post he held for 47 years. His most productive period as a composer was between 1795 and 1815, during which time he wrote overtures, symphonies, numerous cantatas for the Jakobskyrka and the academy; he also collaborated with Stenborg on the incidental music to *Äfventyraren, eller Resan till Månens ö* ('The Adventurers, or The Journey to the Isle of the Moon', 1791), and Kotzebue's *Eremiten* (1798). The oratorio *Försonaren på Oljeberget* ('The Redeemer on the Mount of Olives') to a text by Ödmann, performed at the Royal Opera in 1815 and revised for performance at the Riddarhus in 1820, is considered his finest work. A cantata on a text by J.O. Wallin, his last work, was performed by the academy at the Storkyrka in 1816. His only opera, *Zoroaster*, was never performed, but some arias for French operas were produced at the Royal Opera. He taught music theory at the Swedish Royal Academy of Music from 1814 to 1830.

Frigel composed in a classical style modelled after Handel, Gluck and Haydn, and he expressed a preference for what he termed 'orthodox' music. He maintained an extensive correspondence with many distinguished musicians, including Cherubini, Spontini and Vogler; among his pupils were E.G. Geijer and P.C. Boman. Few of his works were published, apart from some songs issued by Abraham Hirsch. His manuscripts are in the libraries of the Swedish Royal Academy of Music and the University of Uppsala.

KATHLEEN DALE/HANS ÅSTRAND

Frigimelica Roberti, Count **Girolamo** (*b* Padua, 10 Jan 1653; *d* Modena, 30 Nov 1732). Italian librettist, poet, architect and librarian. From 1691 to 1720 he was a curator of the public library at Padua, where he was a member and *principe* of the Accademia dei Ricovrati. Family quarrels drove him to spend the rest of his life in Modena. Buildings designed by him were erected or started in Padua, Vicenza, Stra and Modena from 1717 onwards. 11 operas to librettos by him, set by C.F. Pollarolo, Alessandro Scarlatti, Caldara and Luigi Mancia, were performed at the Teatro Grimani a S Giovanni Grisostomo, Venice, 1694–6 and 1704–8. He wrote a further libretto for Padua, which was first performed at the Teatro Obizzi in the spring of 1695. All these librettos are in five acts and treat mythological or historical subjects. Some are called tragedies, some (from 1704) tragicomedies; they often include choruses and ballets. Like those of Morselli, Silvani and Zeno they adhere to the predominantly serious, stylistically elevated manner of libretto writing that paid homage to Aristotle and the French classical dramatists. Seven oratorio texts by Frigimelica Roberti, in two parts or five acts and with music by C.F. Pollarolo and Badia, were performed between 1697 and 1702 in Venice, Vienna and Rome.

KARL LEICH

Frijsh, Povla (*b* Aerø, Denmark, 3 Aug 1881; *d* Blue Hill, ME, 10 July 1960). Danish soprano. After studying with Ove Christensen she went to Paris at the age of 17 to work with Jean Périer and made her recital début there three years later. She toured with the Cortot-Thibaud-Casals trio, from whom she acknowledged learning much about phrasing and timing. She appeared in Paris in recital with Raoul Pugno and was chosen by Mahler to sing in his Second Symphony in Cologne (1910). She made her

American début in New York in 1915, and gave annual recitals there until 1947. Frijsh's voice was distinctive in timbre and expressively used. Although she sang in opera only twice – in Paris (*L'incoronazione di Poppea*) and in Copenhagen (Peter Heise's *Drot og marsk*) – her sense of drama was extraordinary: she made a hair-raising experience of Schubert's *Gruppe aus dem Tartarus*, yet could sing Cui's *La fontaine de Csarskoë-Zelo* in the purest bel canto. She was always interested in new songs, encouraging composers such as Virgil Thomson, Randall Thompson, Samuel Barber and Rebecca Clarke by including their works in her programmes. She was the first to sing many of Poulenc's songs in New York, and she gave the New York premières of Bloch's *Poèmes d'automne* and Loeffler's *Canticum fratris solis* (1925). In her later years she was active as a teacher. Her complete recordings have been issued on CD.

PHILIP L. MILLER

Frike, Philipp Joseph. *See* FRICK, PHILIPP JOSEPH.

Friml, (Charles) Rudolf (*b* Prague, 7 Dec 1879; *d* Los Angeles, 12 Nov 1972). American composer and pianist of Czech birth. He won a scholarship to the Prague Conservatory and studied composition with Dvořák and piano with Josef Jiránek. He began composing light concert pieces as soon as he graduated, but also accepted a position as accompanist for the violinist Jan Kubelík in order to support himself. He toured Europe and made two visits with Kubelík to the USA, where he decided to settle in 1906. In that year he performed his First Piano Concerto with Walter Damrosch and the New York SO and gave recitals throughout the country, quickly achieving a reputation for his imaginative improvisation. He also continued to compose both concert pieces and lighter music, often under the pseudonym Roderick Freeman.

In 1912 Victor Herbert, who had quarreled with Emma Trentini, the leading lady of his *Naughty Marietta*, refused to honour his commitment to compose a second operetta for the singer; Friml was called upon to take Herbert's place and wrote *The Firefly* (including the songs 'Giannina mia' and 'Sympathy'), which became his first Broadway success. It was followed by *High Jinks* (1913, including 'Something seems tingle-ingleing') and *Katinka* (1915, with 'Allah's Holiday'). For a time thereafter Friml wrote scores that were closer in style to musical comedy than to operetta. Although several of these shows enjoyed long runs, it was not until 1924 that he had another major success. *Rose-Marie*, written in collaboration with Stothart, Harbach and Oscar Hammerstein II, was the most popular American musical of the 1920s, particularly in London and Paris, where the length of its run established a record. Friml wrote the music for seven of the show's eighteen musical numbers, and collaborated with Stothart on three others; among Friml's contributions were the title song and 'Indian Love Call'. The collaborative 'Totem Tom-Tom', with its strong rhythmic drive and chromatic countermelody, is noteworthy for its attempt to create the sound world of native Canadians. Two more enormously successful operettas followed: *The Vagabond King* (1925, including 'Only a Rose', 'Some Day' and 'Song of the Vagabonds') and *The Three Musketeers* (1928), with 'Ma Belle' and 'March of the Musketeers'.

After the onset of the Depression tastes in musical styles changed sharply, and Friml's essentially middle-European mannerisms were perceived as outdated. Although he composed scores for several more Broadway shows and for three Hollywood films, he was apparently unable to accommodate the newer idioms, and met with no success. The one exception was his song 'The Donkey Serenade' from the film version of *The Firefly* (1937), though this was, in fact, an old melody, having originally appeared as 'Chansonette' in the *Ziegfeld Follies of 1923*. Friml remained active as a concert performer, however, until shortly before his death.

Compared with the music of Romberg, Friml's scores are generally more chromatic, both melodically and harmonically. Whereas Romberg excelled at writing waltzes, Friml's most enduring songs are his sentimental ballads in duple metre such as 'Rose-Marie' and 'Only a Rose'; his melodies are characterized by chromatic neighbour tones and sustained notes over a more active accompaniment. Like Romberg, he was known for his marches, a result of his central European heritage and upbringing, one fine example being 'Song of the Vagabonds', somewhat unusual because of its minor mode. It was not only in individual songs but also in his unified concept of a show that Friml made significant contributions to the American musical, and the original programme for *Rose-Marie* included the remark that 'the musical numbers of this play are such an integral part of the action that we do not think we should list them as separate episodes'.

WORKS
(*selective list*)

STAGE
mostly operettas; dates are those of first New York performance

The Firefly (O. Harbach), 2 Dec 1912; High Jinks (Harbach), 10 Dec 1913; The Peasant Girl (E. Smith, H. Reynolds, H. Atteridge), collab. O. Nedbal, 2 March 1915; Katinka (Harbach), 23 Dec 1915; You're in Love (Harbach, E. Clark), 6 Feb 1917; Kitty Darlin' (Harbach, P.G. Wodehouse, after D. Belasco), 7 Nov 1917; Sometime (R.J. Young), 4 Oct 1918; Glorianna (C.C. Cushing), 28 Oct 1918; Tumble In (Harbach, after M.R. Rinehart and A. Hopwood), 24 March 1919; The Little Whopper (Harbach, B. Dudley), 13 Oct 1919; June Love (Harbach, W.H. Post, B. Hooker), 25 April 1921; Ziegfeld Follies of 1921 (G. Buck, Hooker), collab. others, 21 June 1921; The Blue Kitten (Harbach, W.C. Duncan, after Y. Mirande and G. Quinson), 13 Jan 1922

Cinders (Clark), 3 April 1923; Ziegfeld Follies of 1923, collab. others, 20 Oct 1923; Rose-Marie (Harbach, O. Hammerstein II), collab. H. Stothart, 2 Sept 1924 [films, 1936, 1954]; The Vagabond King (Hooker, Post, R. Janney, after J.H. McCarthy), 21 Sept 1925; No Foolin' (Ziegfeld's American Revue of 1926) (Buck, I. Caesar), collab. J. Hanley, 24 June 1926; The Wild Rose (Harbach, Hammerstein), 20 Oct 1926; The White Eagle (Hooker, Post, after E.M. Royle), 26 Dec 1927; The Three Musketeers (W.A. McGuire, Wodehouse, C. Grey, after A. Dumas), 13 March 1928; Luana (H.E. Rogers, J.K. Brennan, after R.W. Tully), 17 Sept 1930; Music hath Charms, or Annina (R. Leigh, G. Rosener, J. Shubert), 29 Dec 1934

OTHER WORKS

Films: The Lottery Bride, 1930; Music for Madame, 1937; Northwest Outpost, 1947

Vocal: many songs, incl. Pisně Závišovy [Songs of Zavis], cycle, 1906; When I Hear an Old-Fashioned Waltz; Bring back my blushing rose (1921); Roses in the Garden (1921); Two Lovely Lying Eyes (1921); I've found a bud among the roses (1922); When I Waltz with You (1922); On a Blue Lagoon (1924); A Gypsy of Song (1933); I want the world to know (1937); My Sweet Bambina (1937); others for stage works, films

Orch: 2 pf concs.; Sym. 'Round the World'; Escape to Hong Kong, sym. poem, c1961; Chinese Suite; Arabian Suite; A Day in May,

suite, 1923; Rural Russian Scene; Chansonette, 1923 [arr. of Chanson, pf, 1920]

Pf (many arr. chamber): dances incl. Konzertwalzer, op.12, Tschechische Tänze, op.29; character pieces, incl. Réveil du printemps, op.32, Chant poétique, op.33, Romance sentimentale, op.34, Berceuse, op.50, Canzonetta, op.51, Lullaby, op.58, Mignonette, op.59, Dumka, op.63, O Vermeland, op.64, Legende, op.66, Drifting, op.67, Aquarellen, op.74, 5 Mood Pictures, op.79, Pastoral Scenes, op.80, Daisy Field, op.81; études incl. Staccato-étude, op.37, Etude, F, op.44, Etude fantastique, op.61; suites incl. Suite mignonne, op.35, California Suite, op.57, Bohemian Suite, op.60, Russian Suite, op.83

GERALD BORDMAN/WILLIAM A. EVERETT (text); DEANE L. ROOT (work-list)

Frimmel, Theodor von (*b* Amstetten, 15 Dec 1853; *d* Vienna, 25 Dec 1928). Austrian music scholar. He trained as a doctor of medicine in Vienna, graduating in 1879, but had already begun to turn his attention to the history of art and music. During his student years and in the years immediately afterwards, he made extensive study tours in Germany, Italy, France and the Netherlands, working in between at the Österreichisches Museum für Kunst und Industrie (1881–3). His only full-time appointment was as assistant curator of the Vienna Hofmuseum (1884–93), a post which he gave up in order to devote himself more thoroughly to his Beethoven studies; in later life he taught art history at the Vienna Athenäum and was director of the Gräflich Schönborn-Wiesentheidschegalerie. His interests and talents were happily united in his work on Beethoven biography and iconography, although he never succeeded in drawing his detailed studies together into a major work, with the exception of the *Beethoven-Handbuch* (1926). He was the editor of the short-lived *Beethoven Jahrbuch* (1908–9). After his death his papers, amounting to more than 20,000 items, were acquired by the Beethoven Archiv in Bonn.

MALCOLM TURNER

Frisbie, Charlotte J(ohnson) (*b* Hazleton, PA, 20 Dec 1940). American ethnomusicologist and anthropologist. She took the MA in ethnomusicology in 1964 at Wesleyan University, where she studied with D.P. McAllester; in 1970 she took the doctorate in anthropology at the University of New Mexico. She was appointed professor of anthropology at Southern Illinois University in 1970. She also served as president of the Society for Ethnomusicology (1987–9). She began researching Navajo culture and music in 1962 and her first book, a study of the Navajo girl's puberty ceremony (1967), is an example of the detailed documentation and analysis of music, language and ritual that has become her hallmark. She is also known for her groundbreaking work on music and gender.

VICTORIA LINDSAY LEVINE

Frischmuth, Johann Christian (*b* Schwabhausen, nr Gotha, 25 Nov 1741; *d* Berlin, 31 July 1790). German composer. Son of the teacher and choirmaster Johann Elias Frischmuth (*b* 1704), he toured with several theatrical troupes as an actor, singer and Kapellmeister, specializing in playing comic old men. In 1775 he was at Münster, from 1775 to 1780 at Gotha and from 1780 with Ackermann's troupe at Hamburg. Having had little success in Hamburg, he spent some time without employment in Gotha and Ohrdruf, but from 1782 he was an actor and Kapellmeister for Döbbelin's troupe in Berlin, where his Singspiels *Das Mondenreich* and *Clarisse, oder Das unbekannte Dienstmädchen* had been performed in 1769 and 1775 respectively. After the departure of the music director Johann André (1784) Frischmuth became chief Kapellmeister. When Döbbelin's theatre was reorganized as the Nationaltheater (1786) Frischmuth was able to retain his position; in 1788 C.B. Wessely was appointed his assistant with equal powers. Of Frischmuth's works only the vocal

score of *Clarisse*, dated 1771 (*D-Bsb*), and the libretto of *Das Mondenreich* (Schatz Collection, *US-Wc*) are extant; other operas (*Die kranke Frau*, ?1773; *Der Kobold*) and 12 violin duets op.5 (Berlin, ?1765) are lost. Frischmuth was not identical with the J.C. Frischmuth living in Schwabhausen in 1797, a teacher and choirmaster who composed the *Zwölf leichte Orgelstücke* (Leipzig, 1813) and several vocal works.

GERHARD ALLROGGEN

Frischmuth, Marcus Hilarius. *See* FUHRMANN, MARTIN HEINRICH.

Frisius, Johannes [Fries, Hans] (*b* Greifensee, canton of Zürich, 1505; *d* Zürich, 28 Jan 1565). Swiss schoolteacher, theologian, philologist, humanist and music theorist. Between 1527 and 1531 he attended the cathedral school in Zürich on a scholarship provided by the Swiss reformer, Ulrich Zwingli. In the company of his friend the polyhistor Conrad Gesner he went to Paris in 1533 and for two years studied music and philology at the university. After spending a year teaching in the Lateinschule at Basle he returned to Zürich in 1537 as a teacher of Latin, Greek and music in the cathedral school, a position he held until his death. In order to complete his education he went to Italy in 1545. Although he visited many Italian cities, Venice was of particular importance, for there he studied Hebrew and numerous Latin and Greek manuscripts. After returning to Zürich in 1547 he reorganized musical instruction in its schools. He was interested in both sacred and secular music, and studied the lute in 1532 with Johann Widenhuber of St Gallen.

In addition to publishing theological and philological works, Frisius was known as a music theorist. His *Brevis musicae isagoge* (Zürich, 1554) is his most important contribution to music. (Its first edition, *Synopsis isagoges musicae*, 1552, lacked music examples.) The 1554 edition discussed both plainchant and mensural music, and contained 24 four-voice settings of Horatian odes. According to the book's preface, the tenor part of some compositions was composed by Frisius and the other three voices by the Zürich Cathedral organist and singer, Heinrich Textor. All pieces are in strictly chordal style and adhere faithfully to the poetic metres of Horace. Such pieces were used by humanistic schoolteachers to combine musical practice with a study of classical metrical schemes. Frisius also edited a collection of evangelical songs and psalms in about 1540, which was published by a relative, Augustin Friess. It contained Frisius's own poem, *Der hat ein Schatz gefunden* (based on *Proverbs* xxxi.10) and employed the melody *Entlaubet ist der Walde*. The popularity of this setting may be seen in its frequent reprints in other Swiss songbooks up to the end of the century.

CLEMENT A. MILLER

Friskin, James (*b* Glasgow, 3 March 1886; *d* New York, 16 March 1967). Scottish pianist and composer. At the age of 14 he won a scholarship to the RCM, London, studying the piano with Dannreuther and Hartvigson, and in 1905 a composition scholarship with Stanford. His compositions, notably the Piano Quintet (1907), received early recognition. He taught at the Royal Normal College for the Blind (1909–14) and in 1914 went to the USA to teach the piano at the DKG Institute of Musical Art and later at the Juilliard School. A noted Bach interpreter, he gave the first American performance of the Goldberg Variations (1925). His compositions include piano, choral and chamber works, but his development as a composer was curtailed by teaching responsibilities. In 1944 he married the English composer and viola player Rebecca Clarke.

Friss [friska] (Hung.). A quick section of VERBUNKOS or CSÁRDÁS dance music.

Fritsch, Balthasar (*b* Leipzig, 1570–80; *d* ?Leipzig, in or after 1608). German composer and violinist. He may have been one of the Leipzig Stadtpfeifer, a privileged body to whom violinists were added about 1600. Certainly he moved in their circle and enjoyed the patronage of the von Walwitz family. The 12 pavans and 21 galliards that make up his surviving 1606 volume are light and spirited, and are part of the vogue for ensemble dance music precipitated by the influx of English comedians and viol players to Germany. The pavans are characterized by birdcalls, echoes and extensive motivic unification. The galliards, though less contrapuntal, also contain motivic play. His 12 madrigals (1608) are more serious pieces full of contrapuntal skill and the latest Italian dialogue technique; he used the same style of writing in his German songs. His music formed part of a tradition in Leipzig from which emerged collections such as Schein's *Venus Kräntzlein* (1609) and *Banchetto musicale* (1617).

E. FRED FLINDELL

Fritsch, Johannes (Georg) (*b* Bensheim-Auerbach, 27 July 1941). German composer and viola player. While reading musicology, philosophy and sociology at Cologne University (1961–5), he also studied the viola and composition with Zimmermann and Koenig at the Staatliche Musikhochschule. He attended the Darmstadt summer courses, where he distinguished himself as composer and performer with *Duett* in 1962. He played the viola in the Stockhausen

Ensemble from 1964 until 1970. Fritsch also worked in the electronic studios of West German Radio, producing *Fabula rasa* in 1964 and *Modulation IV* in 1968. He taught theory at the Rheinische Musikschule, Cologne (1965–70), and from 1971 to 1984 he taught a composition class and the course on contemporary music at the Darmstadt Academy of Music, at the same time teaching general harmony and the aesthetics of the media at the Cologne Musikhochschule, where he became professor of composition in 1984. He has been active as a writer on new music, and as an editor of various publications, including the journal *Feedback Papers* (from 1971).

In 1970, together with Gehlhaar and Johnson, he founded the Feedback Studio and followed this in 1971 with the foundation of the studio's publishing firm (the first German publishing house to be run by composers). In the same year he organized what was known as 'Hinterhausmusiken' and edited the *Feedback Papers*. He was on the board of the Darmstadt Institute for Contemporary Music and Musical Education (1974–98). He lectured at the Darmstadt summer courses (1974, 1984 and 1986) and organized the World Music Conferences in Vlotho (1979, 1982, 1984 and 1986). Prizes awarded to him include one from the state of North Rhine-Westphalia (1966), the prize of the Paris Biennale (1971), a Villa Massimo bursary (1976) and the Robert Schumann prize of the city of Düsseldorf (1981).

In his works of the 1960s (particularly *Akroasis* and *Modulation IV*), Fritsch tried to bring about a mediation between artificial and natural sounds, so that the music is not isolated as an abstract, aesthetic object, but rather is permanently in confrontation with its environment and the external conditions of its generative process. Thus, daily life and history, sacred and profane, European and exotic music, are all used as sources of material to be composed into the work's setting of perspective. As a result, his work at this time had a pronounced collage character and drew on a wide diversity of media.

While Fritsch took his guidelines mainly from Zimmermann and Stockhausen in his early works (up to the beginning of the 1970s), his later compositions, from the mid-1980s onwards, bear increasingly clear traces of the influence of Morton Feldman. The reduction of both material and methods, the intensification of the single sound and a turning towards archetypal and meditative phenomena that are religious in the widest sense are all major aspects of his late work, in which the intercultural and harmonic tendencies of earlier years are still present.

MONIKA LICHTENFELD

Fritsch [Fritschius, Frizsch, Fricz], **Thomas** (*b* Görlitz, bap. 25 Aug 1563; *d* Breslau [now Wrocław], 27 March 1619). German composer. He may have attended the Gymnasium in Görlitz although there is no evidence that he received his musical training from Kantor Winkler. He was a member of the order of Kreuzherren mit dem Roten Stern at Breslau. In 1608 he became prior at the monastery and in 1609, following the death of Johann Henceius, he was elected master. However, the monastery failed to notify the master-general of their decision, and he nullified the election. After a new vote, Elias Bachstein was appointed master and Fritsch was despatched to a monastery in Bohemia for three years. He may have returned to Breslau in autumn 1612. Fritsch was evidently on good terms with Georg Rudolph, Duke of Liegnitz, to whom his motet collections were dedicated. The title 'Magister' in the tenor volume of his *Novum et insigne opus musicum* (1620) was probably a posthumous tribute to a highly-esteemed musician and composer. The main source of his music, all of it sacred, is *Novum et insigne opus musicum*, which contains 119 works for four to ten voices for the church year. It was complemented by several other works surviving only in manuscript, but most of these disappeared at the end of World War II. Fritsch adhered on the whole to the conventions of late Renaissance polyphonic music and was clearly influenced by Lassus, Handl and Hassler. He also cultivated polychoral techniques, even when writing for only six voices (as in *Gabriel angelus apparuit*, in *PL-PE*). His music is clearly transitional in character and typical of a period when the declining Renaissance was slowly giving way to early Baroque practice. There is often a close correlation between words and music both in works to Latin texts – the vast majority – and in the four pieces to German texts in the 1620 volume.

WORKS

Novum et insigne opus musicum, compositum ad totius anni festivitates (119 compositions), 4–10vv (Breslau, 1620); facs. score and partial edn of 2 motets in AMP, i–ii (1963–4); ed. in EDM (forthcoming)

2 motets, 5 Lat. hymns, some 6vv, *A-Wm*, *PL-PE*; facs. score and partial edn of 1 motet in AMP, i–ii (1963–4)

2 masses, 6, 8vv; Magnificat, tone 7, 5vv; 2 motets, 6vv; 1 Lat., 4 Ger. hymns, 4, 6–8vv: lost, formerly *D-Bs*; Stadtbibliothek, Breslau; Biblioteca Rudolfina, Liegnitz

MIROSŁAW PERZ/RUDOLF WALTER

Fritts, Paul Byard (*b* Tacoma, WA, 1951). American organ builder. His earliest training was with his father, but he later worked with John Brombaugh and studied organs in northern Europe before opening his own workshop in 1977 in partnership with Ralph D. Richards in Tacoma. In 1988 Richards left to form a partnership with Bruce Fowkes in Tennessee, and Fritts continued under the name of Paul Fritts & Co. From the outset the firm's instruments had mechanical action and were tonally and visually inspired by historical north European examples. Since about 1990 the decorative carved pipe-shades of several organs have been executed by Fritts's sister, Judy Fritts. Significant instruments include those in St Alphonsus Church, Seattle (1984), the University of Arizona, Tempe (1991), and the Pacific Lutheran University, Tacoma (1997).

BARBARA OWEN

Fritz [Fritze], **Barthold** (*b* Holle, nr Hildesheim, 1697; *d* Brunswick, 17 July 1766). German maker of keyboard instruments. He was granted the citizenship of Brunswick on 12 July 1720. Fritz built organs, positives, harpsichords, clavichords, pianos and mechanical instruments of various kinds, including musical clocks and singing birds. His reputation was based on the fine quality of his clavichords and especially on their bass tone. Like a number of German makers, he strengthened the bass register of his clavichords by adding a third string an octave higher. Burney praised his clavichords, although C.P.E. Bach wrote in 1773 that he preferred those made by FRIDERICI. E.L. Gerber (*Lexikon*, 1790–92) wrote that Fritz had made over 500 clavichords, of which only a handful now exist; one in the Victoria and Albert Museum, London, is dated 1751, has a row of 4′ strings for the lowest 20 notes (*F′* to *c*), string-gauges (0–7) written in ink on the key-shanks and (probably) overspun strings in the bass. Another of his surviving clavichords, dated 1747, is in the Musikinstrumenten-Museum in Berlin (cat. no.3594), and yet another was lent by the Grotrian-Steinweg Collection to the Städtisches Museum, Brunswick. Fritz's *Anweisung, wie man Claviere ... in allen zwölf Tönen gleich rein stimmen könne* (Leipzig, 1756, 5/1829), gained some popularity.

DONALD HOWARD BOALCH, PETER WILLIAMS, MARTHA NOVAK CLINKSCALE

Fritz, Gaspard [Kaspar] (*b* Geneva, 18 Feb 1716; *d* Geneva, 23 March 1783). Swiss composer and violinist. His father, Philipp Fritz (1689–1744), came from Celle and settled as a music teacher in Geneva in 1709. Burney mentioned that Gaspard was a pupil of G.B. Somis in Turin, where he undoubtedly learnt composition. At the end of 1736 or the beginning of 1737 he returned to Geneva, where in April 1737 he married. As his four children all had godparents from highly placed families in Geneva, Fritz presumably moved in such circles from an early age as a violin teacher. Between 1738 and 1743 he directed the music at social occasions held by English residents in Geneva; the dedications of his printed works further indicate his connections with aristocrats staying there. In 1756 he went to Paris for the publication of his opp.3 and 4 and on 9 and 12 March and 18 April he appeared at the Concert Spirituel, but his Italian style of playing acted against his success. He returned to Geneva, where, to judge from the legacy he left, he re-established a successful career as a teacher. In June 1759 he played at Voltaire's residence, but opportunities to appear in public in Geneva arose only gradually after 1770.

Fritz's excellence as a virtuoso violinist was stressed both by A. Ryhiner of Basle in 1758 (who, however, found his ornamentation excessive and his gestures too vigorous; see Staehelin) and by Burney in 1770 (who particularly emphasized Fritz's powers of expression). Some of Fritz's published works had considerable success and were subsequently reprinted. The three-movement sonatas of op.1 (which Handel judged favourably) exhibit sectional contrasts characteristic of the ripieno concerto. In the op.2 sonatas, also in three movements, Fritz approached the style of the Turin school, with a richly decorated solo line supported by a thematically unrelated bass; some of the final movements are sets of chaconne variations. These elements are present on a much larger scale in op.3 and, together with greater demands on the player's technique, make for a splendidly expressive melodic style. The simpler op.4 trios (in fact trio sonatas) show similarities with the works of Antonio Campioni and Alessandro Besozzi in their clear formal layout and frequent short sections of imitation in all parts. Scherchen, who edited the first of the six symphonies op.6, drew attention to their formal elegance, nobility of expression and highly individual orchestral writing; these qualities lend the symphonies a more original flavour than most of the early Classical works produced by the Mannheim school (it should however be said that the date Scherchen gave them, before 1760, is probably too early).

WORKS

Edition: *Gaspard Fritz: Oeuvres complètes*, Musiques à Genève, ii (1994–) [O]

JÜRG STENZL

Fritzeri [Frizeri, Frixer di Frizeri], **Alessandro Mario Antonio.** *See* FRIDZERI, ALESSANDRO MARIO ANTONIO.

Fritzius [Fritz], **Joachimus Fridericus** (*b* Brandenburg, after *c*1525; *d* after 1597). German Protestant teacher and composer. He devoted himself to music from his early youth; like many Protestant teachers he went to Styria in Austria because of its tolerance. According to his own report he worked as a teacher in other countries; the only known facts about him, however, relate to his activities in Styria. There is evidence that he was in Graz from 1576 but without any fixed appointment. Subsequently he taught in minor Protestant schools in the Upper Styrian villages of Eisenerz (*c*1578), Vordernberg (*c*1582) and Kapfenberg (1585/6–97). In 1594 he was described as 'a pious old man, a licensed preacher and musician'. As a result of the Counter-Reformation he lost his post and received six guilders when he departed in 1597.

Only four five-voice Latin motets by Fritzius survive. They were printed by Georg Widmanstetter (Graz, 1588; ed. in MAM, xxxviii, 1975), and are the only indisputable surviving examples of music composed by a Protestant in Styria. The main features of Fritzius's settings are syllabic underlay and rich chordal or quasi-polyphonic textures, in which notes are frequently repeated. Imitation is used only very sparingly and there is no suggestion of a concertato style. The rhythmic contrasts, however, show the influence of the madrigal and canzonetta. The *Etliche deutsche geistliche Tricinia* (Nuremberg, 1593) and the *Neue Tricinia* (Frankfurt, n.d.) are both lost; they contained music for voices of limited range and were designed for school use, as were many other similar publications of the time. Fritzius also wrote *Selectiores cantiones* and a treatise (both lost); the latter was dedicated to the provincial deputies of Styria; this too was didactic in aim, although nothing detailed is known of its contents. Motets in organ tablature survive in the manuscript *D-Rp* C119.

HELLMUT FEDERHOFER

Fritzsche, Gottfried (*b* Meissen, 1578; *d* Ottensen, 1638). German organ builder. He was an intimate of Praetorius, Schütz and Scheidt, and he qualifies, along with both the Compenius brothers (Esaias and Heinrich the younger) and Hans Scherer the younger, as one of the foremost German masters of his day. Fritzsche was probably a pupil of Hans Lange, a native of the Dithmarschen region of Holstein, whose workshop was in Kamenz, near Dresden, and is known to have worked on organs at the Thomaskirche, Leipzig (1596) and the Nikolaikirche, Leipzig (1598). Lange, like Heinrich Compenius the elder, was a disciple of Esaias Beck and Fritzsche initially constructed his organs on the same model. From the outset, however, he provided a wider range of stops; his reeds, like Beck's, had only short resonators and, most notably, the *Rückpositiv* and pedal-board were without Principal choruses of their own. Examples are the instruments in the Hofkirche, Dresden (1612–14), the church of the Holy Trinity, Sondershausen (1615–17), and the Stadtkirche, Bayreuth (1618–19). Peculiar to all these organs were the three 'principalia'; Prinzipal 8′, Oktave 4′ and Trompete 8′, for instance, would be placed visibly one in front of the other in the façade, with the Trompete having resonators only two feet long at most. He reformed organ building in Hamburg, after moving there in 1629 to take over the Scherer family's sphere of operations. In the major repairs and extensions that Fritzsche undertook (from 1631) on the organs of St Katharina and the Jakobikirche in Hamburg, in which he expanded them to four manuals and 56 and 59 stops respectively, he not only gave the *Brustwerk* an independent keyboard but also provided each *Werk* with a separate Principal chorus. With these innovations and with a large number of ingeniously differentiated new stops, Fritzsche created the prototype of the Hanseatic Baroque organ, to which even such distinguished successors as F. Besser, J. Richborn and Arp Schnitger added nothing essential. It remained the standard instrument for almost a century and was to be one of the inspirations to the *Orgelbewegung* of the 1920s. A large number of Fritzsche's stops survive in the organs of the Marienkirche, Wolfenbüttel; St Katharina, Brunswick; and the Jakobikirche, Hamburg. Some details of Fritzsche's organ in the Schlosskapelle, Wolfenbüttel (1621), survive in the organ of the church in Clauen, and the *Hauptwerk* (1628–9) of the Fritzsche/Treutmann organ in the church at Harbke (near Helmstedt) is nearly complete.

Gottfried Fritzsche's son Hans Christoph (*d* late 1673 or early 1674) built organs in, among other places, Handorf (13 stops, some of which survive), Altenbruch (1647–9; two manuals, 25 stops; some stops survive), Copenhagen (Trinitatis Kirke, 1655–60) and Neuenfelde (from 1673); this last was completed after his death, by his son-in-law Hans Heinrich Cahman.

Most important among the pupils of Gottfried Fritzsche was Friedrich Stellwagen; others included Tobias Brunner of Lunden (*d* 1654), whose organ at Tellingstedt (1642) is still extant; Jonas Weigel of Brunswick (*d* after 1657), who built an organ for St Martin, Brunswick (two manuals, 23 stops); and Tobias Weller (organs at Frauenkirche, Dresden, 1619; cathedral of St Peter, Bautzen, 1642; St Matthäi, Leipzig, 1649).

HANS KLOTZ/DIETRICH KOLLMANNSPERGER

Frizsch, Thomas. *See* FRITSCH, THOMAS.

Frobenius. Danish firm of organ builders. It was founded in 1909 at Copenhagen by Theodor Frobenius (1885–1972) and in 1925 moved to Lyngby near Copenhagen. In 1944, when his sons Walther and Erik joined the firm, it began building organs with mechanical key-action and slider-chests and mainly mechanical stop-action. It specializes in carefully designed modern casework with the characteristic feature that the pipework of each manual is arranged to present three to six repeating arrangements of front pipes. The characteristic neo-classical organ type, developed by the firm in the period from about 1925 to 1955, has inspired organ builders in other countries, especially in England and the USA. Important new organs built in Denmark include those at Thisted Kirke (1972), Ribe Domkirke (1973, enlarged 1994), St Mortens Kirke, Naestved (1975), Vangede Kirke (1979), and Opstandelseskirken, Albertslund (1992). Instruments built abroad include those at Queen's College, Oxford (1965), the First Congregational Church, Cambridge, Massachusetts (1972), the Takayama Mahikari Grand Shrine, Japan (1984), and Marienfelde Kirche, Berlin (1994).

GUY OLDHAM/OLE OLESEN

Froberger, Johann Jacob (*b* Stuttgart, bap. 19 May 1616; *d* Héricourt, nr Montbéliard, France, 6/7 May 1667). German composer, organist and keyboard player. Considered the foremost mid-17th century German composer of keyboard music, he was court organist in Vienna, studied with Frescobaldi in Rome, and travelled and performed in the Low Countries, England, France, Germany and Italy. He crafted a distinctive personal idiom from stylistic features of Italian, French and German keyboard music. His works strongly influenced Louis Couperin and German keyboard composers into the time of J.S. Bach.

1. Life. 2. Works. 3. Achievement and influence.

1. LIFE. Notwithstanding Froberger's importance in the history of keyboard music and the esteem in which he was held in the late 17th and 18th centuries, documentation of his life is fragmentary. The 18th-century accounts by Walther (*WaltherML*) and Mattheson (*Mattheson GEP*) are inaccurate. Walther, for instance, gave Halle rather than Stuttgart as Froberger's birthplace and fixed his birthdate 19 years too late. It was only in the 1930s (see Seidler) that these mistakes were finally rectified. Halle, however, was where his family came from; his grandfather, Simon, lived there, and his father, Basilius, was also born there in 1575. Basilius entered the choir of the Württemberg ducal chapel in Stuttgart in 1599 as a tenor, rising to become Kapellmeister in 1621. While four of his six surviving sons were later employed at the Stuttgart court chapel, there is no record of Johann Jacob's having served there.

Froberger presumably received musical instruction from his father, perhaps from other family members and possibly also from J.U. Steigleder who became court organist in 1627. (Thematic allusions to works of Steigleder's have been noted in some Froberger ricercares.) The musical life of the Stuttgart court was enriched by musicians from many parts of Italy, France, England and Germany. The court archives show service there by several English lutenists: John and David Morell, and Andrew Borell, who received payment for teaching one of Basilius Froberger's sons in 1621–2. Basilius himself was paid to teach one of his own sons in 1627–8; which of the six it was is not known. The young Froberger was therefore exposed at an early age to the major European stylistic currents in music. After Basilius's death Johann Georg and Isaac Froberger sold their father's musical library to the Württemberg court; the catalogue survives, showing that Basilius's personal collection contained many works by leading contemporary Italian and German masters.

For reasons that remain obscure Froberger went to Vienna, probably in about 1634, perhaps intending to join the imperial chapel. Since, however, this occurred during the Thirty Years War, in which the Holy Roman Empire and Württemberg were on opposite sides, it is difficult to understand just how such an intention could have been fulfilled, no matter who might have recommended the 18-year old musician to the imperial court. Mattheson's report that Froberger was taken to Vienna by the Swedish ambassador impressed by his capacities as a singer can hardly be correct. Sweden, too, was allied with Lutheran Württemberg against the Catholic forces of the emperor, whose army administered a crushing defeat on the Protestant forces in September 1634 at the Battle of Nördlingen. This débâcle even forced the Württemberg court to flee to Stuttgart, doing away with the entire musical establishment. No archival material in Stuttgart makes any mention of Johann Jacob either before or after he moved to Vienna. Nevertheless, he must have maintained some link with the ducal family, for his last position was as musician to the dowager Duchess of Montbéliard (Mömpelgard), a territory of the house of Württemberg. Basilius, his wife and daughter all succumbed to the plague in 1637.

Johann Jacob was employed as an organist in the imperial chapel in Vienna from 1 January to 30 October 1637. In June 1637, apparently after initially having been refused, he was granted leave to go to Rome to study with Frescobaldi with a stipend of 200 gulden. The document recording the granting of this scholarship to Froberger also shows that pressure was exerted on him to convert to the Catholic faith, which he eventually did, probably in Rome.

After study with Frescobaldi, Froberger returned to the imperial chapel in Vienna and resumed his post as organist and chamber musician in April 1641, remaining in office until October 1645. A second sojourn in Italy, which may have commenced as early as November 1645, appears to have led to further study with the Jesuit polymath Athanasius Kircher in Rome, rather than with Carissimi as previously believed (see Annibaldi). Frescobaldi, his mentor in instrumental music, had died in 1643; now Froberger wished to gain equivalent mastery of sacred vocal music in the *prima pratica* tradition. Kircher's

Musurgia universalis (Rome, 1650/*R*) contains the first publication of a Froberger composition, the hexachord fantasia included in the autograph manuscript of the 1649 *Libro secondo* presented by the composer to Emperor Ferdinand III in September 1649 (*A-Wn* Cod.18706). While in Rome, Froberger became adept in the use of Kircher's *arca musurgica*, a device for composing in five different styles: recitative, church, fugue, dance and instrumental *sinfonie*, and polyphonic combinations for up to eight voices, and even as many as 16 divided among four choirs. This device, far more sophisticated than the *arca musarithmica* fully explained in *Musurgia universalis*, was barely mentioned in that mammoth tome. It was reserved for the favoured few, crowned heads most particularly. On the way back to Austria, Froberger demonstrated the *arca musurgica* to the ruling princes in Florence and Mantua and was rewarded with presents. In September 1649 he returned to Vienna and promptly showed off Kircher's composing device to the Emperor, an enthusiastic amateur musician, who was duly impressed. He also presented him with the *Libro secondo*, which, like a similar presentation copy labelled *Libro quarto* (*A-Wn* Cod.18707), was calligraphically decorated by Froberger's old friend Johann Friedrich Sautter, the son of an official at the Württemberg court in Stuttgart. (The *Libro primo* and *Libro terzo* are lost.) In a letter to Kircher of 18 September 1649 Froberger recounted how he had successfully presented the *arca musurgica* to Ferdinand III, as he had previously to various Italian princes. In Vienna Froberger was heard performing on the harpsichord by William Swann, an English diplomat in the service of the Prince of Orange. Swann reported on 15 September 1649 to the prince's foreign secretary, Constantijn Huygens, that this musician was 'un homme tres rare sur les espinettes'. All his life Froberger was greatly esteemed by Huygens, himself a lutenist and composer of talent, and through him Froberger came to know the music and writings of French musicians such as Chambonnières, the Gaultiers and Mersenne.

The mourning period following the death of the empress on 19 August 1649 limited musical activity at the Vienna court. This may well have been responsible for Froberger's departure from Vienna on a tour that eventually lasted over three years. Just as musicians and artists like Dowland and Rubens had been entrusted with diplomatic missions or even, it has been said, espionage, so Froberger's extended tour may well have involved extra-musical activity. It is likely that one of the first places he visited was Dresden, where he performed at the electoral court in friendly competition with Matthias Weckmann, probably during autumn or winter 1649–50, and delivered to the elector a letter from the emperor. He was rewarded with a gold chain and in turn, presented the elector with a manuscript volume of his works. His friendship with Weckmann, born of this encounter, was lasting. An important manuscript source of Froberger's music (the Hintze MS, *US-NH*), containing the only unbowdlerized text of his *Méditation sur ma mort future . . . Memento mori* (the opening movement of Suite no.20), is thought to be in Weckmann's hand. Froberger probably also came into contact with Schütz and Christoph Bernhard during his stay in Dresden. In March 1650 he was in Brussels at the court of Archduke Leopold Wilhelm von Habsburg, the emperor's brother and governor of the Spanish Netherlands. There is archival evidence showing that money was paid through an agent of the archduke for Froberger's entertainment and anticipated travel expenses for his onward journey. A payment to Froberger himself for performing before the archduke was made in December 1652. According to Balthasar Erben, who studied with Froberger in late summer 1653, his teacher's tour had taken him from Dresden to Cologne, Düsseldorf, Brussels, Zeeland, Brabant and Flanders, leaving from Antwerp for Paris. Froberger performed in the French capital in September 1652 and was still there when the lutenist Blancrocher died in November after a sudden fall in his presence, as recorded in a touching musical elegy, the *Tombeau de M. Blancrocher*. During this period Froberger also travelled to London, arriving penniless after being robbed by pirates between Calais and Dover, as memorialized in the *Plainte faite à Londres pour passer la mélancholie*, the opening movement of his Suite no.30. Given the limitations of English public musical life during the Commonwealth, it is likely that Froberger hastened to return to Paris where music continued to flourish even during the wars of the Fronde, then still raging. In a letter of February 1654 to Kircher, Froberger reported that in England he had been asked about the polymath's *Musurgia universalis*. That there was interest in a work by a Jesuit scholar in Puritan England during the Commonwealth is worthy of note. In spring 1653 Froberger passed through Heidelberg and Nuremberg *en route* to Regensburg where the imperial diet had been convened by the emperor. In April 1653 Froberger was again on the payroll of the imperial chapel and remained in office until his last salary was paid to him on 30th June 1657, shortly after the death of Ferdinand III.

Under the new regime Froberger was not reappointed to his post at the imperial chapel, despite his dedication of another volume of his works to Leopold I, described on the title-page as emperor perhaps even before his election (*A-Wn* Cod.16560). This was probably produced in some haste and unlike those presented to Ferdinand III, was not decorated calligraphically. The reasons underlying Froberger's dismissal are believed to have been political rather than artistic. Both Mattheson and Walther ascribe it to 'Kaiserl. Ungnade' (imperial disfavour). Emperor Ferdinand III had died on 2 April 1657, but confirmation of his successor did not occur for another 15 months. The delay is said to have been caused by the opposition of Louis XIV and a number of his allied Rhenish princes including Elector-Archbishop of Mainz, a powerful temporal ruler as well as virtual Catholic primate of Germany. It is probable that the Jesuit order was also opposed to Leopold's election. Froberger's association with these interests believed inimical by the new emperor most likely caused his abrupt dismissal despite his long service in the imperial chapel. Kircher, his mentor in Rome, was a central figure in the Jesuit order, and Froberger's link with the court of the powerful Elector-Archbishop of Mainz is shown by the fact that he performed there in September 1665, on which occasion he and Huygens finally met in person. The posthumous publication of Froberger's works by Bourgeat of Mainz, beginning in 1693, were dedicated to the secretary to that archepiscopal see, J.J. Walter, a one-time pupil of Kircher in Rome, and possibly sponsored by him.

Most of what is known of Froberger's last 18 months is contained in the correspondence between Huygens and

the dowager Duchess of Montbéliard. Huygens's letter in October 1666, in reply to one from Froberger, unfortunately not preserved, mentions his having written that he expected soon to return to the imperial court. This, however, did not occur, as far as is known. Instead, Froberger lived virtually in retirement at the Château d'Héricourt (near Montbéliard), the dower house of Duchess Sibylla. There he died of a stroke on 6 or 7 May 1667, and was buried on 10 May, as reported by Sibylla to Huygens on 25 June 1667. Froberger had apparently sensed that his end was near, and the day before his death had handed the duchess a gold coin to give to the rector of Bavilliers for a grave, alms for the poor, and gratuities for the servants at the castle where he lodged. Her physician Dr Binninger recounted in his memoirs that he had been summoned to attend Froberger but arrived only after the patient had already expired. Neither the church in Bavilliers nor the Château d'Héricourt remains.

2. WORKS. Except for two motets, all Froberger's extant compositions are for keyboard. Contained in the three autograph volumes in the Austrian National Library are 12 toccatas, 12 ricercares, 12 suites, 12 capriccios, 6 fantasias and 6 canzonas. Found only in secondary sources are a further 8 toccatas, 5 capriccios, a single fantasia, 2 ricercares, 18 suites and a few single movements: the *tombeau* for Blancrocher, the Lamentation on the death of Emperor Ferdinand III, an Aria in D minor, and an Allemande and Courante in G major. Five toccatas in Adler's edition (DTÖ) are now excluded from the canon: no.17 is by J.C. Kerll, no.22 a variant of no.16, and nos 23, 24 and 25 are spurious. Suite no.29 in that edition has also now been eliminated from the list of genuine compositions. In Schott's edition it has been replaced by a suite in E♭ major, numbered 29 *nova*, previously misattributed to Georg Böhm and since tentatively identified as the one Mattheson described as depicting a dangerous crossing of the river Rhine.

Froberger's cosmopolitan life and musical experiences are reflected in his works, which synthesize Italian, French and German elements. He is particularly noted for his innovative and very personal programmatic compositions: *Tombeau fait à Paris sur la mort de Monsieur Blancrocher*; *Lamentation faite sur la mort très douloureuse de Sa Majesté Impériale, Ferdinand le troisième, An. 1657*; *Lamento sopra la dolorosa perdita della Real Mstà de Ferdinando IV, Rè de Romani* (first movement of Suite no.6 in the 1656 autograph); *Plainte faite à Londres pour passer la melancholie* (first movement of Suite no.30); *Lamentation sur ce que j'ay été volé et se joüe à la discretion et encore mieux que les soldats m'ont traité* (first movement of Suite no.14); and *Allemande, faite en passant le Rhin dans une barque en grand péril* (Suite no.29 *nova*).

The notation of the three autograph manuscripts is varied: open score on four staves for the polyphonic canzonas, capriccios, fantasias and ricercares; suites in French style on two five-lined staves; toccatas in Italian style on two staves, the lower of seven lines and the upper of six. There is no letter or number tablature notation. While the polyphonic works and even the toccatas, except nos.5 and 6 in the 1649 autograph expressly labelled *Da sonarsi alla Levatione* (to be played on the organ at Mass during the Elevation), are performable on both organ and string keyboard instruments, the suites and laments belong exclusively to the latter.

A characteristic Froberger toccata (save for the two Elevation toccatas, the similarly atypical no.5 of the 1656 autograph, and no.21) opens with an improvisatory (*stylus fantasticus*) section, usually headed by block chords intended to be elaborated freely as Frescobaldi directs, followed by a section built from a motif treated in quasi-contrapuntal imitation, often termed 'imitative homophony', rhythmically sharply profiled, somewhat playful in character, in pronounced contrast to the rhapsodic opening. The improvisatory style returns in briefer form as a transition leading to the following imitative section that treats the same motif in a rhythmically varied form. Another similar short bridge may lead to a third variation of the motif. The toccatas conclude with a brief improvisatory passage and elaboration of the final cadence. It is the improvisatory sections rather than the imitative episodes that are particularly striking in their originality.

Such imitative homophony in lesser hands can often impress as mechanical; while it certainly lacks the spice of the bold dissonances and turns of phrase that render the improvisatory sections so expressive, this is rarely the case in the fugato episodes of these toccatas. Froberger's toccatas, while clearly influenced by those of his teacher Frescobaldi, are more tightly organized. Instead of a rhapsodic form built of numerous short sections that come to abrupt conclusions, the pupil's are constructed of fewer and more extended sections. In this respect they resemble more those of his contemporary Michelangelo Rossi, also a Frescobaldi pupil, but without his extreme chromaticism and rhythmical eccentricities. Froberger's toccatas are more sharply focussed on the central tonality than those of either.

The polyrhythmic pieces can be ranked by how closely they adhere to the *stile antico*: the ricercares do so only slightly more than the fantasias. While Frescobaldi distinguished these two genres sharply, Froberger's are essentially similar. Both are based on neutral slow subjects without particular melodic interest that lend themselves to ingenious contrapuntal treatment and combination with other subjects. The working out is clearly in the tradition of 16th-century *prima pratica*. The opening subject in its various transformations dominates from beginning to end. Fantasia no.1, based on the hexachord, and no.4, *Sopra sol, la, re* answered by *Lascia fare mi*, both in the 1649 autograph, are evident tributes to Frescobaldi's solmization pieces. The final ricercares in the 1649 and 1656 autographs merit special mention; both go beyond the limits of prevailing keyboard temperatures, calling for notes unavailable in such restrictive tunings as the ubiquitous $\frac{1}{4}$-comma mean-tone scheme. It appears that, as has been suggested was Frescobaldi's preference, Froberger espoused the cause of equal temperament, or at least something very close to it. Each of the three sections of Ricercare no.6, in C♯ minor, in the 1649 autograph, ends with a perfect cadence with a *tierce de Picardie*. The similarly constructed sixth ricercare of the 1656 autograph closes each of its three sections in exactly the same way on an F♯ major triad. Froberger's ricercares and fantasias, well-proportioned and offering much rhythmic and motive variety, stand out as masterly, especially in comparison to many formulaic contemporaneous examples. This composer wore his contrapuntal learning with remarkable grace and lightness.

Froberger's canzonas and capriccios, based on livelier subjects, are essentially similar in form, unlike Frescobaldi's which are distinctly different in character. The younger composer, however, follows his mentor by composing them in multi-sectional variation form, like the canzonas in Frescobaldi's *Libro secondo*, but somewhat more melodiously and gracefully. The variation technique is essentially rhythmic, achieved through changes of metre or by diminution. Bridge passages and concluding bars in improvisational toccata-like form lend variety and interest to the canzonas. The capriccios are somewhat lighter in character, often with scherzo-like subjects that lend the pieces a certain jollity despite their contrapuntal ingenuity. The fugal texture is unrelieved by episodes as such; the subject, as so varied, is adhered to tenaciously. Most of the canzonas are in three sections while the capriccios run the gamut from a single extended section to as many as six. Froberger's contrapuntal techniques, while masterly, are essentially conservative, in sharp contrast to his radically individual suites and laments.

It is Froberger's suites and laments that establish him as a composer of unique historical importance. Whether or not he can be claimed as the sole creator of the keyboard suite, he was certainly among its earliest pioneers. The dozen suites contained in the 1649 and 1656 autographs are not so labelled; each dance in the sequence is headed by its own title without any collective designation. In the 1649 set, three suites (nos. 1, 3 and 5) consist of an allemande, courante and sarabande. No.2 adds a gigue and places it at the end. No.6 is a type of variation suite, *Partita auff die Maÿerin*, a German folktune thought to have been a favourite of Emperor Ferdinand III; six variations are followed by a courante, its *double* and sarabande. The six suites in the 1656 autograph are all in four movements: allemande, gigue, courante and sarabande. This sequence was Froberger's preference according to his friend Matthias Weckmann's note in the Hintze manuscript (*US-NH*). Nevertheless, in the posthumous Amsterdam editions and, regrettably, in Adler's too, these suites were arbitrarily recorded into the conventional 18th-century sequence of allemande, courante, sarabande and gigue. The remaining 18 suites fall into two principal groups: 13 are four-movement works, ten with the sarabande at the end and three with the gigue last; the other five are three-movement suites of allemande, courante and sarabande, each with a *double*. Froberger apparently began with a three-movement form which he later expanded to four. In these earlier suites there is often a thematic connection between the allemande and the courante. Except for one of the five suites found only in a secondary source (no.25), with a second courante instead of a *double* of the first, no suites have multiple courantes in the manner of Chambonnières, although Froberger was familiar with his compositions through his friendship with Huygens.

It is the *stylus choraicus* (Kircher's term, literally 'dance style'), a loose-textured monophony enlivened by French lutenists' *style brisé*, that prevails in Froberger's suites. Contrapuntal part-writing is only suggested by occasional thematic imitation. The binary-form sections are repeated. The allemandes in particular show French influence, making the fullest use of *style brisé*, lute-type figurations that lend them rhythmic life. Yet they are more intensely expressive than the somewhat four-square allemandes of Chambonnières and the lutenists. The courantes in the 1649 and 1656 autographs are of two types, both French-influenced: one in triple metre in 6/4 with occasional hemiola bars of 3/2 (typically the penultimate bar of each binary section) and a second slower dance notated in 3/2 throughout. In five of the non-autograph suites the courantes are in 3/4 time without hemiolas, somewhat quicker and closer to the Italian form as composed by Frescobaldi. Froberger's gigues are of two types: one is either in compound 6/8 (barred as 6/4) or in triple time, rhythmically similar but with larger note values; the second type is in 4/4 using sharply profiled dotted rhythms. Both varieties feature fugal textures, sometimes using inversion of the opening subject in the second section. The sarabandes in 3/2 metre are solemnly dignified but with a particular intensity of expression. Some second sections end with a written-out *petite reprise*, presumably to be played more softly, or a free improvisatory passage reminiscent of his toccatas. The *Tombeau* for Blancrocher and the *Lamentation* for Ferdinand III, strongly influenced by the French lutenists, are even more intensely expressive. The *Lamentation* is unique in Froberger's works; it is in F minor, a key not otherwise found, and in three rather than two sections, ending with the note F repeated three times. The *Tombeau* ends with a descending C minor scale, picturing Blancrocher's fatal fall down a flight of stairs. In the *Lamento* for Ferdinand IV, heir presumptive to the imperial throne, Froberger depicts his ascent into heaven by a C major scale ascending to the top of the four-octave keyboard.

The two motets are cast in the 17th-century Venetian *stile concertante* imported into Germany by Heinrich Schütz, whose *Symphoniae sacrae* (1647) also are scored for one to three singers, two violins and continuo. While the *stile antico* still prevailed at S Pietro in Rome, Froberger composed these in this newer idiom despite his adherence to *prima pratica* traditions in his polyphonic pieces.

3. Achievement and influence. Froberger enjoyed considerable and lasting posthumous renown. The publications of his music after 1693 in Mainz and Amsterdam, as well as the widely distributed 17th- and 18th-century manuscript copies of his works, attest to his continuing fame. Not surprisingly, since they did not derive from the composer, the publications issued years after his death were inaccurate, not to say corrupted, when compared with the versions in Froberger's autograph. The claim sometimes made that their variant readings represent the composer's revisions cannot be documented. Although composing within a far more limited range of genres, Froberger can be seen as belonging to the same German eclectic tradition that culminated in the music of Handel and J.S. Bach. His works achieved a remarkable synthesis of Italian, French and German stylistic elements. It is not only in the works of German contemporaries like Weckmann and later north European composers like Buxtehude that his influence is manifest. The music of Louis Couperin includes an unmeasured *Prélude à l'imitation de Mr. Froberger*; a similar influence can be discerned in Couperin's other unmeasured preludes, and the principal source of Couperin's music, the Bauyn manuscript (*F-Pn*), also includes many Froberger compositions. Curiously, although he studied with Frescobaldi and had many links with Italy, none of Froberger's music is found in Italian sources. Neither did he exercise

any discernible influence on Italian composers with the exception of Michaelangelo Rossi, whose toccatas resemble his more than those of their teacher Frescobaldi. In the case of contrapuntal compositions of a less individual character, however, it is more difficult to pinpoint stylistic relationships.

Today it is especially Froberger's works cast in an intensely personal, indeed emotional idiom – the laments and some of the opening movements in the suites – that impress most. Influential as one of the earliest composers of keyboard suites, including some programmatic movements praised by Mattheson (1739) and Kuhnau, Froberger was most prized, especially in 18th-century Germany, as a master of contrapuntal craft. Manuscript copies of his works in fugal forms survive in the hands of such devotees of the cult of counterpoint as J.P. Kirnberger and J.N. Forkel. Gottlieb Muffat, one of Froberger's successors as imperial court organist, copied out only his toccatas and contrapuntal compositions. J.S. Bach's moonlight copy of his brother's book of keyboard pieces included some by Froberger, and Bach is reported to have held Froberger in high esteem, 'although he was somewhat old-fashioned' (Adlung). Two copies in Mozart's hand of the opening sections of Froberger's hexachord Fantasia no.1 as printed in Kircher's *Musurgia universalis* survive, showing its continued value for study and teaching material. Burney, quoting Marpurg, wrote: 'his works will always be models for good regular fugues'. Beethoven's notes on his counterpoint studies with Albrechtsberger mention his teacher citing Froberger as an example.

HOWARD SCHOTT

Frog (Fr. *hausse* or *talon*; Ger. *Frosch*; It. *tallone*). In the bow used for string instruments, the device which secures the hair and holds it away from the bowstick at the lower end (where the player grasps the bow). The term 'heel' or 'nut' has been used in England for this device. Hence the term 'at the heel' (Fr. *au talon*) or 'at the nut' is a direction to use that part of the hair closest to the frog.

DAVID B. BOYDEN

Fröhlich. Austrian family of musicians. Anna (*b* Vienna, 19 Nov 1793; *d* Vienna, 11 March 1880), a soprano and pianist, studied the piano with Hummel and singing with Giuseppe Siboni, whom she followed to Copenhagen. Josefine [Pepi] (*b* Vienna, 12 Dec 1803; *d* Vienna, 7 May 1878), a soprano, studied with her sister Anna at the Gesellschaft der Musikfreunde (1819–21); she made her début as an opera singer in Vienna in *Die Entführung aus dem Serail* and Winter's *Das unterbrochene Opferfest* (1821), then performed in Scandinavia and was appointed private singer to the King of Denmark. After operatic

appearances in Prague (1826) and Milan (1830) she returned to Vienna to teach singing privately.

Anna, Josefine and their sisters Barbara Franziska (*b* Vienna, 30 Aug 1797; *d* Vienna, 30 June 1879), a contralto, and Katharina (*b* Vienna, 10 June 1800; *d* Vienna, 3 March 1879), a pianist and close friend of Grillparzer, made a valuable contribution to Viennese musical life. Their house was one of the best-known centres of musical activity and comparable in importance with Sonnleithner's or Kiesewetter's. Schubert often accompanied in readings of his songs or improvised at the piano at their musical evenings, and Grillparzer and other members of Viennese society heard Schubert's music there for the first time and came to know the composer. At Anna Fröhlich's instigation he wrote some works for her, for her pupils and for Josefine Fröhlich, including a setting of Psalm xxiii D706 (1820, first performed publicly in Vienna, 1821, under Anna Fröhlich's direction), *Gott in der Natur* D757 and *Des Tages Weihe* D763 (both 1822). Grillparzer wrote the texts for two major Schubert works whose solo parts were composed for Josefine: *Zögernd leise* D921 (1827), the second version of the famous serenade *Das Ständchen* (written for the birthday of one of Josefine's pupils), and the cantata *Mirjams Siegesgesang* D942 (1828).

GAYNOR G. JONES

Fröhlich, Friedrich Theodor (*b* Brugg, 20 Feb 1803; *d* Aarau, 16 Oct 1836). Swiss composer. Although he wrote much music in his youth, he followed his father's wishes and became a lawyer. He went to Berlin in 1823, but there he became involved in musical activities. The following year he fell ill and returned home, where he had lessons in composition. The government of the canton of Aargau then offered him financial support to continue his musical studies, and in 1826 he returned to Berlin, where he studied with C.F. Zelter and Bernhard Klein and met a number of important people, including Felix Mendelssohn. At this time his compositions were first published. Fröhlich also made the acquaintance of the German philologist W.H. Wackernagel, who became his closest friend. He composed prolifically, and his choral works and solo songs from this period in particular distinguish him as a true Romantic.

In 1830 Fröhlich was recalled to Aarau, where he became a professor of music at the cantonal school and also taught at the teachers' college; in addition he was made director of the Singakademie and took on a number of private pupils. He married Ida von Klitzing in 1832. At first, Fröhlich's numerous duties satisfied him, but they also deprived him of time to pursue his own creative work, whose demands he felt urgently. He was beset by professional disappointments and difficulties with publishers, but above all he felt the lack of any contact with important musicians: the few with whom he managed to make contact around Aarau rejected him as an innovator who had moved too far beyond their classical, and classicist, attitudes. He was surrounded by a circle of friendly but dilettante music lovers in Aarau, and he suffered deeply from this artistic isolation: he felt his significance to be misunderstood, and the greater part of his works remained unknown. In a fit of depression he committed suicide. Only later was he recognized as one of the most gifted of the Swiss Romantics.

WORKS

MSS in CH-Bu

printed works published in Berlin unless otherwise stated

VOCAL

Choral with orch (all with solo vv): Ps cxxxvii, 1827; 2 masses, 1828, 1835; Totenfeier, 1829; Passionskantate, 1831; Jesus der Kinderfreund (cant.), 1834; Ps i, 1836

Other choral (pf acc. unless stated): Die Elfen, female vv, 1827; Schweizerlieder, unacc. male vv, op.1 (Leipzig, 1827); Weihnachtskantate, solo vv, chorus, 1830; Grabgesang Heloisens, S, chorus, 1830; Epiphanias, 3 male vv, 1830; Gesang der Geister über den Wassern, 1831; Meeresstille und glückliche Fahrt (J.W. von Goethe), 1831; Litanei, unacc. chorus, 1832; Das unser Vater, unacc. chorus, 1832; Schifferreigung, 3 male vv, op.11 (?1833); Preis der Liebe, 1834; Lieder im Volkston, unacc. male vv, op.13 (1834); several unpubd mass movts

Duets: Hausstandslieder, S, T, pf, 1835

For 1v, pf: Wanderlieder (W. Müller), op.2 (1828); 8 deutsche Canzonetten, op.3 (1828); Geistliche Gesänge, op.4 (1829); 9 deutsche Lieder (W.H. Wackernagel), op.5 (1829); Geistliche Lieder (Novalis), op.6 (1829); 3 aargauische Volkslieder, op.7 (1829); Lobgesang der Maria, op.9 (1829); 6 Lieder, A, pf, op.8 (Leipzig, 1830); 12 Lieder (J. Kerner), op.10 (1832); Persische Lieder (F. Rückert), op.12 (1834); others, unpubd

INSTRUMENTAL

Orch: 2 syms., A, 1830, 1 lost; 3 ovs., zu Dyhrns Konradin, 1827, B♭, 1832, zu Passionsmusiken, 1835

Chbr: numerous str qts, f, 1826, g, 1826, E, 1828, c, 1832; Qnt, pf, 2 vn, 2 hn, 1833; Pf Qt, unpubd; 2 sonatas, vn, pf; Fantasia, vn, pf, 1832; notturni, vn, pf; 2 sonatas, vc, pf

Pf 4 hands: Fugues, 1832; Ov., E♭, 1833; variations

Pf solo: 20 sonatas, A, 1831, 19 lost; elegies; fantasias; variations

LUISE MARRETTA-SCHÄR

Frøhlich, Johannes Frederik (*b* Copenhagen, 21 Aug 1806; *d* Copenhagen, 21 May 1860). Danish composer, violinist and conductor of German descent. He studied the piano, the violin and the flute (début in 1812). From 1821 he was engaged by the Royal Theatre, first as an orchestral violinist, while studying with the Kapellmeister Claus Schall; his public début as a violinist was in 1824 and later he was well known as a quartet player. He became the theatre's chorus master in 1827. From 1829 to 1831 he made a study tour of Germany, Paris and Italy, having already made a name as a composer of string quartets and overtures. When Schall retired in 1834, Frøhlich was one of three alternating conductors chosen to succeed him; later he conducted all the opera performances. He was a director of the Musikforening from its founding in 1836 until 1841 and chairman in 1836–7. He went on leave to Italy in 1838 to recover from a street accident and a stroke. On his return he wrote the music for some of Bournonville's ballets, but ill-health forced him to resign his post at the theatre in 1844; afterwards he composed little.

Frøhlich's works are chiefly instrumental and his style was strongly influenced by Mozart, Rossini, Weyse and Kuhlau. An autograph chronological list of his compositions, giving 59 opus numbers, shows that about a third of his works, mostly for flute or violin, are lost. His Symphony in E♭ op.33, completed in 1830 in Rome, marked a revival of Danish interest in the genre, following 30 years in which the overture was so highly favoured that only two symphonies were composed by Danes (Krossing in 1811 and Gerson in 1813–17) since C.E.F. Weyse's symphonies (1795–9). His orchestration, influenced by Kuhlau, is individual in its treatment of the wind, especially the horns. Other characteristics of his music are its lively rhythms and motivic concentration. He used popular ballads and folktunes in some of his ballet scores, while other works such as *Erik Menveds barndom* ('Menved's Childhood') were partly inspired by Danish medieval history. One of that ballet's procession scenes was later arranged (by Frøhlich and others) as the *Riberhusmarch*, and became one of the most popular Danish marches.

WORKS

printed works published in Copenhagen; MSS in DK-Kk

STAGE

Ballets: Tyrolerne [The Tyroleans], op.43, 1835, excerpts, arr. pf (n.d.); Valdemar, op.44, 1835, excerpts, arr. pf (n.d.); Herthas offer [Hertha's Sacrifice], 1838; Festen i Albano, op.47, 1839, arr. pf (n.d.); Faedrelandets muser, op.48, 1840; Erik Menveds barndom [Menved's Childhood], op.51, 1843, excerpts, arr. pf (1880); Raffaello, op.52, 1845

Vaudevilles [collab. Johanne Luise Heiberg]: En søndag paa Amager, op.54, 1848, excerpts, arr. pf (n.d.); Abekatten [The Monkey], op.55, 1849, excerpts, arr. pf (n.d.); En sommeraften [A Summer Evening], op.59, 1853

Other works: Natten før brylluppet [The Wedding Night], Spl, op.25, 1829; Borgfogedens bryllup [The Castellan's Wedding], incid music, 1835

ORCHESTRAL

With vn solo: 4 concs., a, op.3, 1825, E, op.7, 1825, d, op.26, 1829, inc., E♭, op.30, 1829–30; 2 concertinos, d, op.14, 1826, g, op.20, 1827, lost; Introduction og polonaise, B, op.6, 1825–9, as op.2 with acc. arr. pf (n.d.); Divertissement, op.9, 1825–8; Introduction et variations sur un thème de Rossini, a, op.16, *c*1826; Potpourri, on themes from Kuhlau's Lulu, op.23, *c*1828; Introduction et rondo, op.29, 1830; Souvenir de Rome, E, op.31, 1830; Introduction et polonaise, A, op.34, 1831; Potpourri, on themes from Auber's La muette de Portici, op.37, *c*1831

Other works: Sym., E♭, op.33, 1830; 5 ovs., Kong Salomon og Jørgen Hattemager, op.10, 1825, E, op.11, 1825, d, op.21, 1827, Frejas alter, op.22, 1828 [rev. as ov. to Borgfogedens bryllup, 1835], Majgildet, op.39, 1832, ed. (1958); Introduction og rondo, solo hn, op.24, 1829, lost; 11 other works, some with solo inst, 7 lost

OTHER WORKS

Chbr: 4 str qts, d, op.1, 1823 (n.d.), A, op.2, *c*1823, b, op.15, *c*1826, lost, A, op.17, 1827; 2 potpourris, hn, pf, opp.8, 12, 1825; 2 qts, 4 hn, op.19, 1827, 1830; 2 fl sonatas, C, op.27, 1829, a, n.d.; Marsch og jagtstykke, 9 hn, op.40, 1832; Introduction et variations, A, vn, str qt, op.41, *c*1832; Duet, C, 2 fl, op.53, 1847; 7 other works, 5 lost

Other works: 2 cants., op.49, 1840, op.50, 1841; numerous choruses, unacc./pf acc., mostly for male vv; 2 pf pieces; inst canons

TORBEN SCHOUSBOE

Fröhlich, (Franz) Joseph (*b* Würzburg, 28 May 1780; *d* Würzburg, 5 Jan 1862). German teacher, musical organizer, critic, theorist, conductor and composer. He studied music at the student institute of the Juliusspital in Würzburg, and studied law and philosophy at the university there. In 1801 he began his career as a violinist in the prince-bishop's court orchestra. He also founded the Akademische Bande, a student choral and orchestral group, which in 1804 became the Akademisches Musikinstitut and was made part of the university, thus becoming the basis of the first state music school in Germany. His teaching and organizational work was of the highest importance and encompassed several disciplines and activities. He became reader in aesthetics in 1812, reader in pedagogical studies in 1819 and professor in 1821. In 1820 a singing school was established as part of the institute. He also conducted important historical concerts for King Ludwig I in 1825, 1834 and 1840. Fröhlich retired from conducting the orchestra in 1844, from teaching in 1854 and from directing the institute in 1858.

Although he composed a number of original works, including church music, symphonic music, an unperformed opera *Scipio* (1818), songs and much chamber and piano music, it is for his teaching manuals and theoretical and critical writings that Fröhlich is renowned. As a theorist he was thorough and above all practical in his approach; as a teacher he demanded that theory and practice should go hand in hand; as a critic, especially for the journal *Caecilia*, he showed an alert understanding of the music of his day, including the late works of Beethoven. His biography of the Abbé Vogler is impartial, despite Fröhlich's personal esteem for Vogler. Fröhlich was also an important contributor to Ersch and Gruber's encyclopedia (above all, he wrote the entry for Haydn); in his last years he had begun work on a history of early music. His *Musikschule* included performance instructions for all instruments available in his day.

JOHN WARRACK/JAMES DEAVILLE

Froidebise, Pierre (Jean Marie) (*b* Ohey, province of Namur, 15 May 1914; *d* Liège, 28 Oct 1962). Belgian

composer, organist and musicologist. He studied at the Namur Conservatory with Barbier and then at the Brussels Conservatory with Raymond Moulaert (composition) and Joseph Jongen (fugue). In 1939 he took the *premier prix* for organ, in Malengreau's class, and two years later he won the Agniez Prize for composition. He continued his composition studies with Gilson and Absil, and was an organ pupil of Tournemire in Paris. In 1943 he won the Belgian second Prix de Rome with the cantata *La navigation d'Ulysse*. Appointed professor of harmony at the Liège Conservatory in 1947, he was also choirmaster at the Grand Séminaire and organist of St Jacques. He was an excellent teacher and had a strong influence on younger composers such as Pousseur and Boesmans; his many other activities, enthusiastically undertaken, enlivened the musical life of the city. Young performers and composers were brought together in his 'Variation' group (1950), and he passed on to them his keen interest in music from the 13th century to Webern. He was also concerned with reviving early organ music.

Like Souris, with whom he shared other qualities, Froidebise left a small body of works of consistently high calibre. A man of cultivated literary taste, he wrote admirable music for the theatre and the cinema, and his most important concert works – those which constitute his op.1 – were also based on texts. His earliest pieces for organ, however, show evidence of his Franckian training, and *De l'aube à la nuit* was composed in memory of Satie. There is more individuality in the abundantly melodic Violin Sonata. Absil's influence is present in the harmonic and rhythmic explorations of the *Trois poèmes japonais*; its general feeling recalls Stravinsky's *Three Japanese Lyrics*. Throughout his youth Froidebise was a great admirer of Stravinsky, as is most clear in the *Cinq comptines*, performed at the 1950 ISCM Festival. The discovery of Webern caused his music to move in a more sober and austere direction: in the cantata *Amercoeur* the disciplined construction of a text from Liège place names is matched by a severe and economical 12-note serial technique.

With the *Stèle pour Sei Shonagon* Froidebise broached aleatory music. Scored for soprano and four groups – quartets of strings, woodwinds and brass, and a percussion ensemble – the work is in three sections concluding with a postlude. Each section begins with a percussion prelude and then three vocal passages alternate with three instrumental passages. The latter alone are in measured time, but even so they are rhythmically extremely supple. The soprano has to improvise her rhythms in accordance with the text, her line surrounded by a radiant halo of instrumental sound. *Stèle pour Sei Shonagon* is Froidebise's finest achievement, a work that handles 12-note serial technique without the frigidity of *Amercoeur*, subtle in its ever-changing sonorities and suggestive in its use of silence. In addition to his op.1, the radio operas *La bergère et le ramoneur* and *La lune amère* were notable successes.

WORKS
(*selective list*)

DRAMATIC

Radio ops: La bergère et le ramoneur, 1954; La lune amère, 1956
Ballets: Le bal chez le voisin, ?1953; L'aube
Incid music: Antigone (Sophocles), 1936; Oedipe roi (Sophocles), ?1946; Ce vieil Oedipe (A. Curvers), ?1946; Elkerlyc, 1949; Jan van Nude (M. Lambilliotte), 1951; Les choéphores (Aeschylus), 1954; Hippolyte (Euripides); La maison à deux portes (Calderón); Une ville chantait (J. de Coune); Le p'tit bateau de la réunion (J.M. Landier)
Film scores: Visite à Picasso (P. Haesaerts), 1951, collab. Souris; Lumière des hommes (Bernhart), 1954
